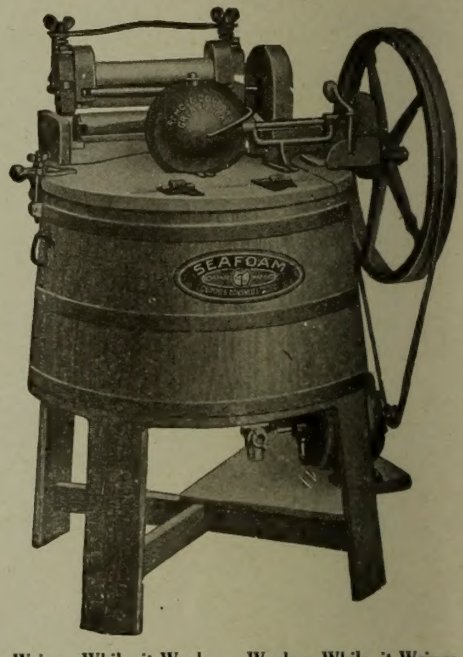
Home Laundry Equipment operated by electricity

The SEAFOAM will accomplish everything required of a combination washing and wringing machine, and there is nothing intricate or delicate about it.

Washes with a dolly, and has a wringer which runs both ways.



Washing and wringing can be done separately or at the one time—ALL BY POWER.

Fitted with 1-6 H.P. Robbins and Myers splash-proof motor.

The Seafoam is carefully tested before leaving our factory, and you get it all ready to attach to an ordinary standard electric receptacle.

Style "B" is for engine drive.

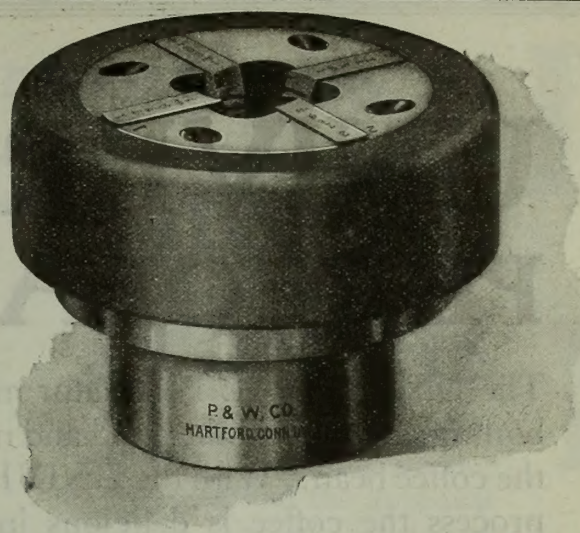
HARDWARE AND METAL, March 29th, 1919. Volume XXXI., published every Saturday. Yearly subscription price, $3.00. Entered as second-class matter July 1st, 1912, at the Post Office at Buffalo, under the Act of March 3rd, 1879. Entered as second-class matter at the Post Office Department, Ottawa.

An actual photograph of Williams' SUPERIOR Wrenches taken from the height of the 57th story of the Woolworth Building, during construction; 750 feet above City Hall Park, New York City. Star in picture: Singer Building, 41 stories in height.

Williams' Superior Drop-Forged Wrenches

A big business, like a big building, requires a broad and sound foundation. For nearly half a century we have been designing and developing standard lines of Superior Drop-Forged Wrenches. We now make and carry regularly 40 patterns in about 1,000 sizes, with openings from 3/16 to 7 5/8 inches ready for prompt shipment—something standard in design and size for every recognized trade need.



Our trade marks—"Vulcan" and "W" and "Agrippa" are known the world over wherever machinery or tools are used. They stand for Superior quality—the kind that guarantees service under the most severe conditions, for they represent our constant effort to maintain the high standard of excellence that has long been established for Williams' product.

Specify Williams' Wrenches or Tools when you order and get Superior quality.

Wrench Booklet on request.

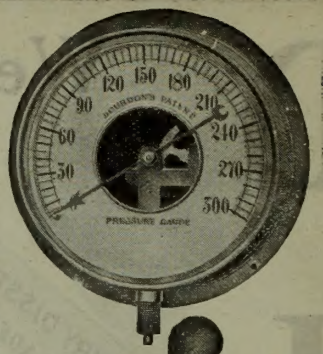
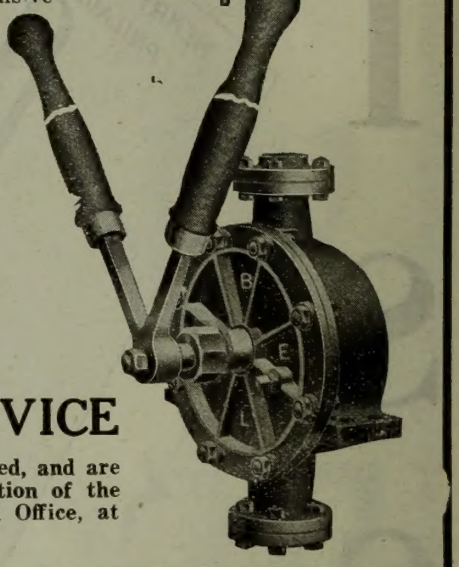
FIVE WORKS---OVER 3,000 EMPLOYEES



UNITED BRASSFOUNDERS AND ENGINEERS, LIMITED



EMPRESS FOUNDRY, CORNBROOK, MANCHESTER, ENG.

DURING THE WAR our Plants have been exclusively engaged on work of supreme national importance.

WITH PEACE IN SIGHT we are pleased to announce that we intend to again direct our energies to the intensive production of:—

GUNMETAL and BRASS VALVES and COCKS.
STEAM, WATER and COMPRESSED AIR FITTINGS GENERALLY.
CAST IRON STOP and SLUICE VALVES.
SEMI-ROTARY PUMPS.
EXTRUDED BRASS and BRONZE BARS.
BRASS BOLTS and NUTS, STUDS and GENERAL TURNED WORK FROM THE BAR.
CAST AND MALLEABLE IRON COCKS and PIPE FITTINGS.
PRESSURE and VACUUM GAUGES.
INJECTORS and GENERAL JET APPLIANCES.
ENGINE GOVERNORS (Pickering, Proell, and Other Types).
SPRAYING MACHINES, for Insecticides and Lime-washing.
COPPERSMITHS' WORK.
"STELLA" BRAND ALLOYS: MANGANESE COPPER, SILICON COPPER, FERRO ZINC, PHOSPHOR COPPER and TIN, etc.

"UBEL" POST-WAR SERVICE

If you are interested in any or all of the lines mentioned, and are in a position to take a hand in the energetic distribution of the same, please communicate with us NOW to our Head Office, at above address.

The "One Minute" Washer

Makes a Holiday of Wash-Day

Hand, Electric, Gasoline and Water Power

Every Retailer knows that the most profitable goods to handle are those which satisfy his customers.

The "One Minute" Washer is the most satisfactory washing machine your customers can buy and the most profitable one for you to sell.

Its claim to usefulness and extrordinary selling qualities is backed by the years of unusual service it has been rendering the Canadian Housewife.

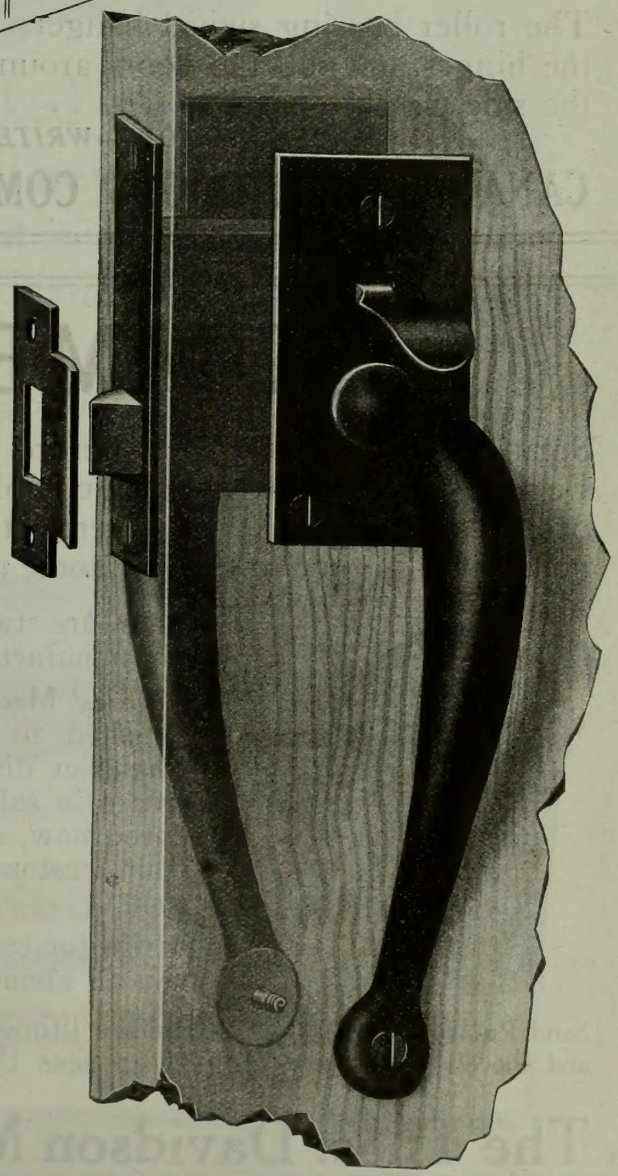
There is yet to be returned to us an unsatisfactory machine. A fact that all dealers appreciate. **The "One Minute" Washer**—saves labor—washes clean—is easy to operate—noiseless—attractive appearing (all working parts are concealed under the tub)—strongly made, durable (the tub will not rot)—and a quick seller.

It will pay you to investigate the "One Minute Washer."

You should be selling them in your district. Write us for our agency proposition.

One Minute Manufacturing Co. - Toronto, Canada

No. 27
Garage Door Latch
For Swinging Doors



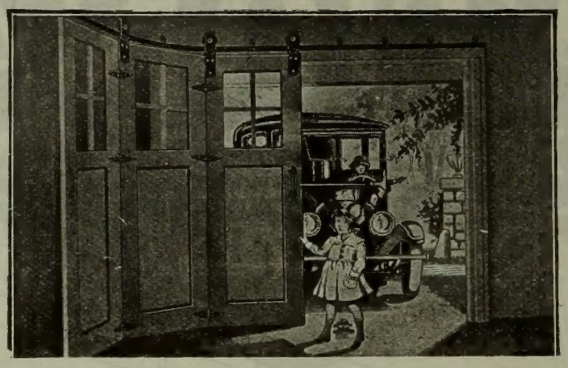
Note the graceful lines of the Handle on this Latch. Has all the appearance of a high-grade door lock combined with correct shape and size for this class of work.

Does its work well. No complicated parts to get out of order. Reversible for right or left-hand door. Adjustable for doors 1⅛ inch to 2¼ inch thick.

Packed in the *"Unusual National Way"* each in a strong box with screws. Weight per doz., 36 pounds.

Your customers will be willing buyers of this distinctive appearing Garage Door Latch.

Write for particulars, prices and our big catalogue of Builders' Supplies.



ALL GARAGE DOORS SHOULD BE HUNG ON ROLLERS

No equipment ever produced offers the many attractive features or gives such universal satisfaction to the user as does the

HATCH GARAGE DOOR OUTFIT

Outfit includes:

- **3 Special Swivel Door Rollers**
- **22 Feet of Track**
- **3 Pairs Special Garage Door Hinges**
- **3 Stay Rollers**
- **2 Extra Heavy Door Handles**
- **1 Safety Hasp**
- **1 Hook and Eye**

Makes doors weather-tight, sag-proof; prevents slamming, and does not get out of order.

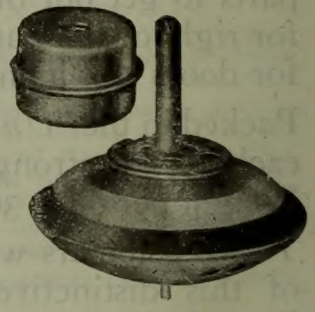
The hinged door allows entrance without opening the other two.

Complete directions packed with every set.

The roller bearing swivel hangers hold the doors in place, take the bind off the hinges and roll the doors around the corner, on the inside of building to the side wall.

SWING IN NOW---WRITE OUR HANGER DEPT. TO-DAY.

CANADA STEEL GOODS COMPANY, LIMITED, Hamilton, Canada



SUMMER TOYS

Spring will soon be here. Before long the children will be out-doors again. Be sure you are stocked with a complete line of summer toys. Right now is the proper time to place your order. It will enable you to make a display of the new goods in time to capture some good business.

Here are two representative lines we manufacture:

Kiddies' Mechanical Humming Tops Finished in attractive colors, and whenever displayed result in an increase in sales. They should be ordered now, as the summer needs of your customers must be supplied soon.

Write for catalogue No. 44a, telling you all about Kiddies' toys.

Sand Pails and Shovels Finished in attractive lithographed colours that delight the eyes of every child who sees them. Well made and extra strong.

Time to Order
FREEZERS

All of the three, LIGHTNING, GEM or BLIZZARD, have served the housewives of America for thirty years, and, like the cream they create, are in demand in all seasons.

They are built of the very best material and workmanship possible—their ingenious construction makes them easy to operate, quick freezing, and economical to both dealer and user.

The Blizzard, being simpler in construction and cheaper in price, makes it a good running-mate with either the Lightning or Gem. They sell themselves and stay sold! No come-backs or complaints.

This means easy net profits for you.

K K

DO YOU BELIEVE IN SUCCESS?

Listen To This Brief Story:

¶ Almost a year ago we entered the business of making washing machines. Investigation had shown us the principal faults to be found by users of household laundry machinery, and we decided to produce only the very best machines which could be made.

¶ We went abroad and studied methods there as well as at home. We secured automatic machinery of the latest type, engaged men with years of expert experience, and arranged our factory according to the best plans we could obtain.

¶ After thorough, and sometimes expensive tests, we succeeded in bringing out a line of machines which we believe are leaders, not followers, in the Canadian market.

¶ Wherever these KRIBS WASHING MACHINES have been introduced the results have been beyond the brightest hopes. Pleased customers make enthusiastic dealers, meant more orders for jobbers—our factory working at top speed to get out the machines.

¶ The result is that we are expanding, extending our plant, engaging more men, rushing preparations for making more and more KRIBS machines.

¶ ARE YOU benefiting by this SUCCESS? Think it over. Then act quickly. Spring is here, and that is the big season for selling KRIBS machines.

4 Good Reasons ---READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 15 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

THE NORTHERN BOLT, SCREW AND WIRE COMPANY, LIMITED - OWEN SOUND, ONT.

Selling Oil Conscientiously

Why People Go to Certain Dealers

Last summer 259,896 automobiles were registered in Canada. In addition there were hundreds and hundreds of tractors, and the number is growing rapidly.

Every one of these engines requires a lubricating oil to meet its mechanical needs with scientific exactness.

Picture the variety of the oil requirements of these many engines—made by many different manufacturers, designed by different engineers.

It is a problem that demands expert knowledge.

Dealers who sell the complete line of Gargoyle Mobiloils—who sell them according to the Gargoyle Mobiloils Charts of Recommendations are able to correctly lubricate any make or model of automobile, tractor, or other automotive unit that may be in their territory. They are able to take advantage of their entire market for lubricants—not merely a part of it.

They sell Correct Lubrication—not just "oil."

They get repeat business.

People go back to them for more. Because their customers get the full benefits of Correct Lubrication, which means maximum operating efficiency at lower cost per mile or per acre.

That is why people go to certain dealers and why these dealers are building up a constantly increasing profitable business in Gargoyle Mobiloils.

Write us at Room 704, Imperial Oil Bldg., Toronto, for booklet, "Correct Lubrication," containing Charts of Recommendations for all makes of automobiles, tractors, motorcycles and motorboat engines, and for full information regarding our offer to dealers.

MADE BY

The BEACH FOUNDRY COMPANY, Limited

OTTAWA. ONTARIO

Mr. Hardware Jobber - Here's Good News for you—

We are pleased to announce that we have secured representation in Canada, divided between the following two well-known and popular Sales Agents:

C. C. CRAIG COMPANY, WINNIPEG, in Western Canada.
MUTUAL SALES COMPANY, TORONTO, in Eastern Canada.

It has been sometime since the "IRWIN QUALITY LINE" and the GENUINE SUNASACK LINE" of Razor Strops has been offered to you through local representation. The standard of quality embodied in these two lines of Razor Strops is well-known to most jobbers. You will have an early opportunity to examine our samples, and we believe that their efficiency and value will warrant your placing your orders with us.

GENUINE SUNASACK RAZOR STROPS

Genuine Sunasack Razor Strops are too well and favorably known to the trade to make necessary any detailed explanation here. Our present line includes all of their popular numbers at attractive prices. Our modern facilities enable us to make prompt deliveries and render clean cut service.

IRWIN QUALITY RAZOR STROPS

Irwin Quality Razor Strops are made in a large variety of styles and sizes and from our cheapest to our most expensive each Strop is guaranteed to be efficient. Irwin Strops have unusual sales value and are priced so as to allow a liberal profit for the jobber and dealer.

Note the attractive Razor Strop display illustrated above. One dozen assorted Strops attached to a substantial metal fixure lithographed in three colors suitable for window, wall or wall counter display. Samples of this assortment gladly submitted upon request.

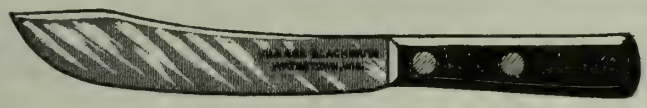
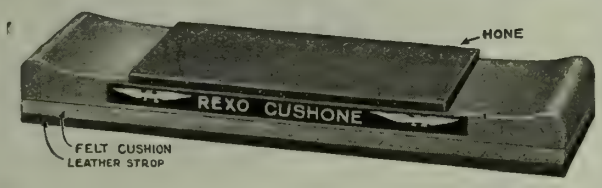
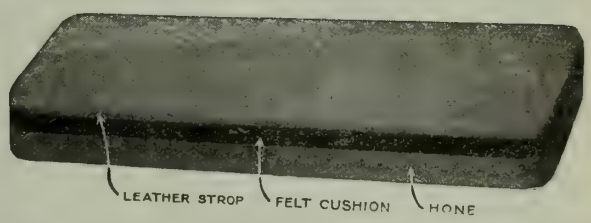
VILLAGE BLACKSMITH

Put a King Assortment on your counter. Displays of this kind always increase sales on this class of goods. All tools bearing the Village Blacksmith brand are unconditionally guaranteed.



Our tools are not shaped in rolls or made with drop hammers. **They are forged.** The steel being driven into a perfect compact cohesive condition.
The tempering by the old water method produces unusual toughness.
The edges—although they can be filed and speedily dressed—are nevertheless of a hardness that cut fast and clear without wearing the edge.





VILLAGE BLACKSMITH

Quantity.	Length.	Diam.
6 only No. 91 Punch	6 in.	½ in.
2 only No. 97 Centre Punch	4 in.	⅜ in.
2 only No. 99 Prick Punch	4¾ in.	⅜ in.
2 only No. 103 Drift Pt. Punch	5½ in.	⅜ in.
6 only No. 1031 Drift Pt. Punch	6 in.	½ in.
2 only No. 802 Cold Chisel	5½ in.	⅜ in.
3 only No. 803 Cold Chisel	6 in.	½ in.
1 only No. 804 Cold Chisel	6½ in.	⅝ in.

Village Blacksmith Knives are not pressed out cold from sheets, or made almost automatically. They are forged from octagon bar to finished product. The method is slower, but they always have edge-holding stuff.

15 strokes! Lather the face and shave. **Hone it 5, Strop it 10—For Razors and Safety Blades—Highest Efficiency—Fool Proof—Economy.**

Fine Hone and Fine Strop

No wire edges. No burning edges. No experience required. A fresh-honed, gummy edge for every shave.

The Strop is Genuine Shell Horsehide. It is perfectly cushioned. It lays flat and is not under tension. No rounded edges. Correct angle all the time. 10 strokes at the correct angle are more efficient than 50 on a swing strop not held exactly right.

The Cushioned Strop-Back Hone

Well-known brands carried in stock by most jobbers are: Black Eagle, Moraine, 3-line Swaty-Formula, Blue Diamond, also manufacturers of On-Time Strop Hone, Hone Handle Strop. These are all products of:

The American Hone Co.
OLEAN, N.Y.
Agents for Winnipeg: Parkhill & Hanson,
905 Confederation Building.

THERE ARE BENCH SCREWS AND THERE ARE BENCH SCREWS!

When you order BENCH SCREWS from your jobber, do you know that some are made with **single** thread and some with **DOUBLE** thread?

Double thread Screws give twice the travel per turn of the handle—and—

Do you know that some Screws are made of **common bar iron** which strips under strain and some with **Bessemer Steel**, which gives age-long service?

Remember, satisfaction to the consumer or user is your best advertisement, and we supply—

A Bench Screw with DOUBLE THREAD made of best **Bessemer Steel** with carefully machined nuts—neat wood handles.

We supply Colleges and Technical Schools and people who are particular—we want your orders.

Gillette

Safety Razors

ARE you making the most of the return of several hundred thousand men to Canada?

Every man among them shaves.

To be sure, many thousands of them already use a Gillette Safety Razor. The others have a leaning towards the Gillette, and money in their pockets. Supply the demand.

Two Steady Sellers!

Every Gillette Safety Razor will give equal satisfaction. Here are shown two sets, however, that have proven exceptionally steady sellers. The Standard Set, shown above, is, perhaps, the best known.

The Gillette Bulldog, shown to the right, should be on hand for the athletic man who prefers the stockier handle.

The soldiers have become familiar, too, with the Pocket Edition Gillette Sets—they will like the new Kit Set, No. 20, bound in black, seal-grain leather.

Keep your Gillette Display well to the front these days.

High Wages Mean High-Priced Stoves

Manufacturers Declare There is No Likelihood of Any Reduction — Cheaper Steel and Iron, They Say, Not An Important Factor to be Considered —Lots of Business in Sight

ONE fact stands out clearly in the stove situation at the present time as viewed by the stove manufacturers and that is that there is no likelihood of any lowering of prices this season. As stated in previous issues of HARDWARE AND METAL, the manufacturers guaranteed prices on stoves until April 1. While this guarantee runs out on Tuesday next it will not, according to manufacturers, make the slightest change in the situation.

The reduction that has been made in steel and iron prices is not even a factor in the situation, they say, because the value of the few pounds of steel or iron that goes into a stove is many times counterbalanced by the higher wages that have prevailed. Incidentally the manufacturers are face to face with the question now of perhaps still further wage increases and also of shorter hours.

Stove manufacturers seen by HARDWARE AND METAL *are unanimously of the opinion that slightly cheaper steel and iron will not mean any reduction in stove prices. Even the lowered prices they point out are far higher than those which prevailed before the war. On the other hand wages have soared and as labor in stove production amounts to sixty per cent. of the cost it is the big factor to be considered. Prices were guaranteed until April 1, but the expiry of this guarantee on Tuesday next will not, the manufacturers state, affect the situation.*

Affects Production

"We do not know just where we are at in these matters yet," said one manufacturer to HARDWARE AND METAL. There are some workmen who seem to have the idea that a six-hour day is the thing. If six-hour days become general the effects on production are obvious. The dealers, hardware men, and others are letting the manufacturers look after carrying the stock this season. They appear to be taking the attitude that if they hold off buying they will be able to get the stock anyway when they require it and it seems to be strongly in their minds also that prices may come down. Dealers who are figuring on this basis are entirely wrong. What will happen is that when they want the goods they will not be able to get them. Take our own case for instance. We usually at this time of the year have our orders in for general lines, pipes, etc. The orders we have in so far this season could be counted on one's fingers. We will fill those but instead of going ahead and manufacturing as we usually do we are going ahead with lines for which we see possibilities in sales returns.

Stocks are Low

"Stocks are low. This is general all over the country. There is no question about that. Even with the stocks the manufacturers have on hand now after a poor season there is nothing like enough goods to take care of the needs of the trade. As a result of turning our attention to other lines we will not begin to make stoves for the fall trade as soon as usual. We will make deliveries in rotation when the orders start to come in and that means that with anything like a normal business our stock will soon be depleted and those who have not ordered will have to wait until the goods can be produced."

The tariff is an exceedingly live question just now with all manufacturers and this stove manufacturer had the following remarks to make about it:

Just the Beginning

"I am looking for the Government to take off the 7½%," he said. "What will be the result? It will be merely the start. Many of the Ontario farmers are just as strong in their demands as the men from the West. Taking off 7½ per cent. will be just like throwing a bone to a dog. It will keep them quiet for a while but they will be back again for more. As far as American competition is concerned, Canadian prices are, I believe, on an average fully ten per cent. below those of American firms. We will simply have to hustle a little more but I think we can hold our own."

Demand is There

"Heating and cooking appliances are going to be in good demand," said another manufacturer. "Even in the past two weeks there has been a noticeable improvement in the business. Many retailers apparently are begininng to realize that prices are not going to come down. There is a lot of good business in sight and if they want to get it they have to have the stock and they are beginning to buy. There is a good deal of building going on all over the country. That creates a demand for heating apparatus, stoves, etc. This building activity, according to the best information we can obtain, is not only likely to be steady but to be steady for a long period. Also it is not centered in any one section of the country but there is a scarcity of homes all over the Dominion. Added to this is the return of about half a million of our soldiers. Many families who have been living with friends or relatives will now go to their own homes again. Thousands of the younger men who went over single are bringing home wives with them. Thousands of others will be married here. All this means a demand for goods and the dealers who see ahead are making their plans accordingly.

Cannot Reduce

"As far as prices are concerned we are not planning the slightest reduction. One of the things we see coming is that we may not be able to maintain our usual production. In our own factory there were many enlistments. A great many of the men who went were skilled men. Scores of them are still in France and will not be home in time to be a factor in the production of the goods we require to meet the demands this fall. We cannot replace them. I know that other stove manufacturers besides ourselves are up against the same thing but that does not help matters. Another thing that may affect production is the shortening of hours. By no possible means can a reduced staff of men working six hours a day produce as many stoves as a complete staff working eight or ten

Keen Interest in Tariff Question

Retailers and Manufacturers Eagerly Awaiting the Bringing Down of the Budget—Many Hold View That the Present is Inopportune Time For Bringing Up the Question

THE situation in regard to the tariff is being followed by retailers and manufacturers with the keenest interest and the bringing down of the budget is eagerly awaited. In commercial circles this week the tariff has been one of the big topics and widely varying opinions are expressed. Not all the retailers by any means are in sympathy with the manufacturers.

A great many retailers and manufacturers take the view that the present is not a good time to go into tariff matters, as there are too many other problems that need solving.

Not Opportune Time

"I do not think that the present is the time to take hold of a matter of this kind," said A. A. Bittues, Montreal manager of the Gillette Safety Razor Co. of Canada. "It would be ill-advised and ill-timed, in my opinion, to undertake a revision of the tariff."

Mr. Bittues feels that there are enough problems at this time to deal with, and that to create more would serve no good end just now. Interference in any way would but cause more difficulties.

Causes Disturbance

D. J. Munn, president Alex. McArthur & Co., Ltd., Montreal, said: "There is no doubt about it, any interference with the tariff would be untimely. Logically the thing speaks for itself. It would pay to maintain tariffs as they are for some time, even though it be done at a loss, for it is a discretion that suits the peculiar times that the country is confronted with to-day. It would be a most disturbing factor now."

Mr. Munn pointed out that, while it might be possible to consider a revision later, to deal with this problem at the present time would be but to add another to the many which the Government has to solve. It had big questions to solve, Mr. Munn believes, which will require careful handling all around. There are difficulties enough.

W. S. Leslie, president A. C. Leslie & Co., Ltd., thinks that the present is an inopportune time to take up a matter of this kind. "Falling markets make keener competition in any case and a serious enough loss to those having stocks in hand. This outside competition is a difficult problem for the trade at present," said Mr. Leslie.

Views At Ottawa

The special correspondent of HARDWARE AND METAL at Ottawa writes as follows regarding the matter:

The secrecy of caucus is, of course, supposed to be inviolable, but it isn't. The Prime Minister makes a formal statement to the press of such of the proceedings as it is desired to make public, and then the reporters go and get the real news from the members.

After what was expected to be a most momentous caucus on Thursday, the Acting Premier announced that the whole matter of the tariff would be gone into after the close of the session by a commission composed of members of the Cabinet, following the precedent set by Messrs. Fielding and Paterson some years ago. Whatever immediate changes there were to be made in the tariff, if any, would be announced when the budget speech was made.

Take It Calmly

Judging from the recent reconnaissance in force made by the Western members in the House, and the fact that they have been going around the corridors breathing out threatenings, it might be assumed that such a decision in caucus would mean a scene of violence on the Western front; but Messrs. Maharg, Reid, Henderson and the others seem to have accepted the announcement with the utmost calmness. They do all their roaring through the medium of Hansard. This will show their constituents that they are playing the game. What they do in caucus is not supposed to reach the public.

Covers Every Item

At present it is assumed that even the 7½ per cent. war tax, which was one of the things which Mr. Maharg insisted would have to come off before the main tariff was even considered, will only be gently shaved, if it is interfered with at all. It covers every item, and is a valuable revenue producer, which the Government has no desire to dispense with. Such luxuries as those "long-legged" boots the ladies affect will be attacked. It is the extremes af fashionable attire which cost money. The man who uses stock clothing of standard cut can always secure very much better value than the young man who affects those flights of fashion seen on the movie heroes. Agricultural implements are likely to suffer a cut; the implement manufacturers do not appear to have much sympathy from any quarter in the House. But there will be nothing in the way of a general scaling down of the tariff at present which can give much comfort to the Grain Growers' Association, or anyone else looking for radical action.

Storm Only a "Black Wind"

Anyone who has read or listened to some of the speeches made in the House would be inclined to say: "Well, it is all up with Union Government now." Possibly the Western members may live up to their advance notices, but there is no present indication of it. It is generally assumed that they will do nothing so rash as to resign or take any other action which may separate them from the honors and emoluments which their seats in Parliament provide. Their constituents may take it out in fuming.

There is talk of an increased indemnity. The high cost of living, that admirable goat, will furnish the excuse. The reason is perfectly plain. Anyone can see that while a pension of six hundred dollars has been considered quite adequate to maintain a totally disabled soldier for a year, a member of Parliament, who is in full possession of all his faculties, except his sense of humor, cannot possibly get along for three or four months at Ottawa on over four times that amount. It is hoped that the announcement that nothing will be done on the tariff will not come so close to an increase in the indemnity as to cause any evil-minded person to begin putting two and two together.

Expect a Howl

If the expected action on the tariff is taken—or, rather, the expected inaction—it might reasonably be assumed that even the coyotes on the prairies would be drowned out in the howl which would ensue. A Western mayor who was here recently begging for a postoffice, and got little encouragement, went home and advised his friends that the only thing to do was to "set up a howl that would be heard in Ottawa." But it may be pointed out that what sounds like a perfectly irresistible howl in the place where it is perpetrated, does not jar the hush in the slightest when its echoes penetrate to Ottawa. You can get used even to the coyotes; and the powers that be at Ottawa are so used to howls that they feel about the same way you feel when the clock stops ticking. You never notice it until it stops.

They Like Their Jobs

This Union Government is somewhat unusual, in that a great number of the members who are here recognize quite distinctly that they are political accidents, and they do not expect lightning ever to strike again the same place. They like the job, in the meantime, and they like the indemnity. They like the nice writing paper, and doing away with the trouble of licking stamps and paying for them; it is much simpler. to

The New Bankruptcy Act

Legislation Introduced to Establish a Uniform System of Law and Procedure Throughout Canada in Respect to Bankruptcy and Insolvency—Will Be Administered by Superior Courts

THE Bill in respect to bankruptcy which the Government has introduced will supply something which has been lacking in the commercial laws of Canada, although opinions regarding it are divided. The Act seeks to establish a uniform system of law and procedure throughout Canada in respect to matters of bankruptcy and insolvency.

A bill was introduced last year, which was prepared by seven lawyers from different parts of Canada. The main change in this year's bill is that it applies to all incorporated companies except railroads, banks, trust companies, and insurance companies. The provisions of this year's bill applies to all persons, firms and corporations. This is a change from last year's bill, which provided that corporations could go into bankruptcy voluntarily.

Clauses Will Apply

The provisions of the present winding-up acts in regard to corporations have been incorporated in this measure. The language has been made, as far as possible, to conform with the phraseology of the English Act, so that judicial decisions which have been made on the various clauses of the English Act will apply, as far as possible, to the sections of the Canadian Bill.

Various proposals have been made with regard to the administration of the Act. In committee last year the retail merchants proposed that it should be left to the judge to discharge bankrupts. The Canadian Manufacturers' Association wanted bankruptcy judges in the different provinces to administer the Act. The idea of the Bill now before the House is to allow the present courts to do this. The Act will supersede all provincial laws. It will likely be amended in different respects as it goes through the House.

A Strong Demand

It may be pointed out that there was a strong demand from English exporting houses to have this Act passed, as they complain that they never know where they are at in handling Canadian credits.

By Section 91 of the B.N.A. Act jurisdiction is conferred upon the Parliament of Canada to pass laws in respect to bankruptcy and insolvency. In the year 1875 the Dominion Parliament did pass an Insolvency Act, which after several amendments was finally repealed in 1880. The Act of 1875 was for several reasons deemed unsatisfactory. The machinery provided under the Act was cumbersome, tedious, and expensive. After its repeal by the Dominion Parliament several of the provinces passed acts in respect to preferences and assignments, and for the winding up of the estates of debtors in various ways.

Upholds Authority

It was at one time contended that provincial enactments of this class were beyond the jurisdiction of the various provincial legislatures in Canada, but in 1894 the Judicial Committee of the Privy Council gave judgment upholding the authority of the Ontario Act respecting assignments and preferences by insolvent persons, chiefly upon the ground that in the absence of any Dominion enactments upon the subject the various provinces of Canada could pass legislation which would have force and effect within the provincial boundaries until superseded by a law of the Parliament of Canada.

Favor General Law

The Government has considered that it would be in the general interest of trade and commerce in Canada that a general law on the subject of bankruptcy to apply to the whole of Canada should be passed, and with that object in view has introduced a bill at the present session. In the session of 1918 S. W. Jacobs, M.P., of Montreal, introduced a bill on the same subject. That bill was referred to a special committee of the House which went into the question exhaustively. The present bill embraces the conclusions reached by this special committee during the session of 1918, although some important features have been added.

Seeks Uniformity

Briefly, the present bill seeks to establish uniformity of law and practice upon the subject of bankruptcy throughout all the provinces of Canada. The provisions of the bill, as mentioned above, apply to all persons, firms and corporations doing business in Canada except farmers. Farmers can, if they so desire, take advantage of the provisions of the Bill, but they cannot be compulsorily forced into bankruptcy. The Bill settles all questions of priority among creditors, abolishes all preference as between creditors heretofore recognized in any of the provinces of Canada and seeks to establish a speedy and inexpensive method of winding up the estates of debtors.

Important Provision

One very important provision of the bill is that the honest debtor who has not been guilty of any fraud or trickery in the management of his business, and who has handed over all his assets to the trustee in bankruptcy shall be entitled, under certain conditions, to a discharge from further liability.

In general, the Bill follows the procedure laid down in the English Bankruptcy Act, although a great many variations have been introduced to meet conditions arising in the various provinces of Canada.

Entrusted to Courts

The administration of the law will be entrusted to the superior courts of the various provinces and trustees in bankruptcy, sufficient in number to meet the requirements will be appointed by the Governor-General in Council. These trustees will be specially selected and will be required to furnish ample security for the proper management and distribution of the assets of the insolvent estate.

Owing to the strike in the Printing Bureau, the Bill has not yet been printed, but will be in French and English as soon as possible, and will be given its second reading and be fully discussed in Committee of the Whole.

KEEN INTEREST IN TARIFF

Continued from page 30

write: "B.S., M.P." on the corner of the envelope. They like snapping their fingers at the pages, and seeing them jump. They like bowing to the Speaker when they cut across his bows in the front. They come nearer to being heroes to their wives, watching them from the gallery, than ever before in their lives. Will they give it all up in a huff, because their constituents persist in clamoring for something they know they cannot get? Not many of them.

Maharg May Resign

It is assumed by some people that Maharg, who is taken as being the visible embodiment of Western tariff sentiment, will resign if the war tax is not wiped out and substantial tariff reductions made. It would be far more likely that Reid, of Yorkton, would be the man who would take such action, or perhaps some obscure member who has said little or nothing, but may be thinking a good deal. Many people doubt if Maharg is at heart a free trader at all.

GETS ONTARIO CHARTER

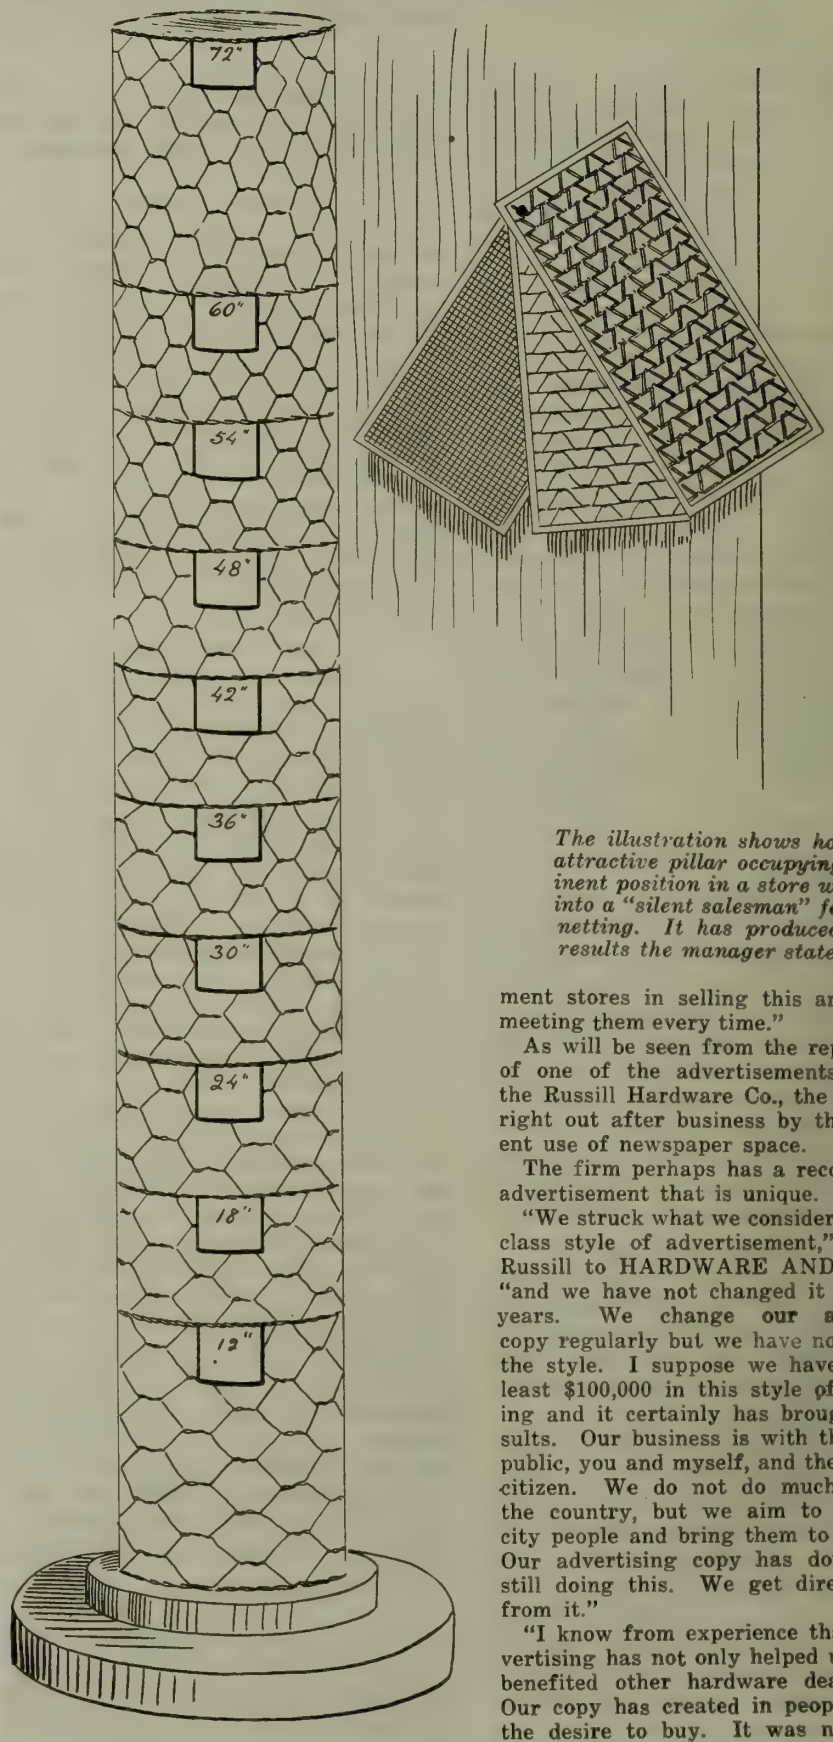
The Ontario Sewer Pipe and Clay Products Company, Limited, with head office in Toronto, has been incorporated with an Ontario charter.

Making Poultry Netting Sell Itself

Simple But Effective Plan Used By the Russill Hardware Co.—Manager Tells of the Results He Has Obtained From Advertising

"IT'S one of the finest helps in selling poultry wire that we ever had. The plan is simplicity itself but it produces results and saves our sales force a lot of time and trouble. Customers who come in wanting to purchase poultry netting see exactly what we have, what sizes there are and what the price is. Very often if the salesman happens to be busy for a few minutes the customer has, by looking over this "demonstrator," sold himself. That is he has picked out the kind of netting he wants, figured out how much it will take and all we have to do is to cut it and give him the goods."

This is the high compliment Mr. F. J. D. Russill, manager of the Russill Hardware Co., Toronto, paid to the poultry netting "demonstrator" which is illustrated on this page.



Easy to Show

"We have simply turned what would ordinarily be an unattractive pillar in our store into a real demonstrator or silent salesman," said Mr. Russill to HARDWARE AND METAL. "We wrapped green baize around the pillar to make a background against which the netting would show out neatly and attractively and then fixed a piece of six-foot netting around the pillar also. In order to show the various widths of the netting we marked on the green cloth before the netting was finally fastened a series of the widths. These are made by using white tape which makes them stand out distinctly. In addition to make sure that no misapprehension can take place we attach a card on which is shown the size and price of the netting."

Can Figure Quickly

Close at hand are a number of panels as shown in the illustration. There is one for each style of netting that the firm carries in stock. Each panel also shows the size of the netting and the price per foot. In order to prevent the rough ends of the netting from catching in customers' clothes or cutting their hands while they are examining the samples, each panel is bound with tin. This not only keeps them in good shape but also has the effect of making them perhaps more attractive than they would be in any other way.

"We handle quite a lot of netting," said Mr. Russill. "This method of showing it has certainly helped out sales. Rolls of poultry netting are somewhat difficult to display in a store under ordinary circumstances. They are not easy to handle and they take up a lot of room. By this plan we can show exactly what we have in stock, the size and the price, and keep it before people in a prominent part of the store. We have to meet the department stores in selling this and we are meeting them every time."

The illustration shows how an unattractive pillar occupying a prominent position in a store was turned into a "silent salesman" for poultry netting. It has produced splendid results the manager states.

As will be seen from the reproduction of one of the advertisements used by the Russill Hardware Co., the firm goes right out after business by the consistent use of newspaper space.

The firm perhaps has a record for an advertisement that is unique.

"We struck what we considered a first-class style of advertisement," said Mr. Russill to HARDWARE AND METAL, "and we have not changed it in twenty years. We change our advertising copy regularly but we have not changed the style. I suppose we have spent at least $100,000 in this style of advertising and it certainly has brought us results. Our business is with the general public, you and myself, and the everyday citizen. We do not do much trade in the country, but we aim to reach the city people and bring them to our store. Our advertising copy has done and is still doing this. We get direct results from it."

"I know from experience that our advertising has not only helped us but has benefited other hardware dealers also. Our copy has created in people's minds the desire to buy. It was not always

convenient for some of those living quite a distance away to come down to our store but they had seen things advertised that they wanted and have gone to a store nearer home and asked for the goods we featured and asked for them at the prices we quoted.

"Intelligently directed advertising is a great producer of business. We believe in offering the people goods that are of real value and offering them at a fair price. A big point in all our advertising copy is that it is seasonable. This is very important. We change our copy constantly and always aim to keep before the people lines of goods which they can use now."

Vary the Size

Mr. Russill explained that the firm varies the size of its advertisement according to the season of the year. From now on it will use its maximum space. A little later when business is quieter the space taken will be about two-thirds of that used just now.

As will be seen from the firm's advertisement a free use is made of illustrations. Prospective buyers are given a picture of every line that is offered. It is generally a small illustration but it is clear and shows out sharply in the ad. A word description of whatever is offered is also given and it will be noticed that special care is taken to give the price, not only in figures larger than the type used in the copy, but printed below so that there can be no possible misunderstanding.

Helps the Sales

"Giving the price always, is an important feature of our advertisements," said

This type of ad has produced big results for the Russill Hardware. Note the generous use of illustrations.

Mr. Russill. "We find that it is good business in every way. People know exactly what an article is going to cost them. They come into the store with their minds made up as to the goods they want and the price it is going to be. They are "sold" already and we save a lot of valuable time by not having to explain the goods or the price."

It will be noticed from the advertisement that an appeal is made to customers to telephone in their orders and that every satisfaction and attention is assured if this is done.

"We get a lot of business over the telephone," said Mr. Russill. "People in all parts of the city see our advertising and pick out things they want and telephone in for them. A prompt delivery service is part of our system and we aim to fill all orders received over the wire as quickly as possible."

Mostly for Cash

Mr. Russill stated that the great majority of their business is done on a cash basis.

"Ninety per cent. of our trade I should say is cash," he stated. "We have a big turnover naturally in a type of business of this kind where we are dealing strictly with the average citizen trade."

Athough out of the section where it can expect to make the most out of its window displays, the Russill Company has two good windows.

"Window displays produce results," said Mr. Russill. "We are in a section where because of our location we cannot reap the results that we would if there was a greater volume of traffic passing in front of our store. Attractive windows however bring in a lot of business and we change our displays regularly."

AIR DELIVERY OF SOLDIERS' LETTERS

A regular aeroplane service between England and the Army of Occupation in Cologne has been inaugurated by the 120th Squadron of the Royal Air Force. The photo shows a big bag of mail being loaded into one of the high-speed machines at Folkestone. A few hours later the letters will be dropped at Cologne. The tag is enlarged in the photo.

Would Regulate Shipping Rates

Retailers and Manufacturers Interested in Bill Which Aims to Place Water Carriers Under the Direction of the Railway Board — Question of Interest on Overcharges to Be Taken Up by Manufacturers

OTTAWA.—J. E. Armstrong, M.P., is again endeavoring to bring ships acting as carriers under the operation of some authority which shall be able to regulate their rates and time and manner of calling at ports. At present shipping in Canada, whether inland or coastal, is under no control. The firms claim that they differ from railways in several important respects. There is no public franchise given to any one company. The railroad enjoys a monopoly on the road it uses, and which the Government helped to build. It operates between definite points and on a definite schedule on a fixed roadway. It is not subject to marine risks which require it to carry insurance of from 5 to 8 per cent. Shipping men say that as long as they have no public franchise, they should have no special burdens. They claim that absolute competition insures fair rates.

Not Common Carriers

"We are not common carriers," they say. "We can say with perfect right and freedom: 'I will not take your grain, I will take somebody else's that I get one-eighth of a cent a bushel more for. I will not go to Colborne or Midland because of unloading conditions there. I would rather run my boat through to Montreal so that I can get a return cargo.' The boatowner does that and nobody can say he is wrong, he is not a common carrier and cannot be ordered to do what he does not wish to do."

Mr. Armstrong presents the conditions which obtain as a result of this freedom which the shipping men of Canada claim for themselves. He says:

Have 8,500 Ships

"At the present time we have 8,500 ships, with about 45,000 employees, under Canadian register. None of those, with the exception of the few operated in connection with the railways, are under any control with regard to tariffs, tolls, tariff agreements, places of stopping or whether they shall stop at all. They may take a shipper's goods or leave them, as they wish. There is no control over rates on grain from the Northwest. Canada has spent over four hundred million dollars on dredging rivers, buoying and lighting water-ways, building docks and piers and canals, in order that the transportation facilities may be cheapened and improved; but rates have gone on increasing from year to year. Grain carriers have increased enormously in size and carrying capacity, which should make for lower rates; but the rates have gone up.

There is practically a monopoly in the lake traffic, as the Canadian Steamship Company claims it controls over 90 per cent. of the traffic. This Bill (Bill 6; an Act to Amend the Railway Act) will place us in a position by which we can enter into an agreement with the United States and Great Britain to get control of our shipping. We are the only country in the civilized world which has no such control now. The United States has passed a law by which the United States Shipping Board has control on coastal and inland waters."

"There will, of course, be objections. The millers will object, as well as the sugar men and others who have been getting special rates and privileges. The millers, for example, have been allowed to load a boat with grain but need not take delivery of it for a long time."

Rates Increased

"The matter has been up several times since 1912, and rates have increased very materially. Lake vessels have been passing the small ports and ignoring the small shippers, and there seems to be no control over them.

"Generally speaking, those who are strongest in demanding the passing of this bill are the farmers of the West, the fruit growers of both Ontario and British Columbia, the Vegetable Growers' Association, and small shippers generally who are at the mercy of the boats, not only as regards rates, but as to whether their goods shall be carried at all or not."

Wants Same Tariff

When the joint Committee of the Senate and the House had under consideration the consolidation of the Railway Act, Mr. Armstrong introduced an amendment urging that, so far as was deemed applicable, the Railway Act should apply to tariffs for water carriers. The Consolidated Railway Act has passed the Senate and will next come before the House. Mr. Armstrong will introduce an amendment following along the principles of the following bill, which received its first reading February 27th.

The section in the Railway Act which applies is Section 358: "The provisions of this Act shall, so far as deemed applicable by the "Railway Board, extend and apply to the traffic carried by any railway company by sea or inland water, between any ports or places in Canada, if the company owns, charters, uses, maintains or works, or is a party to any arrangement for using, maintaining or working vessels for carrying traffic by sea or by inland water between any such ports or places."

Special Cases

This is applicable only to cases where railways have water carriers in connection. The Senate struck out the following, which would cover what Mr. Armstrong has in mind: ".....and the provisions of this Act in respect of tolls, tariffs, and joint tariffs, shall, so far as deemed applicable by the Board, extend and apply to all freight traffic carried by any carrier by water from any port or place in Canada to any other port or place in Canada."

Follow It Closely

The Canadian Manufacturers' Association has appointed a committee to take up matters in connection with this bill. It is stated that it may, unless handled wisely, work out so that not only many manufacturers but many retailers who depend upon water carriers to get their shipments at the lowest rates may be seriously affected. In some cases it is feared they might lose the shipping altogether and this would materially affect their business.

Question of Overcharges

There is also the question of interest on overcharges in connection with shipments. This matter has been under discussion before but no satisfactory settlement has ever been arrived at. The committee of the Canadian Manufacturers' Association will take this up when the bill is under consideration and endeavor to have something definite settled.

The Amendment

Bill 6.—An Act to amend the Railway Act, is as follows: Subsection one of section thirty of the Railway Act, Revised Statutes of Canada, 1906, chapter thirty seven, is amended by inserting the following paragraphs immediately after paragraph (g):—

"(ga) With respect to any privilege or concession given by any company or express company or by any person owning or controlling any such steamboat or vessel as is in the next paragraph mentioned, and where any privilege or concession is given by any such person or by any company or express company to any person or class of business or in any part of Canada, the Board may order that such privilege or concession be discontinued or modified or granted to any other person or class of business, or in any other part of Canada, either the same or in a modified form.

"(gb) With respect to the traffic accommodation, classification of freight, traffic agreements, tolls and tariffs to be furnished, made, entered into and charged in connection with and by steamboats, and other vessels engaged on a regular route carrying passengers or freight or both from one port or place in Canada to another port or place, or to a port or place outside of Canada and with respect to the places along the line of route where such steamboats and vessels shall call for traffic, the time of call and duration of stay."

2. All tariffs of tolls, tariffs agreements, and classifications of freight charged, entered into or adopted in connection with any steamboat or vessel mentioned in paragraph (gb) of this Act shall be submitted to the Board.

Increases Sales by Showing Wallpaper

Main Hardware and Paint Store Makes Neat Displays—Be Careful to Watch Remnants and Sell These Promptly—This Line a Good Profit Yielder—Paper and Paint Stock Go Well Together

SOME cities have either proven better fields for the sale of wallpaper than others, or the initiative of the hardware dealer has made this condition. It would appear that the Main Hardware and Paint Store of 1966 St. Lawrence street, Montreal, has created a demand for wallpaper through the fine displays which are maintained. An impression is made on the prospective customer and with a fair range of patterns almost any trade can be catered to and successfully served.

S. Migicovsky, the manager and owner, stated to HARDWARE AND METAL that wallpaper was a good seller with them and that one of its biggest advantages was the profit it yields. To make this profit it is necessary to buy stock carefully, to not overbuy and to keep patterns checked up and moved out before they get out of date and therefore unsaleable.

Profits—Remnants

"Some dealers sell their papers at a fairly close price and make up for this on the borders, for which a very high price is sometimes asked," said Mr. Migicovsky. "We prefer to mark our papers at a fair profit and to mark borders in like manner. It works out much the same, but this plan seems better to us."

The profits of paper, in a general way, are very satisfactory. Sometimes these run 100 per cent., and sometimes they run much higher, even twice this and occasionally much more. To a certain extent it is a line that has definite selling seasons and it is therefore up to the dealer to make his "hay" while the sun shines. This does not require the fleecing of a customer, but the wise hardware dealer selling this line will be entitled to a good margin of profit, which will be available, Mr. Migicovsky pointed out, if the dealer watches his stock, etc.

Avoid Accumulation

One of the important points to consider is that of preventing an accumulation of odd rolls of paper. Patterns are made up for each season. When a range of patterns begin to sell, the dealer will do well to watch these carefully. In the event of a line selling well, it can be replenished while the season is in full swing, and yet care must be taken, if there are patterns that one finds to be uncertain, to get rid of these quickly. If a few rolls of a given pattern are left, and it is decided best to discontinue this pattern, it is better, in Mr. Migicovsky's opinion, to clear it out forthwith at a price. Better to get one's money out of it than to have the odd stocks on hand.

By showing his stock of wall paper in a prominent place in his store the proprietor of the Main Hardware and Paint Store has created a demand for it that is steadily increasing.

Wallpaper and Paint

Answering a question as to how the two lines—paint and wallpaper—fitted into a hardware stock, Mr. Migicovsky replied that the combination was a good one. It is very probable that the woman who needs wallpaper will also want some paint or varnish, and vice-versa. Here is the salesman's chance. It is very easy to say, once the sale is made—"We have just opened up our spring paint stock. Here is a line that we have tried out ourselves and it is excellent for brightening up the border of a bedroom or the dining-room. We have it in half pints, quarts and half gallons. A little of it goes a long way, and it is a wonderful brightener. Would you like to try it out?"

Will Need Brushes

Then there are the brushes that will be wanted. For the paper it is probable that many will want a wall brush and at least one of these should be sold. For the paint or varnish wanted one to three brushes will be needed and a little tact will help the salesman suggest these. An extra brush might be sold on the understanding that, if not needed, it was returnable, with money refunded, Most people are flattered to know that they can "get their money back." It gives them a feeling of freedom towards the store but in many cases they will not ask for the refund.

Expansion Has Come

As will be seen in the accompanying photograph, the Main Hardware and Paint Store has made ample provision for its paint stock. Mr. Migicovsky referred to the fact that his father had been a painter and that they always had adhered to high-grade lines of paint and varnish. He figured that such lines could not be too carefully selected, and there is no factor greater in getting the "come-back" into original or even repeat sales. A high-grade paint or varnish will do its own advertising, and wise purchasing of the stock will prevent troubles later. The better element of one's trade, at least, will pay a little more for quality.

And so, for many years, the better paint lines have been specialized in and a good trade catered to. The attractiveness of this stock as one enters the store is, in itself, one of the best selling helps for the various lines sold. About $1.500 paint and varnish stock is carried and about $2,000 worth of wallpaper in addition to general lines.

The Federation of British Industries

Plans to Bring All Parts of the Empire Into a Closer Trade Relationship — Many Canadians Invited to Visit the Chief British Manufacturing Centres

THE aspirations and activities of this organization which has for its object the co-ordination of all branches of industry within the Empire were the subject of a special interview between the London, England, representative of HARDWARE AND METAL and Mr. Edmund L. Hill, the general secretary of the Federation.

The Federation was formed a little over two years ago with the object of bringing into closer touch and fostering a more cordial relationship between the manufacturer, the worker and the trades generally whilst advancing the interests of British Commerce throughout the world. Its membership now numbers 163 associations, 15 controlled associations, and 822 firms, which, it is claimed, represent directly and indirectly 20,000 manufacturing establishments, having a total capital of between four and five million pounds sterling.

Overseas Trade

A special department is now in the process of formation which will send out its own ambassadors to all the principal trade centres. In each market, a Commissioner is to have his own local Federation of British Industries which will work as a subsidiary Federation. These representatives have not yet been definitely appointed, but in every case they will be men who understand the local markets and have a sound experience of the peculiarities and customs of trade in the area allotted for their activities. Questioned on the subject of Canada, the reply was that it will be a man who "knows his Canada." In the case of Canada, of course, each province would call for special treatment on its own merits.

Now in England

For purposes of propaganda the Federation have invited a number of representatives of the Canadian Expeditionary Force, all connected with commercial enterprises in Canada, to visit, before they return home, some of the chief manufacturing centres in this country. The following are the names of the delegates together with the trade interests they represent: Major S. T. Layton, 2nd Can. Hvy. Btty., Consulting Engineer; Capt. E. V. McKagne, C. C. Cyclist Batt., Civil Engineer, Toronto Harbor; Major G. H. Sherrer, D.S.O., 3rd Bgde., C.F.A., Electrical Engineer; Capt. F. H. Dainham, M.C., 44th Batt., Representative large Wholesale Importers and Manufacturers Textile Goods; Capt. A. S. Brown., 59th Batt., Textile Manf. Agent; Lieut. W. B. Scott, Bordon, Mechanical Engineer; H. Capt. & Q.M. W. Hogg, Etchinghill, Mechanical Engineer and Contractor; Capt. W. Stevens, 4th Res. Batt., Witley, Electrical Engineer; Capt. N. Franks, M.C., 21st Res. Batt., Bramshott, N. Alta. Rep. for Canadian Allis-Chalmers and Can. Gen. Electric Co.; Lt.-Col. W. B. Worsnop, D.S.O., 1st Res. Batt., Seaford, Manufacturer and Salesman of Machinery; Lt.-Col. D. S. Ellis, D.S.O.; Major W. H. McGhee.

Closer Relationship

At a dinner at the Princess Restaurant in London, at which the Canadian representatives were entertained, Mr. Guy H. Locock, assistant director of the Federation, who occupied the chair, spoke of the mutual advantage it would be to both countries to have a permanent partnership and friendship between England and Canada. The war had piled up a big debt, and while it was essential that we should produce to the utmost of our power, it was also important that Canada should get in touch with our great manufacturers, and take steps towards forming a permanent and practical organization to keep the two countries in close touch. The Federation recognized that it had to be very active in developing the trade of the Empire, both between the constituent parts of the Empire and foreign countries. The Government had done a good deal, but it could not do everything. Individual traders were also doing what they could but they were hampered by the conditions that now existed—capital, taxation, and labor. The Federation here stepped in, and by its various activities through out the world it ought to take an important position in the foreign trade of this country.

Sir George Perley

Sir George Perley, High Commissioner for Canada, who was present, said: "The war had shown that the British Empire ought to be self-contained. The natural resources of the Empire should be kept in our own hands, developed, and manufactured by and used by us, and we ought not to allow our raw material to go to foreign countries to be made into the finished article and then returned to us. He knew it had been said that if Canada could buy more cheaply somewhere else than in this country it was better to do so. He did not believe in that. He was not asking the Government to send men and women to Canada, but if that policy had been pursued during the past fifty years the assistance the Dominion could have given to this country during the war would have been magnified he did not know to what extent. Now, when they were considering the problem of reconstruction, the tour about to begin would be of advantage as the delegates would have an opportunity of talking with the captains of industry and exchanging ideas, so that when they returned home they would have a better idea of the trade in which they were interested. We were passing through a period of unrest, and it was vital we should get back to the ordinary business conditions as soon as possible. He was confident the Federation would do everything possible to develop trade within the Empire. He believed it was the intention of the Government to do everything possible to encourage trade with the Dominions in preference to any foreign country, but sometimes the regulations did not work out exactly as the Government desired, and he hoped the Federation would use its influence to see that the regulations were made in such a way as to develop trade to the fullest possible extent and so strengthen the bond of brotherhood that bound us together."

Among others present at the gathering were Harrison Watson, Chief Canadian Government Trade Commissioner, formerly in the metal trade in Montreal, and Lieut.-Col. Edwards of the Headquarters Staff, Canadian Expeditionary Office, London.

ENGLISH BUILDING TRADE HELD UP

Builders, architects and contractors cannot proceed until the Government make up their minds on the release of material and until it is known definitely what the prices of material are to be. London bricklayers are waiting for jobs and there are not nearly enough to absorb the building operatives now employed. During the past few days men have been discharged through lack of material and uncertain prices. Among the men there is a strong opinion that the Labor Party should take up the question in Parliament.

HIGH WAGES MEAN HIGH-PRICED STOVES

Continued from page 29

hours. In my opinion the dealers who are holding off buying are making a mistake. People are going to buy stoves. They are going to need them right along and the man who gets the business is the man who has the stock.

Another Side to It

"There is another side to this question also. The possibilities of the export trade must be considered. It would not take many very big orders from England or France or any of the other European countries to clean out most of the supplies now on hand. Just what the export business will amount to we are not in a position to say yet but it is a matter to be reckoned with in sizing up the future business at home."

The fly lays four times each summer, and 80 eggs each time. The descendants of one female fly in a single season may number 2,080,320.

Lower Steel Prices to Boost Buying

Canadian Firms Advising Trade That They Will Meet the New Schedule Now in Effect in the United States—Judge Gary Predicts Period of Prosperity and Revival of Business

CANADIAN steel firms are advising the trade that they will meet the reduction in prices which is being put into effect by the American firms. Canadian jobbers and the trade generally are making every effort to pass on the lower prices at once to users in the hope that they will encourage buying to stimulate business. There seems to be a general opinion that the new schedule will bring out some business that has been holding back in anticipation of the announcement in regard to prices. Iron and steel bars, base, at Canadian points, have been moved down to $4.40, but the chances are that they may go a little lower than this.

Price Difference

There has always been a difference of 25c per hundred maintained between steel and iron bars, the steel bars bringing the higher figure. Many of the dealers claim that there is no good reason why this difference should be maintained. There have been many cases where mild steel has been substituted for iron and the chances are that few people have been the wiser. The belief that there should be a difference in price is dying out, and it would cause little surprise were the new schedules that will be worked out on the new price cuts contain a flat price at the Canadian warehouse.

Out of the Market

One of the largest Canadian mills is practically out of the market for the present, because there is not enough business to enable it to run to capacity. It went ahead and cleaned out all the orders that were unfilled when the war closed, but in the meantime did not book much new business. As a result there is nothing in sight now to run at anything approaching capacity, and the firm has refused to tender at all on several orders that had very fair tonnages, claiming that the amount of business in the order did not warrant starting the mill going.

Caught by Price

Some of the Canadian warehouses will be caught by the new price announcements at United States points which became operative when they were announced. "We have material on hand that we cannot afford to sell at a price to meet the new figures," said one dealer to HARDWARE AND METAL, "but that will be our funeral. It is useless to try and get the old war price, and the only thing is to clear it out and have the funeral over with as soon as possible."

Are Still High

The new American steel prices are only 14 per cent. below the set prices during the war, but they are still 81 per cent. on the average above prices prevailing for a ten-year pre-war period.

The new American price schedule which is now in effect is as follows:

	Nov. 11 price.	Present price	Ap'ved new price	Reductions Nov. 11	From present.
Pig iron, basic—	$33.00	$30.00	$25.75	$ 7.25	$ 4.25
Billets, 4 inches—	*47.50	43.50	38.50	9.00	5.00
Billets, 2 inches—	*51.00	47.00	42.00	9.00	5.00
Bars—	*51.00	47.00	42.00	9.00	5.00
Slabs—	*50.00	46.00	41.00	9.00	5.00

Ore—No change.					

*Gross tons. †Net tons. ‡100 pounds.

Basing points and differentials unchanged. Prices effective at once.

Boost Business

Confidence was unanimously expressed by both the steel manufacturers and members of the board that the temporary sacrifice of profits by the producers will be amply compensated by the resultant flow of pent-up business.

Judge E. H. Gary, of the United States Steel Corporation, in outlining the position of the steel industry towards the voluntary reduction of prices by the basic industries declared:

"After careful consideration and full discussion relating to cost of production and all other facts and circumstances relating to the iron and steel industry, representatives of the industry submitted to the Industrial Board of the Department of Commerce a schedule of proposed reduced prices of the principal iron and steel products, which, with modifications suggested by the board and accepted by the industry, has been approved by the board.

Objects Aimed At

"The objects to be secured are a revival and stabilization of business by establishing a reasonably low basis of prices which would be satisfactory to the consuming public, and yet so far as practicable would yield a moderate and reasonable return to the investors where they are entitled to it in the application of sound business principles, and at the same time would not disturb wage rates or interfere with wage agreements; and further, having determined upon prices which it is expected will not be reduced during this year, it is believed that the volume of business will be promptly increased, and that furnaces and mills will be operated at a largely increased capacity, thus giving employment to a correspondingly increased number of employees.

All Facts Scrutinized

"It has been necessary to ascertain and scrutinize all the facts and figures in order to prevent any injustice, and this has been the occasion for considerable discussion and some differences, but as a final result of the conferences which have taken place during the last two days and before, the committee appointed to represent the entire iron and steel industry joined in the report which was made to the Industrial Board.

Thinks It Just

"While in the opinion of some of the manufacturers the board has insisted upon some changes in the schedule submitted before approving the same, yet the Iron and Steel Committee are convinced that the members of the board have been governed solely with the intention of protecting and promoting the best interests of the public, the investors of capital and the employees, without discrimination, and that the action of the board has been wise and just.

The First Move

"The iron and steel industry was the first called upon by the board to meet the business situation and to lend its energies and assistance in bringing about readjustments and restoration of good business conditions and, therefore, was the first called upon to make the necessary sacrifice in profits; but those connected with the trade believe that as a result for the year as a whole they will be compensated, and that if other lines of industry show the same disposition, as they undoubtedly will, we may expect great business progress and prosperity in the near future."

EDITORIAL COMMENT

STIMULATING BUSINESS

TO-MORROW'S dullness may be prevented by to-day's activity. This is especially true in the business world. Business prosperity ultimately depends upon the customer. A great many people all over the Dominion of Canada have been deprived of a great many things they would normally have purchased, by reason of the restricted production brought about by war conditions. At that time they were told, and it was quite true, that the patriotic thing to do was not to buy, not to consume materials that were urgently needed for winning the great struggle. Now, however, it is patriotic for people to start buying again just as rapidly as they can. Perhaps the very quickest and surest way to get people buying again is to put on a strong advertising campaign. Both manufacturers and retailers are interested in keeping business moving steadily. Advertising has time after time proved its value in creating a demand for products. It will, if given a chance, do the same thing now. The demand is in the country, but the buying desire of people has to be stimulated, more perhaps now than ever before, because the former cry—not to buy for patriotic reasons—has been thoroughly impressed in many people's minds. They are making old things do when they should have new. Take the case of stoves for instance. More stove repairs were made in the past season than in many years before. Many of these stoves are, even with the repairs that have been put on them, not giving anything like the service to their owners that a new one would. They are perhaps consuming more fuel than the new styles. Many of them are not built for using either wood, coal or gas like the new models. Owing to the conditions that prevailed a year ago, and that might easily have prevailed again during the past winter had long stormy periods tied up the railways, this matter of being able to burn any kind of fuel available is an important one. These are points that the people need to be told about. New stoves may save them real money and a good deal of inconvenience.

If the retailers go after the stove business and let the people know about all the new features, through advertising, window displays and salesmanship in their stores they can turn over a lot of merchandise. They have some real talking points in the new styles and the thing is to make the most of them. There is any amount of business to be had but it must be gone after. Perhaps no field at the present time offers wider opportunities than the sale of paints. More painting has been neglected in the past five years than ever before in the history of the country. This neglect is general from coast to coast. It is bad enough in the cities, but out in the rural districts, it is stated, it is many times worse. Hardwaremen are going after this opportunity and already there have been some splendid window displays and advertisements. This has brought results and the firms which took advantage of the fine weather to get their paint selling under way earliest are the ones which have done the most business. It is work of this kind that tells. Live retailers make live towns. They stir up a lot of business in a manner that not only wins dollars for them, but reputation for their stores. Lack of advertising is often responsible for lack of business and often an economy of a few dollars in this line is responsible for the loss of many dollars in profits.

RAVAGES OF FIRE

PROPERTY valued at more than $40,000 was destroyed in Ontario every day last year. The unfortunate thing in connection with this, aside from the tremendous loss involved, is that the great percentage of this damage was due to extreme carelessness and might easily have been prevented. Rubbish and fire are twin brothers. One of the most prolific causes of fires was matches, cigar stubs or cigarettes dropped carelessly into rubbish. You can help prevent fire by not allowing rubbish to accumulate. You can help stop Canada's enormous fire loss by using reasonable caution in the storing and handling of oils, gasoline, paints and other volatile liquids. Oily waste thrown anywhere makes a dangerous fire hazard. Statistics prove that one of the great causes of fires spreading is that the people who discover them waste valuable minutes in trying to fight them. Delays of this kind are dangerous and costly. Call the fire department first and then do what you can while they are coming. This may mean the saving of a whole store, perhaps a block of stores and maybe of human lives. The seriousness of Canada's fire losses is being brought home to business men and the public at large by those who

are working to reduce this enormous waste. It is pointed out that every single fire loss affects every individual as the loss has to be made good at the general expense of all. The insurance companies pay the merchants, the merchants allow in their charges for the premiums they have to pay and the consumer has to provide for this.

RETAILERS ARE HELPING

IT is predicted that the sales of war savings stamps will reach new records this year as a result of the plan that is being followed of enlisting the cooperation of retailers. There is perhaps no surer or quicker way of getting in direct touch with so many people as through the stores. The proprietors and their staffs have taken hold of the work and are lending every aid in helping it along. In the United States, where the sales of savings stamps have reached huge sums, the National Retail Dry Goods Association, with a membership of 700 department stores scattered in cities from coast to coast, has also pledged its support.

The Window Trimmers' Association, which is affiliated with practically all display and window advertising for retail stores throughout the country, has promised to do everything possible to make the campaign a success through the medium of window displays.

CAUSE FOR REJOICING

JUST one year ago German military power, then perhaps at its maximum strength, was launching its most terrible blow. The first news of the big Hun drive was beginning to come in and it was so filled with uncertainty that the anxiety of the Allied peoples was increased. All that was known was that town after town and position after position were being captured and that thousands of prisoners were being taken. The one note of confidence that stood out everywhere was the assurance of the Allied leaders that they were not only holding an unbroken line, but were confident that they would hold it. For three solid months the suspense was the greatest in all the months of the war and then the tide turned. There is every cause for rejoicing and thankfulness, as it is impossible to imagine what the situation would be now if the peace table were reversed and the Kaiser and his Prussians were dictating peace instead of the Allies.

OUT OF HUN CONTROL

A REPORT just issued by the Alien Property Custodian shows that the grip of Germany on the American metal industry has been broken, if not entirely wiped not. The report states that all the metal concerns in the United States that were controlled by Germany have been disbanded or Americanized.

WHAT OTHER EDITORS SAY

THE claim is made that the steel industry is standing in the way of a general readjustment in business. The steel trade's rejoinder is that lower prices for steel would not result in greater demand, hence there would be no greater activity. They would point to the record of the past, that steel prices have always been reduced to a very low level before a general demand developed, and that the buying movement always fell weeks if not months after the time of the bottom in prices being reached.

On this subject there is room for a difference of opinion. The steel producers may insist that they called the turn just right, reducing prices just at the time needed to encourage the buying movement that had just become ready to develop, but the critics may ask what proof the steel producers can furnish that if they had gone down to bottom three months or six months sooner the buying movement would not have developed so much sooner.—*The American Metal Market.*

* * *

THE manager of a stove company remarked recently that one of his salesmen encountered a dealer who refused to buy stoves because he had six left from last year. A discreet investigation developed the fact that no use had been made of the manufacturers' selling helps. Cleverly illustrated and written booklets bearing the dealer's imprint were gathering dust on the back of one of the stoves. Several weddings had occurred in the families of his customers. With one exception, all the newly married couples bought stoves from other dealers in the town. The other dealers advertised their stoves and made liberal use of the manufacturers' selling helps. They kept their stock of stoves bright and clean and displayed them to the best advantage. The dealer who had the six stoves left from last year never made any special effort to sell them. The fact is that he is not a merchant. He is merely a store keeper. He is intellectually lazy. He does not read books on merchandising or trade journals. He has never concentrated his mind upon a selling campaign. He waits for customers to come to him instead of going after them through the medium of newspaper advertising, circulars, and personal solicitation. No wonder he has six stoves left from last year! —*American Artisan and Hardware Record.*

* * *

THE question which is uppermost in the minds of our manufacturers to-day is, we venture to say, Government control of trade. The Government is apparently very much disinclined to take its tentacles off trade and the result is that its red tape is wound round and round the whole machinery of import and export trades, with the result that on the import side we are paying far too much for what we consume, while on the export trade, which it is urgently necessary should be stimulated to the greatest possible extent in order to provide funds for meeting heavy indebtedness, is practically paralyzed, with results which are plainly shown by the statistics furnished by the Board of Trade. Our primary and immediate duty is to see to it that our commerce is released from these obnoxious fetters. Isolated agitation is evidently of little avail. The captains of industry and commerce must marshal their forces and make their power felt without delay. The present Government, so far as it has given any indication, is largely governed by a policy of expediency, and public opinion is the only force that can bring them to a sense of their obligations to the public interests they are supposed to serve.—*The Irish Ironmonger.*

* * *

THE real foundation of prosperity is hard and intelligent work. The precise prices paid for labor and commodities are much less important in the long run. The country cannot prosper with a get-rich-quick idea as the prevalent one. It must have the work-hard-and-intelligently idea.—*The American Metal Market.*

EVENTS IN THE TRADE

Business Changes

Ochre River, Manitoba.—H. Stevens, hardware, is succeeded by Stevens and Good.

Ituna, Sask.—Corson, Morrison and Watson, hardware, have sold to Siekierski, Zaclworny and Zahorski.

Elmwood, Ont.—A. P. Reuber, Elmwood, Ont., has disposed of his hardware business to Charles Emke.

Highgate, Ont.—N. Littlejohns of Orford, Ont., has purchased the hardware business of the late George L. Gillies.

Obituary

The death occurred at Belle River, Ont., of Noah Parent, hardware merchant.

The death occurred at Penetanguishene of Charles McGibbon, of the McGibbon Lumber Co.

George W. Cole, president of the firm of Geo. W. Cole, Ltd., manufacturers of straw specialties, died at his home in Toronto.

James A. Cline, a former resident of Seaforth and for many years in the hardware and furniture manufacturing business at Wingham, died in Toronto. Before removing to Toronto, where he lived retired, he was engaged in manufacturing at Guelph, Ont.

The death occurred at St. Thomas, Ont., of Joseph Lewis, aged 63, president of the Elgin Handle Company. For a great many years he was timber buyer for the J. H. Still Manufacturing Company.

Fire Losses

Hartman Bros. hardware, and the Midland Iron and Steel Co., Ltd., sustained losses in a fire at Midland, Ont.

Fire in the wire and brush works of Albert S. Ulley, Montreal, caused a loss of $2,000.

New Firms

Fitzgerald and Kent have opened a hardware store on King street east, Hamilton, Ont.

Personal

Raymond H. Young has been appointed advertising manager of the Stanley Works, New Britain, Conn.

Major Donald S. Fisher of the Enterprise Foundry Co., Sackville, N.B., is leaving shortly on a western tour which will include points from Winnipeg to was a Montreal visitor. Vancouver. Major Fisher went to France in August, 1914, with the 1st Division after joining the Royal Canadian Dragoons.

W. H. Lamont, of H. S. Howland, Sons & Co., Limited, has returned after spending several weeks in New York and Atlantic City.

W. Dunlop Stewart has returned from France after being on overseas service for two years and is resuming his duties with Wm. B. Stewart & Sons of Toronto, sales agents for the Hamilton Cotton Co., Ltd.

Trade Notes

The Superior Roofing Company has been registered at Montreal.

Cronin and Thompson succeed Frank Cronin, implement dealer, Woodstock, Ont.

The M. Philbin Hardware Co. has been registered at Montreal by H. St. Leger Philbin.

The Manville Asbestos Co., Ltd., has been succeeded by the Canadian H. W. Manville Co., Ltd.

The Renfrew Machinery Co., Ltd., Renfrew, Ont., manufacturers of cream separators, etc., has been succeeded by M. J. O'Brien, Ltd.

The Standard Iron and Metal Co. of Montreal has been dissolved but the business will be continued on the same lines by A. Latt.

La Compagnie des Products de Cement du Canada, manufacturers of artificial stone and building materials, has been registered at Quebec.

The McMurtry Hardware Company's branch store at St. Thomas, Ont., has closed, and the stock is being moved to the main store at Galt.

Marshall Ecclestone, hardware and furniture, Timmins, Ont., has purchased a warehouse building, which will be remodelled and converted into an automobile display show room.

William Richardson, tinsmith, Dutton, Ont., was terribly burned when a gasoline torch he was using exploded and ignited his clothing. The accident occurred, it is stated, while he was adjusting the valve and some of the gasoline leaked out. His condition is reported as serious.

Montreal News

Norman Labeile, of C. Labelle, Three Rivers, was in Montreal this week.

E. Julien, of Baie Shawinigan, Quebec,

J. Ernest Bureau, of Richardson and Bureau, manufacturers' agents, Montreal, is spending a couple of weeks in the Maritime Provinces calling on the trade.

W. J. Oiphant, with the Ritchey Supply Co., Toronto, was in Montreal this week.

George Henderson, president of Brandram-Henderson Ltd., Montreal, was in New York this week.

Regina Notes

I. Stern, of I. Stern and Co., Montreal, was in the city this week.

C. A. Foster demonstrated stoves in the city this week for a Detroit firm.

Mr. Brown, representing A. MacFarlane, Montreal, was in the city this week.

Peart Bros.' Hardware Co., Ltd., have moved into their new store, 1856 Scarth St.

Frederic Saur, manufacturers' agent, Calgary, called on the hardware firms this week.

J. Chambers, representing Reckitt's (Oversea) Limited, England, was in the city this week.

W. R. Herbert, sales manager for the British American Paint Co., Ltd., visited Regina firms this week.

Maritime News

W. S. Fisher, of Emerson & Fisher, Ltd., St. John, has left for Asheville, North Carolina, where he will spend six weeks.

W. A. Maclauchlan, of St. John, has returned from Montreal, where he spent several weeks on account of the serious illness of his son, Major R. F. Maclauchlan, who was suffering from a relapse from wounds received in France.

At the annual meeting of the Rogers Hardware Company, Limited, of Charlottetown, P.E.I., plans for the erection of a factory for the manufacture of an article of which they are large importers, were considered, but decision was postponed. Reports presented showed a large increase in sales over the previous year, the total increase since their reorganization in 1911 having reached $150,000. Directors and officers elected were: G. J. Rogers, president; Judge A. A. McDonald, vice-president; and John M. Gillis, secretary-treasurer.

Incorporations

Anglo Canadian Metals, Limited, capital $40,000, head office, Toronto, plans to manufacture and deal in metals, metal products and machinery.

A. M. Castle Engineering Company, Limited, head office, Toronto, capital $275,000, plans to manufacture and deal in gas, oil, steam and electric engines and in power plants.

The Hoag Oil Engine Company, Limited, capital $100,000, head office, Brantford, Ont., plans to take over as a going concern the firm of H. P. Hoag & Co.

Lynch Auto Sales Company, Limited, capital $40,000, head office Sault Ste Marie, plans to deal in motor vehicles, accessories and supplies.

Harding Bros. of Canada, Limited, capital $40,000, head office, Toronto, plans to deal in time recorders, watchmakers' and other lathes.

Canadian Collapsible Rim Company of Canada, Limited, capital, $500,000, head office Windsor, Ont., plans to manufacture and deal in automobiles, bicycles, boats, and motorcycles and accessories thereto.

Renfrew Electric Products Limited, capital $500,000, head office, Renfrew, Ont., plans to take over as a going concern the business of the Renfrew Electric Manufacturing Company Limited.

Montreal Portland Cement Company, Limited, capital $2,000,000, head office, Montreal, plans to manufacture and deal in cement products and artificial stone.

The National Safety Oil Burner Company, Limited, head office, Toronto, capital $40,000, plans to manufacture and deal in oil burners, oil filters, stoves and furnaces.

The Mitchell Holland Company, Limited, capital $1,000,000, head office, Montreal, plans to manufacture and deal in hardware, paints, building materials and electric fixtures.

Grimsby Steel Furniture Company, Limited, capital $60,000, head office Grimsby, Ontario, plans to manufacture and deal in steel furniture.

H. H. Robertson Co., Ltd., capital $200,000, head office, Sarnia, Ont., plans to manufacture and deal in steel, iron, metal, asphaltum asbestos and products thereof.

ASBESTOS COMPANY DISPUTE IN COURT

An action is in progress in the Montreal courts against the directors of the Jacobs Asbestos Mining Company of Thetford, Quebec. The same is preferred by Sir Mortimer Davis and asks that the court order the defendant company to hold back a ten per cent. dividend payment, pending a financial examination of the company's position. Arguments of the plaintiff through legal representatives were to the effect that the defendant company was not in a position to proceed with the dispersal of the dividend proposed and action in the matter was therefore ordered to be withheld pending a fuller investigation.

Daylight Saving Endorsed By Retail Merchants of St. John, N.B.

A BUSY and successful year was reflected in the reports submitted at the annual meeting of the annual meeting of the St. John, N.B., branch of the Retail Merchants' Association, and the interest displayed gives promise of results at least as satisfactory for the coming year.

In his annual report the secretary, T. F. Drummie, showed that every branch of the association's undertakings had been most successful and that a large increase in membership had taken place during the year. He urged the executive to take a more active part in the public affairs of a nature beneficial to the community generally, as well as to the merchants in particular.

F. B. SMITH

Of the Smith Hardware, Belleville, Ont., who, as stated in HARDWARE AND METAL *of February 22, was elected a member of the Executive Committee of the Retail Hardware Association of Ontario at the meeting in Hamilton.*

The secretary of the dollar day committee reported that two dollar days had been held, on February 21 and August 21, and that both had been highly successful.

The report of the treasurer, M. E. Grass, showed the finances of the association to be in satisfactory condition.

The provincial secretary, Miss F. P. Alward, reported that all the larger firms in the city are taking an active interest in the work of the association and are co-operating heartily with the provincial branch.

The association went on record in favor of the holding of a peace carnival in St. John during the summer or fall months.

Favor Daylight Saving

A resolution in favor of daylight saving, copies of which were ordered sent to Sir Thomas White, the city's Federal representatives and to the secretary of the Dominion Association, was passed, as follows:

Resolved, that inasmuch as daylight saving has proved itself of great advantage to the business community, enabling employees of stores and other workers to have the benefit during the summer months of some 180 hours of free daylight for recreation—equalling eighteen full days of ten hours each added to their holidays and at no cost to anyone;

Therefore resolved, that the Retail Merchants' Association, St. John branch, endorse the continuing of the daylight saving movement and hereby petition our Government to so enact for the year, 1919.

The New Officers

Officers elected for the year 1919 were as follows: Honorary president, A. O. Skinner; president, F. W. Daniel; first vice-president, A. N. McLean; second vice-president, S. E. Fisher; third vice-president, J. H. Vaughan; treasurer, M. E. Grass; secretary, T. F. Drummie; advisory board, G. M. Ross, H. Mont Jones, D. J. Barrett, J. H. Marr, K. D. Spear, William Hawker, Harry Warwick, C. H. Smyth, S. E. White, J. A. McKay, F. A. Dykeman, T. A. Armour, A. A. McIntyre, S. C. Young, H. W. Rising, R. E. Wark, W. E. Ward, I. Chester Brown, B. R. Macaulay, H. H. Scovil, S. C. Webb, S. S. Francis, G. W. Morrell and G. C. Emerson.

Railways' Cash Plan May Go Into Discard

While no official statement has as yet been made by the Canadian Railway War Board, it is unofficially stated that the proposal of the railways to demand cash from shippers after June 1 has died a natural death. Nominally, the proposition has been left over until June 1 so as to give shippers a chance to make the necessary arrangements with bond houses to furnish the bonds required. It is stated to HARDWARE AND METAL, however, that the present plan is to allow the proposal to be forgotten. Circular 97, which was to have become effective on March 1, roused such a storm of protest that the measure was laid over. Manufacturers declare that they will never agree to the demand of furnishing a bond. They do not mind settling their freight bills in cash, but they declare there is no logical reason why they should be asked by the Canadian Railway War Board, the railways or anybody else, to furnish a bond, as long as their credit is unquestioned. The Canadian Manufacturers' Association, through its Transportation Committee, is taking this matter up with the Board and will endeavor to have the procedure that is in effect at the present time continued.

Remove Restrictions On Hardware Lines

Advices have been received by G. T. Milne, Montreal, and F. W. Field, Toronto, British Trade Commissioners in Canada, that the following additions have been made to the list of goods which may be exported without license:

Fancy goods made of morocco and light leathers; iron and steel manufactures generally, except high speed steel and certain special articles; machinery of all kinds, except textile machinery and machinery wholly made of brass or copper; toys and dolls; games of all kinds.

Lists of export restrictions recently removed:

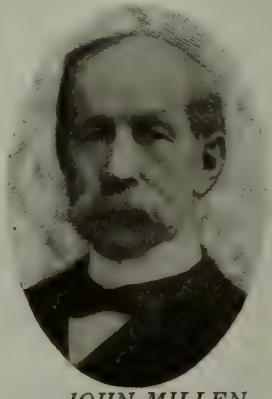
Binder twine, barrels and casks, boilers, chrome ore, chestnut extract cork, fuel economizers for boilers, goldbeaters' skin, gluestock, dry white lead, hide clippings, resins lead coated sheets, paraffin wax, pigskins, cast iron pipes, iron or steel wire, wire rope, quebracho extract, cast iron radiators, solid glucose, railway sleepers, or iron or steel railway springs, railway wheels, axles and tyres, railway constructional material except rails, silk, manufactures, spirits, except whiskey; terneplates, tinplates. Import prohibition relaxed on bacon, lard, hams, hardwood, the latter until January 1st. Import relaxations revoked, licenses will be now necessary, brooms, brushes, buttons, gloves of leather and fabric, gas mantles, vegetable tape, cotton piece goods.

Saskatchewan Stores Favor Early Closing

All retail stores at Moose Jaw, Saskatchewan, will likely close all the year round at 5.30 p.m. Out of one hundred merchants, ninety-three have signed a petition to this effect. Shorter hours for the staffs of all the stores are expected to become effective as soon as the council takes the necessary action upon a petition placed before it. The petition calls for an amendment of the city by-laws whereby all stores will open at 9 o'clock and close at 5.30, during every month in the year.

Early closing for six nights in the week is practically assured in Regina. Ten of the twenty trades sections reported almost unanimously in favor of the move. The report of the other ten, which will be available very shortly is expected to show an equally strong endorsement of the measure.

STEEL COMPANY LOSES BUYER



Richard A. Hogge, for several years buyer for the Steel Company of Canada, Montreal, died on Monday last of pneumonia at the age of 33. His loss is keenly regretted by those with whom he was associated in the offices of the Steel Company.

Mr. Hogge was born in Dumfries, Scotland. He started his business career with A. R. Brown, McFarlane and Company, iron and steel merchants, Glasgow, remained with them for two years, then he went to the Lanarkshire Steel Company of Motherwell, and was employed at their head office in Glasgow, becoming chief clerk.

He came to Canada in 1910, and was employed by Messrs. Hugh Russell and Sons, iron and steel merchants, until he entered the employ of the Steel Company of Canada, January 1, 1912, as clerk in the works' office, eventually becoming the company's purchasing agent, which position he held at the time of his death.

John Millen Dies Following Operation

After a very brief illness of about a week, John Millen, president of John Millen & Sons, Limited, 323 St. James Street West, Montreal, died in the

JOHN MILLEN

President of John Millen and Sons, Limited whose death occurred at Montreal.

Montreal General Hospital on Tuesday of this week. The immediate cause of death was that of an operation, and to which Mr. Millen was not equal at his advanced age, of 76 years. In good health until recently, Mr. Millen was able to attend to his duties, and had only been away from his office about ten days. He was looking forward with interest to the fiftieth anniversary of the company, of which he was the founder and president, and which was to be suitably celebrated in May of the present year.

He entered the service of the firm of L. Blaiklock sixty years ago, but ten years later he started a general hardware business on his own account. The present company was incorporated in 1906, when it changed its character from retail to wholesale.

While not entering into public life, Mr. Millen displayed a special interest in certain phases of public welfare. As a Westmount citizen he was an active member of the Municipal Association and exhibited great enthusiam for the beautifying of the city.

Mr. Millen is survived by his widow, who was formerly Miss Annie Phillips; also by two sons, E. D. Millen, who is with the Grand Trunk Railway in Toronto, and J. Ernest Millen, managing director of John Millen & Sons, Limited.

Windsor Secures Two New Accessory Plants

The Windsor correspondent of HARDWARE AND METAL says:

"Establishment of the Canadian and British Empire branch of the Collapsible Rim Company in the Border Cities is now an assured fact, and arrangements are now pending, relative to the selection of a site whereon to erect a factory. Automobile rims and accessories will be manufactured and distributed throughout the British Empire from the local factory. The parent concern, a large industry, is located in Chicago.

Little time is being lost by the Auto Specialties Company, of St. Joe, Michigan, in establishment of its Canadian subsidiary, to be located on the balance of the Windsor industrial site. F. F. Davidson, architect of the company is in the Border Cities looking over the site preparatory to commencing building operations in the near future. Three large buildings will be erected within as many years, the total cost of construction and equipment approximating $400,000.

BRITISH STEEL COMBINE

Reports from Engand announce that Messrs. Baldwin, steel manufacturers, have acquired the undertaking of the British Steel Corporation, which was formed last October with a capital of $5,000,000. This corporation had acquired the Briton Ferry Works and a site of 305 acres, situated between the Swansea Docks and Neath River, on which blast furnaces and coke ovens, with a capacity of 20,000 tons of pig iron, are to be erected. It is estimated that when this amalgamation is completed the new corporation will have the largest productive capacity in Great Britain and one of the largest in Europe. Other negotiations are in progress for the extension of the Baldwin interests to the manufacturing side of the steel business. It is understood that Baldwins will make an issue of £1,000,000 of new preference shares.

Another recently announced amalgamation of steel interests was that of the Furness group and the Seaton Carew Iron & Steel Co., of Teeside. This is the second merger negotiated by the Furness Corporation this year, the firm of Cochrane & Co., of Middleborough, having been acquired a short time ago.

BURIED AT MONTREAL

The remains of the late George Drummond, president of Drummond, McCall and Co., Ltd., wholesale iron merchants, Montreal, who died while in London in February, were laid to rest in Montreal on Monday last. The funeral was one of the largest for some time, and many friends of long standing were in attendance, the various associations of which the late Mr. Drummond was a member being represented, and the floral tributes being numerous and fitting.

Many American Advertisers Are Adopting "Standards of Practise"

There are some interesting thoughts for business in "Standards of Practice," which many of the advertising clubs of the country have adopted. These standards are worth reading. For example, here they are as printed on the back of an application blank for membership in the Advertising Club of Los Angeles, each member of the club being required to subscribe to them when he joins:

"We pledge ourselves to remember that advertising is and should be, first of all, an exponent of the square deal, and that it is only when business men put the interest of the buying public first that they take the best advantage of their opportunities.

"We will not, at any time, knowingly do anything which will injuriously affect advertising, nor will we carelessly speak ill of any advertising medium.

"We will work together to the end of making all advertising more truthful, knowing it will then be more effective and of greater benefit to the buying public.

"We will exercise care, individually, at all times, to see that every advertisement with which we have anything to do shall measure up to the plain, simple truth. We stand firmly for constructive advertising and condemn, without reserve, all forms of destructive advertising.

"To each other we pledge patient service toward the upbuilding of advertising in this community.

"To all business men of this community we pledge co-operation toward the advancement of the community's business along sane and proper lines.

"To the public whom we as a club serve primarily, we pledge our best efforts to make advertising the servant of the people in the truest sense."

Says Canadian Bridge Company is Not Merging With Steel Corporation

PERSISTENT rumors have been current recently, relative to a merger of the interests identified with the Canadian Steel Corporation, Ojibway, and the Canadian Bridge Company of Walkerville, but these were dispelled by Willard Pope, vice-president of the latter concern, when he informed a representative of HARDWARE AND METAL that his firm would not be absorbed by the mammoth industry at Ojibway.

"The Canadian Bridge Company," he said, "will continue to run, as in the past, an independent corporation. All rumors to the contrary are absolutely without foundation."

The Walkerville concern is now completing the last of eight merchantmen for the United States Government. Construction was done at the Walkerville plant and the parts shipped to the Atlantic seaboard for assembling.

Canadian steel structural business is due for a great impetus during the present year, in the opinion of Mr. Pope.

Mr. Pope believes the recent action of the United States Industrial Board in fixing base prices for structural material for the year 1919, at approximately $7 per ton lower than now prevails will have a stimulating effect on Canadian business. Domestic steel structural work, he explains, has been suspended practically, since the outbreak of hostilities, and since their cessation, buyers have been holding off in anticipation of reduced prices. Realizing there will be no further drop, they will now proceed with necessary work that has accumulated in the meantime, he declares.

Consequently, the Canadian Bridge Company is preparing for a business expansion, and toward this end have brought back to the Border Cities, C. F. Porter, who was associated in an important capacity in the erection of the Quebec Bridge, as chief engineer of the company.

Retail Merchants Want Code Amended to Stop Guessing Contests

DISCUSSING the attitude of the Retail Merchants' Association and guessing contests, "The Retailer," published by the Saskatchewan and Alberta branches of the organization, says:

"The Saskatchewan Provincial Executive of the Retail Merchants' Association of Canada, Inc., is unalterably opposed to any scheme of the nature of the contest now being conducted by the Auto Contest Company, as a means of increasing business, and has already taken steps to see that the section of the Criminal Code of Canada dealing with such matters is amended so as to effectively put a stop to any such scheme in the future. The association considers such contests to be bad in principle and altogether a vicious form of advertising. We believe also that instead of having a beneficial effect on the business of the merchant concerned, it has rather the opposite effect and results in raising a suspicion in the minds of the purchasing public that if the merchant putting on such a contest can afford to give away an automobile and $500 or $1,000 in cash, he is pulling down more profit on the sale of his merchandise than he is entitled to. The cry has been raised that, "If I don't go in, my opposition will." Well, let him, if he chooses to do so; we presume each individual retailer is running his own bcsiness, and not allowing his opposition to run it for him. Moreover, if each individual retailer would absolutely refuse to have anything to do with any such affair as this until the promoters had secured the endorsement of their Retail Merchants' Association, it would not be long before the country was rid of them.

If any proposed scheme is considered legitimate, and can be shown that it will benefit the retailer and his customers as well, the Association will be glad to help it along and the endorsement of the Association will go a long way towards insuring its success; but if the scheme is not up to the mark no time will be lost in saying so, and ten chances to one the promoters will not waste their time and ours by approaching us for our endorsement. This simply comes down to an individual matter. Let every merchant absolutely refuse to consider any such proposition until the endorsement of the association has been secured. Simple, isn't it?—but effective—and that is what your association is for. Don't fall for it first, and then "holler" afterwards. Usually there is a mighty poor chance of recovering any of the money you have invested. Do business with legitimate concerns in a legitimate way.

DOMINION BOARD WILL MEET IN VANCOUVER NEXT YEAR

The aims of the Retail Merchants' Association were outlined by speakers from the various provinces at the banquet held Tuesday night.

The part played by the Dominion in the great struggle just concluded was touched upon, as was the question of a lower tariff by Mr. Coulson, of Regina.

A big excursion of the association will take place next September, when delegates will take a trip to Vancouver, where the next session of the Dominion board is to be held.

B. C. MANAGER FOR PAPER HOUSE DIES SUDDENLY

Vancouver, B.C., March 27—Special—E. A. Baker, British Columbia manager of the J. C. Wilson & Co., Ltd. wholesale paper distributors, died very suddenly. He was born in Cornwall, Ontario, sixty years ago and was one of the founders of the Baker-Leeson Co. in 1902, which later became the R. W. Leeson Co., then the Leeson, Dickie, Gross and Co., and later still became the Western Jobbers, Ltd. At one time Mr. Baker worked for Oppenheimer Bros. He has been a manager for Wilson Co. since 1904. He was thirty-second degree Mason, a prominent Oddfellow and a Presbyterian.

THE CLERKS DEPARTMENT

Did You Know That Walt Mason Formerly Worked in a Hardware Store?

Famous Humorist Wanted to "Sell Handsome Silverware to Stately Dames, But Was Kept Busy Carrying Kegs of Nails Upstairs"

"THERE might be few human failures in this beautiful world if every delegate could discover, early in life, just what he is cut out for, and govern himself accordingly, but the sidewalks are swarming with people who are doing the wrong thing, and don't know it, says Walt Mason in the "American Magazine."

Myriads of people are started wrong by their parents. The proud father surveys his bunch of children, and says: "Algernon Augustus will be a preacher; there always has been a clergyman in the family since the days of William the Corn Curer. Achilles Philologus must be a lawyer, for he already shows a tendency to grab everything in reach, and raises a rough-house if anything is taken from him. Arabella has decided musical talents, and I hope to live to see the day when she will play rings around Paderewski, or back Galli-Curci off the walk as a vocalist."

How It Worked Out

So the children are reared and educated accordingly, and in the fullness of time we see Algernon driving a dray, and Achilles impounding dogs for the municipality, and Arabella is a tight-rope walker in the circus. Meanwhile, after quitting their prearranged vocations, they have tried everything, and never found the thing they really could do.

There probably is some task fitted to every man, something of which he might make a glittering success; but unless he stumbles against the task accidentally, or it is revealed to him in a dream, he may never identify it. And so we have our mute, inglorious Miltons who are plying spades because they never chanced to get hold of lyres, and village Hampdens and Cromwells running shooting galleries or hot-dog joints.

Was 50 Years Old

I had lived half a century before I discovered that I could do one thing well enough to make life a success—and then another man discovered it for me. I had a talent for rhyming, and never valued it. I had the idea that I could write profound editorials, and draw pictures, and make two bales of hay grow where one grew before, and a lot of other things; but there were countless people who could do such work better than I could, and I groped around for years and years, trying to find some place where I really fitted, and always was a square peg in a round hole. And all the time I carried around the one little talent that might have provided me an igloo in Easy Street.

In Hardware Store

As a boy I worked in a woolen mill in Canada, and hated the work bitterly. I was convinced that people should quit wearing clothes, so that woolen mills might be abolished. Later I worked for a year or more in a hardware store. Every visions of a rapid rise to a partnership. I would marry the beautiful daughter of the chief partner and live happy ever after. with vassals and serfs at my side. But the dreams always fizzled out soon. I found the hardware business a bore. Instead of selling handsome silverware to stately dames, I was kept busy carrying kegs of nails upstairs. There were no laws governing working hours in those days, and a clerk began his duties at one o'clock in the morning and got through at midnight.

Wrote Poetry

In my breathing spells I wrote poetry and sent it to the local paper. The editor, J. B. Trayes—the paper was the Port Hope, Ontario, "Times"—stopped me one day and told me, in a kind, fatherly way, that in time I might make a passable writer if I would learn to spell and try to cultivate cordial relations with the English grammar. He pointed out that such expressions as "I seen" and "I have went" and "I hadn't ought" are not endorsed by the great masters of literature.

I felt so discouraged by his remarks that it was a long time before I submitted further elegies to editorial eyes.

Tries Farming

Then I went to New York State to revolutionize agriculture. I had an uncle there and he took me into his home and made me one of the family. I had the usual iridescent dreams of becoming a landed proprietor, handing out largesse to a worthy peasantry. But farming, even with the kindest of bosses, involves some hard work, and hard work never appealed to me. There were cows to milk in the morning, and beans to hoe all day. I found it imposible to carry a fan and parasol when hoeing beans, and the heat annoyed me greatly. My uncle soon saw that I was a liability rather than an asset, and set me down as a false alarm.

The World's Error

And this is an error that the world falls into every day in its judgment of men and boys. If Richard Roe fails at two or three things he is set down as an incompetent; whereas the truth probably is that he is a misfit who hasn't yet found the place where he belongs. They used to say that Patrick Henry was no account; they talked the same way about Ulysses S. Grant, and myriads of others.

And so I left my uncle's farm and journeyed westward in a desultory way. In Charleston, Illinois, I loaded a large grip with "novelties," including plush photograph frames, magnificent albums, and many things no sane people could have any use for, and visited the homes of the proletariat, trying to make sales. The women were polite, as a rule, and invited me in, and gossiped freely about the weather and the crops, but they wisely new job always looked charming until I got into it. Being imafinative, I had drew the line at buying any of my wares. One day, after I had walked about ninety miles, carrying my grip, which weighed three hundred pounds, the city marshal told me if he saw me peddling around any more he'd cast me into a loathsome dungeon. Agents had become such a nuisance that the town council had just framed an ordinance casting them into outer darkness. I've always had a friendly feeling for that officer for giving me a timely warning instead of leading me to the moldy straw.

Was Dead Broke

And so, in the course of time, I arrived in St. Louis without any retinue or unseemly pomp. I was dead broke, as usual, and took the first job that offered, which was kicking a job press in a big printing office. When I went to work I plainly saw myself the manager of the establishment in a brief time, and was convinced that I'd be elected mayor later on. The establishment did a lot of work for a tobacco firm, and one day this firm burst into song, sending in some rhymed copy celebrating a new brand of smoking tobacco.

Gave Him $2 For It

I was called in to read proof with the foreman, a fine fellow named Mack, and I casually remarked that the poetry must have been fashioned by the village blacksmith, for it was rotten stuff. I took a piece of paper and wrote out a version I thought better. Mack also thought it an improvement, and sent my verse around to the tobacco house. The manager there sent it back with his approval, and later gave me two dollars for doing the trick. This was the first money I ever received for verse. It revived my interest in the fine arts and belles lettres.

There was a weekly humorous paper edited by A. B. Cunningham, later of the Baltimore "News." I at once sent him some poetry, and he wrote and asked me to call at the office of his paper, the "Hornet." He was a big, jovial Southerner, and he explained that the "Hornet" wasn't a money-making concern, but he would pay me five dollars a week to make myself useful around the office. If the paper prospered, so would I. It seemed an obvious thing that the paper would prosper when I was connected with it, so I went to work there, and in the course of a few weeks the journal clasped its tired hands across its breast and curled up and died.

They All Died

I managed to hook on to several small papers after that, and they all died. When I joined them they might have the bloom of health in their cheeks, as it were, but they couldn't stand my blighting presence. They had a swift journey from the gilded saloon to the bier and the shroud. Oh, why, may I ask, should the spirit of mortal be proud?

This casualty list convinced me that I was a square peg in a round hole where journalism was concerned, and I travelled to Kansas, where, in the absence of any other employment, I again started in to place agriculture upon a higher plane. I was twenty years old and a chronic failure, so far. For a time I wrestled with mules at an average of fifteen dollars a month,

hating the work worse every day. Then, by a desperate effort I got into newspaper work again, this time on daily papers of rugged constitution, and they didn't die of it.

Was Book Agent

I was in and out of newspaper work for many years thereafter. Often I tried other occupations, still groping for the place where I'd really fit. In Omaha I became convinced that the mission of a book agent is ennobling and educational. I secured a sample copy of a valuable work entitled "Manual of Social Forms." It described all the finer curves of etiquette. It told how to eat soft boiled eggs without getting them on your whiskers, and how to back out of the throne-room, when presented at court, without falling over the furniture. I ascribe my queenly grace of movement, and majestic port, to my profound study of this admirable volume.

Got Out Quickly

I went up to Frank Ransom's office. Mr. Ransom was—and probably is—a distinguished lawyer of Omaha, and I had been introduced to him once when I was well clothed and prosperous, and remembered him as a genial man. So I selected him as my first victim. I found him seated at a desk, and when he looked up and saw me with a book about the size of a billiard table, he reared up to a height of eighteen feet, produced his watch, and said he'd give me just thirty seconds to reach the foot of the stairway. I made it in twenty-eight. He told me afterwards that he didn't recognize me; but the result probably would have been the same if he had, for he confessed to a shuddering dread of book agents.

Then I tried the residence districts and stuck to it three or four days without selling a book, when I concluded that I still was a square peg.

Out on the Farm

Farming has a peculiar fascination for people who have once indulged in it. When I am on a farm I detest every kind of work connected with it; but when I am at other work I hear the barnyard calling, calling me.

During the reign of Grover Cleveland I yielded to this urgent call once more, and established myself at Beatrice, Nebraska, where I bought a suburban home, and rented fifteen acres of land, and mixed up newspaper work and agriculture.

I wrote prose essays and stories, and sold them for what they would fetch, and also contributed a column to a local newspaper. The total income from my literary labors amounted to about fifteen dollars a week. I raised corn and hogs and thunder, and had settled down to harmless mediocrity and genteel poverty. I had my little talent as strong as ever, but didn't consider it of any worth.

A Great Contrast

At this time there lived in Beatrice a young man named George E. Haskell. He was a great contrast to myself. He knew just where he fitted, and had definite plans in life. He was operating a small creamery, and while he conducted his air-cooled churn he was dreaming dreams. But his dreams had some sense and purpose in them. The creamery business in the West then was a joke. There were cheap little creamery buildings all over the country, and they were forever going broke.

Mr. Haskell had the idea of organizing the creamery business on a sane basis, with a central plant for churning, and receiving stations for collecting the cream. Meanwhile, he wanted to get the farmers interested in dairying, and proposed to establish a monthly farm paper to spread the right kind of propaganda. He offered me the job of editing it, and I seized it with eagerness, although I knew less about cows than the cows knew about me. But I read bulletins and trade papers and stored my mind with much information.

The Dairy Business

So I began writing wise things about balanced rations and butterfat, and after a while convinced myself that at last I had found my true sphere. Dairying was the square hole adapted to the square peg. There's nothing more convincing than your own writings. Cows in those days were reasonably cheap, and I managed to buy nine or ten of them, and got stung in several instances. The man who goes shopping for cows should be able to judge the goods. People who sell cows have small regard for the truth, as a rule, and their affidavits are worthless.

I bought a large black cow from a man who had held many offices of trust and honor. When I started to lead the animal away he and his wife both wept, and said it was like parting from a beloved aunt. They put their arms around Bossy's neck, and made such a fuss that I felt guilty when I took her away. The cow really had an amiable disposition and an excellent moral character, but she was subject to fits, and sometimes when I'd be milking her she'd sit down in my lap and squash me against the side of the stall.

Accomplished Kicker

I had another cow, a Holstein, that must have taken boxing lessons with her feet. She was the most accomplished kicker I ever saw, and was always landing left hooks and other haymakers on my shirt bosom, until I learned to tie her legs together when milking her. I sold her to Kirk Griggs, a prominent ranchman, and he said he got along with her all right, as he milked her through a fence.

I fed my cows in strict accordance with the rules laid down by Hoyle and other authorities. Their rations were so nicely balanced that I used an apothecary's scale in preparing them. I wanted to publish the results in the farm paper for the guidance of other producers of butter-fat—but I didn't; they were too discouraging. This enterprise, like nearly everything I tried, was a dismal failure. My cows didn't produce enough to pay for the refreshments they consumed, and in the end I took them down to the creek and drowned them.

Was Enthusiastic

Meanwhile Mr. Haskell was making his dreams come true. Here was a man who had a passionate enthusiasm for his work. Everything connected with the creamery industry was of profound interest to him; a cow was more beautiful to him than a sunset; a load of alfalfa outclassed a rainbow. Not that he lacked artistic perception; but his whole heart was in his work and nothing but success was possible to him. He established his central creamery, and his receiving stations, and moved forward a bit every day, and in a few years he was at the head of the greatest creamery organization in the world.

Smiled No More

My painful experience with cows and balanced rations left me an embittered man who smiled no more; but after a year or two I recovered sufficiently to become interested in hogs. Many people were becoming beastly rich raising hogs, and if they could do it I surely could. So I fenced in several lots, and built the most fearful and wonderful hog house ever seen in the United States. They talk about it in Beatrice to this day. It had galleries and porches and all modern conveniences. People used to stop, as they drove by, to see my hogs sunning themselves on a balcony twenty feet from the ground. You see, I had studied the subject thoroughly, and found authorities agreed that most swine diseases were due to lack of exercise. So I made my hogs exercise. In order to get anywhere they had to traverse corridors, and climb stairways, and loop the loops, and perform on the horizontal bar.

A Heavy Loss

I had a beautiful bunch of porkers when fall came, and was arranging to sell them, and the money was to pay off an indebtednes sthat had been weighing me down a long time. One morning I went out with a bucket of swill, and found one of my largest hogs dead. Two or three others were sick. Then for days together I was busy burying my dead hogs. The whole bunch, with the exception of two or three runts, died the death. It is strange how the runts always hang on, when youth and beauty are being carried to the tomb.

I covered myself with sackcloth and ashes and established a lodge of orrow, and for weeks my wife handed me my victuals with a ten-foot pole, for it wasn't safe to approach me.

And all the time I had a little talent that might have made me independent of hogs.

And I was making futile use of my little tenpenny gift. People who needed poetry for any purpose called upon me. If a leading citizen met an untimely death, and somebody wanted to read an original poem at his grave, I wrote the poem, and was expected to consider myself honored when asked to do it.

His Reward

If a merchant prince contemplated a fire sale, and wished to have some unusual advertising, he asked me to write up the matter in Miltonian verse, and I did it, as a matter of course, and perhaps received a package of boneless codfish as a reward.

During political campaigns I was often called upon to sound a clarion note in verse, and I don't recall ever receiving anything for it, except an occasional asbestos cigar, of the kind candidates favor.

I held the talent cheaply, and, of course, others took it at my valuation.

After many vicissitudes, I drifted into Emporia, Kansas, and went to work for William Allen White's paper, the "Gazette." There I wrote editorials which I considered highly important if not epoch-making, and once a day I produced a little rhyme to fill a corner on the front page.

Got a Start

Mr. White had found me a derelict, at the threshold of old age, and he wanted to see me prosper. So he proposed to have some of my work syndicated. But he didn't choose the illuminating editorials. He saw possibilities in the rhymes; and when once they were syndicated and earning money for me, I took them seriously, and put the best work I could into them, for the first time in my life. Had it not been for meeting a man with more sense than I possessed I never would have seen any possibilities in the verses which have made me comfortable in my advancing years.

And I know there are myriads who could do something well, and convert indigence into prosperity, if they only could determine what that something is. Nature plans a man for something definite, and then fails to let him know what it is, and he goes groping, groping for the task he can perform and enjoy the performance.

There is no hamlet so small that it hasn't its misfits. At the crossroads you will find the preacher who should have been a painless dentist, and the schoolteacher who should have been a lion tamer, and the piano tuner who was meant to be a hayrake chauffeur.

The cities are swarming with the misfits, men and women who have been dumped into occupations they hate, and for which they are unsuited; but how is anybody to tell them where their true destiny lies, since they don't know themselves?

Ernest Clarke, commercial manager of the firm of Herbert Terry & Sons, Ltd., Redditch, England, manufacturers of metal springs and other light metal goods, is visiting Canada and getting in touch with a number of manufacturers.

Says Fire Chiefs Are Afraid to Enforce Laws Which Would Reduce Canada's Heavy Losses

Dominion Fire Commissioner Discusses Remedial Measures With the Members of the Canadian Credit Men's Association

SOME rather serious allegations were made by J. Grove Smith, of Ottawa, Dominion Fire Commissioner, at a meeting of the members of the Canadian Credit Men's Association.

In pointing out that seventy-five per cent. of the fire loss is caused by five per cent. of the fires, he made the statement that his department can, if given a free hand, reduce the huge fire wastage in Canada by fifty per cent. in three years.

"The million dollar fires are in million dollar buildings every time," he said. "Our campaign must be directed against the business men. It is no use teaching women and children to guard against fire. The woman who upsets a lamp in a cottage is not the party responsible for our huge losses. The great losses come in our business buildings, and they come because we are not concentrating our legislation. There are too many statutes and the result is a scattering of effort. No one is responsible.

Use Their Influence

"There are too many influential citizens among the business men who use their influence. Talk about a fire chief attempting to enforce fire laws. It is absurd when you stop to consider that so many of these appointments are made the way they are through political "pull," and that fifty per cent. of the officials who are supposed to enforce the laws are unable to do so because of influences that can bear upon them through lodges or politics. Permissive legislation has proven itself useless in dealing with this big matter. Investigating fires after they have occurred is useless. The thing to do is to prevent them. We must revise our methods and concentrate on this work. Ninety-nine per cent. of the cause of fires is fully realized by nine-tenths of the people. In several of the provinces the work to further fire prevention has not progressed because there have not been sufficient funds."

All Are Affected

Mr. Smith pointed out that every fire loss that occurs in Canada affects every individual from Halifax to Vancouver.

"Because it puts an indirect tax upon us all so that many do not realize, we bear it willingly," he said. "But the tax is there none the less. It is part and parcel of every commodity. Every loaf of bread for intsance is insured from the time the wheat is gathered on the prairie or field until it arrives on the consumer's table. Insurance is merely an indemnity. We should keep that in mind. It does not restore loss once it has occurred. Insurance cannot bring back the building or the stock that has vanished in smoke. Education in regard to fire prevention has been left too much to generalities. There have been a few items sent to the newspapers urging women and children to be careful with matches or telling men not to throw cigar stubs away carelessly, and all that sort of stuff. It is all right as far as it goes, but we are not getting anywhere by this work. We must get a bigger conception of the work. Since Confederation, no less than $350,000,000 worth of Canadian property has fallen a prey to the flames. When you add to this our expense for insurance, the cost of water supply systems, and the maintenance of fire departments, it means that it has cost us in the neighborhood of $900,000,000. The unfortunate thing about it all is that our losses are steadily increasing.

Huge Canadian Loss

"Canada, with a population of only eight and a half million people, has the highest per capita fire loss in the world; that is $4.25. We have been and are still careless of our wealth. We are squandering without any regard for the people of the future and their needs. Our enormous forest fire losses should teach us this lesson alone. The time has come when we must conserve. It is of vital importance to every one of us to stop these losses. The future of Canada depends to a large extent upon our industrial efforts. We are not by any means finished yet with commercial rivalry from Germany and Austria. There are other nations to consider also. Our manufacturers will have to compete against keen competition, and one of the drags upon their progress is this indirect tax on everything due to fire losses. It is our duty to-day to conserve and protect to the fullest extent the magnificent heritage Canada has. We have been doing just the opposite.

Applying Palliatives

"Instead of going directly to the root of the trouble we have been applying palliatives. We must go to the source of the trouble as quickly as possible. Teaching children in schools is good work; telling the women to be careful with matches is good work, but the big losses are in our business districts. From a community point of view, if a man's premises are a fire hazard the community should have sufficient interest in the matter to make him remove the menace by making improvements. We have legislation. There is Dominion law and Provincial law, and municipal statutes. No one is responsible, and we are getting nowhere. There is too much division of authority and the laws are not being enforced. In a broad sense all fires are local. They come right down to us as individuals every time. We have, I suppose, about 4,000 fire halls and departments in Canada. What we want is that these men should be sent out to prevent fires before they start. Splendid work can be done in this direction. These firemen should inspect and advise property owners and reduce to a minimum the possibilities of fires starting. It takes trained men to get the best results in this work, and the men who do it should be efficient."

Hits the Agents

Mr. Smith stated that there are between 20,000 and 30,000 fire insurance agents in Canada. He declared that they were not as a whole giving the public the service which was to be expected from the premiums paid.

"There are too many of them have side lines," he said, "or insurance is a side line with them. Street car conductors sell insurance, and any number of other individuals. Agents should be licensed on the basis of their qualifications.

"Canada has the heaviest per capita fire loss in the world and Ontario has the heaviest loss in Canada. We must do something. As matters stand now it is not sufficiently centralized to secure efficiency, and the local enforcement is affected by political or other influence. If given proper support our department can reduce Canada's fire losses in three years by fifty per cent. We must have some way of overcoming political or other influence. One way perhaps is to amend the criminal code so as to make it possible for any one who causes fires by negligence to be prosecuted in the proper courts. I do not think if we had this law that we would need to invoke it, but it would be there in case it were needed."

Mr. Arthur Hewitt, of the Ontario Fire Prevention Leauge, spoke of the fire waste in Ontario and also mentioned the Arson Trust in the United States. an organization which, it is stated, defrauds the insurance companies out of $8,000,000 yearly by deliberately-planned fires.

The insurance committee of the Credit Men's Association will discuss the fire prevention question shortly and recommendations will probably be made in line with some of Mr. Smith's suggestions.

HOW TO ARRIVE AT YOUR INCOME TAX

First take your income,
Add wife's income.
Divide by your eldest son's age,
Add your telephone number,
Subtract your auto license number,
Add electric light bill,
Divided by number of kilowatts,
Multiply by your father's age,
Add number of gold fillings in teeth,
Add your house number,
Subtract your wife's age (approximate).
Divide by number of aunts you have,
Add the number of uncles,
Subtract number of daughters,
Multiply by number of times
You have gone up in an airplane,
Subtract your best golf score;
Add a pinch of salt
And then go out and
Borrow the money and pay the tax.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

THE markets this week have undergone many changes, and steel and iron goods are showing the effects of the new schedule which has gone into effect in the United States. Further price changes in several lines are expected at any time. In the trade the opinion seems general that with many lines of goods having reached as low prices as may be expected for some time, that there will be a stimulation of business.

The market for turpentine and linseed oil remains firm, and is expected to. In some quarters advances are predicted again, owing to the demands from overseas and conditions that prevail in regard to supplies of raw materials. Deliveries are being made for orders placed some time ago, and this is also creating activity. The outlook is for good business generally.

A decline in the price of wire nails took place this week, but cut nail prices show no change.

Many important reductions are noted in the prices of sheets.

New prices are named also for cast iron pipe and fittings.

Manufacturers state that as a result of conditions in the bristle market brush prices are going to be very firm.

Business in general shows a steady improvement and inquiries that are being received indicate that it is opening up nicely in a great many lines. Great building activity is anticipated.

MONTREAL MARKETS

MONTREAL, March 27. — Of greatest importance this week are the reductions made for wire nails, staples and various kinds of wire, iron and steel. These were rather anticipated following the reduction made in basic steel prices last week in the United States. Staples and barbed wire figure in the declines made, also poultry netting staples, while, as yet, cut nails are unchanged. Further reductions are also made in the prices on black and galvanized sheets, while washers are lower and also stove pipe dampers. Stove pipe wire is lower and lead is a shade easier.

Wrapping paper is up 25c per 100 pounds and mirrors of various kinds are also higher.

There is a fair amount of business and this will increase with improved roads. The feeling in the trade is continually better and a good season is anticipated.

Wrapping Paper Up; Mirrors Also

Montreal

WRAPPING PAPER, MIRRORS.—An advance in the price of Kraft wrapping paper has been made, the basis being increased 25c per 100 pounds to $10.75. Mirrors are up in price, too. Ordinary grade in size 8 by 10, with arched top, are quoted at $10.20 per doz.; 9 by 12, $12.25, and 10 by 17, $17.40. Louise design are selling as follows: 5 by 7, $2.75; 7 by 9, $3.85; 8 by 10, $4.55; 9 x 12, $5.70, and 10 by 14, $7. "Excel" 4 by 6 are quoted at $1.90; 5 by 7, $2.40; 6 by 9, $3.10; 7 by 9, $3.45; 8 by 10, $4.10; 9 by 12, $4.15, and 10 by 14, $6.40.

Washers; Dampers Are Lower

Montreal

DAMPERS, CAST WASHERS.—Prices for cast stove pipe dampers have been revised downward and the new prices per gross are as follows: 5 in., $13.50; 6 in., $15, and 7 in., $19.20. Cast washers are reduced to $5.75 per 100 pounds.

Stoves Are Steady; No Ware Changes

Montreal

STOVES AND WARES.—There is little interest in stoves and ranges as yet, although these will probably start to move soon. Wares have been fairly good sellers, and while there is no change on these as yet, the reductions made in steel prices last week will doubtless have some bearing ere long on the prices being quoted.

Wire Nails, Wire And Staples Down

Montreal

NAILS AND WIRE.—Declines have been effected here for wire nails. The base on standard is reduced to $4.75 per keg, while that for cut remains unchanged at $5.35. These may be reduced later. Bright wire staples are down to $5.10 per keg and galvanized to $5.85, while the price for 25-lb. boxes in each case is 50c per 100 pounds higher. Barbed wire is down to $5.30, and plain twist to $5.80 per 100 pounds. Galvanized coil spring wire No. 9 is quoted at $4.95 and No. 12 at $5.10. Plain galvanized wire is reduced to $4.90 for No. 9; $5.05 for No. 12, and $5.15 for No. 13. Plain bright wire is down to $5 base, and for annealed, oiled and coppered the base is the same. The discount on poultry netting staples is increased to 20 per cent. Stove pipe wire No. 18 is reduced to $8.25 per 100 pounds, and No. 19 to $8.75.

Rope Movement More Promising

Montreal

ROPE AND CORDAGE.—For the past ten days or two weeks there has been a better movement of rope, but there is still room for improvement. The market has steadied down somewhat and there are no further revisions this week, pure manila holding at 34c, British manila at 30c, and sisal at 27½c. The only change made in cordage is that of a revision to the old price for manila clothes lines which are advanced again from the price of $3.75 quoted last week to that of $4.25.

Better Movement Gasoline and Oil

Montreal

GASOLINE, COAL OIL.—A heavier movement of gasoline is noticeable, and there is likely to be more sale right along, the roads becoming better from day to day. Prices are steady and held still at 34c for motor grade, per Imperial gallon. Coal oil is steady and unchanged at 20c to 23c per gallon.

50c *and* 55c *Reduction On Iron and Steel*

Montreal

IRON AND STEEL. — Reductions ranging from 50c to 55c per 100 pounds are made in iron and steel. This follows the changes made last week in steel prices, and is in accord with the tendencies pointed out in HARDWARE AND METAL at that time. There is a fair movement and the new prices will probably accelerate demand, particularly as there are indications that these prices will continue to rule.

Common bar iron, per 100 lbs.	3 75
Refined iron, per 100 lbs.	4 75
Mild steel	3 75
Iron finish machinery steel	3 80
Norway iron	12 00
Single reeled machinery steel	5 50
Spring steel	5 50
Sleigh shoe steel	3 75
Tire steel	3 95
Toe calk steel, per 100 lbs.	4 65
Band steel	3 75
Harrow tooth steel	3 90
Mining tool steel, per lb.	**0 17½-0 19**
Black Diamond tool steel, per lb.	**0 18 -0 19**
Black Diamond cast steel, lb.	**0 22**

Both Kinds Sheets Reduced 25c

Montreal

SHEETS AND PLATES.—A reduction of 25c per 100 pounds is made in the basis of both black and galvanized sheets. This makes a fairly low price on the various grades and gauges, and there will doubtless be a larger movement in view of this and because of the better weather conditions that have arrived.

BLACK SHEETS—	**Per 100 lbs.**	
10 gauge	$6 00	$6 50
12 gauge	6 10	6 65
14 gauge	5 85	6 50
16 gauge	5 95	6 55
18-20 gauge	6 10	6 75
22-24 gauge	6 15	6 15
26 gauge	7 20	6 90
28 gauge	6 35	7 00
GALVANIZED SHEETS—		
10¾ oz.	....	$9 25
28 gauge	....	8 75
26 gauge	....	8 50
22 and 24 gauge	....	8 35
20 gauge	....	8 35
18 gauge	....	8 35
16 gauge	....	8 00

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Solders Reduced; Lead Sheets Held

Montreal

LEAD PRODUCTS.—The base prices for various solders are reduced this week and the reductions total about 2 to 2½c. Wire solder is also lower. Lead pipe and lead sheets are held unchanged. In a general sense there is some business sifting in all the while, but this, for the most part is confined to small and frequent orders.

Lead pipe, lb.	....	$0 12
Lead pipe (cut lengths)	....	0 13
Lead waste pipe, lb.	0 13	....
Lead traps and bends	**Net list.**	
Lead wool, lb.	....	0 14

Lead sheets, 4 to 8 lbs., s. ft.	....	0 11
Cut sheets, ¾c lb. extra, and cut sheets to size, 1c. lb. extra.		
Solder, guaranteed, lb.	....	0 38
Solder, strictly, lb.	....	0 35
Solder, commercial, lb.	....	0 33
Solder, wiping, lb.	0 31	0 35
Solder wire (8 gauge)—		
40-60	....	0 36¾
45-55	....	0 39¾
50-50	....	0 42½
Zinc sheets, casks	....	0 17
Do., broken lots	....	0 18

Some Hope Seen In Old Material

Montreal

OLD MATERIAL.—As the season proceeds there is an apparent awakening of interest in old scrap. This, it should be said, is not decidedly manifest as yet, but there is a healthier condition than that prevailing all winter. Prices are without change to speak of, a few readjustments being made.

Dealers' Buying Prices—		
Pipe scrap, ton	8 50	9 00
Stove plate, ton	....	15 00
No. 2 busheling	....	5 00
Old rubbers, boots and shoes	0 06	0 06½
Overshoes, lumbermen's rubber boots	....	0 03½
Bicycle tires	....	0 03

Tin Steadier; Lead Easier

Montreal

INGOT METALS.—The markets are decidedly slow and uninteresting. There are practically no changes, although some are quoting lead down a trifle. Tin is steadier.

COPPER.—While the movement is limited here the price basis is without change and this is still 19c.

TIN.—Cables from London indicate some greater strength there. The position here is steady and without change, basis being 60c.

LEAD.—While it is nominally unchanged some are selling lead in large lots on a favorable price basis, but there is a dearth of extensive business. The basis holds at 7c to 7½c.

ANTIMONY.—There is no change on this. It is stated that some of the larger operators across the line are taking on future business at a lower rate. Local price holds at 8c per pound.

SPELTER.—Little business is taken on and the price remains at 9c.

ALUMINUM.—Naturally there is not much demand for this. The basis is the same as last week with 40c per pound quoted.

PIG IRON.—$45 per ton continues to be the price here for this.

TORONTO MARKETS

TORONTO, March 27.—Lower prices in many lines of iron and steel products feature this week's quotations. The Canadian firms are meeting the new schedule of prices which were put into effect by the American steel magnates, even though in some cases it means disposing of stock that was purchased at high prices. Nail prices are lower, and a substantial reduction is announced in cast iron pipe and pipe fittings. While trade in some lines is reported quiet, it is opening up nicely in many others, and a noticeable improvement is reported. A great deal of activity in lines required by the building trades is anticipated. Reduced prices on flashlight batteries are now in effect.

Reduction Made in Flashlight Batteries

Toronto.

FLASHLIGHT BATTERIES. — The list prices on reliable flashlight batteries have been reduced to the following: No. 222, 40c; No. 322, 45c; No. 324, 50c; No. 422, 45c; No. 423, 50c; No. 442, 45c; No. 443, 60c; No. 445, $1.00; No. 452, 45c; No. 552, 45c.

The above list prices are subject to regular flashlight discount.

Sharp Revision in Cheaper Corn Brooms

Toronto.

CORN BROOMS.—As a result, it is stated, of price cutting in some quarters and a general easing up in the cost of raw materials, a sharp reduction has been made in the cheaper grades of corn brooms, which are now listed at $8.30 per dozen, as against former quotations of $9.35 per dozen. Prices in all the better grades remain firm. A fair volume of business is being handled.

Nail Prices Lower; Wire Also Reduced

Toronto.

NAILS, WIRE.—The price of nails again shows a decline, the present quotation for wire being $4.70 per hundred pounds base, and cut at $5.35 per hundred pounds base.

Wire is also down and the quotation for smooth steel wire is $5. Improvement in business is expected as a result of building activity.

Gasoline in Demand; No Change in Prices

Toronto.

OILS, GASOLINE.—Owing to the normal demands for gasoline being steadily increased by the quantities re-

quired for tractor purposes, trade in this commodity is very active. Price quotations show no variation from the former figure of 33 cents per gallon. A brisk demand is reported for machine oils. Coal oil prices are steady at from 19½ cents to 22½ cents per gallon, according to grade.

No Change in Stoves; Summer Lines Moving

Toronto.

STOVES, WARES. — The country trade is calling for shipments of oil stoves and ovens, and as a result there is considerable activity in these lines. A number of orders for gas and electric stoves are also being filled. Manufacturers without exception declare there is no prospect of any lower prices, owing to the wages that are being paid. There has been an improvement in the trade in all lines of wares and the outlook is regarded as satisfactory.

Revision of Prices in Iron and Steel

Toronto.

IRON AND STEEL.—A steady and rapid improvement in business is expected to follow the new prices for iron and steel. It is generally expected that the prices set this week will obtain for many months. The prices are as follows:

Common bar iron	$4 50	$4 75
Common bar steel	4 50	4 75
Refined iron	4 90	5 15
Angle base	4 75	5 00
Horseshoe iron	4 75	5 00
Tire steel	4 70	4 95
Mild steel	4 50	4 75
Norway iron	11 00	13 00
Toe caulk steel	5 40	5 65
Sleigh shoe steel	4 50	4 75
Band steel, No. 10	4 75	5 00
Do., No. 12	5 00	5 25
Spring steel	9 50	11 50
Mining drill steel	21 00	30 00
Sheet cast steel	0 42	0 45
Tool steel	0 22	0 30

Higher Prices Are Asked For Sheets

Toronto.

SHEETS, PLATES.—There is a decidedly firmer tendency in the prices of black sheets and slight increases are noted this week in a number of lines. The quotations are as follows:

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$6 80	$7 50
12 gauge	6 50	6 75
14 gauge	6 00	6 25
16 gauge	6 00	6 25
18-20 gauge	....	6 50
22-24 gauge	....	6 55
26 gauge	....	6 60
28 gauge	....	6 70
3-16 inch plate	....	6 25
¼-inch boiler plate	....	5 80

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS—		
10¾ oz.	$8 10	$8 50
U.S. 28	7 70	8 20
U.S. 26	7 40	7 90
22 and 24	7 25	7 75
18 and 20	7 10	7 60
16	6 95	7 45
14	....	6 80

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Fair Demand For Corrugated Sheets

Toronto.

CORRUGATED SHEETS.—A steady improvement in the demand for corrugated sheets is reported. Many recent inquiries are being converted into orders and still other inquiries are coming in. Good weather from now on is expected to maintain the improvement that has already taken place. Prices are unchanged:

	Per 100 sq. ft.	
Corrugated Sheets—	Gal'zed	Painted
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Cast Iron Pipe and Fittings Are Revised

Toronto.

CAST IRON PIPE, FITTINGS.—New quotations for cast iron pipe and fittings, effective immediately, are as follows: 4 inch cast iron pipe, medium and heavy, 25 per cent. off; 2, 3, 5 and 6 inch, medium and heavy, 20 per cent. off; 2 to 6 in. fittings, 35 per cent. off; 8 in. pipe and fittings, 15 per cent. off.

Firmer Prices For Brushes Expected

Toronto.

BRUSHES.—Brush makers who have been receiving new quotations on bristles, state that brush prices for the future will be very firm. Increasing export business will also be a factor in this direction, it is stated. High wages are another cause which manufacturers state will prevent prices coming down any for some considerable time.

Boiler Tubes and Wrought Pipe Steady

Toronto.

WROUGHT PIPE, BOILER TUBES. —No changes are reported in prices of wrought pipe and business is only fair. Boiler tube quotations are steady, and it is expected there will be no change for some time. Sales are showing improvement and prompt deliveries from the mills are being secured.

	Per 100 feet	
BOILER TUBES—	Seamless	Lapweld
1 inch	$28 00	$.....
1¼ inch	32 00	.....
1½ inch	35 00	28 00
1¾ inch	35 00	28 00
2 inch	40 00	28 00
2¼ inch	43 00	30 00
2½ inch	45 00	35 00
3 inch	52 00	40 00
3¼ inch	.....	47 00
3½ inch	62 00	48 00
4 inch	70 00	60 00

Many Inquiries For Lead Products

Toronto.

LEAD AND ZINC PRODUCTS.—Many inquiries which promise to develop into good business are reported. Prices on these lines are expected to remain firm.

No Changes Made in Wrought Iron Pipe

Toronto.

INGOT METALS.—Trade in these commodities is showing increased activity and even more activity is expected. Copper prices are inclined to be easier, but do not show any material change. Tin is expected to continue firm.

COPPER.—Business in copper promises to be steady, as the price situation now is such that buyers are more confident. Ample supplies are in hand and quotations are being made around 18 cents a pound.

TIN.—Tin prices remain firm, but are not expected to show any change before June 1. A fair volume of business is being done, the quotations being at 60 cents.

SPELTER.—Business in spelter is reported as quiet with prices ranging from 8¼ to 8½ cents per pound.

LEAD.—The outlook for increasing business is reported as good as numerous inquiries are coming to hand. The price is steady at 7½ cents a pound.

ALUMINUM.—Business in this line is quiet, with little reason to expect any immediate activity. Quotations are made at around 50 cents a pound.

ANTIMONY.—There is little demand in this line even at the lower prices of 8¼ to 8½ cents.

LONDON MARKETS

LONDON, Ont., March 27.—Business continues seasonably good. Paints oils, varnishes and other spring household lines are beginning to move rapidly. Most prices remain firm.

There is every indication of a real building boom in this city this year. Architects are very busy with plans, and many inquiries are coming in for materials.

Linseed Oil and Turps Are Higher

London, Ont.

OIL, TURPENTINE.—Linseed oil and turpentine are higher. Linseed oil is up 5c a gallon. The quotations are as follows: 1 to 2 bbls, raw, $1.72, boiled, $1.75 per gal.; 3 to 5 bbls., raw $1.71, boiled, $1.74; 6 to 9 bbls., raw, $1.69, boiled, $1.72, less bbls., add 10c per gal. Turpentine is up 4c a gallon. The new prices are: 1 bbl. lots, $1.07 Imp. gal.; 2 to 4 bbls., $1.06; 5 gal., $1.17 per gal.

PUTTY.—Standard 100 lb. drums, $6.75; 25 lb. drums, $7; pure, 100 lb. drums, $8.75; 25 lb., $9 per 100 pounds.

GLASS.—Single diamond, 25 per cent.; double, 25 per cent.; cut lights, 10 per cent.

Poultry Netting and Staples Are Lower

London, Ont.

STAPLES.—Galvanized poultry netting staples lower. The new prices are: 100 lb. kegs, $9.60 per 100 lbs.; 50 lb. boxes, $9.90; 25 lb. boxes, $10; 10 lb. boxes, $10.40.

Lower Prices For Sash Weights

London, Ont.

SASH WEIGHTS.—Prices for sash weights are lower. The new quotations are: Solid, 3 lbs. and larger, $3.25 per 100 pounds; sections, 1 lb., $4; ½ lbs., $4.50.

Razors Go Back To The Old Price

London, Ont.

RAZORS.—Gem Junior razors are back at the old price of $9 per dozen. Blades are quoted at forty cents a package.

Higher Prices For Wash Boards

London, Ont.

WASH BOARDS. — Quotations for wash boards are higher. The new prices are: Improved Globe, zinc, $5.15 per doz.; Diamond King, glass, $6.30 per doz.

Shellac Prices Are A Little Easier

London, Ont.

SHELLAC.—Prices are a little easier, the latest quotations are: Orange, 1 gals., $4.25; ½ gals. $4.35 per gal.; white, 1 gals., $4.75; ½ gals., $4.85 per gal.

No Changes Made in White Lead in Oil

London, Ont.

WHITE LEAD IN OIL.—There are no changes in the prices of white lead in oil. The quotations are: Pure, in ton lots, $16.30 per 100 pounds; less tons. $16.65; pure Elephant, $16.90; less tons, $17.25.

Prices of Rope Remain the Same

London, Ont.

ROPE.—No change has been made in the prices of rope this week. The figures are: Pure manila, 34c base; British manila, 30c; New Zealand hemp, 30c; sisal, 27½c.

Dust Mops and Polishes in Demand

London, Ont.

DUST MOPS, POLISHES.—There has been a good sale for dust mops and polishes. Prices are as follows: O'Cedar mops, No. 1 round oil, $12; No. 3, triangle oil, $12; No. 5, round dry, $12; No. 14, triangle dry, $12 per dozen. O'Cedar polish, 4-oz. bottles, $2; 12-oz., $4; 1 qt. tins, $10; ½ gal. tins, $16; 1 gal. tins, $24 per dozen.

Step Ladders and Curtain Stretchers

London, Ont.

STEP LADDERS.—Step ladders and curtain stretchers are quoted as follows: Shelf lock, 22c per foot; Ontario, 29c; curtain stretchers, No. 88 common, $19 per dozen; No. 5, with easel, $27.50; No. 22, loose pin, $33.50.

Geo. Matthew Adams
CAN GERMANY PUT THE GENIE BACK IN THE BOTTLE?
—From the Spokeman Review, Spokane

Screen Doors Are Now Being Shipped

London, Ont.

SCREEN DOORS.—Screen door and window orders are now being shipped. Following are the quotations: No. 1, grained only, $17.40 per dozen; No. 3, with brackets, grained, filled, and varnished, $28.40; No. 21, mission style, grained, filled and varnished, $26; No. 8, with panel, grained, filled, and varnished, $30.65; No. 9, with panel and oval, grained, filled and varnished, $36.90. Screen door spring hinges, No. 20, japanned, $19.50 per gross pairs; No. 7-11 loose pin, steel, $20.

New Prices For Spades and Shovels

London, Ont.

SPADES AND SHOVELS.—Spades and shovels are quoted at 25 per cent. off list. The net prices are figured at the above discount for polished goods. Other quotations are: Black Cat, $14.50 per dozen; Fox, $15.07; Olds, $15.07; Bull Dog, $17.31; Jones, $17.31. Black Cat scoop shovels, No. 2, $18 per dozen; No. 4, $18.50; No. 5, $18.75; No. 6, $19; No. 8, $19.50; No. 10, $20.

No Changes in Sap And Syrup Supplies

London, Ont.

SAP AND SYRUP SUPPLIES.—There have been fair sales in these lines during the week. Prices are as follows: Sap pails, straight, $22.50 per 100; flaring, $22.50. Sap spiles, Eureka, $13.50 per 100; sheet metal, tinned, $2.25; Warner, $3.50. Syrup cans, ½ gal., $15 per 100; 1 gal., $22.50; 2 gal., $40; 5 gal., $65.

Lawn Mowers Are Now Being Shipped

London, Ont.

LAWN MOWERS.—Lawn mowers are now being shipped at the following list prices, less 35 per cent: Daisy, 12 in., $8.25; 14 in., $9; 16 in., $9.70. Star, 14 in., $10.70; 16 in., $11.40. Woodyatt, 14 in., $11.80; 16 in., $12.50; 18 in., $13.20; 20 in., $13.90. Empress, 14 in., $15.25; 16 in., $16; 18 in., $16.65; 20 in., $17.35 each.

Sporting Rifles Are Unchanged

London, Ont.

SPORTING RIFLES. — Winchester sporting rifles and shot guns are now coming in. There is no change from the former price list plus 7½ per cent.

Higher Prices For Johnson's Floor Wax

London, Ont.

FLOOR WAX.—A higher quotation for Johnson's floor wax is now in effect, the new price being 63 cents a pound. Screen wire cloth, painted black, is quoted at: 100 ft. roll, $3.25 per 100 sq. ft; 50 ft. rolls, $3.30; bronze, 14c per sq. ft.

WINNIPEG MARKETS

WINNIPEG, March 27.—Market conditions during the past week show very few changes, and fairly firm markets are expected for some time on shelf hardware, while heavy goods will be governed entirely by prices to be fixed in the near future by the United States Government, which is now discussing costs with the heads of all the American mills. Price changes during the week show revisions in the following lines: Boiler tubes, cotton rope, pure manila, African hemp and British manila rope, and galvanized iron sheets.

Business is reported fairly brisk, shipments of sporting goods, etc., moving freely.

Prices of Hinges Remaining Firm

Winnipeg.

CORRUGATED STRAP HINGES.—With the opening up of spring business and the building trade good, sales are looked for on hinges, prices of which hold firm at the following figures: Light T and strap hinges 15 per cent. off list. Corrugated strap hinges, No. 4, $1.60; No. 5, $2.20; No. 6, $3.00; No. 8, $4.75; No. 10, $7.00; No. 12, $10.80 per dozen. Corrugated strap hinges, No. 4, $2.00; No. 5, $2.50; No. 6, $3.40; No. 8, $5.70; No. 10, $8.50; No. 12, $12.00.

Revised Discounts On Boiler Tubes

Winnipeg.

BOILER TUBES.—A further change in the price of boiler tubes is reported during the week based on revised factory discounts received from manufacturers, which make to-day's selling prices f.o.b. Winnipeg as follows: 1½ in., 28c per foot; 2 in., 28c; 2¼ in., 30c; 2½ in., 35c; 3 in., 40c; 4 in., 60c.

Cotton Rope Shows Five Cent Decline

Winnipeg.

CORDAGE.—Cotton rope prices show a decline in price of 5c per pound during the week, based on new lists received from the manufacturers, and even further reductions would not come as a surprise. To-day's ruling prices are quoted herewith: Cotton rope, 3-16 in., 67c per pound; ¼ in. and larger, 66c per pound. Rope markets in general have been very erratic for some time past, prices at the first of the year showed a heavy decline, but later advanced to almost the same high levels, while this week prices on pure manila, British manila and African hemp rope register declines of from 3c to 3¾c per pound, sisal and lash yarn remaining firm at former levels. To-day's ruling prices on all lines are quoted herewith: Pure manila rope, 35¼c base; British manila, 31¼c; African hemp, 31¼c; sisal, 28¼; lath yarn, 28¼c.

Linseed Oil Shows No Change

Winnipeg.

LINSEED OIL.—Prices on linseed oil continue firm on the local market, no change being recorded during the week, while shipments are reported as improved with the anticipation of an early spring opening. To-day's markets are confirmed herewith: Raw linseed oil, $1.85 per gallon; boiled, $1.88 per gallon.

Shoe Wax Prices Are Much Higher

Winnipeg.

SHOE WAX.—Based on new costs of recent shipments of shoe wax in 1-oz. balls, prices have been revised, manufacturers' prices in the States showing advances of from 40 to 50 per cent. over former quotations, and new price effective to-day is $1.60 per 100 balls.

Turpentine Prices Remaining Steady

Winnipeg.

TURPENTINE.—Although turpentine prices show some slight fluctuations on the Eastern market, Winnipeg prices continue firm at former figures, with about the usual demand. Stocks are reported sufficient to take care of all spring business. Prices are confirmed as follows: Barrels, $1.25 per gal.; ½ barrels, $1.28; 5-gal. lots, $1.30 gal.; 1-gal. lots, $1.30 gal., plus the usual extras for containers.

Galvanized Sheets Are Down 25 Cents

Winnipeg.

SHEETS.—Galvanized iron prices which have been steadily declining for some time past, again show a reduction of 25c per 100 pounds, based on latest mill quotations, while black iron sheets hold firm at former prices. To-day's ruling prices are given herewith on both lines:

Sheets—	Black	Galv'd
10¾	....	$9 75

10	7 05	....

No Changes Made in Wrought Iron Pipe

Winnipeg.

WROUGHT IRON PIPE.—Wrought iron pipe prices continue firm as last quoted, and show no signs of any immediate change. Stocks are reported fairly well assorted, with the usual spring demand. To-day's market prices are confirmed as follows:

Wrought Iron Pipe—	Black	Galvanized
¼	$ 5 40	$ 7 74
⅜	5 50	7 88
½	7 38	9 10

PITTSBURG MARKETS

PITTSBURGH, Pa., March 27.—The much heralded reduction in iron and steel prices has occurred, and proves to be more or less of a farce, particularly in unfinished and finished steel products. The action is approximately what nearly everyone was saying, in advance, should not be taken. It was generally said among producers, while the preliminary discussion was on, that either prices should not be reduced at all or they should be reduced radically. A small reduction, it was held, would do no particular good and would involve a loss to producers in that they would have to adjust prices on business already on books, in finished steel products at least. While a corresponding adjustment would have to be made if there were a large reduction, there would be a compensating advantage in that consumption would be stimulated.

Nearly everyone in the trade who expresses himself has voiced decided dissatisfaction with last week's price revision and it will naturally be asked why the industry did something of which it does not approve. The explanation appears to be that there were two contingents in the general committee that decided this matter, the one holding that there should be no price reduction at this

time, the other that there should be a large reduction, and a sort of compromise was reached, satisfying no one. Of course, after there had been so much talk it was necessary that there should be some reduction. The industry could not square itself with the Industrial Board without doing something, when at the general meeting of the industry there had been a unanimous vote in favor of co-operating with the Industrial Board. Nor could the producers square themselves with the buying trade, which had come to expect price reductions by April 1 as a certainty. The mills and furnaces would have been unable to adhere to the old prices and indiscriminate cutting would have resulted, perhaps winding up with an entirely disorganized market.

The arrangement concluded really represents the maintenance of prices rather than their reduction, and the support of the Industrial Board to the procedure is obtained, with likewise, apparently, the promise of the Department of Justice that it will not interfere. The "Gary dinner" movement of 11 years ago was decided afterwards to have been in contravention of the Sherman law against conspiracies in restraint of trade. Now the Sherman law has virtually been suspended in favor of the present operation, and instead of the Industrial Board seeking further reductions it has made an official statement that it "believes that a level has been created below which the public should not expect to buy during the current year." Inasmuch, however, as the new steel prices are only 14 per cent. below the Government prices during the war, but are 81 per cent. above the average prices that obtained during the ten years before the war, 1904 to 1913 inclusive, the buying public will expect what its judgment suggests rather than what the Industrial Board now suggests.

Reductions in Detail

The official agreement between the iron and steel industry's committee and the Industrial Board was that basic pig iron should be reduced $4.25 per ton, from $30 to $25.75, this being f.o.b. furnace in most cases. The industry has interpreted this to cover a $4.25 reduction on all pig iron, retaining all the differentials, basing points, etc., that were created during the war-time control. Thus the Eastern Pennsylvania furnaces, which last September were given a Pittsburgh basis, but of late have been disposed to get back to quoting f.o.b. furnace, now return to the Pittsburgh basing. The Birmingham furnaces appear disposed to insist upon the new prices at Birmingham, instead of quoting below the general basis as they had to do in the past in order to reach northern markets. The only question is how long the furnaces can maintain differentials and practices that are contrary to the practices developed under competitive conditions during all the time before the war.

Unfinished steel products are reduced uniformly $5 per gross ton, making prices as follows: 4-inch bilets, $38.50; 2-inch billets, $42; sheet bars, $42; slabs, $41, all f.o.b. Pittsburgh or Youngstown; wire rods, $52, Pittsburgh.

Finished steel products are all reduced 35 cents per 100 pounds or $7 per net

Price Comparisons

A weighted average, giving the price of each important finished steel product, ton, except that grooved steel skelp and wire products are reduced only $5 per net ton. The new prices are as follows, all Pittsburgh basis, in cents per pound; bars: 2.35; shapes, 2.45; plates, 2.65; grooved steel skelp, 2.45 universal mill skelp, 2.55; sheared steel skelp, 2.65; steel pipe, 57½ per cent. basing discount; plain wire, 3.00; wire nails, $$3.25 per keg, base; galvanized wire, 3.70; painted barb wire, 3.40; galvanized barb wire, 4.10; black sheets, 28 gauge, 4.35; blue annealed, 10 gauge, 3.55; galvanized sheets, 28 gauge, 5.70; painted corrugated, 28 gauge 4.65; galvanized corrugated, 28 gauge 6.75; tin plate, $7.00 per base box, 100 pound; terne plate, I. C., $7.05 per base box.
a weight in accordance with its tonnage importance, shows prices of finished steel products in general, excluding rails, as follows per net ton: Average for ten years before the war, 1904 to 1913, $36; Government limit under war time control, $76; after reductions of December, 1918, $72; after last week's reductions, $65. Thus the new prices are 81 per cent. above the pre-war average. Copper, even at the 26 cent Government price, was only 69 per cent. above its ten-year pre-war average, while copper is now a couple per cent. below its pre-war average. The copper producers deflated their prices. Report has it that it was the copper producers who proposed to Secretary Redfield that the Government attempt to deflate commodity prices in general, because the copper producers were not getting the benefit, in increased sales, of their greatly reduced price, since copper as a rule is not used by itself but only in connection with other materials, and if the other materials do not come the demand for copper is restricted.

Buying Outlook

The steel price reduction will stimulate buying but will hardly stimulate consumption to any extent. While buyers had been purchasing only from hand to mouth for a long while past, they still found it possible to hold back purchases when it became probable that there would be price reductions by April 1, and this pent-up buying is now expressing itself, but this will hardly do more than arrest the decline in steel mill operations that has been especially pronounced since the first of this month. Consumption will not increase. Investors will not be moved to take hold and engage in building and other projects involving large quantities of steel. The Gary dinner movement of 1908 is being repeated, only this time with full Government approval. Whether the mills will hold together is the question. The other time the mills were nearly all of a mind. This time there seems to be quite a divergence.

Stiff Sentence is Passed on Forger

Alexander Ellison, alleged to be president and manager of the Paper and Hardware Products, Limited, Montreal, was sentenced to three years in the penitentiary for forgery by Judge Choquet.

The case is an interesting one and considerably drawn out. It has cost the Canadian Pacific Railway Company, it is said, a great deal of careful investigation and a large amount of money. Ellison carried out his operations through the use of bills of lading, forging these and uttering them as if they had been genuine, and the bills of the C.P.R. Company were used.

These cases originated before the criminal courts in June of last year, and have been proceeding with certain intermissions ever since.

This matter was first brought to the attention of the Canadian Pacific Railway early in 1918, and after extensive and careful investigations by the company's investigators, under the direction of Chief Investigator Burns the offences were finally traced to Ellison.

Ellison was arrested on four counts and appeared before the magistrate sitting in enquete, where he pleaded guilty to all four charges, at the same time making an application to the court for stay of sentence in order to give him time to make a settlement with the creditors.

To this application, Lieut.-Col. J. J. Creelman, advocate, acting on behalf of the Canadian Pacific Railway Company, made no objections, and the court accordingly granted a certain delay before passing sentence. The Canadian Pacific Railway afterwards declared that these settlements had not been made, or that any serious intention of settlement had been shown, and application was made to the court that sentence be pronounced, to which application the court agreed, and passed sentence yesterday as stated.

Ellison, who was one of the chief officials of the Paper and Hardware Products, Limited, Mile End, forged bills of lading on certain cars of scrap metal, consigned to various concerns in the United States and in Ontario, in cluding the Struthers Furnace Company, Struthers, Ohio; the Allegheny Steel Company, the Kokoma Steel and Wire Company, Kokoma, Indiana; Garnick Bros., Sharon, Penna., and others. Investigation amongst these concerns by the Canadian Pacific investigators, revealed these bills of lading to be false, and of no value, and before the plea of guilty of the accused was accepted, representatives from the various concerns were heard as witnesses, all tending to show that the perpetrator of these forgeries was the accused, Ellison.

GOPHER POISON TRAP

W. Witzke of Witzke Bros., Expanse, Sask., has patented and is putting on the market a new gopher poison trap. The device, it is stated, has been tested and approved by Professor Jackson of the Manitoba Agricultural College.

Does Unusual Advertising Really Pay?

Some Stunts Which Were Successfully Used By a Western Canada Dealer to Increase His Sales of Paints—Originality a Big Factor in Attaining the Results Desired

IF repeated mention by my customers of the unusual methods I adopted in advertising far and wide in my district, and the business that I had established on the Western prairies was any evidence of its worth, then I had abundant reason to feel that these methods were reasonably successful. For years after some of these methods had been put into operation, customers and friends would refer to having seen some of this advertising wherever it had been made with the idea of forming a permanent reminder to the general population.

Why Unusual Methods?

To my mind many thousands of dollars are literally thrown into the waste heap through careless and undirected advertising. So much has been written on this and the reasons why such misdirected advertising are so obvious, that it would seem quite unnecessary to here treat of this matter. And yet, having been located in a small community myself, I am very well aware of some pitfalls into which the town merchant falls. Having a town paper, he naturally feels that, as a good citizen, he should support it, and in this I believe he is right. But sentiment does not bring monetary return. If a merchant is spending good money to carry a message to his customers and to prospective customers scattered throughout his district, he must either make this message cover the ground or adopt such means of publicity other than the announcement in his weekly paper, as will draw to him the people he would sell to. From my own standpoint I have used both, and would not confine myself to the weekly paper, but would still use the unusual method for the simple reason that I have found it valuable. In brief, it has the great advantage of "starting something." Once you get people talking about you properly a very large advantage has been created on your behalf.

"Painting the Town Red"

One day I decided that I must stimulate my paint selling. I had the advantage of representing one of the most widely-advertised paint makers in America and carried a very comprehensive line of his products on my shelves. It was spring. The time of "clean-up, paint-up" was already in the air and the days were getting warm and suitable for the application of this great preserver and beautifier. I must sell the lion's share of paint in my district for I had a considerable opposition as represented by two other merchants in town.

Going to the local printer I arranged for a thousand or two briefly-worded bills and had him print these in red ink. The wording was as follows: "Buy it—Use it." In addition to these two brief sentences, one at the top and one at the bottom of this bill (and which was about seven by nine inches in size), the centre of the bill contained the name of the paint in abbreviated form, three letters only being used. I decided on this wording because of its brevity and that the message might be readily committed to memory, whether the reader wanted to or not. It was so short that even the child had it in a few minutes.

Was Out Early

I got up early the next morning. Having prepared a pot of paste and laid a brush out, and donning my overalls and smock, I was out to "paint the town red." And I did. I must have started not later than 5 a.m., and was pretty well finished with my unique job before the bustle in town started. When I got through the sidewalks of the town were decorated everywhere, and it mattered not from what direction people came, they got my message, and got it in many cases before breakfast. It was one of the best ideas I ever adopted, and had the advantage of not only being cheap, but also very effective. It made the more indelible the fact that I sold such paint, and reminded the citizens that they should think about painting. When they did so, my paint was likely to receive favorable consideration, and the results justified this effort. It cost me little, and I lost no dignity in doing the work myself.

This One a Winner

A trades' procession had been planned, and as the merchants of the town were agreed upon taking a real interest in making this successful, I decided that I should have to make a display that would not only contribute to the success of the scheme, but also to centre attention upon my store. There was this additional advantage in the scheme, that I mapped out, and this rested in the fact that the whole countryside would be represented on the gala day when it arrived.

Going to the lumber yard I selected long narrow strips of lumber. These varied in length, some of them twenty feet, and from this down to twelve and fourteen feet. They were not more than three-eighths of an inch to half an inch in thickness. This was necessary as they had to be bent in semi-circular form. The whole idea was to make a huge globe and cover this with cheap cotton, the big "ball" to be finally painted to represent the world.

Briefly, I made the big globe about eight feet in diameter, and this was constructed as follows.

My tinsmith gave me his time for a couple of days, and we laid the long strips out in a big free space in the back yard. Lapping two of the longest of these, they were nailed securely together and then bent and again nailed after being lapped again when the extreme ends were brought together. This made the start for the big cylinder, and the same operation was repeated over and over, with spacing rather close until we had the skeleton of our float in pretty good shape. As it was impossible to get a perfect cylinder without, we used annealed baling wire to draw the globe into shape. This also had the effect of making it very rigid and in shape to stand the strain of being placed on wheels and driven through the streets.

Covered With Cotton

Once the skeleton was completed, cotton was carefully stretched over the whole framework and completion was in sight. Taking two or three pots of paint it was an easy matter to outline the continents, vari-colored paints being used and the seas being tinted blue. The division lines were made with black paint, and this also served for the small amount of lettering that was necessary, and for the meridian and longitudinal lines. When completed it looked excellent, and with the addition of an upturned can secured above the globe, and with the contents spilling over it the effect was 100 per cent. effective. The can used was supplied by a two-thirds size creamery can and thus of correct proportion.

When this float appeared on the street it certainly took the attention of the large gathering that had assembled, and was an undoubted success. It made for wider publicity for my store, and in this respect alone I am sure it was worth the several days time that had been required to make it, and the expenditure entailed for material.

Other Schemes, Too

In addition to the outlined schemes which I had adopted and which may not have been quite so original, was the stenciling of sidewalks with a footprint phrase, directing the pedestrians to my store.

At one time, in order to stimulate holiday trade I arranged a contest and offered as a prize a miniature range which was perfect in every way, and which would accommodate ordinary fuel. The happy winner, a young lady, brought me in return a very excellent miniature mince pie.

Of the country billboard idea I was an enthusiast, and some of my signs erected years ago are, I understand, still where I nailed them.

That there is much to be gained from the working out of unique plans to interest one's customers, so long as there is a wholesome idea and an effective message behind it, I believe that the

Getting Ready for Boating Season

Some Valuable Pointers on Requirements to be Met That Will go a Long Way in Helping to Make Sales—Efficient Methods of Finishing—Owners Appreciate Advice and Service

TO successfully sell boat finishes requires considerable insight into the exact requirements of the surface exposed to the water, as well as the technical ability of the finish to meet such needs.

The use of motor boats, seaplanes, and other light craft during the war, developed the necessity of serious study of the finishes required in order that they might render efficient service. Most of these required the direct exposure of the wooden surface to the water. It was found that if they were not rendered waterproof, moisture added to their weight, and materially diminished the speed obtained.

From the investigations made in search of suitable finishes, many valuable lessons were learned by the paint and varnish trade, and which we shall endeavor to render in suitable form for the promotion of more efficient selling for this class of trade.

Conditioning Wood

Wood is a cellular substance, the fibrous parts of which absorb considerable quantities of moisture; when this fibre becomes saturated with moisture, further quantities of water may be admitted in liquid form. This water, in liquid form, is then held in the cellular cavities of the wood. When wood, which has absorbed both moisture and liquid water to this extent, is submitted for a considerable period of time to drying, both the water and moisture pass out, and the wood is restored to its original so-called air-dry form, which under normal conditions of testing and fabrication should contain approximately 11 to 15 per cent. of moisture. Spruce used in seaplanes, and other craft of this nature, is usually conditioned to the above moisture content before working.

Numerous samples of wood, conditioned to the above extent, where prepared; these were coated with the various finishes under investigation, which included raw linseed oil, boiled linseed oil, various dopes used in seaplane construction, spar varnishes, enamels, shellacs and oil and varnish graphite mixtures.

Are Mostly Used

We shall concern ourselves only with the linseed oils, spar varnishes, enamels and shellacs, these being most commonly used in ordinary boat finishing.

The samples were enclosed in a specially constructed cabinet at a temperature of 100° F. with a relative humidity of 95% for seven days. It was found that the panels coated with raw and boiled linseed oil absorbed the largest percentage of moisture; the one with raw oil absorbing a greater quantity than that coated with boiled oil. The two samples coated with spar varnish absorbed the next highest percentage. Shellac was next, while the four panels coated with enamel averaged the lowest percentage of moisture absorption.

These panels were again thoroughly dried for a period of seven days, and then submerged in a tank of water for another period of seven days. The gain in water absorption by each class of panel was in the same relative extent as moisture, that is, raw oil being the highest, and receding in extent in the following order: boiled oil, spar varnish, shellac and enamels.

Allowed to Dry

The panels were again allowed to dry for seven days at a temperature of 70° F., and reweighed to determine the amount of water retained within the structure of the wood. Boiled oil was found to retain a higher percentage of water absorbed than raw oil. Enamels with the lower pigment content were next; shellac next; spar varnish next, while the enamels with the highest pigment content retained the least.

It is quite apparent from the above experiments, that neither raw nor boiled linseed oils are suitable for finishing boats, especially for surfaces below the water line. It is interesting also to note that no film is absolutely waterproof, especially when submerged in water. This makes it necessary to select and sell the class of material that permits the least quantities to pass the films and will permit them to pass out most completely when submitted to the drying process. In this respect, the enamels with the highest pigment content appear to have the preference.

How It Worked Out

The experiment with shellac was interesting; rather upsetting some hitherto preconceived ideas. The low water and moisture absorption shown by the shellac-coated panels somewhat reverses the idea that shellac is subject to rapid water absorption. The fact that shellac

SANI-FLAT

A sanitary flat oil paint for all interior painting. The persistent demand for SANI-FLAT is proof of its satisfying qualities. It will be a revelation to your customers—the beautiful effects attainable with this ideal wall-covering.

It's easy to apply, sets slowly, showing no laps or brush marks, is absolutely sanitary and washable with water, without injury. Makes a perfect under coat for enamel and has great body and covering qualities. SANI-FLAT is so flexible, and it may be used in so many varied and different ways that the householder quickly realizes the advantage of using it.

May we acquaint you with the great selling possibilities of this line? Our agency proposition is a good one. Write us for full particulars.

GETTING READY FOR BOATING SEASON

Continued from page 54

coatings almost immediately turn white when placed in water, may have led to this belief. From the standpoint of durability, however, shellac has proved very inferior to spar varnish when exposed to sunlight and the atmosphere for long periods of time. Its wearing qualities are also a detriment.

Further experiments were conducted with the enamel panels by giving them additional coats, and it was found that after subjecting them to the same treatments as above described, remarkable reductions in absorption were accomplished by the addition of each extra coat. It has been suggested, as the result of these experiments, that four coats of enamel to boat construction would be repaid by the very high water resisting film obtained.

The results were so convincing that a large part of the finishing done on United States seaplanes was based on the deductions made from these investigations.

An Efficient Process

For those who wish to take the extra care and trouble, the following highly efficient process can be undertaken in finishing a boat. Coat the wood with a good spar varnish, and then apply aluminum leaf over all. Over the leaf apply a coat of spar varnish or enamel. This method is said to give the highest degree of moisture and water resistance.

With these facts thoroughly understood, the retail dealer is in a splendid position to advise boat owners regarding the most efficient method of finishing a boat.

A large amount of such work, however, consists in refinishing, which makes advice in this direction also necessary. In cases where a boat has been repainted year after year, it has probably become so encrusted with old films that any new coating will have little opportunity of rendering efficient service. In such cases it is advisable to have all of the old coatings removed, either with the blow torch or with a good paint remover. After all the paint has been removed the hull should be scraped, so as to get down to a new surface as much as possible. After the removal, the hull should be allowed several days to dry, after which an enamel coating can be built up as described.

In case the boat is comparatively new, the old paint surface can be sandpapered down to an even surface suitable for refinishing, and an enamel coating built thereon.

Half the Battle

Having the right kind of knowledge to give a boat owner is perhaps more than half the battle in selling boat finishes. But it is necessary to let him know that you are particularly well posted in this direction, and that you have the goods to back the advice given him.

Perhaps the circular letter is the most efficient means of advertising for this purpose. It is comparatively easy to obtain the names of all boat owners in the community through the aquatic clubs, or by simply visiting the water front.

Along about April the motor boat owner and the yachtsman begin to feel their sea legs, and turn their attention to their pet crafts. The time to get him coming your way with this business is when this feeling is coming on. It is well to get his attention early. Use whatever information you have at hand in your letter to show that you know something about boat finishing, and you will readily gain his interest. The boat fan is pernickity about his boat finish, and the dealer who can show a superior knowledge about such stands a better chance of gaining his confidence, which is one of the reasons we have entered into technical details concerning boat finishing in this article.

Unless a dealer is situated in a community where a large number of boats are used it would scarcely be worth while devoting window displays to boat finishes when other lines might be displayed more profitably, and this is another reason why we commend the use of the circular letter. The rabid boat fan is pretty sure to refinish his boat every spring, so that there is not so much a necessity of encouraging the use of paint with him as there is of putting him wise to some new and more efficient wrinkles. Here, again, is where competent technical information will count, and gain his interest.

Besides, having the most up-to-date information about boat finishing at hand, knowing how to use this information, and when to use it, is important. By handing out these brass tack facts, it may be that the information given in this article will assist you in selling boat finishes. Try it out and see to what extent you can increase your paint business in this direction.

The Brush Department

Methods Used by Hamilton Firm to Increase Its Sales of Brushes

Good Advertising Copy, Attractive Window Displays Backed Up by Quality Goods and Store Service Produce Results For Mills Hardware Co.

THE quickest and best way to sell goods is to let the buying public know that you have them. This applies to brushes just as to any other line of merchandise. The most effective way of letting the largest number of people know in the shortest time about your goods is to advertise. The Mills Hardware Co. of Hamilton has always been a consistent user of newspaper space, and is just embarking on the most extensive advertising campaign it has yet attempted.

"We are doubling our newspaper space," said Nelson Mills, vice-president of the company, to HARDWARE AND METAL. "From now on we will use newspaper space every day. Our advertising has produced splendid results."

Carefully Prepared

The Mills Hardware Co., pays a little more than particular attention to the preparation of its advertising copy. As will be seen from the accompanying illustration illustrations are used generously. The cuts are all good, clear electros that show out well and not only enhance the neat general arrangement of the copy but impress the goods in the minds of prospective buyers. "A brush for every purpose," carries out the idea that the Mills Hardware Co. tries to convey to customers all the time, that is that they have a big complete stock of quality goods. This idea that there are lots of sizes or styles to choose from creates in the minds of many readers involuntarily a favorable attitude toward the store. The descriptive sales talk which accompanies each item is interesting. A great majority of buyers like to read copy of this kind. It talks to them, not at them, answers the questions they would likely ask if they were in the store, gives a lot of general information. One of the chief features of each item is that the prices are given.

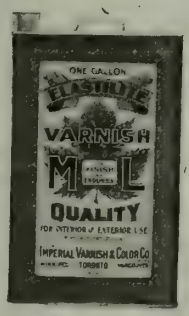
Window Displays

The Mills Hardware Co. backs its advertising by window displays which are just as attractive and on which just as much care is bestowed, as is given the copy. Window displays have proven big

Boeckh's Steel Grip Rubber Set

A SURE indication of the quality of Boeckh's Brushes is the fact that for sixty-three years they have been used by Canadian industries.

Every Brush bearing the Boeckh trade-mark is guaranteed absolutely dependable. The bristles are in to stay—they cannot possibly come out, for they are steel gripped and rubber set.



Brush users know Boeckh's Brushes—let them know that you stock them.

Display and specify. Boeckh's Steel Grip, Rubber Set Brushes—the brushes that are nationally advertised.

There are features of this advertisemen t which can be adopted with advantage by any hardware dealer in arranging h is own copy. Note especially the attractive arrangement, use of illustratio ns and that the price of every article is given.

business producers for the firm and many sales are traced directly to showing the goods in this way. Just as much care is taken to give prospective buyers the price of each article shown as in the advertisement. On nearly every line shown the price is indicated by a neatly printed card.

The service idea is carried out in the selling in the store. Every buyer of paint or varnishes is asked if he has a brush with which to do the work. It is never too much trouble to explain why this brush or that brush should be used for certain kinds of work if the best results are to be obtained.

It is to store service of this kind, backed by good window displays and good advertising, that the firm attributes its steadily increasing sales.

LOWER STEEL PRICES

Continued from page 37

Board Approves

The Industrial Board in a statement declared:

"In giving its approval to the schedule of prices just decided upon for the principal articles of iron and steel, the Industrial Board of the Department of Commerce, carrying out the purpose for which it was created, believes that a level has been reached below which the public should not expect to buy during the current year. The purpose of the board is to bring about such a lower level of prices as will effect stability and stimulate trade, to the end that business and industry can proceed and build up with confidence and provide maximum employment.

Strike Balance

"In its effort to effect co-operation between the Government, representing the public, and capital and labor, it has in view a due just regard for all of those interests, and therefore in giving its approval to these prices and others, which it will consider immediately, it will endeavor to strike a balance which, while calling sooner or later for some sacrifice or adjustments on the part of all, yet will not subject all of these interests to undue hardships.

"The board is asking industry to cooperate in taking the first step and voluntarily make temporary sacrifices in the interests of all, and has asked the iron and steel industry, because of its fundamental importance, to be first to act, and the board is highly gratified with the spirit in which it has responded.

"It is fully understood and expected that the present wage rate or agreement will not be interfered with, the approved prices having this in view.

"The reduction in the price lists may involve the necessity of some high cost plants either shutting down temporarily or running at a loss for a period, but it is expected that with an increased volume of business soon to be developed a reasonable return to the average and the better-than-average producers will be afforded. In view of the higher costs developed throughout the world as a result of the war, a return to anything like prewar prices is regarded as out of the question. It is expected that other industries as well as the consuming public and labor will recognize their obligations in the circumstances and co-operate in the same generous spirit as has the steel industry."

INVISIBLE PLUMBERS' MATES

A friend of mine, states "Vulcan," in the English "Ironmonger," who is an ardent microscopist, has made himself popular with the soldiers in a certain camp by setting up his instrument once or twice a week in a club house much frequented by the men. His corner of the room may not attract so many as the bar, but his bugs and beetles compete on equal terms with the billiard tables, and that is a pretty good gauge of his powers of entertainment. During a recent sharp frost his live box contained one evening some rotifers—weird little aquatic "beasties" with heads which had the appearance of a pair of milling cutters working at a terrific speed in opposing directions. One of the men asked where he had got his specimens in such sharp weather, and the reply disclosed the fact that these animalculæ have a penchant for loitering in lead guttering and the troughs between roofs. Scrapings from such places, even if they are kept in a box and dry for weeks, will usually yield a few rotifers if the dust is put into the live box with a little water. What the man with the microscope could not explain was the connection between the lead and the suspended animation of the rotifers, nor could he say how these particular animalculæ found their way into the gutters, or for what purpose they went there. Perhaps the plumbers could tell us if they would?

BIG SEASON EXPECTED FOR MARINE BUSINESS

With an early season promising, the oil refiners are looking forward to an increased volume of business for lubricating and marine oils. One of the large companies in Montreal stated that they expected a bigger and better season than ever, and it is expected that there will be a decidedly increased business once navigation opens. As viewed at present there is every indication of shipping coming into use at a date much earlier than usual. The ice in the St. Lawrence is honeycombed and moving out fast. It will not be surprising to see ocean vessels come into port much earlier than usual.

Varnish Investments

Varnish buying is not only an investment for the dealer, but is equally so for the consumer.

In the long run the only profitable varnish investments are those that produce a handsome finish that lasts indefinitely. Such products are profitable for the painter, because every operation on which he uses them is a permanent testimonial and business-builder for him. They are profitable for the owner, because a lasting finish means economy. They are profitable for the dealer, because they are easy to sell, and the demand for them is continuous and cumulative.

Berry Brothers' label has for sixty-one years been the buyers' guarantee of profitable investments in varnishes, enamels and stains.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, March 27.—Linseed oil continues to monopolize the stage in the paint market and advances of six cents per gal. over the quotations of last week have been effected. It is impossible to say from day to day just what the prices will continue to be, but no recession is anticipated so long as shipping is scarce as it now is.

Turpentine is steady and very firm, and supplies are none too large. Some expect that an advance will be made ere long.

Shellacs have declined in this market fifty cents per gallon, the change affecting both white and orange. Putty and white lead continue to be firm, particularly under oil's influence.

Shellacs Reduced In Price

Montreal

SHELLACS.—Reductions have been made in various grades of shellac, the change totalling 50c per gallon. Orange in barrels is quoted at $3.50 per gallon and at $3.75 in one gallon jugs. The corresponding prices for white are: barrels, per gal., $4 and jugs, per gallon, $4.25. These prices are applicable to Montreal city. The freer movement of gums and lower prices for alchohol are contributing factors in the reduction.

Six Cents Added; Linseed Oil $1.66

Montreal

LINSEED OIL.—Steadily advancing seed markets has been the order nearly every day since last report, and single barrel lots of raw oil are quoted at $1.66, a straight advance of 6c over the low price of last week. There is no indication of relief from the advancing condition, for shipping is scarce and seed in sight is far short of requirements in the States and Canada, it is said. There is little promise of low prices prevailing until the shippers can get tonnage for supplies.

	Imp. Gal.
Raw—	
1 to 4 bbls.	$1 66 $1 67½
5 to 9 bbls.	1 65 1 67½

No Change But Firm Turpentine

Montreal

TURPENTINE.—While there has been no actual change in the basis on turpentine, the market rules very strong and one large importer is not quoting this week, supplies being temporarily short. The outlook does not indicate any lowering of prices and the tendency is firmly the other way.

	Imp. Gal.
Turpentine—	
1 to 4 barrels	$.... $1 05
Small lots	.... 1 16

(Packages extra).

Firm Putty Price; White Oil High

Montreal

PUTTY.—There is little likelihood of putty prices being revised downward. In the first place, whitings are still firm and none too much has been received. The strength of linseed oil is a big factor and if this continues to soar there may even be revision upward for putty.

White Lead Holds; Bookings Made

Montreal

WHITE LEAD IN OIL.—There is a steady demand for lead in oil and the amount of mail business in addition to that sent in by the travellers is large, seasonably speaking, with some of the suppliers. There is every indication of the movement being better from week to week. Prices are unchanged with five ton lots selling at $15.50 per 100 lbs., ton lots at $16 and smaller than ton lots, $16.35.

Letter Orders For Mixed Paint

Montreal

MIXED PAINTS.—The market is steady and is becoming more active from week to week. The manufacturers are finding conditions better as the actual painting season approaches and letter orders are coming to hand well. The basis is steady all around and stocks are in good shape.

TORONTO

TORONTO, March 27.—No change has been made in the price of linseed oil this week. There is a good firm market with a steady volume of business, as the manufacturers are drawing heavily. Seed values are keeping up well and the quantity that is coming in is not large.

As predicted in HARDWARE AND METAL last week another advance has been made in the prices of turpentine. The new quotations are three cents higher than those of last week which were four cents in advance of those recorded two weeks ago. The market is very firm and prospects are that it will continue so.

Linseed Oil Shows No Change in Price

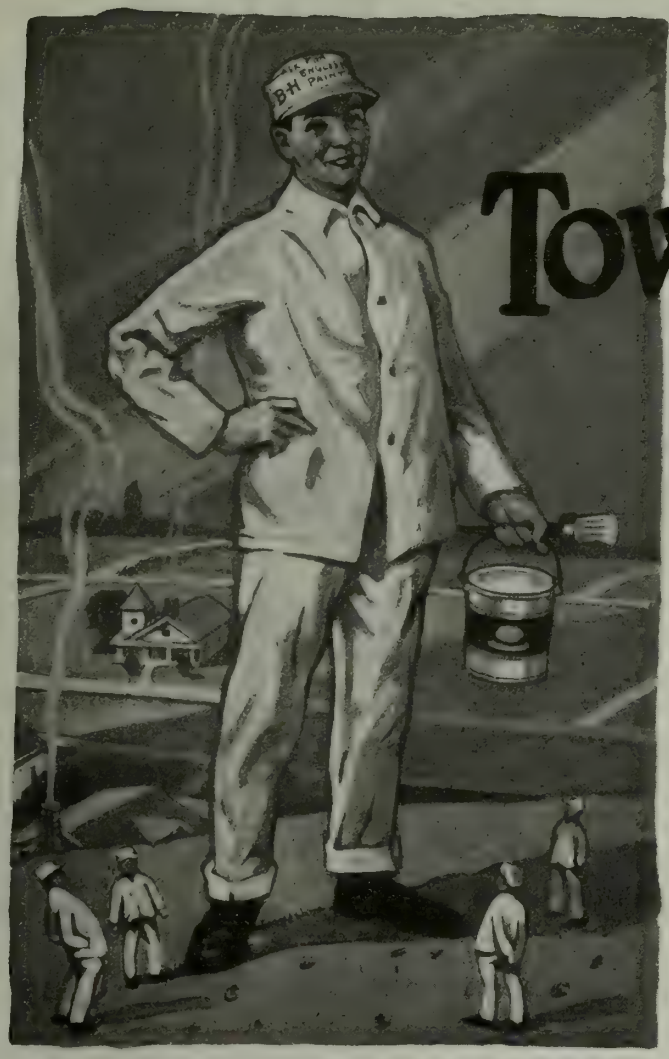
Toronto.

LINSEED OIL.—A good deal of activity prevails in linseed oil this week as a result of the manufacturers' demands. The market is firm and there is, it is stated, little chance of prices declining to any extent in the immediate future. The export business is of good volume with indications that it will reach really large proportions. The range of quotations is as follows:

	Raw	Boiled
Linseed Oil—		
1 to 2 barrels, gal.	$1 72	$1 80
3 to 5 barrels, gal.	1 71	1 79
10 bbls. and over	1 69	1 77
	Imp. gal.	
1 to 2 barrels, gal.	$1 69	$1 83
3 to 5 barrels, gal.	1 68	1 82
10 barrels and over	1 66	1 80

Prices shown are those ruling on Thursday of current week and subject to daily fluctuations of the market.

No Change Made in White Lead in Oil



Toronto.

WHITE LEAD IN OIL.—White lead in oil shows no variation in price. There is a fair volume of business offering and it is apparently growing slowly but steadily larger. Quotations are as follows: Pure white lead in oil, $15.80 per hundred pounds in 5-ton lots; $16.30 per hundred pounds in ton lots, and $16.65 per hundred pounds in less than ton lots. The various brands are shown in the current market quotations.

Mixed Paint Trade Is Showing Activity

Montreal.

MIXED PAINTS.—With the opening up of spring business and increased building activity, the trade in mixed paints is

Towering High

above all other paint propositions—

Every B-H Agent realizes that he is in a position to offer his customers a "paint proposition" that his competitors have no means of equaling. He never has to say a word to his customers about B-H Quality—the Guarantee Label pasted on every can says it for him—and says it so emphatically as to place beyond all argument or doubt the goodness of

B-H "English" Paint

70% Pure White Lead
30% Pure White Zinc
100% Pure Paint

Consider first this outstanding fact of quality. Then consider the overwhelming superiority of the B-H publicity—which day by day is winning new converts to the use of B-H "English" Paint. Finally, bear in mind that you can sell this paint at as low a price as any other standard line and still make quite as much profit. All this means that the "profit and prestige" possibilities that go with B-H representation are such as to make our proposition tower high above any other paint representation ever offered to Canadian hardware dealers.

BRANDRAM-HENDERSON LIMITED

MONTREAL HALIFAX ST. JOHN TORONTO WINNIPEG
MEDICINE HAT CALGARY EDMONTON VANCOUVER

steadily growing. The outlook for business it is stated is excellent. No changes are noted this week in any of the prices. Repeat orders are coming in nicely it is stated.

Another Advance in Price of Turpentine

Toronto.

TURPENTINE.—Another advance in the price of turpentine was made this week and prices are now three cents higher than last week. A steadily increasing demand is noted and supplies are not coming through as rapidly as they might in many cases owing to difficulty in getting through shipments. There is a steadily increasing demand from overseas and this is also a factor in the situation. Very, very firm is what dealers say regarding the outlook. Quotations to-day show advances of three cents, making the price $1.10 per Imperial gallon in single barrel lots:

Turpentine—	Ibp. gal.
1 barrel (barrel included)	$1 10
2 to 4 barrels (barrel included)	1 09
5 gallon lots	1.20

Glass and Putty Show No Changes

Toronto.

GLASS, PUTTY.—While business is light in the window glass trade a lot of business is being figured on which indicates that there is going to be a splendid demand later. As glass is one of the last things that goes into a building this activity may not develop for some weeks yet or until the big building program that is developing is well under way. Prospects for business, it is stated, are excellent except in Winnipeg and vicinity where the wages that are being demanded are keeping building stagnant. Prices show no change—the discounts are shown in the current quotations.

Putty prices are as before:

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices.

Montreal Automobile Dealers Are Planning To Co-operate More Closely

MONTREAL automobile dealers and those interested in the equipment and garage end of the business are bent on uniting their forces with a view to getting the most out of concerted effort. At the annual general meeting of the Montreal Automobile Trade Association held at the Windsor hotel, matters relative to the trade in general were taken up, and it was decided, among other things, that there should be a three-fold division of the automobile trade interests.

In the first place it is proposed that the automobile manufacturers and dealers shall be grouped into one unit; the automotive equipment manufacturers into the second group, while into a third section or group it is proposed to place the licensed garages and repair shops.

Permanent Secretary—Co-operation

Through the appointment of a permanent secretary, it is expected that a greater amount of benefit can be obtained for the good of the trade generally. It will be the duty of this secretary to handle the active work of each unit, and in this way a concerted and co-ordinated plan can be kept in view from time to time. The desire is that such mutual co-operation will result in benefit to all, for with a solid organization of such strength, there would necessarily be a great deal of benefit in a large way.

During the progress of the meeting, matters of much interest were discussed at length.

New Constitution—Officers

A new constitution is planned, and it is very probable that there will be regular monthly meetings hereafter for each section. It is proposed that the by-laws be changed to permit of a section of subscribing members.

The new officers selected for the year are representative of the various sections and the slate is as follows:

President, J. O. Linteau; vice-president, J. Ernest Millen,; treasurer, N. J. Catudal; secretary, J. R. Marlow; directors, W. E. Baker, C. S. Hoben.

It was generally agreed in an informal discussion of the matter that a motor show would be planned for 1920.

DOES UNUSUAL ADVERTISING

Continued from page 53

average hardware dealer can use his time to good advantage and spend at least part of his annual appropriation in the manner outlined. If I were again entering the game I would follow out other original ideas that one can always evolve, if thought be exercised. The idea is to be different and to get away from the fixed or stereotyped ideas which do not impress because they are worn out.

BRITISH EXPORT RESTRICTIONS ON TIN PLATE RAISED

Tin plates, terne plates and lead coated sheets have been transferred by the British Government from list "A" to list "C." This means that tin plates can now be exported from England. With the British tin plate manufacturer able to obtain pig tin about 20c per pound less than American manufacturers, it will affect American export trade in tin plates.

This situation is not expected to continue after June, as there is every prospect that the present embargo placed by the American Government on pig tin imports will be raised.

An extra quantity of steel has now become available for the British tin plate industry, and makers are asked to state the additional amount which they anticipate being able to make use of per week.

A seasonable window display will always increase the sales of paints. When showing these lines it is always well to add a good display of brushes.

New plant at Montreal where Munro's Pure Paris Green is made. The largest factory in Canada devoted exclusively to the manufacture of Paris Green.

Knocks 'em Cold

Munro's Pure Paris Green, the Potato Bug's Deadliest Foe

There's no spray poison like Munro's Pure Paris Green for putting the quietus on the destructive potato bug. It's such a fine, light powder that it sprays evenly on the foliage and gets *all* the bugs.

Every person who grows potatoes knows what Paris Green will do and all regard it as the most effective and satisfactory poison. It is the easiest to sell because it's simply a case of handing the most growers what they need most.

Line up for big sales by stocking the best Paris Green—Munro's. Put up in convenient packages. Over Government standard for strength.

Take our advice and order your season's stock *now*. Your jobber will supply you or we'll serve you direct.

1428 Granville Street VANCOUVER

Uniformity in Varnish

One of the most difficult problems in the manufacture of varnish is that of making the product absolutely uniform.

DOUGALL VARNISH

is guaranteed in this respect. Every batch of varnish is made to tried and tested formulas and no varnish is permitted to be shipped unless tests prove it to be true to formula.

Thus a gallon of DOUGALL VARNISH purchased one or two or five years from now will be exactly the same and will give the same good service as a gallon of that same varnish purchased to-day.

The Dougall Varnish Co., Ltd., Montreal

It's Like a Rolling Snowball!

REMEMBER the big snowballs you used to make when you were a boy — how they grew bigger and bigger at every turn?

Well, that's just the way with "61" Floor Varnish in Colors. It "turns over" quickly and P&L dealers are increasing their sales at every turn!

It's that 70-year-old Pratt & Lambert reputation for quality backed up by powerful nation-wide advertising that keeps that ball rolling and kicking up cash in its wake.

Are you in on this? Have you stocked "61" in Colors?

If you're not one of these dealers, let us show you how to get your share of this steady business! Write for particulars of Introductory Assortment.

Most Successful Bicycle Dealers in Canada Sell C·C·M· Bicycles

"90% Made-in-Canada"

LOOK up the most successful bicycle dealers in any part of Canada.

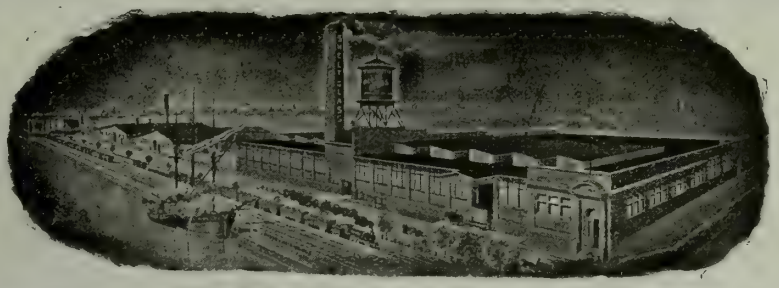
Ask them what Bicycle they have pushed in building up their fine business.

Dollars to doughnuts it's one of the C.C.M. nameplates:

"Massey," "Gendron," "Ivanhoe," "Cleveland," "Brantford Red Bird," "Columbia" or "Perfect."

Why? Because they are so unusually well made they always give satisfaction. They build up good-will for the dealer who sells them.

And because they are so well and favorably known they are easy to sell.



Street car cards and newspaper ads all over Canada this season will help to make C.C.M. Bicycles still easier to sell.

Agencies are still to be had in most districts. For full particulars write to Head Office or nearest Branch.

GREAT WEST ELECTRIC CO., LIMITED

WINNIPEG, MAN.

Distributors of Laco Tungsten and Nitro Lamps

TRADE MARK "MORRISCA"

When you see the above Trade Mark on anything pertaining to Fishing Tackle you need have no hesitation in recommending it to your customers.

There is no possibility (except in a few articles) of prices for Fishing Tackle being reduced before next season, so that during the period of transition you would be well advised to place orders well ahead of your every-day requirements.

Orders for future delivery are now being booked, but owing to the great pressure we have had with Government work it will be some time yet before we are able to attain our pre-war output.

Our new General Catalogue is now in preparation, and we are placing on a Register the names of Fishing Tackle Dealers who will obtain a copy on publication. Have you sent in your name? If not, do so now.

In the meantime we invite and welcome your enquiries and will be pleased to quote you for anything we can supply. We are Wholesale only, and all enquiries from consumers direct are referred to the nearest retailer. We don't cut into his business.

Morris Carswell & Co., Ltd.
118 Howard Street, Glasgow, Scotland

Wrenches, Pliers, Screw Drivers

On this line of goods we have built a reputation. We have taken care of the trade on Crescent Pliers and Wrenches particularly well, and at the present time are guaranteed deliveries by the manufacturers to the end of 1919. In addition to the well-known Crescent lines we handle the Bemis & Call Adjustable, the No. 80 Motor Wrench, the Carll Wrench, which is interchangeable, can be used as a nut or pipe wrench. The Bonney Stillson, the Special Auto Stillson, the Como Pipe, and Eagle Claw, the Imperial Angle, the Lane Set of Ratchet Wrenches and the Allen-Eureka Ford Ratchet Sets. In Screw Drivers we have the Crescent Hammer Handle, the No. 35 assortment with Oak Display Stand, and the small Screw Driver for hard-to-get-at-places. If your stock runs low on Pliers, Wrenches or Screw Drivers at any time we are the people to write.

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

STOP!

and consider if you are prepared to handle to your entire satisfaction your portion of the large and extensive **paint and varnish** business that is anticipated this coming season.

KYANIZE VARNISHES and KYANIZE MOTOR CAR ENAMELS

Every can of this well-known advertised line is guaranteed to be and do all we claim for it or we will refund the purchase price for the empty can.

THE ◆A◆ IS BEHIND ALL KYANIZE PRODUCTS

Besides the well-known, extensively advertised line of household varnishes and enamels, the **Kyanize** line includes a complete variety of the finest architectural varnishes and enamels. Kyanize makes the home attractive and beautifies the automobile.

READY MIXED PAINTS

DIAMOND "A" BRAND——ABSOLUTELY PURE

50% Lead 50% Zinc

OUR GUARANTEE

We hereby guarantee Diamond "A" absolutely Pure House Paint to be made entirely of Pure White Lead, Pure Oxide of Zinc (except such shades as do not contain lead and zinc), Pure Coloring Materials, Pure Linseed Oil, Pure Turpentine Dryer, and nothing else, and is sold subject to chemical analysis.

We will supply you with a strong line of advertising for store and window-dressing purposes for both Kyanize Varnishes and Diamond "A" Paint.

Up-to-date and comprehensive advertising will be sent direct to the consumer in your district.

Around and Around and Around!!!

No human hand can keep up a fixed normal speed

If every owner of a fixed feed separator—especially those who **think** they are skimming clean—could see a chart of the great **variation** in speed during one week's separation, they would be amazed. The chart would show that practically all the time the separator was being turned **below** speed and wasting butterfat. Actual tests prove that 95% of all separators are turned below speed most of the time and all separators are turned below speed some of the time. No matter how careful you are, it is humanly **impossible** to turn at a fixed speed, day in and day out. Speedometers, bells and other contraptions only show how wasteful fixed feed separators are.

SHARPLES SUCTION-FEED CREAM SEPARATOR

SKIMS CLEAN AT ANY SPEED

We again emphasize the vigorous advertising campaign for Sharples—in which the dominant note is the exclusive Sharples feature of "Skims Clean at Any Speed." How convincing is this appeal can be readily grasped from the above reproduction of a Sharples advertisement. Is it any wonder that the Sharples dealer contract is a valuable one—and that the Sharples Separator Company carefully selects its dealers? Progressive dealers are invited to write us. We have a **real** opportunity to offer.

The Sharples Separator Co., TORONTO, ONT REGINA, SASK.

Sharples Milker—The only milker with a squeeze—Send for catalogue.

The Lounsbury Co. Newcastle, N.B.

Distributors through all their branches.

"Over 2,425,000 Sharples Separators in daily use."

Buy Pumps Now for Future Shipment

BT ready to ship. Pump No. 5 for watering stock

Place your order now for the pumps you will need this summer and fall. We'll protect you if prices rise and guarantee you against loss if price falls before date of shipment. Read proposition below.

BT ready to ship. Pump No. 5 for domestic use.

Our proposition is this: We'll protect you on a rise or fall of price up to date your goods are shipped. If the price goes up you get the **old** price, if it goes down you'll get the new.

Buy now the pumps you require this summer and fall. Specify delivery in 2 months, 3 months—any time up to eight (8) months. We'll protect you on price up to day goods are shipped.

Don't hesitate about ordering now the stock you can turn over this summer. The above proposition guarantees you against risk of loss.

Prices, in our belief, are not coming down in the near future

Pump prices will remain firm because of cost of labor and raw materials for a long time yet. Therefore, we gladly make the above proposition to our dealers.

Beatty Bros., Limited

Fergus, Ont. **London, Ont.** **St. John, N.B.**

Talk No. One Hundred and Ninty-one

Spring arrived "officially" March 21st. The voice of the robin will soon be heard in the land and the noise of the busy sheet metal man using "PREMIER" GALVANIZED STEEL SHEETS on the early Spring jobs will be evident too. That's why he gets the jobs!

TINKER TOM.

Look for Talk No. 192 next week.

CROWBARS

No. 102-A—CHISEL POINT

We offer you bars made of High Carbon Steel at the same price as you are buying the Mild Steel Bar elsewhere. Send us a trial order.

B. J. COGHLIN CO., LIMITED, Office and Factory: Ontario Street East, MONTREAL.

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace—made for Machine. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

REPRESENTATIVES WANTED EVERYWHERE

We have been manufacturing awnings for over FORTY years and honestly lay claim to being experts in our line. We guarantee QUALITY, FIT and WORKMANSHIP EQUAL to ANY and SUPERIOR to MOST awnings made by other manufacturers. Business in this line can be developed locally by agents in touch with new buildings and alterations. If we are not represented in your locality we are open to appoint an agent—preferably in the hardware trade. Good commissions. Samples and quotations on application.

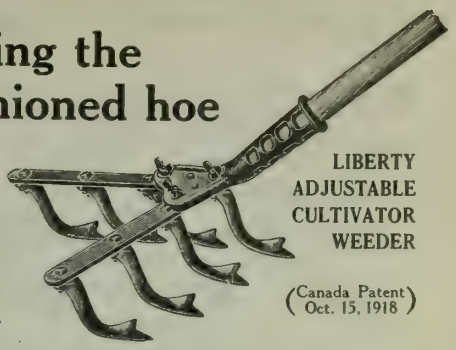
"CADILLAC" ELECTRIC VACUUM CLEANER

Wherever the "Cadillac" Electric Vacuum Cleaner is being used it is rapidly ousting all others.

A "Cadillac" Electric Vacuum Cleaner is more effective and will save time and labor.

The "Cadillac" Electric Vacuum Cleaner is the only Canadian-made machine on the market, and is the best. It will last a lifetime — cleans carpets, rugs, curtains, mattresses, etc., thoroughly and quickly with little effort. No woman is happy until she owns one.

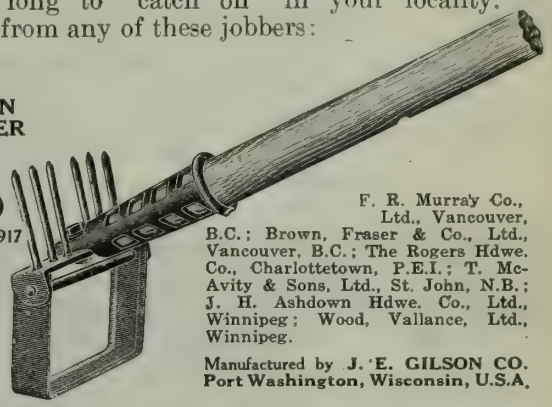


An attractive proposition is offered to new dealers.

Write for further particulars

Clements Mfg. Co., Limited
78 Duchess Street Toronto, Ontario

Outselling the old-fashioned hoe



LIBERTY ADJUSTABLE CULTIVATOR WEEDER

(Canada Patent Oct. 15, 1918)

Wherever they have been introduced Liberty Cultivator-Weeders and Gilson Weeders are rapidly ousting the hoe from popular favor. Anyone who has ever used a hoe can see at a glance that these new Gilson tools are more effective and will save time and labor. It won't take Gilson Tools long to "catch on" in your locality. Order from any of these jobbers:

THE GILSON WEEDER

(Canada Patent May 22, 1917)

F. R. Murray Co., Ltd., Vancouver, B.C.; Brown, Fraser & Co., Ltd., Vancouver, B.C.; The Rogers Hdwe. Co., Charlottetown, P.E.I.; T. McAvity & Sons, Ltd., St. John, N.B.; J. H. Ashdown Hdwe. Co., Ltd., Winnipeg; Wood, Vallance, Ltd., Winnipeg.

Manufactured by **J. E. GILSON CO.**
Port Washington, Wisconsin, U.S.A.

Why It Pays!

ADVERTISING in HARDWARE AND METAL is economical because it reaches, and the advertiser only pays for, a circulation of tremendous buying power, which is always on the lookout for new lines and information regarding goods which are already in stock.

Manufacturers and wholesalers cannot afford to side-step the dealers. In nine cases out of ten, the customer accepts the retailer's recommendation.

25c a can Common Sense Exterminator

KILLS RATS

Has been on the market for 25 years. Quickly and effectively eliminates rat pests. It dries them up. Destroys without odor.

"Common Sense" is sold on a money-back guarantee. Good profits in it for the dealer.

Jobbers write us for terms.

Ask us about our **Roach** preparation.

Great Possibilities Under The Trade Agreement Between Canada and Britain.

"THE wiping out of the handicap which Canadian products met in the British market, and the granting of what is equivalent to a preference for Canada temporarily, at least," says THE FINANCIAL POST, "should result in a great impetus to our immediate trade with the mother country. If permanent, as it is almost certain to be, if we keep men of the Borden, Lloyd Harris capacity on the job, it means tremendous immigration and the settling of millions of acres of farm lands. It means the extensive development of present and the establishment of numerous new industries in Canada, to take advantage of the preference; bringing in hundreds of thousands of mechanics and mine and forest workers. For example, the Canadian subsidiary of the U. S. Steel Corporation, which has been marking time, will, in all probability, now go ahead energetically with their twenty or thirty million dollar plant development here. In fact, it is quite probable that within a week plans will be completed and action taken for the immediate erection of about 1,500 workmen's houses at Ojibway, Ont. As we go to press we read in cables to U.S. papers that scores of American manufacturers and other business developers who have been in Great Britain are returning home feeling that there is now little hope of overcoming the handicaps of prohibition of imports and preferences unless they establish branch plants in Canada or the United Kingdom."

The above is a portion of an important leading article in THE POST *of March 15th—an issue of exceptional interest. In addition to this*

THE FINANCIAL POST

OF MARCH 15th CONTAINS:

F. P. JONES SPEAKS OF EMBARGO REMOVAL

Believes it Will Result in a Number of Large Orders for Canada

Note These Contents of THE POST Dated March 22nd

Good Men

DO you need the services of a good retail salesman, traveller, or manager. The best of them read HARDWARE AND METAL each week from cover to cover. Incidentally they also note the condensed ads. in the "Wanted" section. You can use space in this section at a cost of two cents per word for the first insertion, and one cent a word for subsequent insertions. Add five cents for box number or address.

ADVERTISING to be successful does not necessarily have to produce a basketful of inquiries every day.

The best advertising is the kind that leaves an indelible, ineffaceable impression of the goods advertised on the minds of the greatest possible number of probable buyers, present and future.

★STEFANSSON'S
OWN STORY *of his*
FIVE YEARS *in the* ARCTIC

Over five years ago Vilhjalmur Stefansson, the famous Arctic explorer, was commissioned by the Canadian Government to lead a party into the uncharted space that extended from the north-westerly boundaries of Canada on to the North Pole. Shortly after the party got away the news came back to civilization that Stefansson and some of his party had drifted out into the Arctic seas on an island of ice and they were given up as lost. But Stefansson came back, safe and sound after four years of amazing adventures, during the course of which he made many discoveries of scientific and geographical value. Mr. Stefansson has written his story of this wonderful journey and exclusive Canadian rights have been purchased by MACLEAN'S MAGAZINE. It starts in the April issue and will continue for six months. It is a thrilling narrative—unquestionably the most important Canadian story of the year.

★**Mr. Stefansson's story will be published exclusively in Canada in MACLEAN'S. The series of articles by him, now appearing in American and Canadian newspapers, refer entirely to his experiences on previous explorations and do not deal with the journey that he undertook for the Dominion of Canada and completed last year.**

Other Outstanding Features of April MacLean's

"Imperial Relations Must be Worked Out," by Viscount Bryce. An important announcement on the future construction of the British Empire.

"Reconstruction in Turkey," by Stephen Leacock. A humorous article on the present condition of things in Turkey as seen by Canada's great humorist, and applied to Canadian conditions.

"Bulldog Carney," by W. A. Fraser. A splendid novelette of the Canadian West, complete in this issue. Illustrated by Charles L. Wrenn.

"Opening the New Book," by J. K. Munro. An article on the situation at Ottawa created by the new Liberal leadership—smashing, impartial, fearless.

"The Sun Gazer," by Charles G. D. Roberts. A remarkable animal story. Illustrated by Artheur Heming.

"Canada's Fishmonger General," by Thomas M. Fraser. An article on a young Canadian who put Canadian fish on the diet of the British armies by a series of Barnum and Bailey advertising stunts.

"Bombing the Boche," by Lieut. J. Vernon Mackenzie. The second of the two articles that Mr. Mackenzie has written on the whirlwind campaign of raid reprisals which so frightened all Germany.

"The Transformation," by Frederic S. Isham. Illustrated by Hanson Booth. The second instalment of this sparkling new serial.

"Man and Wife," by C. W. Stephens. Illustrated by R. M. Brinkerhoff. The first instalment of a three part story of Canadian life by a new Canadian writer—a delightful love story with a background of business intrigue.

The Review of Reviews

The best articles from all publications the world over are selected and condensed for this department. Some of the articles in the April number are:

The Man Behind Bolshevism.
Could German Fleet have been Destroyed.
The Secret Plans of the Allied Command.
Too Much Wilson.
Is the ex-Kaiser Haunted?
Next Government Will be Labor.
New Life of Deposed Princess.
A New Kind of Socialism.
Are We Communicating With Mars?
The Cohort of the Damned.
Has War Wiped Out Disease?
The Red Terror in Russia
The Sultan Takes Hold.
Some Tricks of the Mediums.

The Value of the Business Press to Business Men

"Business men do not realize the value which trade journals and technical magazines may have for them in increasing the efficiency of their factories and in giving them a broad and comprehensive view of their business.

"Our foreign competitors read almost every article published upon their business with great care and thoroughness. Many of them have duplicate copies of their favorite trade paper sent to their homes so that they may read them away from the business without being disturbed. Many foreign manufacturers contribute articles to these journals on phases of the business with which they are most familiar. Such articles are bound to be helpful and have a constructive effect.

"Our trade journals and technical papers are the best in the world, and they should be supported and encouraged by our business men.

"Copies should be placed where employees can see them and they should be urged to read and study them.

"These papers are preaching the gospel of sound business on practical lines and are helpful not only to business but to the country as a whole.

"If the suggestions made by them in the past had been followed by our business men it would not be necessary at this time to point out some of the fundamental weaknesses in American business."

—Edward N. Hurley, formerly Chairman of the Federal Trade Commission, in "The Awakening of Business."

The following is list of the MacLean publications. Every publication is a leader in its field. Write us for any information you may desire with regard to the field covered, advertising rates, etc.

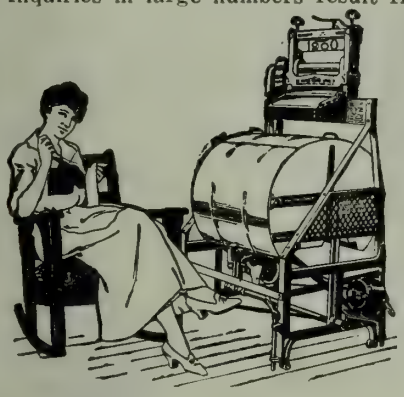
SUPREME AMONG WASHERS



The "1900" Complete Line Pays You Best

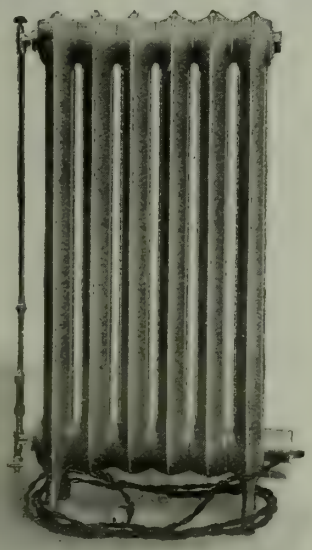
For over twenty years we have been making washing machines **exclusively.** The best types of washers have been developed and patented by us in this time.

Recently we have perfected two new models representing the highest development the Washing Machine has ever attained.

"1900" Cataract Electric Washer

These most modern washers, as well as the other various "1900" machines—the Gravity, Water Power and Gasoline Motor Washers—are sold everywhere through our extensive advertising, which is the largest publicity campaign conducted for washing machines in Canada. Inquiries in large numbers result from this advertising, and these inquiries are turned over to such "1900" dealers as have proven their worth in their different territories.

"1900" Agitator Electric Washer



Is there a live "1900" dealer in your district? Would you like to know more about the "1900" line?
If there is no one selling "1900" Washers in your territory there is a chance for you. Make use of it by writing to-day to the Wholesale Department.

The "1900" Washer Company
357 Yonge Street
TORONTO

Prepare For Spring Trade

Your customers can save time and money by using our Electric Steam Radiators.
Hydro Electric P.C. Approval No. 101.

Spring and its uncertain weather will soon be here. Raining, windy or cold one day, very warm the next, warm in the day and perhaps extremely cool in the evening. It is neither convenient, comfortable nor economical to operate the furnace. One or two of our radiators will furnish all the heat when, where and as required at the minimum of cost and attention.

Clean, economical and guaranteed.

We offer attractive terms to legitimate dealers.

Metal Cutting Problems Solved

with

Help Your Customers Cut Down Metal Cutting Costs

The Starrett Chart will enable **them** to select the **proper** blade for **their** particular requirements, as it was produced only after the most severe tests had been made on all classes of materials, under various conditions.

Any one Hack Saw Blade cannot be successfully used in cutting off Structural Steel, Iron or Brass Pipe, Cast Iron, Tool Steel or Sheet Metal. If that were practical, we would have made such a blade years ago.

To Increase Efficiency of the Cutting-Off Department

it is necessary that the proper blades be used for particular requirements. The Starrett Chart gives your customers reliable information they can depend upon.

Our service department will conclusively prove the above statements. Get Catalog No. 21MA.

IT'S OUT!

The new Spring Series of Newspaper Advertisements for Hardware Stores . . .

Eight advertisements of assorted sizes—the smallest 5 inches, single column; the largest, 8 inches by 5 columns.

Each advertisement is beautifully illustrated—each is a "puller" for any store that makes use of it.

Plates of these advertisements will be sent free to any hardware merchant who requests them.

What do **we** get out of it? You are wondering why we are so generous as to give advertising plates away. The answer is simple. In each plate, there is a small space devoted to O-Cedar Products. The reference to O-Cedar is not large enough to make it look like an O-Cedar advertisement—just enough to let people know that you handle O-Cedar Products. Only one merchant in a town can have the use of the requested plates. So it will be well to let us have your order without delay. There is a blank space in each, as shown, wherein may be inserted whatever special items you may wish to list. The entire series of 8 advertisements are ready for you to look over in proof form. Send for the sheet of proofs and learn how to make use of our Advertising Department.

HARDWARE AND METAL, April 5th, 1919. Volume XXXI. Published every Saturday. Yearly subscription price, $3.00. Entered as second-class matter July 1st, 1912, at the Post Office at Buffalo, under the Act of March 3rd, 1879. Entered as second-class matter at the Post Office Department, Ottawa.

—to touch up the old car

The lengthening days and higher temperature of Spring wakens the motorist to fact that his car looks rather dingy and in need of a touch up to make it presentable.

This is a good time to bring out your stock of cleaners and "touch-up" auto accessories — show them in your windows.

Beside the Johnson line of Auto Products, we carry Tire Repair Kits, Locktite Tire Patches—the patching material which mends large-size blow-outs most satisfactorily.

Johnson's Auto Products

will make and keep the car young.

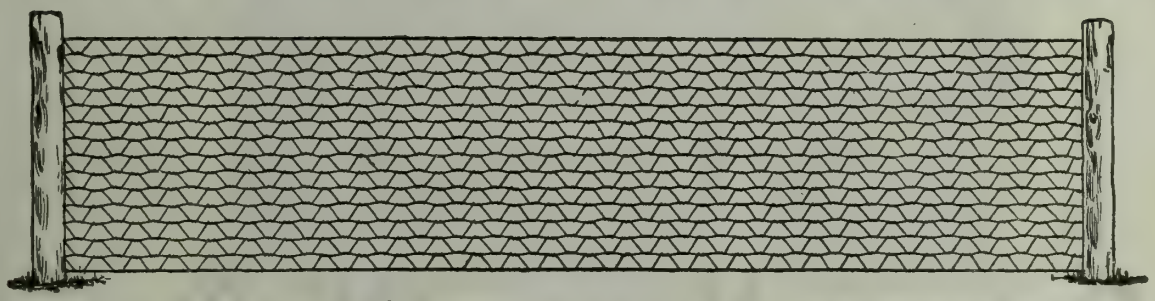
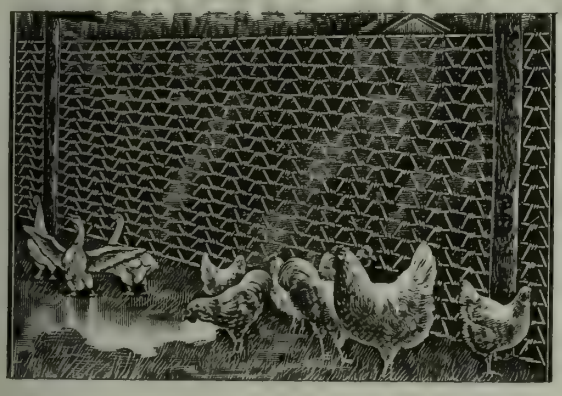
"WW" BRAND Always Makes Friends! "WW" BRAND



W. W. Poultry Fence



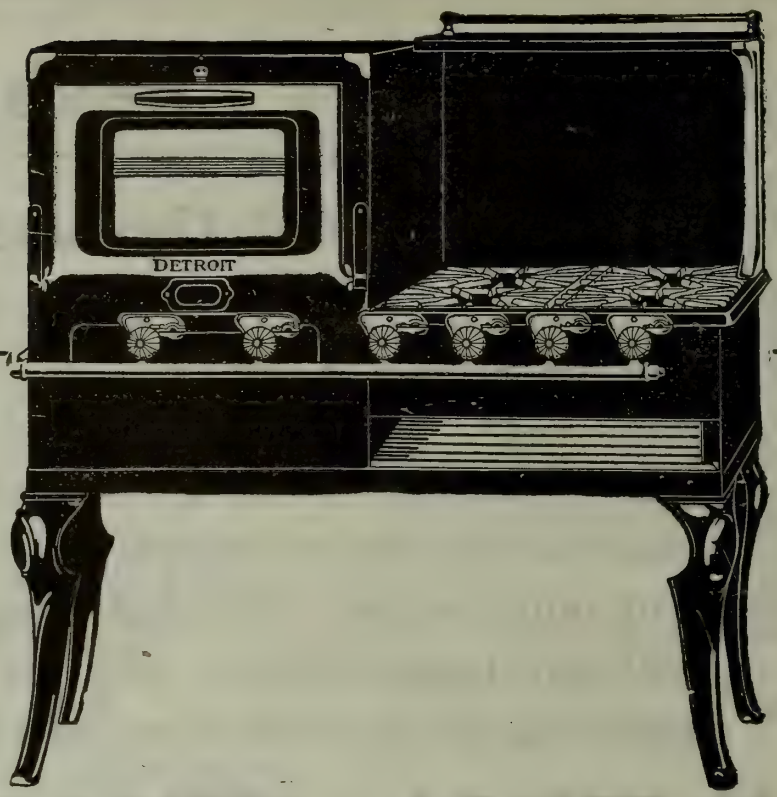
Every Roll Guaranteed

The guarantee means that the horizontal wires in truss formation are two sizes heavier than cross wires. At intersections the wires are completely twisted, avoiding hinging tendencies and openings by unwinding that are common with other makes. Will hang straight and tight between posts without affecting width, not requiring rail or board at top or bottom.

POULTRY FENCING

Made in one and two-inch mesh

Importance to You



The manufacturers of "WW" Poultry Fencing control every step in the manufacture and, therefore, can regulate the quality from the beginning to the end. Nothing but the best is allowed to pass.

We carry a complete assortment of Wickwire Hexagon Netting, Galvanized after weaving—the price is the same as Galvanized before weaving.

ARMCO IRON

ENAMELED PRODUCTS

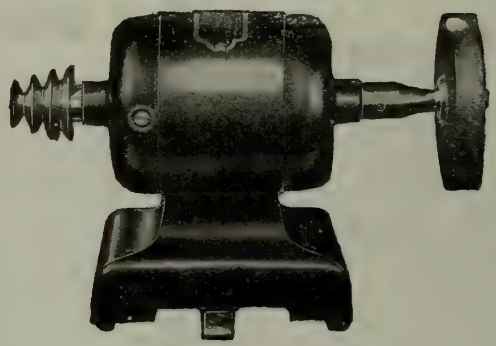
In the Home

Armco Iron makes its appeal to the women of America in the way of enameled refrigerators, stoves, tabletops, and other enameled kitchen products.

It is a pleasure to feel we have a part in bringing about this great "Enamel Age" for the American kitchen. Our message to the home makers of the land is that they can expect the best products when they know the enameling is done on a pure Armco Iron base.

Its evenness and freedom from occluded gases, seams, scars, cracks, spots, pin-holes and other defects are what make possible the polished perfection of Armco Iron Enameled Products. They don't show ugly spots or rough places.

Many leading manufacturers are using Armco Iron exclusively for all enameled parts in the manufacture of their kitchen cabinets, stoves and table tops.



The American Rolling Mill Co.

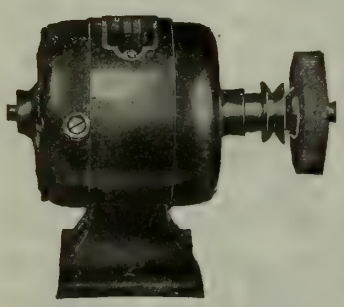
Purity ARMCO IRON Durability

SELLING THE "DUMORE" MOTOR



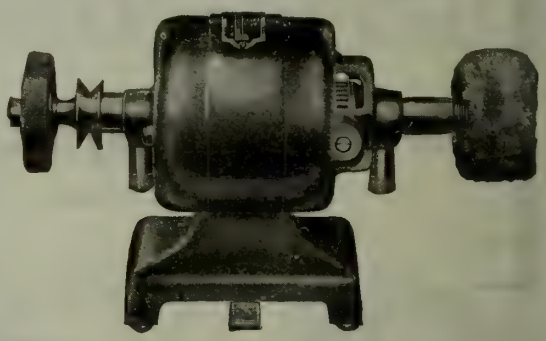
Type C 1-16 H.P.

Of course you know how to sell Northern Electric "Dumore" Motors, Mr. Dealer, but have you ever tried this method?—

Take one of our Type C 1/16 H.P. Motors and place it on your counter just at the spot where most of your customers approach it, attaching it to the nearest socket in full view. Each time a customer is at the counter, demonstrate it to him; however, you will find that the majority of them will ask you for a demonstration.

Really, the machine sells itself. You can readily show your customer how easily it is handled and the large number of household helps it can accomplish, such as polishing silverware, cleaning cutlery, driving various domestic appliances, etc.

If one of your customers think it is too large or too small do not forget to show him either Type A 1/25 H.P. or Type D 1/8 H.P. If you have not tried this method, put it in effect at once and you will be surprised at the increase of your sales.



Type A 1/25 H.P.

Built to meet the demand for a light compact power unit. Finished in black enamel. Equipped with 3 feet of cord and attachment plug, wheel arbor and emery wheel. Wheel arbor nickel plated. Type B motor is similar to Type A, only it is entirely nickel plated.

Type C 1/16 H.P.

Light and Powerful. Always ready for use and is as near trouble proof as motors can be made. Equipped regularly with 3-step pulley on one end of the motor shaft and a wheel arbor on the other, together with an emery wheel. Can be equipped the same as Type D. Equipped with 8 feet of cord and attachment plug. Cutler-Hammer, 3-speed Rheostat, Speeds: 2,000, 6,000, 8,000 r.p.m.

Type D 1/8 H. P.

A popular size, especially adapted for jewelers' and dentists' work. Equipped with 8 feet of cord and attachment plug. Shaft ends are tapered. Ritter chucks and wheel arbors can be used on this motor. Speeds: 2,000, 6,000, 8,000 r.p.m.

If you are not one of our dealers, write us for full particulars, prices and literature.

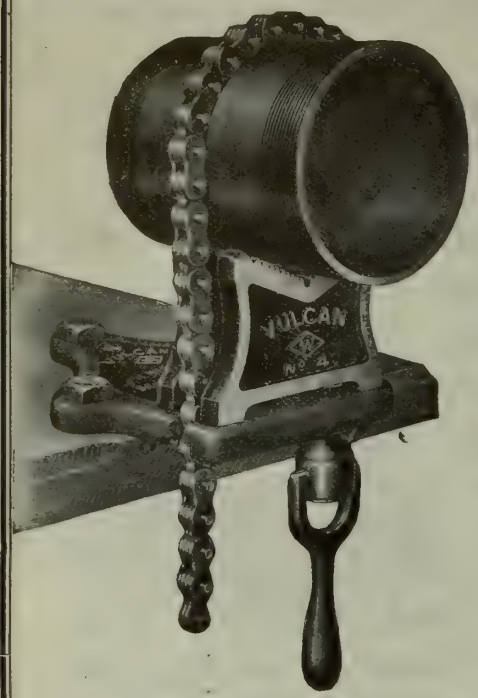
Tools for Telling the Time

SELLING "Ingersolls" is not a jewelry proposition in the ordinary sense of the word. "Ingersolls" are tools that your customers need just as much as they do hammers, saws, chisels or any other tools that you sell.

If you are not handling "Ingersolls," then you are overlooking trade that should be yours. There is no trick in selling them. It is not like selling other watches. You don't have to talk about jewels or movements — or anything like that. Display them — let your customers know that you have them —and you can build up a good trade for them.



Robt. H. Ingersoll & Bro.

PEDLAR'S PERFECT TONCAN METAL CULVERTS

Why *Corrugated* Metal Culverts?

Because corrugations add tremendously to strength, corrugated metal Culverts are easily handled and reasonable in cost.

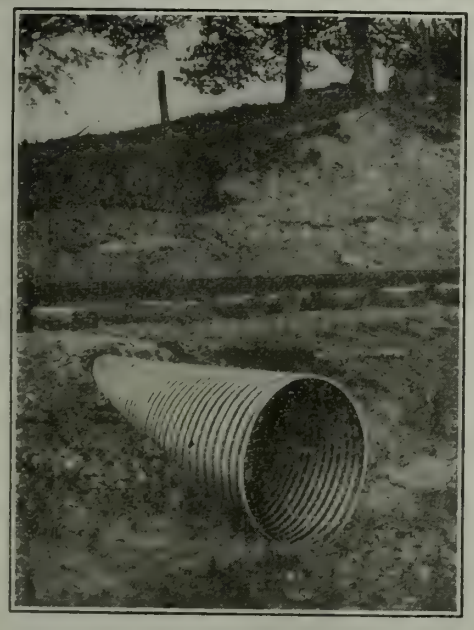
Corrugations make bursting through freezing impossible and they give the culvert a good grip on the ground during freezing weather and floods.

Under deep fills Pedlar's Perfect Culverts give abundant strength and unsurpassed lasting qualities.

Why *Pedlar's Perfect* Corrugated Metal Culverts

Because they have proven their ability to stand up under the heaviest service. Because they are "perfect" in workmanship—depth of corrugations and careful attention to every detail. **Because they are made of Toncan Metal and will last indefinitely.**

Toncan Metal is unsurpassed in lasting qualities by any sheet metal made from iron ore.



Culverts made from Toncan Metal are giving splendid service in nearly every country of the world under every condition of soil and climate.

Thousands of these Culverts are in service in Canada. We will gladly supply names of users and our Culvert Book No. 32 on request—write

For every severe sheet metal service, from roofing and flashing to tanks and refrigerators, choose Toncan Metal. It is reasonable in cost yet lasts indefinitely.

Our Book "Corrosion — The Cause — The Effect—The Remedy" should be in your Library — We'll send it on request.

Corrugated Culverts should have earth above them to at least their own diameter. This Pedlar's Perfect Culvert stands the pounding of railway service with even less.

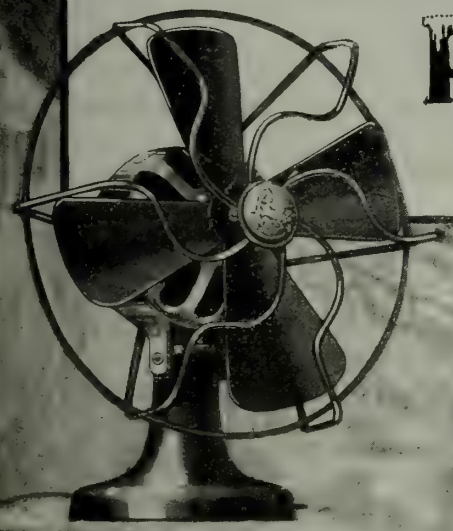
For the Office Desk

And Every Room in the Home

The opportunities for the sale of Polar Cub Electric Fans, at only $8.50 retail, are tremendous. At this price they become the individual fan to be used on each desk in an office and in the dining room, living room, kitchen, and the sleeping rooms at home—a wonderful field for sales.

Polar Cub is strong and substantial. Has two speeds and a stop. Is equipped with cord and plug. Has a handsome nickel plated motor, adjustable to any angle. Height, 8 inches; blade diameter, 6 inches; blades, guard and base finished in rich, velvet black enamel.

Send in your order now and be prepared for the first hot wave. Don't delay and lose sales by taking chances on last minute deliveries.



BACKED BY ADVERTISING

Polar Cub will be advertised every week in The Saturday Evening Post during July and August, the hottest months of the year and the demand is bound to be a large one. It is by far the biggest fan value in the market to-day—a fan whose price puts it within the reach of all and yields a good dealer profit.

Polar Cubs are packed 12 to the carton and some exceptionally good store display material will be supplied FREE if requested. Write for discounts and prices.

Eureka Corn Planter

There is no wasting of seed where the *Eureka Corn Planter* is used. Every kernel is accounted for with the result that economy is a certainty to the last degree.

Then, too, planting is easier and more thoroughly done with a like saving in time and labor.

Everything is in favor of the Eureka Corn Planter. It's such an economizer that customers are readily convinced of the wisdom of purchasing one or more. It sells on its merits, making good profits for the dealer.

In one and two-hand styles, well finished, light and durable, positive and accurate in action. A seed guard determines the number of kernels to be dropped in each hill. Only one lot of seed can pass into the jaws at one time. A flat steel spring is used in place of the cheap brushes used in ordinary planters, which constantly wear out.

Recommend this labor- and money-saving tool to your customers.

Sterling Spark Plugs

When the Customer Speaks A Good Word

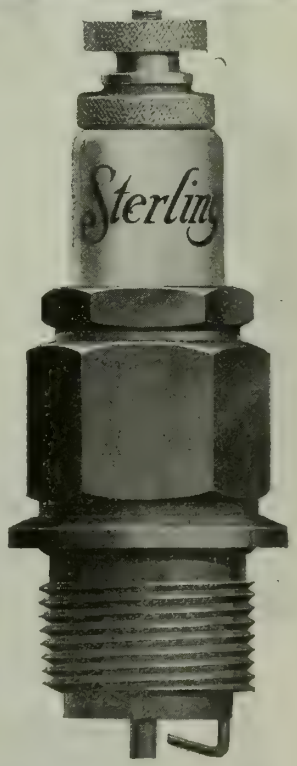
"Just stopped to tell you that I've learned something from you about better car operation.

"And those Sterling Spark Plugs taught me the lesson.

"Well, just like a lot of other motorists, I have been 'plugging' along, so to speak, trying to make on old set of plugs last as long as possible.

"I knew that if I took them out it meant throwing them away, and buying new ones. But I finally put in a set of Sterlings, and you should have seen the difference in this motor.

"But the point is this: when carbon accumulates—and it does accumulate in every motor nowadays—it's the work of only a few minutes to take those Sterling Plugs apart and wipe off the carbon. Then the plugs are as good as new."



This is the evidence of a pleased customer.

Sterling dealers find the sale of Sterling Spark Plugs pleasant because of this relationship with users.

Between the dealer and the Lockwood-Ash Motor Co., the maker behind the spark plug, the relationship is just as cordial.

The Lockwood-Ash Motor Co. is of long and successful experience; its product is one dealers grow more enthusiastic over as the satisfaction of the customer grows.

For sale by progressive garages and supply dealers everywhere.

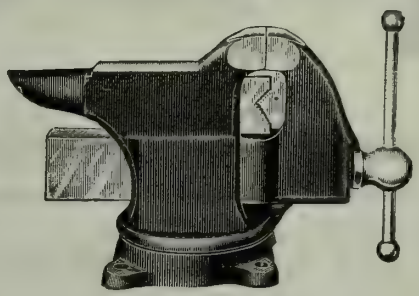
Safe Gauge Glasses

Strong's Ironclad

When ordering Gauge Glasses stop and consider what poorly made, unsafe Gauge Glasses may **cost** the concern.

An eye put out—a man badly cut—a workman laid up for weeks—the company put to great expense under the New Liability Laws.

The ten thousand concerns who use Strong's Ironclad have carefully considered these facts and stick to Strong's Ironclad because **safe** and **reliable** when under High Pressures.



All sizes in lengths of 1 in. to 72 in. in any fraction of an inch, with fused ends. Sell **safe** glasses and **hold** customers. Write for prices.

4 Good Reasons ---READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

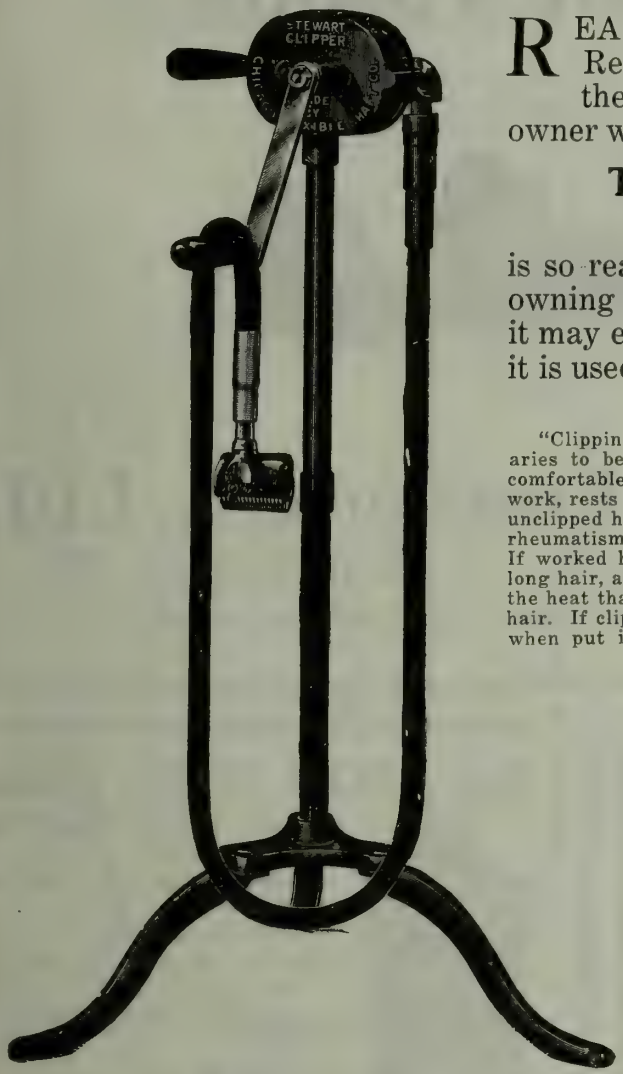
Made of Galvanized Iron with Black Iron Drawers, Self-Closing Doors, Removable Screens

This makes ash-sifting a pleasure instead of a horror; you can wear your best clothes and yet not get any dust on them.



It is dustless; you don't have to rock it or shake it; it is self-operating, a child can work it.

We guarantee that this ash sifter will give satisfaction or your money refunded. There are good profits in it for the dealer. Write us to-day for prices and information.

FURNIVAL & CO.
631 Dupont St. - Toronto, Ont.

Preach (and Practice) the Gospel of Spring Horse-Clipping

READ the accompanying editorial from the Horse Review, get the facts well in mind, and preach the gospel of the "Stewart Clip" to every horse-owner who comes into your store (mule-owners, ditto).

The Stewart No. 1 Ball Bearing Horse Clipping Machine

is so reasonable in price ($13.00) that even the man owning only **one** horse can well afford to buy it. For it may easily save several times its cost the first season it is used.

Says the Horse Review:—

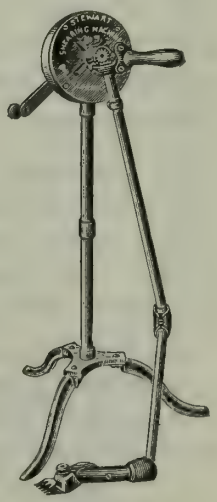
"Clipping a horse in the spring is now conceded by all the leading veterinaries to be as essential to his well-being as shoeing him or giving him a comfortable bed to lie on. A clipped horse dries out rapidly after a hard day's work, rests comfortably and is refreshed for the work of the following day. An unclipped horse is liable to catch the heaves, pneumonia and all sorts of colds, rheumatism, etc. This is especially so when his hair is long and he is "soft." If worked hard he will perspire freely and the moisture will be held by his long hair, and the food that should go to nourish him will be used to replenish the heat that is being constantly taken from his body by the mass of cold, wet hair. If clipped the perspiration will evaporate almost as soon as secreted, and when put in the stable he rests comfortably and his food does him good."

Cows Must Be Clipped, Too

Demand for **clean milk** now being made by shippers, by health departments of cities, and by an awakened consuming public, makes it **necessary** that every milch-cow should be clipped around udder and flanks about once a month. The Stewart No. 1 is exactly suited to this work, as well as to horse-clipping.

Machine Shearing for Sheep

We demonstrate that a **Stewart No. 9 Ball Bearing Sheep Shearing Machine** gets about 15% more wool to the clip than will be recovered by hand-shearing, because the Stewart machine clips to a close, even stubble, all over the body, while hand-shearing is uneven and irregular.



For the same reason the "Stewart" delivers the fleece in one solid, even "blanket" without the "second" cuts that hand-shearers (especially if they are working on a "per-head" basis) leave in the wool. This means a better price for the wool.

And, of course, machine shearing is both faster and more humane than hand-shearing.

For these reasons, every owner of a flock of sheep (even though it be a small one) is an active prospect for a Stewart No. 9, at $19.00.

Your discount from the price named is so liberal that every sale of either machine shows a fine net profit.

Send for our catalog, or if you are already familiar with our machines, send in your order promptly (direct or through your jobber).

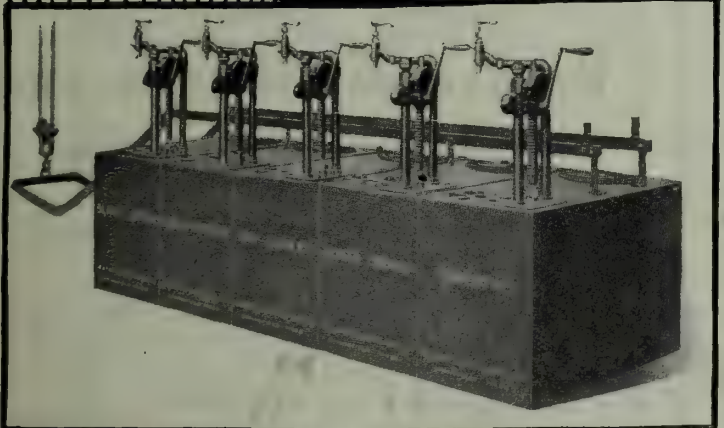
THE STRATFORD MFG. CO., LIMITED : STRATFORD, ONTARIO



Modernize Your Store with a Gilbert & Barker Oil Storage System Save Oil and Money

For handling paint oils, varnishes and heavy, "gummy," non-lubricating oils our T221-H spells maximum efficiency.

This outfit may also be used for lubricating oils and units may be arranged in battery form as shown below.

They make an attractive and economical arrangement, and as they are fitted with chain hoist, barrel dash, track and cradle, the oil is easily emptied from barrel to tank by gravity, which allows thorough draining without waste and this operation can be completed by one man.

These units or batteries are nicely finished in green enamel baked on and the tanks are plainly lettered with the names of the oils when so desired.

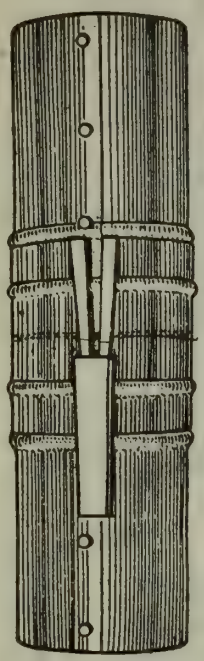
Follow the Leaders

A safe, sane policy, especially when the leaders are the big, progressive men of the country, men who adopt an improved system only after they are thoroughly satisfied that it means greater efficiency and consequently greater profits.

The cost of installing Gilbert & Barker Oil Handling Equipment in your store is nominal and the saving in time, labor, and positive elimination of waste quickly pays for the installation.

For the rapid and economical handling of paint oils, varnishes, lubricating oils or kerosene, there is a Gilbert & Barker outfit just suited to your requirements, and if you are handling gasoline, remember that the G. & B. line of Pumps and Tanks is complete.

Bulletin 52 tells the story in a very compehensive manner



To-day is a better day than to-morrow—write.

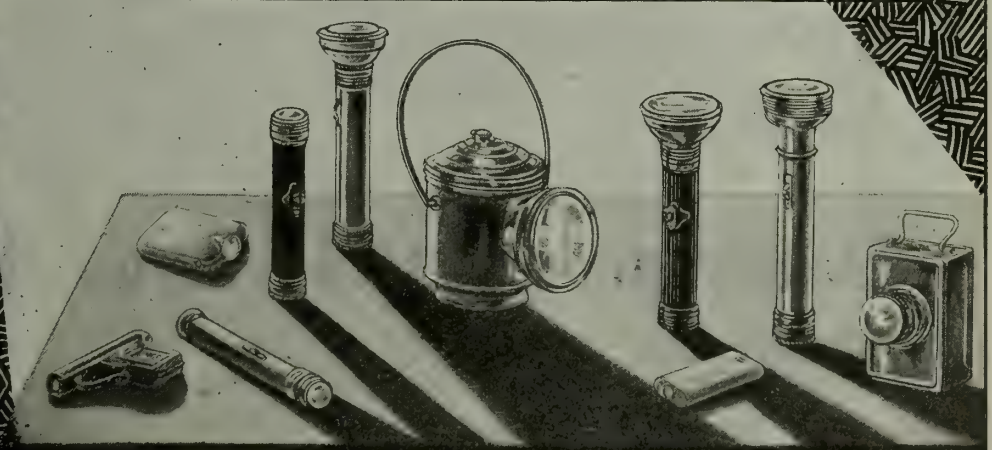
On Your Counter

—plus your window display and the right kind of sales effort in co-operation with ours—that's the winning combination for producing sales and multiplying profits.



Our consumer advertising, showing the many uses for DAYLO, impresses on the prospective customer's mind the need of DAYLO in every household. But the real buying incentive—the thing that makes him dig down into his pocket for the purchase price—is the goods on display.

A DAYLO window display says, "Here's the place to buy me," and ushers in many a sale. But DAYLO counter displays have created enormous sales amongst the class of trade that rushes in for something else and is caught and held by the display while making other purchases or waiting for change.

And don't forget that DAYLO sales bring repeats. No one expects a battery to last forever. You can build up a permanent and growing business in Eveready Tungsten Batteries and Eveready Mazda Bulbs. The big stores are doing it by keeping the Eveready line constantly on display.

Put in a complete Eveready line, push it and get *your* share of this business.

Unusual Activity in Building

Big Chances For Hardwaremen in the General Program of Construction and Also in the Special Field Which Will be Financed by Government Funds to Relieve the Shortage of Dwellings.

AN unusual situation which presents an unusual opportunity for hardware dealers exists in the building field to-day. There are two distinct divisions, each of which is big enough to involve the expenditure of many millions of dollars for materials. In one section there is the general building programme, and in the other the special programmes that are to be undertaken by various municipalities and for which Government funds will be available. This last is aimed to relieve the acute shortage of dwellings that exists throughout the Dominion. Owing to the difficulties in selecting types of homes that would be suitable and also in getting the machinery in operation for their erection, there has been considerable delay, but the situation now is that scores of municipalities are either ready or just about ready to go through the procedure necessary to obtain the Government loans.

This is a type of house of which large numbers are being built in the model towns and villages of England. Ample room for gardening is a feature.

Permits Doubled

In the field of general building there is every indication that a record season is ahead. Taking the Dominion province by province, the statistics available show that the permits for February were double those issued a year ago. The figures for March, it is stated, will also show a huge increase. Reliable information from architects is to the effect that they are busier than they have been for five years, and that they have not only have enough work on hand to keep them busy all this year, but they look for a steady increase in the volume of construction work.

Ontario is one of the provinces which is taking the lead in arranging to make use of the funds offered by the Government to relieve the housing problem.

In all parts of the Province of Ontario municipal councils are making their plans for taking advantage of the Government's offer to provide funds to be used in relieving the shortage of houses. Hardware dealers are keenly interested in this matter as it will mean large sales of building supplies, tools and other merchandise through the stores. There is a big chance here for hardwaremen to render real service in the way of suggestions that will make the homes to be built not only better dwelling places, but more homelike and comfortable. The housing problem has become a most serious one in many places. Many of the homes that were built by speculators were so cheaply and poorly constructed that they are now in such a state that it is only because there is such an acute shortage of houses that people will live in them.

Want Something Better

The people want something better, and many municipalities are planning to give them houses that will more nearly meet the requirements of ideal home conditions. There is a fine opportunity here for the hardware dealers to get busy and make suggestions in connection with the plans and specifications that are to be prepared. Anything that will tend to congestion is being avoided in England and other countries where the housing problem is being worked out. In these countries where they have learned, at a horrible price the lesson that small, dark rooms in crowded quarters exact an enormous toll in deaths from various diseases, the demand is for houses where these menaces to health will be entirely removed. The houses need not be expensive, but with fair-sized rooms and clean and bright surroundings, conditions will be created that are aimed at reducing diseases to a minimum. Much attention is being given to sanitary matters.

Can Give Advice

In all these matters the hardwareman can give excellent advice, and also in connection with the selection of the materials that are to be used. Past experience has proven beyond any doubt that it does not pay either from a health standpoint or from an economical standpoint to build cheap shoddy dwellings.

In the new types of houses in England, gardening is featured with the idea of getting the people, especially soldiers who have been wounded, out of doors in

the fresh air as much as possible. Many of the model towns and villages are kept as spotless as regular applications of paint, both inside and out can make them. There is modern heating and plumbing in these homes, and in many of them not only electric lighting, but electrical equipment of various kinds, all aimed to reduce labor. In all these things the hardwaremen are interested and can give the various municipalities who are busy with plans, advice that will be invaluable. The hardware man will reap the benefit later in the sale of much merchandise.

Can Help Here, Too

Many of the officials of the municipalities have been more or less in the dark regarding the procedure to be followed in connection with the housing scheme of the Government. By making use of the following regulations which have just been issued by J. A. Ellis, director of the Bureau of Municipal Affairs, the hardwaremen may be able to clear up a lot of points on which their councils and committees are rather vague. This will give them an opportunity also to get closely in touch with the work that is going on.

Following are the regulations:

THE ONTARIO HOUSING ACT, 1919

Rules and Regulations Made by the Director of the Bureau of Municipal Affairs Under the Provisions of Section 25(1) of the Act.

Plans, Specifications and Estimates.

(1)—(a) Plans and specifications, together with an estimate of the cost of construction, in triplicate of all houses to be erected under the provisions of the Act other than by a Commission shall be submitted to the Commission, and by the Commission to the Director, for approval; provided, however, that such plans, specifications and estimate of cost may in the first place be submitted directly to the Director for approval. Two sets of such plans, specifications and estimate will be returned marked "aproved" when satisfactory.

(b) Where a Commission proposes to erect houses, plans, specifications and estimate of cost in duplicate shall be submitted to the Director for approval, one set of which will be returned.

(c) All houses shall be erected in accordance with the plans, specifications and estimate of cost so approved.

Restriction as to Cost of House to Apply

2. The provisions of sub-sections 2 and 3 of section 11 of the Act shall apply to subsection (b) of section 12 (1) and to section 13 of the Act, in so far as the cost of a house is concerned.

Restriction as to Cost of House and Land to Apply

3. The provisions of sub-sections 2 and 3 of section 11 of the Act shall apply to subsections (c) and (d) of section 12 (1) of the Act.

Security in Lieu of Cash Payment

4. The security which may be given under sub-section (c) of section 12 (1) of the Act may be in various forms. The following methods might be considered:

(a) The borrower depositing with the Commission or company, stocks, bonds, debentures or other securities for money.

(b) The borrower giving the Commission or Company a power of attorney, or other authority to receive moneys, whether in the shape of salary or otherwise, which is or might thereafter become due and payable to the borrower; and authorizing the Commission or Company to apply same, or such portion thereof as may be agreed upon, on account of the payments to be made under the Agreement for Sale referred to in section 16 of the Act.

(c) A responsible resident of the municipality guaranteeing the payments which the borrower is required to make under such agreement for a period to be agreed upon.

Interest During Construction

5. Whenever a loan is made under the provisions of the Act interest at the rate of 5 per cent. per annum shall be charged upon the amount loaned from the date at which it is advanced. Such interest from the actual date of the advance until a date to be fixed by the Director shall be added to the amount of the loan, as being interest during construction, and shall thereupon become part of the loan.

Interest During Construction to be Charged by a Commission or Company

6. A Commission or a Company acquiring land or erecting houses under the provisions of the Act shall be entitled to charge interest at the said rate upon the amount paid for such land from the date of its payment, and upon the amount paid upon progress estimate for the construction of such houses, until a date to be fixed by the Director, and shall be entitled to include the proper proportion of such interest in the amount at which each of such houses is to be sold.

Commission May Retain Moneys to Secure Payment for Labor and Materials

7. A Commission before making payment on a progress estimate, or the final payment on any loan, to a Company or a person, must be furnished with such evidence as the Commission may require proving that all labor done and materials supplied for the house for which the loan is being made have been paid for, or will be paid for, out of the loan. The Commission is hereby authorized to retain from the progress estimate or final payment such amount as the Commission considers necessary to ensure that all the labor performed and materials supplied for such house will be paid for.

Building By-laws

8. In a municipality which has building by-laws all houses shall be erected in accordance with such by-laws; provided that the minimum requirements regarding general provisions and housing standards of the province shall take precedence over the provisions of the building by-laws of any municipality where such provisions fall below the minimum requirements and housing standards of the province.

House Not to be Converted into Store

9. A house erected under the provisions of the Act shall not be converted into a store or used for any purpose other than a dwelling, except with the approval of the Housing Commission of the municipality.

Remittance of Moneys to Province on Account Loan

10. The Commission shall, by cheque payable to the Treasurer of Ontario, forward to the Director all payments made by it on account of any loan by the Province.

Serial Debentures to be Issued by Municipality as Collateral Security for Loan

11. The debentures to be issued by a Cor-

This photo shows the all steel shelving used by Dunlop & Company of Pembroke, Ont., in its tinware and enamelware department. Note the neat arrangement. Every article is price marked. Display is a feature of this store and in order to show the goods in the display counter still more effectively the firm plans shortly to replace the wooden counter tops with all glass tops.

Handling a Turnover of $750.000

Dunlop & Company, Of Pembroke, Get Business By Going After It — Displaying Goods Well In Store And Windows Materially Increases Sales.

"OUR annual turnover for our year ending March 31 will be approximately $750,000. This will be an increase over the previous twelve months of about $115,000. Business has been good and our trade is continually expanding."

This is the way in which F. W. Cockburn, manager of the Dunlop Hardware Company of Pembroke, sums up the situation at present as far as his firm is concerned in discussing business conditions with HARDWARE AND METAL. Pembroke is a town of 8,000 population, situated in a splendid farming and lumbering district. But this does not explain the volume of business done by the Dunlop Hardware Company.

Go After Trade

"We get the trade because we go after it," said Mr. Cockburn. "We have spared no time, trouble, or expense, to make our stock and our store one of the best in the country. One of the biggest items in connection with our business is the supplies required by the lumbermen. We go right out after this business. The place to get this kind of business is in the lumber camps, and just as soon as a new camp is started our men are there to take orders for supplies. Take crosscut saws for instance. These are needed in large quantities. This year I should say we will sell fuly 2,500. This is approximately an increase over our sales in this line last year of 25 per cent."

In going after the trade in the lumber camps, however, the Dunlop Company does not for one minute neglect either the local retail trade or the trade of the thousands of prosperous farmers in the district. By reaching out for business it has built up a business that extends for at least a radius of twenty miles around Pembroke. French farmers from across the river in Quebec, Scotch farmers in the district east, and German farmers in the territory west, all buy from Dunlop's.

A Splendid Store

The Dunlop Hardware Company, to meet the demands of its trade, requires an immense stock, and it believes in never letting a customer get away because it does not have the goods asked for in stock. The people of the district have come to know that if they want anything in the hardware line they can get it at Dunlop's.

The retail store on the main street of Pembroke is not only one of the handsomest, but one of the largest and most substantial buildings in the town. Two big fires last year swept away whole

ections of Pembroke's business district. Some of the storage buildings of the Dunlop Co. were among those which went up in smoke, but it was at the retail store built throughout of concrete that the flames in the last big fire were checked. The store is absolutely fireproof and the windows, except the platee glass show windows, are of wire glass. The stock is carried in various sections of the store, and each is separated by fire-proof doors. A large stock of cutlery is kept in a fire-proof vault that was formerly used for keeping the books in. It was converted into a fire-proof cutlery store house by simply placing shelving in the vault. Each night massive iron doors close on a valuable stock of this line.

Steel Shelving

As may be seen from the illustration, solid steel shelving is used throughout the enamelware department. Below the shelves various lines are kept in solid steel drawers. These steel shelves occupy the whole of the eastern side of the store and one end.

"The steel shelving has proved so satisfactory," said Manager Cockburn to HARDWARE AND METAL, "that we are planning to put in a lot more of it. It is not only strong but it looks well and is easily kept clean. If it is accidently scratched, a little rubbing with oil removes all traces of the damage. This cannot be done with wood.

Another improvement planned by the firm is in connection with its silent salesmen. These are found throughout the store and at present have glass fronts and wooden tops. It is planned to shortly remove all the wooden tops and replace them with glass.

Some Features of the Store of Dunlop & Co.

Store and adjoining buildings are all of fireproof construction.

Four large display windows which are changed regularly.

The price is plainly marked on every article in the store.

All steel shelving in the enamelware department. More shelving of this style is to be installed.

Display counters with glass front. The wooden tops are to be replaced with glass to add to the display value.

Display tables which are changed frequently are placed at conspicuous points in the store.

Seasonable lines of goods are kept on display in the front part of the store.

All stock is kept looking its best, clean, bright and attractive.

Increase Sales

"We have proven beyond doubt that these silent salesmen are big business producers," said Mr. Cockburn. "People can see the goods and often buy things when they are in the store that they need but had forgotten about until they see them in the cases. Displaying the goods always helps sales, so in order to display them still more we are going to put glass tops on the cases."

Mr. Cockburn appreciates fully the value good window displays are in boosting business. The Dunlop Hardware Company has four large display windows, and the displays are changed regularly.

"We nearly always get results," said Mr. Cockburn, "but if we put in a display and find within two days it is not increasing sales, it comes out. We always use price tickets freely in connection with all goods shown in the windows. We went to considerable expense to secure good show windows and they have demonstrated their value."

Change Them Often

The Dunlop Company has learned the value of keeping display tables laden with various articles at strategic points in the store where all those who come in cannot help seeing them. These displays are changed often and the tables have been responsible for many sales.

The firm also makes it a rule to keep seasonable lines displayed right in the front of the store. At present, stoves, washing machines and hockey sticks are prominently shown. The results may be gathered from the statement of Man-

The above photo shows how the display idea is carried out in another section of the store. Note the display table in the lower left hand corner. Tables like these in conspicuous places about the store sell a lot of goods. They are changed regularly. Note the stove shown close by the door as one enters the door as one enters the store. The counter shown is to be replaced shortly with an all glass counter which will help display and sell still more goods.

The illustration shows a front view of the hardware store of Dunlop & Company at Pembroke, Ont. The four large display windows are changed regularly. The building is of fireproof construction throughout.

ager Cockburn that this year's stove sales will run between $15,000 and $18,000, while approximately 180 hand-power washers have been turned over.

"There is a noticeable tendency on the part of the farmers to buy labor-saving appliances, regardless of cost," said Manager Cockburn. "There is an equally noticeable tendency on the part of the public at large to demand quality goods. I attribute this to the fact that people have learned that owing to the advances in prices inferior goods, which used to be priced low are now high, and people realize that it is better to pay a little more and get a really good article.

Keep Eight Men Busy

The Dunlop Company handles a large quantity of electrical goods, lamps, electric washers, electric irons, and other lines. This business has grown until now the firm keeps eight men looking after electrical wiring and installing fixtures.

The Dunlop Company last year, owing to the difficulties it experienced in obtaining male help owing to the military demands, tried the experiment of putting its enamel ware, aluminum goods, and kitchen ware in charge of two girl clerks. Miss Coles and Miss Perault have been looking after this work for many months, and the increases in sales are the best proof that the experiment was a success.

"We have found that women will go to them and ask about things when they would not care to go and ask a male clerk," said Manager Cockburn. "The girls have picked up the business thoroughly. They take a keen interest in their work, and keep the stock spotlessly clean. I think I am safe in saying they do more work than five men."

Business Kept Up

Mr. Cockburn, in discussing the business prospects said he expected business to expand steadily. After the armistice was signed he said a decrease in volume was looked for. What actually happened was that sales in November, 1918 were $15,000 ahead of those in November, 1917. In December there was an increase of $21,453 over the business of the same month the year previous.

He commented also on the fact that not only the Dunlop Hardware Company, but no firm in Pembroke holds bargain sales.

His views regarding the granting of credit are interesting. He has been with the Dunlop Company for twenty-four years.

Six Years Often

"At the time I started," said Mr. Cockburn, "credit was often granted for long terms, six or seven years. We finally cut it down to two years, but now we insist on a settlement within a year. Our proportion of credit business to cash is nine to one. It is impossible to estimate our losses for a year, but taking a five-year period as a basis, I should say that our losses from credit granting would total five per cent."

Mr. Cockburn said the losses as far as farmers are concerned are very small. While the farmers generally want accommodation he said, he found them honest and willing to pay up sooner or later. The principal trouble the firm finds is collecting from working men who have the habit of paying cash for some time and then suddenly asking for credit on some excuse, run up a good-sized bill, and then migrate.

Pays No Bonus

The Dunlop Company does not pay any bonus to its clerks, but it has a system by which the sales records of each man is kept, and then at the end of the year his salary is raised according to the work he has done.

On all the roadways leading into the town of Pembroke, and at prominent places throughout the countryside where they will be seen by the largest number of people, the Dunlop Company has placed its signs. Two kinds are used, some of steel construction and the other of frame. There are about seventy-five of these signs at one point and another in the country for a radius of twenty miles around Pembroke. They measure about eight feet in length and three feet in height and all direct the farmers to the Dunlop Hardware Co. in Pembroke for their needs. These signs, Mr. Cockburn says, have paid well and bring in a lot of business, besides keeping the firm's name continually before thousands of people.

Other Features

Beside the store building shown in the illustration, which is stocked from cellar to garret, Dunlop & Company have half a dozen other buildings in which to carry various lines which they deal in very extenstively. There is a building for cement, one for axes, of which the firm handles large quantities, another for iron and bars, a large stable, a warehouse, and a building where explosives are kept.

Everything that makes for labor saving and ease of handling is to be found in these buildings. The stable, for instance, has modern all-steel equipment and concrete flooring and is always quickly and easily kept clean. All the buildings are of fireproof construction.

FURTHER DECLINES TO COME ON FALL LINES

A manufacturer of enamel and tinware lines, etc., in referring to the decline in prices this week, states that: "The recent drop in steel prices along with the announcement that the prices on this commodity would be constant during the balance of the year has enabled the manufacturers of shete metal goods to name much lower prices. These prices became effective on April 1, and already tre effect is being felt in the trade. Lower prices will undoubtedly prevail in this manufacturer's opinion on season able fall lines as soon as the raw material for fall goods starts to arrive that have been bought at lower prices. Reports all over the country show small stocks on hand which undoubtedly is responsible for the increased demand.

MASS PRODUCTION OF MOTOR CARS

The first attempt is to be made by British manufacturers to embark upon the mass production of motor cars, a plan which the *Daily Mail* states has met with so much success in the United States. A Newcastle-on-Tyne firm of manufacturers will shortly place on the market a standardized 12-horsepower car assembled from parts manufactured by a number of well-known engineering firms throughout the country.

What Hardwaremen Are Doing

Activities of Stores All Over the Country As Reflected in Their Advertising Copy—Many Suggestions Here For Arranging and Phrasing Your Own Advertisements.

Macnab & Sons, Orillia, Ont., challenge the mail order houses in announcing a sale of stoves. Eight stoves are listed, giving sizes, style and price with the following comment: "To make room for the new lines, we propose to clean out our coal and wood ranges, and to do this we offer you the best line ever sold in Canada at less than manufacturers' prices. Take a look over our stock. You can save $15 to $20 buying now while the line lasts. These prices are cash prices. Your opportunity is to buy now as we cannot repeat this offer when the lot is sold out. On the same quality and on the same cash basis they work on we will meet any prices in Eaton's general catalogue."

J. C. MacIver, Welland, Ont., advertises "Wall paper, paints and brushes. New tapestry wall papers, foliage and scenic patterns for living rooms, dining rooms and halls, blue, brown, grey and buff. Stripe patterns for bedrooms, floral cut-out borders, narrow stripes of blue, pink and mauve. Floral cut-out patterns add charm to these papers. We sell—fine carpet brooms. Every broom guaranteed. Will outwear three ordinary brooms. Try one, $2.70. Kalsomining brushes. Special varnish for furniture and indoor work. See us before buying your ready mixed paints. You will save money."

W. H. Cuddy, Strathroy, Ont., is after the car owners in his town. He advertises "—— auto finishes. Now is the time to remodel your car. —— auto finishes will give you finished results at a home made price. Spread —— auto enamel over the surface as best you can and forget about it. It will even itself out into a smooth coating and dry out of danger from dust quickly. When you drive your car out again it will look like new. —— finish is very durable, more durable than the finish originally put on by the manufacturers of most cars. It will not crack, chip off nor become dull through washing or exposure. You will find your spring hardware needs here.

Consumers' Hardware and Supply Co., Lethbridge, Alberta, advertises "On the line by nine o'clock." A better washing, whiter clothes, no hard work. Freedom from hours of slop and steam when you use the —— high speed washer. It runs easier loaded than others do empty. It's the washer with the spiral cut gears that gives ease and speed, the four-winged dolly that churns the hot suds through the clothes. Positively will not injure the finest fabrics. Your money refunded in 30 days if not satisfied. The washer back by a positive 5-year guarantee. Come in for a demonstration to-day."

Rice Lewis & Son, Limited, Toronto feature the following: "British flags to welcome the returned men and add the brightness of appreciation to the freshness of spring. Many weather worn flags on our public and larger buildings might now be seasonably replaced. We have an assortment." Here follows a description of some of the goods and the ad closes with "Weather wearing, fast color, English all wool bunting."

The Allison Hardware Co., Chatham, Ont., advertises "The —— Silo, the mortgage lifter, the money maker. Pays for itself the first six months. Enables cows to produce as much milk as when pastures are at their best. The —— Silo is scientifically planned, not only as to form and construction, but particularly as to material, the famous Southern long leaf yellow pine being used. Talk it over with us—then ask the man who owns one."

J. R. Myers & Sons, Stratford, Ont, are out to get business from the spring gardeners. Their ad reads: "Garden tools that will make gardening a pleasure. You need to have some sort of garden implements to work the ground properly, so why not buy good ones while you're at it? We have just the right gardening sets for your personal use, that you'll say yourself are just the kind of well made implements you have been wishing for. Prices are right too. Look here, Rakes, 40 cents and up; Hoes, 55 cents and up."

The Pioneer Hardware Co., Davidson, Sask., advertises "Enamelware, our spring stock has arrived and we think that we have a complete line at prices which are right. Hardware, we have also received a carload of mixed hardware and feel that we are in a better position to attend to the requirements of our patrons than ever before. We solicit your patronage for 1919, and assure you of our best service."

John A. Yeo, Shelburne, Ont., offers "A Timely Suggestion. The housecleaning season is now here. Why not get your house painted as well as cleaned? Paint does not only add to appearance, but is a disinfectant as well, and makes a house healthier to live in. Use —— stain for your floors, wood work and doors. We have varnish for the linoleum, ——, —— for the walls and ceilings, in fact everything in the paint line that goes to make the home better to live in."

James S. Neill & Sons, Fredericton, N.B., also feature washing machines. In display type they announce "Washing machines. A washing machine not only washes the clothes mechanically, but does it better and quicker than they can be washed by hand, no rubbing, scrubbing or backaches for you; the washer takes all the work and responsibility." A cut of the washer is given, but no prices are mentioned.

C. E. Hadden, Picton, Ont., in his ad says: "All accounts that are past due owing to C. E. Hadden, must be paid before April 1st, 1919. Your very strict attention to this notice will greatly oblige, as after that date, past due accounts will be collected in another way."

The O. B. Henry Co., Arthur, Ont., is advertising a sale of tools as follows: "Come to Arthur on April 15th. Try to make this a Banner Day. If price will induce you, come. Read the list below. There are dollars saved by buying now. We purchased the used Tools from the Aviation Department of the Imperial Munitions Board, Toronto, part of which we will put on sale that day.

Some of the items listed are:

5	only Blacksmith Leather Aprons, each	$1.00
50	set Assorted makes consisting of the following sizes Auger Brace Bits, one each, 3-16, ¼, 5-16, ⅜, 7-16, ½, 9-16, 11-12, 10-16, 13-16, 12-16, 14-16, 16-16 at	2.00
100	only ⅛ Socket Firmer Chisels with handles ..	.30
75	only ¾ Socket Firmer Chisels with handles ..	.35
100	only 1 Socket Firmer Chisels with handles ..	.35
100	only 1½ Socket Firmer Chisels with handles ..	.35
5	only 30 in. Spirit Levels	1.00
50	only Iron block planes, 5 in. in length, reg. $1.25	.59

The ad closes as follows: "Make our store your headquarters, whether you are in need of goods or not. All welcome."

O. B. Henry & Co., Drayton, Ont., are advertising as follows: "Seeds. We have been a little late this year in quoting prices re seeds on account of the unrest of the market, but we find that there is now considerable activity in the outside market. Following are our prices for immediate delivery and you can take our word it is the right time to buy now.

Going After Auto Accessory Business

Hardware Dealers Have One Of The Greatest Opportunities For Sales This Season in the History of the Trade—A Steadily Growing Field That Brings Both Direct And Indirect Business.

PERHAPS one of the best indications of the steady progress hardware men are making in the sale of automobile accessories is the protest made by some of the jobbers and garage men. They say the hardware men are getting the business and they try to make out that the hardwaremen are encroaching on their territory. Some even will go so far as to say that the hardware men are guilty of a breach of business ethics because they have entered this field.

It is the old story over again. The hardware dealers saw a chance to be of real service to their community and to add a profitable sideline and took it. They not only took it, but in all part of the country hardware dealers have been pushing the sale of accessories with the same "pep" that they put into selling other lines, with the result that they now dominate the situation in many districts.

For Good Business

They have found that their automobile accessory departments can be made to show a profit not only through direct sales but also indirectly through their influence in bringing automobile customers into touch with other commodities in the store.

Car owners as a rule are people with money who do not hesitate at spending a dollar or two when they get what they want. Very often they come into the hardware store for oil, or auto tools or some other line for their car, perhaps only for gasoline, and before they leave will spend several dollars. This happens frequently, so frequently that many hardware dealers count car owners among their best patrons.

Has Grown Steadily

Many hardware firms who ventured into the auto accessory field a few years ago because they saw possibilities in the business have watched the department grow steadily every year, until now it is one of the most substantial and best paying sections of the business.

Just as the automobile business is growing steadily because cars are supplying a real need in the world, so the accessory business is growing and will grow, because every car owner has to have new equipment to keep his car up to date; auto finishes and varnishes to keep it looking at its best, and devices that make for convenience or economy of operation.

Excellent Chances

At no time in the history of the automobile business have there been better chances for handling and selling auto accessories than right now.

Col. Charles Clifton, president of the National Automobile Chamber of Commerce, discussing the situation in regard to automobile production, recently said:

This is the way in which the W. H. Thorne Co. of St. John, N.B., is going after the auto accessory business. This ad. might have been much improved by quoting prices.

"Normally the production and sales of motor vehicles in this country increased at a rate of 40 per cent. a year. In 1915 and 1916 the passenger car increase was 50 per cent. to 80 per cent. respectively, but in 1917 it fell to 17 per cent. and last year there was a decrease of nearly 40 per cent. If the normal increase had been maintained throughout this four-year period, the output last year would have been approximately 2,250,000 instead of the actual production of 1,044,754, and there would have been built about 700,000 more cars than were actually made. So there is an apparent shortage of that many cars. For the year 1919 there should be a potential market for 3,000,000 cars, but not more than half of this number will be produced in all probability, and by summer many persons will be wanting cars who will have to go without, or content themselves with machines that have already been in service too long and should go to the junk dealer."

Same Conditions Here

That this summary of the situation is correct is shown by the statements of manufacturers to HARDWARE AND METAL. Firm after firm declared that it will be absolutely impossible for them to make delivery of new cars in anything like the quantities that they are being called for.

There is only one answer to this situation, and that is that those who have cars and want to buy new ones will have to make the old ones do. Those who do not now own cars will either have to wait or buy used cars and fix them up. They are doing this. Many car owners are also fixing up the old car and plan to make it do this season.

This opens unlimited opportunities for the dealer who is handling auto accessories, and as far as the hardware men are concerned they are taking full advantage of it.

Going After Business

They are going after the business, and they are getting it. Working on the principle that the way to keep merchandise turning over is to let people know you have the goods, the hardware dealers are arranging attractive window displays of accessories, they are advertising in the newspapers, and many of them are sending out lists to the car owners in their territory. Aggressive merchandising of this kind brings results, and the hardware dealers are reaping the reward. They are holding the business that their advertising copy, their window displays, and their other methods bring in because they are rendering service in their stores. They not only have the stock but they have a stock they can stand behind and guarantee to the limit.

Have Played It Safe

No one can accuse the hardware dealers of falling into a trap which so many fell into, that of taking on a whole lot of new and untried goods. Few fields have seen more new lines, many of them fads, brought out than the auto accessory field. Many of them failed abso-

Brothers Who Helped Allies Win

Four Sons of James L. Vokes—Left Their Father's Hardware Store in Answer to the Empire's Call—Three Are Home, Two Wounded and the Other is Still on Duty in France.

COMPARATIVELY few families were represented in the great war by four stalwart sons. Still fewer hardware men had the honor of having that many boys fighting in the service of the Empire. J. L. Vokes of the hardware firm of J. L. Vokes and Son, 68 King street W., Toronto, had all his boys in uniform serving King and country in various capacities. Three of them are now home again, two wounded, while the fourth is still on duty in France with his unit but hopes to be home before very long.

Lieutenant A. L. Vokes, whose picture is shown third in the adjoining column, was the first to answer the call to the colors. In May of 1915 he enlisted at Toronto with the 13th Battery as a private. After training for a short time in Canada he went to England and later to France where he served with his battery through some of the heavy battles at that time. Some of these fights were among the bitterest of the war, especially for the Canadians, who had to hold their own against odds that were tremendous. They were not only outnumbered but at that time the German forces had the advantage in not only having high explosives, but in having them in large quantities.

Wounded at St. Eloi

Lieut. Vokes was kept pretty busy and saw a lot of heavy fighting. He came through it, though unharmed, except for a wound in the hand. This was sustained when he was struck by a piece of shrapned. The wound was more painful than serious. Soon after this he was sent to England where he took the training which resulted in his securing his commission as lieutenant. Returning to France he took part in all the heavy fighting that occurred and was through the terrific struggle that was raging just a year ago at this time when the Germans made their greatest effort. He was also there when the tide turned and it was the Germans who were doing the retreating, followed by the victorious Allies. He arrived home recently.

Went With C.A.M.C.

Pte. H. A. S. (Arnold) okes answered the call in August of 1915 when he signed up with the C.A.M.C. He went to England in September and was on duty there for some time, seeing that side of the war which only those who had to help take care of the thousands of wounded men have any appreciation of. In England he was promoted to Corporal, but in order to get to France and into "the big show" reverted to the rank of private. In France he was stationed with No. 10 Stationary Hospital, which had its headquarters at Calais. Here he did his share in looking after the men who came back in a steady stream from the firing line while the big battles were on. He also saw another phase of the havoc wrought by German "kultur" when Hun aviators made a raid last spring and dropped bombs on the hospital. Pte. Vokes escaped unhurt. He is still on duty in France.

In At The Finish

Pte. Edward L. Vokes, who returned to Toronto on Friday night last, enlisted with the 116th Battalion in September, 1916. After arriving in France and going through some heavy fighting unharmed he was wounded on July 17, 1917, in a raid on Avion, when a piece of a bomb struck him between the shoulders. He wa ssent to England, where he was in the hospital for some time. Upon recovering he was assigned to the duties of Sergeant Instructor and spent some months helping get recruits into shape for service in France. When the big events of the war commenced to shape themselves last year he went to France again, being attached to the third division. He was not only through the fighting which marked the final efforts of the Huns, and which kept the whole world in suspense for three months, but he was in the big drive which the Allies started and which ended victoriously. He was not only in the drive but he was in at the finish, being with the third division when it was in at the capture of Mons the day before the signing of the armistice.

Went in The Navy

Sub-Lieutenant Carl W. Vokes did his bit with the Canadian navy. After signing up in 1917, he proceeded to Halifax and was perhaps exceedingly fortunate in that he reached that city on the day after the explosion which caused such great loss of life and damage to property. He has been on duty ever since until he came home three weeks ago.

The four brothers were in the hardware business with their father before leaving to help fight the battles for the world's liberty.

Lieut. Arthur L. Vokes, who has just got into civies again, is back in the store with his father. His other two brothers are taking a little rest before deciding what they will do.

Reading from top to bottom, the names of those in the photos are: Pte. Edward L. Vokes, 116th Battalion; Pte. Arnold Vokes, of the C.A.M.C.; Lieut. Arthur L. Vokes, who went over with the 13th Battery, and Sub-Lieutenant Carl W. Vokes, of the R.C.N.V.R.

Paint Firm's Big Publicity Campaign

Plans Rapidly Taking Shape To Cover Dominion—More Extensive Than Originally Planned—Important Data Secured Will Assist Greatly—Concerted Action On Retailers' Part Will Be Effective, Too.

EXTENSIVE plans in furtherance of the big educational paint publicity campaign about to be launched by the Canadian Paint, Oil and Varnish Association, are rapidly taking shape, under the committee in whose hands the whole matter has been left. This committee, comprised of George Henderson, president and general manager Brandram-Henderson Ltd.; R. C. Misson, Montreal manager of the Sherwin-Williams Co. of Canada, Ltd.; A. T. Black, manager Martin-Senour Company, Ltd.; H. E. Mihell, of the Imperial Varnish and Color Co., Ltd., and A. W. Poole, of McArthur-Irwin, Ltd., has been actively engaged in placing the forthcoming campaign on a most substantial basis. Such progress has been made as will ensure the inauguration of the campaign about April 20. This will be an ideal time for the opening of the "big push" toward the biggest selling season yet enjoyed by the paint trade from coast to coast.

President Henderson's Views

As president of the Canadian Paint, Oil and Varnish Association, and as chairman of the advertising committee above mentioned, Mr. Henderson said:

"Too many owners of property consider paint as a decorative medium only, and consequently somewhat of a luxury. Perhaps the paint manufacturers are somewhat to blame themselves for this attitude, having probably stressed the artistic side and not paying sufficient attention to the real purpose of paint.

"In this educational campaign we are going to place before the public the true facts, showing that the first and most important purpose of paint is to protect and preserve. It is an astounding fact that the loss to invested capital in this country through decay and disintegration of property because of lack of paint, exceeds the loss through fire."

Plans More Extensive

An outline of the tentative plans for this campaign was given in HARDWARE AND METAL of March 8. Since then progress has been made by the committee and the plans call for a more elaborate programme, it is understood, and for the expending of a larger sum for general publicity. Speaking along these lines, Mr. Henderson continued:

"While the Canadian Association has been fortunate in being able to secure much data from the American Paint Association, which also is conducting a similar campaign, yet we believe we are going in some respects deeper into this matter, placing it on a broader national conservation basis worthy the support of every good citizen.

"We have every reason to believe that the Canadian Trade Commissioner and the Dominion Commission of Conservation will publicly endorse and approve our objects. From this it will be seen that the campaign is much more important than any previous Clean-up and Paint-up campaign. It is to be an educational, conservation movement under national auspices.

GEORGE HENDERSON

Of Montreal President and General Manager of Brandram-Henderson, Ltd.

National in Scope

"The advertising will be of a national character, extending from coast to coast, and using large space in the leading dailies, farm papers, and general publications. In addition to the regular advertising, we have also organized a propaganda department, which has gathered a large amount of information relative to the woeful waste caused through the lack of paint. This data will be furnished the press from time to time in all parts of the country."

Co-operation Expected

In a scheme of this nature it is obvious that the retailer will be no small factor in working out details that devolve upon him. In fact a real opportunity will be afforded the retailer in every town, city and hamlet, and of which he will do well to avail himself. It is an opportunity that has not been afforded in just so unique a manner at any previous time.

"The ultimate success of this campaign," said Mr. Henderson, "rests upon the co-operation given by the retail trade. It furnishes them a wonderful opportunity to 'cash in' by co-operating in every way possible. The committee has carefully prepared a plan enabling the dealer to take full advantage of the campaign. The retail dealer may make himself a teacher of thrift in his own community by bringing this message of the conserving value of paint before his own community."

Get Early Start

With signs of an early spring the dealer will be wise who lays his plans now, and who begins the preliminary publicity in his own community so essential to forming a solid foundation for the coming weeks and months. The mailing list will require revision and careful checking. Before the busy days come this should be attended to and corrections and additions made. Stocks also will need to be checked up carefully and displays made to look their best. Probably a coat of paint or varnish will be effective in the paint section, and early window displays will be in order. The whole atmosphere within the store can be made to breathe the spirit of this movement. Is your plan being worked out? To-day is an ideal time to begin.

SHEFFIELD STEEL FIRMS SEE BUSINESS REVIVAL COMING

Reports from Sheffield, England, report that while the steel trade is very quiet there are indications that a big revival of business in coming. A report says: "There are movements which tend to inspire confidence in the future of the trade, at any rate as regards various special classes of steel. Some at least of the many overseas inquiries are materializing into actual business in spite of the high prices. The South African mines, having now resumed crushing, are ordering a considerable tonnage of steel from Sheffield, and large French orders are being booked for special steels for the automobile industry, as well as steel for the manufacture of implements. There is also a substantial overseas demand for steel plates. Scandinavian countries are in the market for a good deal of Sheffield material. Most of this business represents goods and materials which cannot be done without, and buyers are now being convinced that the high prices are likely to continue. Traders who have opportunities of seeing the initial stages of business movements are now taking a more hopeful view of the future, and prophesy a summer."

Prior to his departure for Calgary, H. S. Doan, who has been on the staff of Hewitt & Black, Limited, hardware, Medicine Hat, Alberta, for seven years, was presented with an easy chair at a gathering of the employees, held at the home of R. C. Black.

EDITORIAL COMMENT

DON'T try to build a business without having a foundation. Store service, good advertising and enthusiasm are a good combination on which to start.

* * *

LONG after you have turned the key in your shop and have gone home, your advertisement, if it is well written and attractive, is proclaiming your store and your goods in many a family circle. A good ad. is a salesman who works 24 hours a day.

A PECULIAR SITUATION

AN interesting sidelight on the copper situation is to be found in the labor problem. With wages high and great accumulations of copper on hand, and with the end of the war stopping heavy governmental demands, the larger companies turned to decrease production to stop inroads on their working capital. The working forces were cut in half. One corporation which employed 2,000 men and turned out 10,000,000 pounds a month cut its force to 1,000 men. Another which employed 1,000 men and turned out 5,000,000 pounds a month cut its force to 500 men. But to the very great surprise of the corporations the cutting in half of the employment force did not cut in half the amount of production. Rather the companies found themselves producing with a half force almost as much as they had produced with a full force. The explanation was made that the men realized the situation, were putting in more time and working harder in their hours of labor.

DAYLIGHT SAVING

THE mix-up that has resulted over the question of daylight saving will apparently be adjusted by the necessities of business. As far as the Government at Ottawa is concerned the vote against the proposal is regarded as mere camouflage. The members who want to square themselves with their rural supporters, and there are many such members, can now go back to them and say in all truthfulness, "You can see for yourselves, for it is on record that we voted against the daylight saving bill." At the same time many of these members are personally strongly in favor of daylight saving. It is regarded as not unlikely that the Government may yet put the measure through under some excuse or other. The situation as it stands now is that the United States has put summer time into effect and the Canadian railways in order to conform with the train schedules and make connections have adopted it too. This naturally means that the telegraph companies will fall in line and the daily newspapers have to operate on the same time as the telegraph companies. In nearly all the larger centres and even in many of the smaller places the clocks have been put forward an hour. It is chiefly from the rural districts that the opposition to the plan is coming. The farmers make all sorts of claims against daylight saving and many are refusing absolutely to adopt it or work by it. In these cases no particular harm is done except perhaps to the farmer himself, who may suffer some inconvenience. Were daylight saving, however, not adopted in the business world, Canadian railways, and factories would be running an hour behind American railroads and there would be not only inconvenience, but loss and serious interruptions to business.

WORTH GOING AFTER

NEVER in the history of this country are people reading the advertisements with such close attention and such keen interest as they are now. The great buying public is thoroughly alive to the fact that reading the advertisements of live wire merchants is one of the ways in which they can not only save money, but help fight the high cost of living. This is especially true of women and they have been doing more buying in the last five years, as a result of so many men being overseas, than the average individual might suspect. An investigation which was conducted recently by a magazine to find out just how much of the buying women have been doing showed some very interesting figures. For instance, ninety per cent. of the house furniture is bought by women, eighty-five per cent. of the pianos, ninety per cent. of the food products, sixty-five per cent. of the socks and sixty-five per cent. of the men's neckwear. No figures are given in regard to hardware purchases, but many hardware men state that there has been a very noticeable increase in the amount of buying done by women. Many firms now, in all their advertising matter, take special pains to feature a number of lines which will carry a broad, general appeal to women shoppers. They state that they are obtaining very excellent results from these tactics. Women naturally love to "shop" and the stores that attract them are those whose ad-

vertising copy carries a real message. If the store backs up this message by having good goods and showing them attractively, sales can be greatly increased.

THE SIX-HOUR DAY

LABOR, wrapt up with itself as unfortunately are other classes to far too great an extent, thinks of capital as the octopus which sucks its blood. Labor thinks of management hardly at all, yet management is the factor which, under proper conditions, gives life to both capital and labor. Management and capital may be one, but where they are one, there capital is also, in reality, labor.

Unions are urging a six-hour day. Henry Ford is said to be granting a six-hour day. The workers in those plants, therefore, will toil for six hard hours—then eighteen golden hours they will have to themselves.

Not so the Ford executives—the management. Those men, be their office hours what they may, will be, as in the past, twenty-four hour men. Time for food, recreation and sleeping they will, of course, take; yet the food will often be taken while the business is being discussed, sleep will frequently be in a Pullman, which is hurrying the sleeper to a business appointment; the recreation will largely be with friends with whom ideas may be exchanged, from whom the valuable fresh start on the business problem may be secured.

The management—the brain workers—neither seek nor know any six-hour day. An understanding of their constant study and work would be illuminating to the labor men. It would lead these to realize how uneasy lies the head that is head of some big work.

WILL HELP CANADA

IMPOSITION by the French Government of an import embargo to the British is regarded by Government officials as evidence that the Allies have completed their plans for industrial reconstruction and are proceding to put them into effect.

Great Britain and France have established a pool to control whatever purchases they need to make in the United States, and Italy is co-operating with them to a limited extent. As a result trade experts do not think there will be much sale for American finished products in the European countries for some time to come, it being the announced policy of the Allies to do without those articles which they cannot manufacture at home. Many basic materials still will be obtained from Canada and already inquiries are coming in in a manner that indicates that considerable future business will develop. The building up of a vast inter-Empire trade is in progress and Canada will benefit, while at the same time helping the Motherland to maintain her industrial place in the world.

WHAT OTHER EDITORS SAY

IT seems to us, much of this outcry against profiteering and Bolshevism is much like the child on the ocean beach trying to sweep the waves back with a broom. What is profiteering? Is it anything more than "getting the price" demanded by conditions? All of us are ready to condemn the other fellow for profiteering because it happens to affect us. But it has probably been noticed that anybody having anything for sale is getting the highest price possible for his commodity. The laborer who used to be satisfied with $3 a day now demands $5 and $6; the farmer who used to yearn for one dollar wheat now demands two dollars; thirty-cent butter and eggs—pre-war prices—now fetch sixty cents. One might go on indefinitely, but what's the use? The man who does not know that to set a profiteering price on wheat means that automatically a profiteering price is set on everything else, has not studied the problem closely. Away back in Bible times, high corn (wheat) prices meant correspondingly high prices on everything else. And this condition has always obtained. It is the same to-day and will be the same for all time. It gets a country nowhere to bring on a condition and then decry the effects. —*Okanagan Commoner.*

* * *

WE learn that the boards of trade in various towns are taking active measures to combat the mail order business that is draining the country towns so steadily and so systematically. This is a line of work that should be taken up by the Forest B.M.A. in a vigorous manner. Every week considerable money is sent from Forest to mail order houses. This is too much of a drain and the bulk of this business can be done through the home merchants if all will join in a united effort. It is well worth trying.—*Free Press*, Forest, Ont.

* * *

SPRING, from time immemorial, has been known as house-cleaning time. During recent years this period has developed a popular slogan, "Clean up and paint up." As a conservative measure this would be hard to improve upon. Wood, when exposed to the weather without protection, soon deteriorates, it bears a shabby and neglected appearance, and is in a great majority of cases but an indication of the enterprise or carelessness of the owner.

Nothing adds more to the appearance of a building than a coat of paint; nothing will do more to protect the woodwork and prolong its life than covering it with a paint preservative. With building conditions as expensive as at present, and with the necessity of employing the available help in the construction of new houses, it is essential that present construction be protected.

Our soldiers are coming home, they are coming from a country of homes, where thrift is paramount, where the people take pride in their premises and keep them in the best condition. Can we not, this spring, bear this in mind, and let our boys see that the home folks have awakened to the advantages of cleaning up and painting up, that their homes bear that well-kept and cheery appearance that bids them welcome?—*The Chronicle Telegraph*, Waterloo, Ont.

* * *

OUR Parliamentary representatives at Ottawa are working up an indemnity objective of $4,000 a session. This is a jump of $1,500 a year, and if the object is obtained the good and bad alike will share in the increased emoluments. We are not going to say that some of the members are not worth the $4,000 a year, but we are confident the number is comparatively small. The mere voting machines will get the same salary as the active and efficient members. If the Commons is entitled to an increase of salary the Senate will stand out for a like consideration, and the present is no time to throw away money when we are told the country will have to strain every energy and practise every economy to pay the interest on our war debts.—*The Chronicle*, Durham, Ont.

EVENTS IN THE TRADE

Business Changes

Port Dover, Ont.—A. M. Brogdon, of Stratford, Ont., has purchased the hardware business of J. S. James.

Obituary

The death occurred at Maisonneuve, Quebec, of W. T. Woodall, manufacturer of tacks.

The death occurred at Gananoque, Ont., of Senator George Taylor. He was a director of the Ontario Wheel Co., Ltd.

William H. Roughley, aged 39, traveller for the past four years for the hardware firm of D. H. Howden & Co., London, Ont., died at his home after an illness of only a few days with pneumonia. He was formerly with the Hobbs Hardware Co., also of London. John, of Calgary, is a brother.

Fire Losses

The premises of the Fowler Hardware, Ltd., Sudbury, Ont., were damaged by fire in a blaze which caused a loss of $150,000.

Personals

Fire in the premises of the Toronto Metal and Waste Company, 146 Niagara Street, Toronto, caused a loss of $12,000.

E. Wright, of Strathroy, Ont., has left for Regina, Sask., where he and his father intend opening a retail hardware store.

At the annual meeting of the Civic Garden Club, held at Hamilton, Ont., A. T. Enlow, of the Dominion Sheet Metal Co., was elected president.

B. C. Culley, of Forest, Ont., who recently returned from overseas, has taken a position in the hardware store of Fred Hunt at Goderich, Ont.

Edward Young, of Tillsonburg, Ont., has joined the staff in the tinsmithing department of the Tweed Hardware Co. at Tweed, Ont.

Walter Muirhead has been transferred from Winnipeg to Calgary, where he is now manager of the sporting goods department of the J. H. Ashdown Hardware Co., Ltd.

Alex. Henry, of sale staff Sheet Metal Products Co., who was operated on for appendicitis last week, is progressing favorably and hopes to again call on the trade in the near future.

Joseph A. Merrick, secretary-treasurer of Merrick, Anderson & Co., Ltd., Winnipeg, returned on Friday last after spending several weeks in California with his son, who has been ill but is now well on his way to recovery. Mr. Merrick reports conditions through Western Canada as very good at points he stopped off at and everyone feeling very optimistic over the outlook.

Norman A. Wylie, for many years sales manager for Ontario of the Sheet Metal Products Co. of Canada, Limited, has resigned to engage in the manufacturing business. At a gathering of the sales and office staffs of the above company, Mr. Wylie was the recipient of an address and a handsome testimonial expressing the regard in which he was held by those with whom he had been so long associated.

Trade Notes

The Superior Roofing Co. has been registered at Toronto.

The Dufferin Paint Works has been registered at Toronto.

The firm of Goodwin & Co., Ltd., Sarnia, Ont., has been changed to Imperial City Heaters, Ltd.

A voluntary petition for a winding-up order has been granted for Munitions and Metal Products Ltd., Montreal.

The Hurley Machine Company, Limited, 413 Yonge street, Toronto, is moving into new offices at 411½ Yonge street.

Wm. Chalmers, hardware, Deloraine, Manitoba, has moved back to the store in which he commenced business 17 years ago. He plans to remodel the building shortly.

W. H. Lutz, of Hespeler, Ont., has resigned as secretary-treasurer of the Grand River Railway to take the position of business manager of the Galt Art Metal Works at Galt, Ont.

Archie Morris has been appointed representative in Edmonton and Northern Alberta for the Merchants Hardware Specialties, Limited, of Calgary. He is opening a permanent sample room in Edmonton. Mr. Morris is well known to the hardware trade, having been a travelling in a coast city.

Montreal News

A. W. Poole, of McArthur, Irwin, Ltd., Montreal, visited New York during the week.

George Henderson, president Brandram-Henderson, Ltd., Montreal, was in New York this week.

The Hamilton Stove and Heater Co. was represented in Montreal this week by Mr. Taber.

Montreal jobbers were called on this week by Mr. Martin of the Channell Chemical Co.

A. Birmingham, of John H. Graham and Co., New York, was in Montreal during the week.

E. N. Dengate, representative for Oneida Community, Ltd., was a Montreal visitor this week.

C. E. Peabody, representing C. E. Peabody & Co., of New York, spent part of the week in Montreal.

Morris Wheller, of Sargent and Co., New Haven, Conn., was a caller on the Montreal trade this week.

T. F. Shurley, of T. F. Shurley and Co., Ltd., St. Catharines, Ont., called on the Montreal trade this week.

Archie T. Black, general manager of the Martin-Senour Co., Ltd., Montreal, was in New York during the week.

Charles Shinn, of the Seed Filter and Manufacturing Co., New York, spent a day or two in Montreal this week.

W. S. McLennan, general sales manager of Brandram-Henderson, Ltd., Montreal, was in New York this week

Members of the Montreal Board of Trade have been scouring the business houses for new members, and their "drive" netted them, it is understood, about 600 members. Several of the interested solicitors were from the metal and hardware section, and Mr. W. S. Leslie, of A. C. Leslie and Co., wholesale metal merchants, has been a very ardent canvasser, it was stated.

S. A. Harris, with S. Guiterman and Co., England, and R. Wumberlich, their New York representative, were in Montreal this week in the interests of the English house. While here they placed orders for a number of general hardware lines, these to be shipped to the English market. HARDWARE AND METAL was informed that the disposition toward Canadian-made goods is very favorable by the English firms, and that they express a real preference for goods available here, which are likely to sell in the British market.

Maritime Notes

W. G. Scovil and Howard Ryan have opened a general store in Hampton, N.B., in the premises formerly occupied by T. G. Barnes & Sons.

S. T. Payson's general store in Westport, N.S., was destroyed by fire recently with a loss of $6,000, only a small part of which was covered by insurance.

Winnipeg News

W. B. Stephenson, of Harding, Man., was a visitor in the city for a few days this week.

Mr. Tompkins, of the Lay Whip Co., Rock Island, Quebec, spent most of the week in the city calling on the jobbing trade.

Jos. A. Merrick, secretary-treasurer of the Merrick Anderson Co., Ltd., has just returned from a two months' vacation spent in California, where he was visiting his son, G. G. Merrick.

Mr. Segurdson, of Segurdson and Thoraldson, who operate stores at Riverton, Arbourg and Gimli, Man., was in town for a few days this week on business.

Regina News

Messrs. McIntyre and Johnston, representing the Prairie City Oil Co. were in the city this week.

Mr. Iron of Yale and Towne, St. Catharines, Ont., was in the city this week.

Mr. Shaver, representing the Gillette Safety Razor Co., called on the hardware trade this week.

Mr. Perry Logan, of the Wood Hardware Co. is spending a few weeks in Toronto.

Mr. H. James, of the Glasgow House hardware department is on a business trip east.

N. L. Van Fant, of the Canada Foundries and Forgings Limited, James Smart plant, was in the city this week.

Mr. Lewis Hurry, manager of the Hingston Smith Arms Co., sporting goods department, Edmonton, was in the city this week.

Incorporations

The A. R. Williams Machinery and Supply Company, Limited, plans to manufacture and deal in tools and machinery.

The Blue Mountain Lumber Company, capital $40,000, head office Collingwood, Ont., plans to carry on a general lumber and sawmill business.

The Canadian Collapsible Rim Company, Limited, head office, Windsor, Ont., capital $500,000, plans to manufacture and deal in accessories for autos, trucks, bicycles, motorboats and aeroplanes.

Midland Woodworkers Limited, capital $500,000, head office, Toronto, plans to manufacture and deal in wooden, corrugated paper and fibre boxes, builders' supplies and tools.

Personal

The Stamped Metal Products Company of Canada, Limited, head office, Toronto, capital $6,000,000, plans to manufacture enamelled ware and kitchen and household ware and also forged and sheet metal goods.

Oliver Lee, Limited, capital $50,000, head office, Toronto, plans to import and manufacture paints, varnishes, glue, toys, rubber goods and motor vehicles.

Scottish Rubber Company Limited, head office, Montreal, capital $100,000, plans to deal in rubber and celluloid goods.

CHANGES IN SALES STAFF OF MENZIES & COMPANY, LIMITED

Messrs. H. Mansell, A. J. Robertson and Robert Brownlee have joined the sales staff of Menzies Company, Limited, manufacturers' agents, Toronto. Mr. Robertson will be sales manager for the Ontario division on the A. C. Gilbert Menzies and the Menzies Company staff. He will have as his assistant, F. J. Venator, who prior to enlisting in the C.E.F. was employed with the Torcan Fancy Goods Company. H. Mansell has been manager for Canada for the past three years of Lazarus & Rosenfeldt and was formerly Western representative of Messrs. Cassidy Limited. He will act as special representative of the two companies. Mr. Brownlee, who was in business for himself in Montreal, until recently, will look after the Maritime Province territory.

WILL HANDLE ACCESSORIES

Motor Products Ltd., has commenced business in Winnipeg, having taken over an automobile accessory firm which recently went into liquidation. The new company will handle a complete line of automobile accessories for both retail and wholesale trade. In the latter department five or six travelling salesmen will be engaged to cover the territory from Port Arthur to the mountains. In addition to the full line of accessories which will be sold largely to the hardware dealers of the West, this company plans to offer batteries and battery parts and to give service on recharging, etc. A catalogue of all lines carried will be ready for dealers about April 1. The personnel of the new company is as follows: S. Sager, president; W. E. Garnett, manager; Mr. Kline, service manager; Mr. Grace, credit manager; Mr. Goldsmith, accountant.

W. E. Garnett, manager of the new company, was formerly manager of the auto accessory department of the J. H. Ashdown Hardware Co. of Winnipeg.

APPOINTED SALES SUPERVISOR

The Thermoid Rubber Company of Trenton, N.J., has appointed H. B. Niblette as supervisor of their tire sales division. Mr. Niblette was associated with the B. F. Goodrich Company for a number of years, and recently was district factory representative of the Quaker City Rubber Company.

JUVENILES FIRE CASTER FACTORY

Four youths faced the court in Montreal on a charge of setting fire to the factory of their former employer, W. J. Hinphy, furniture caster manufacturer. This fire occurred on February 5 and, owing to the many suspicious fires in the city, an investigation was made. The arrest of these boys is the sequel and upon examination they admitted, it is said, having set the fire to "get even" with their old boss. It appears that he had dismissed them because of their inattention to the work assigned them.

MASTER PAINTER IS DEAD

MONTREAL.—A well-known master painter in the person of Jos. N. Arcand, passed away at his home in Montreal, 243 Beaver Hall Hill.

Having followed closely the work of painting and decorating, the late Mr. Arcand filled the office of president, in 1904, of the Master Painters' and Decorators' Association of Canada. In addition to this he was, in the years 1909-10, president of the Montreal Builders' Exchange. It is stated that, in 1903, he was instrumental and largely responsible for the settlement of a painters' strike.

Mr. Arcand is survived by a widow and five children.

ADULTERATED LINSEED OIL

As chairman of a special committee of the National Paint, Oil and Varnish Association to investigate and stop the sale of adulterated linseed oil and turpentine, R. B. Robinette, secretary and treasurer of the Tropical Paint and Oil Company, of Cleveland, Ohio, has issued an appeal to the trade in general to lend its aid in stamping out the practice by reporting to the committee any attempts to sell such products. In the past year, the first of the committee's existence, the committee gathered considerable evidence along the lines indicated and placed it in the hands of the Federal Trade Commission with the result that one or two of the worst offenders were indicted. No publicity was attached to this work, but the committee intends to carry out its work this year in the opposite fashion by obtaining all the publicity possible with a view to furthering the work.

PLAN TO DOUBLE CAPITAL

At the annual meeting of the Ingram and Davey Hardware Company, Limited, St. Thomas, Ont., held during the week, the first item of business after the usual routine transactions had been dealt with was to pass a resolution making application to the Government for the increase of the capital stock of the company from $100,000 to $200,000.

The officers were re-elected and the old directors were returned to office with one addition. Frank N. Barrett, who has been assistant manager for a number of years, was elected to the board of directors. His position will be assistant general manager.

The other officers include George A. Ingram, president and treasurer; George W. Davey, vice-president and manager; E. A. Davey, secretary, and F. N. Barrett, assistant manager.

Plans were also discussed for the enlarging and improving of the store, and other matters in connection with the extension of business.

BUYS WILHELM PLANT

The Glidden Company, of Cleveland, Ohio, has taken over the business of the A. Wilhelm Company, of Reading, Pa., and plans to increase the capacity of the plant for manufacturing dry colors and chemicals.

President Workman Says Prospects For Export Business Encouraging

PRESIDENT MARK WORKMAN, of the Dominion Steel Corporation, has returned to Montreal after an absence of two months in Europe, where he visited England and the Continent.

Mr. Workman had the opportunity to view conditions under many auspices and has concluded that the future prospects for export from Canada are encouraging. Just at present there are many things to becloud the situation, and the uncertainties prove a barrier to more business materializing at the present time.

Great Britain, France and Belgium, Mr. Workman thought, would prove excellent fields for the Canadian manufacturer. With all interest centred upon the peace terms and with the important deside uppermost of getting this one big job completed satisfactorily, it is, at present, anything but easy to secure large business in these markets.

Canada Can Compete

Mr. Workman believes that, when the time arrives and goods will be bought, that Canada can enter the field in open competition with other countries. Operating costs, for instance, have been so increased in England that it is now impossible to produce an average product there at anything like pre-war prices. The demands of labor all around are a large factor in these higher costs and Canada, therefore, will be able to enter as a competitor in many lines, it is confidently expected.

Ships a Big Factor

While Canadian manufacturers can only secure business when they are in a position to deliver the goods, the great necessity confronts the industrial element of the country of securing ample shipping to carry their goods to Europe. Just at the present time the outlook is not over-encouraging for an ample amount of tonnage. Mr. Workman referred to the activity which had been exercised by United States interests and which have been laying big plans for a large merchant fleet. With the Government backing the manufacturer and making it possible for him to not only secure the shipping, but to secure rates that will give him an undoubted advantage, Mr. Workman said that it was of the utmost importance for Canada to give this matter due attention.

In addition to this, it will be also necessary, it was pointed out, to organize and develop an export banking system to work conjointly with the whole export scheme.

Big Manitoba Convention Planned

A GENERAL meeting of the executive of the Retail Merchants' Association of Canada, Manitoba branch, was held in Brandon last week at which it was decided to go ahead with the convention for this year, the officers deciding it would be advisable to hold the convention in Brandon. The dates set, and which, unless something unforeseen develops, will stand are Tuesday, Wednesday and Thursday, June 17, 18 and 19, for what will be the 5th annual convention.

The Brandon branch of the association is very keen on the convention, and along with the executive have enlisted the aid of Mr. McDermid, mayor of Brandon; Mr. Rankin, president of the Board of Trade; Mr. Hobson, president of the Kiwan's Club, and several other influential citizens. The work to be done in connection with the holding of the convention was outlined by J. H. Curle, Manitoba secretary.

The first annual convention was held in 1915 at Winnipeg, and succeeding conventions having been held at the same city it was felt a change to Brandon could be made the centre for this year's activities to advantage.

A real live program is already under contemplation, the executive planning on bringing in two or three large retailers from the South who have made a big success of their own business to outline some of the methods they employed. H. E. Hart, Long Prairie, Minn., who carries on a general merchandising business, is one of those expected. Mr. Hart was one of the principal speakers at a Business Builders' conference held in Chicago in January, 1918, and his address was very favorably commented upon. Although in a town of only 1,500 people, Mr. Hart does a business which compares favorably, in fact exceeds, many city enterprises. Other speakers it is hoped to get are H. E. Clark, hardware merchant, Lakefield, Minn.; F. T. Mann, general store merchant, Devil's Lake, N.D., president of the North Dakota Retail Merchants' Association, and Alex. Carr, Jamestown, N.D. Mr. Carr is a Chautauqua man, connected with the movement known as Community Development, and is rated as one of the best authorities on dealing with the mail order business.

In connection with the addresses to be given by these men it is proposed to have Manitoba merchants lead in a discussion of the various points brought up with a view to getting greatest value for the local merchants.

In addition to these successful retail merchants, representatives of the manufacturers, wholesalers and commercial travellers are to be asked to cover their respective fields, while an open meeting to which the farmers will be invited, is talked of.

A special effort to interest clerks is going to be made, an address on salesmanship with a discussion following, at which actual sales experiences will be given, is another phase of the program being worked out. The Brandon representatives are in favor of putting a little more life into the convention proceedings by introducing musical features.

It is expected the evening meetings will be of an open nature and present idea is to secure moving pictures of an instructive and interesting nature to lend further variation. Thursday night, a banquet to the guests by the City of Brandon seems to be the idea for the wind-up of the convention proceedings.

At the meeting held last week to discuss the condition, E. Bolton, retail grocer, was elected president of the Brandon branch of the association to replace J. M. Robinson, who had resigned. The Brandon officers of the association are:

Honorary president—R. J. Campbell, (furniture).

President—E. Bolton (grocer).

1st vice-president—Alderman J. B. Curran (hardware) with Brandon Hardware.

2nd vice-president—A. B. Knowlton (boots and shoes).

Treasurer—W. E. Crawford (jeweler).

Secretary—John Hopkin (hardware) with Johnson Hardware Co.

Pressed Steel Boxes

R. Chestnut & Sons, Fredericton, N.B. —Please advise where we can buy pressed steel or sheet iron shop boxes for carrying a stock of pipes, fittings, etc.

Steel shelving, etc., may be purchased from the Dennis, Wire & Iron Goods Company, London, Ont., and Geo. B. Meadows & Company, Toronto.—Ed.

Makers of Aluminum Ware

Please give names of Ontario manufacturers of aluminum ware.

Hudson Bros., Limited, Toronto; Northern Aluminum Company, Toronto; Ware Mfg. Co., Oakville, Ont.; Sheet Metal Products Company, Toronto.—Ed.

Concrete Mixer

Frank Dafoe, Madoc, Ont.—Would like the names of manufacturers of small concrete mixers.

The London Concrete Machinery Co., London, Ont., make these.—Ed.

Canning Outfits

H. A. West, Annapolis Royal, N.S.—Will you give the address of a manufacturer of canning outfits for canning fruits and vegetables?

The Andrews Wire Works of Canada, Ltd., Watford, Ont., manufacture these. —Ed.

Metal Hose Reels

Hardware Co. of Toronto.—Can you tell us who makes metal hose reels in Canada?

These are manufactured by the John Watson Manufacturing Co. of Ayr, Ont. —Ed.

Valmar Washer

J. A. Akitt, Ardath, Sask.—Can you give us the name of the manufacturer of the Volmar or Vulmar washing machine?

Can any of the readers of HARDWARE AND METAL supply this information.—Ed.

GALVANIZED SHEETS BUNDLING TABLE

The Dominion Sheet Metal Corporation, Ltd., Hamilton, Ont., has issued an attractive galvanized sheets bundling table measuring 10½ by 14 in. This table gives practical and interesting as well as valuable information regarding the weight per square foot in ounces and in pounds, also square feet per sheet, weight per feet, number of sheets, weight of bundles. Copies will be supplied free to the trade upon request.

GILSON GARDEN TOOLS

The J. E. Gilson Co., Port Washington, Wisconsin, has just issued a handsomely illustrated catalogue of the garden tools manufactured by them, including hand cultivators, wheel cultivators, weeders, edge trimmers, and dandelion diggers. Copies will be sent to readers of HARDWARE AND METAL upon request.

APPEAL ALLOWED

The courts have allowed the appeal of the Mueller Manufacturing Co. of Sarnia, Ont., and dismissed the action of the Pere Marquette Railway Co., which sued to recover $6,692, balance claimed due for the carriage of brass from San Francisco to Sarnia. The Mueller Co. bought from Paul Wenger, of New York, a quantity of brass ingots which that firm was importing from Japan. With the consent of both parties the goods were billed as copper ingots instead of brass ingots. Freight on brass ingots is apparently higher than that on copper. When the goods were delivered it turned out to be scrap brass, and the Mueller Company refused to pay freight except as for scrap, tendering $3,600.79. The railway said that the amount paid must be as billed and demanded $10,292.81. In the suit that followed Chief Justice R. M. Meredith gave judgment in favor of the railway. The Appellate Division reverses this decision on the ground that under the Railway Act and the regulations of the Railway Board the true rate depends on what the goods really are and not what they are billed as.

DEATH OF W. A. KEMP A LOSS TO THE TRADE

In the passing of the late W. A. Kemp, vice-president of the Sheet Metal Products Co. of Canada, Ltd., whose death was announced in the March 22 issue of HARDWARE AND METAL, a very great loss has taken place among Canadian manufacturers in general, and among hardware manufacturers in particular.

Mr. Kemp's experience in the business goes back to the days when kitchen utensils were largely sold off of the wagons of rag peddlers and junk collectors. He was one of the early travellers who put his best efforts into inducing the hardware trade to push and specialize in the selling of household kitchen utensils.

Associated with his brother, Sir Edward Kemp, W. A. Kemp lived to see a business that in the 80's was a very small one, grow to its present size and standing throughout Canada. Particularly was he well known through the West, as he was one of the early travellers throughout Western Canada, and the old-timers out there tell many amusing stories of his efforts to get them to handle tin ware and enameled ware.

Mr. Kemp was a man who possessed to remarkable degree the ability to analyze business conditions and problems, and his rare judgment and sagacity was widely recognized. The thoroughness and patience with which he mastered mechanical and busines details has left a very strong impression on the spirit and efficiency of the business which he spent his life in building up. These traits were welll known and recognized by his many friends among the wholesale and retail hardware trade who first learned to know him years ago when it was his custom to call on the trade from Halifax to Vancouver.

NEW FIRM TO MAKE STAMPED AND ENAMELLED WARES

A new company has started operations in Toronto for the purpose of manufacturing enamelware, tinware, and other lines. The company will be known as The Consolidated Stampings and Enameling Ltd., and will be located at 2382 Dundas Street West, Toronto. Norman A. Wylie, for many years sales manager of the Sheet Metal Products Co., Ltd., and at one time connected with Rice Lewis & Sons. Ltd.. is on of the officials of the new company.

WIRELESS PHONES COSTLY

Montreal.—The proposal to instal "wireless" telephones in Montreal business houses met with a less enthusiastic reception when the probable cost was made known. It is stated that, at present, a telephone suited to this class of conversation would cost from $1,500 to $2,000. While the idea is brand new and the interest quite keen in some quarters, this high cost will have dampened the enthusiasm of those who would otherwise have had orders placed early.

TRADE INQUIRIES

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

565. **Sole and upper leather.**—A Liverpool firm asks to be placed in communication with exporters of the above with a view to business as soon as conditions permit.

570. **Wooden toys, tea trays and tea tables, leather goods.**—A Liverpool firm wishes to get into touch with firms exporting the above with a view to securing a purchasing agency for the North of England territory.

571. **Linseed cake.**—A Liverpool firm asks to be placed in touch with exporters of the above with a view to future business.

573. **Wooden handles.**—A Liverpool firm asks to be placed in communication with exporters of axe, pick, hammer, hay fork and broom handles, with a view to purchasing 50 to 100 gross lots of each.

574. **Wire nails.**—A Liverpool firm is open to purchase the above in lots of 50 to 100 tons.

575. **Bolts and nuts.**—A Liverpool firm would like to receive offers of galvanized barbed wire in 30- to 50-ton lots.

578. **Wooden doors.**—A Liverpool firm asks to be placed in touch with exporters of the above.

579. **Asbestos roofing, shingles, asbestos corrugated sheathing and building boards.**—A Liverpool firm is interested in the above.

584. **Wood for cricket bats.**—A Sydney, New South Wales, company requires quantities of cottonwood and willow for making cricket bats, and invites correspondence from interested suppliers in Canada as per particulars appearing in report from Canadian Commercial Agent at Sydney in last issue, page 391.

586. **Cabinet and builders' hardware; cotton piece-goods.**—A firm in Brisbane, Australia, wishes to secure the agencies for Queensland of cabinet and builders' hardware, also cotton piece-goods, for the sale of all of which they claim a good connection.

587. **Manufacturers' selling agency.**—A newly-established British firm, the members of which have had successful and varied experience with leading British exporting houses, is ready to undertake Canadian agencies. Arrangements for branch agencies have been made in Canada, the Argentine Republic, South Africa, Australia, New Zealand, China, Japan, Dutch East Indies, India, Burma, Straits Settlements, Egypt, Soudan, France, Italy, Spain, Portugal, Russia, Siberia, and Scandinavian countries.

592. **Rubber goods.**—An Englishman now in London, who was formerly manager of a large Petrograd rubber factory, is anxious to get into touch with Canadian manufacturers of overshoes and other rubber goods seeking a market in Finland and Scandinavia, and eventually in Russia.

598. **Wire.**—A Glasgow firm wishes to hear from exporters of all kinds of wire with a view to business as soon as conditions permit.

599. **Box shooks.**—A Glasgow firm wishes to be placed in touch with exporters of the above with a view to business as soon as conditions permit.

600. **Leather bends.**—A Belfast firm wishes to get in touch with exporters of the above, with a view to business as soon as possible.

604. **Baling wire.**—A Glasgow firm wishes to receive offers of steel baling wire, No. 14 W.G. by 9 feet long, looped one end, oiled and bagged both ends, in 10-ton lots, with a view to business as soon as conditions permit.

THE CLERKS DEPARTMENT

"Work the Only Road to Advancement," Says John G. Shedd

President of Marshall Field & Company, of Chicago, Started as a Stock Boy and Worked His Way Up—Many Fail Because They Lack Courage, He Says

YOUR question of how a young man can make a success is one that is very often asked by our employees, and one that we invariably answer with "work," says John G. Shedd, in the "American Magazine."

That may seem quite obvious, for we all believe that a good business career is founded on work. But different people have different definitions of work. There are many young men who, I know, would like to blame their misfortunes on what they term hard luck; whereas, the trouble is really with themselves. A man who is successful and honest with himself will agree with me that there is no royal road to advancement, but that his progress has been made along the sure, though oftentimes long, road of hard work.

Need Good Judgment

Now, I don't mean to say for one moment that success can be achieved by hard work alone; but I do say that work and thoroughness, good judgment and courtesy, certainly ought to achieve the desired end. I also think that in most cases a young man finds his way far easier if he keeps to one line of work. Shifting from one occupation to another—I do not mean from one job to another within an organization—is apt to retard speed.

If I may use myself as an instance, I have always been in the merchandise field. To be sure, I began on a farm; but my first job was in a small store in a little New England town. After a few years' training under able merchants I came to what I like to feel is the greatest store in the world, and here I have remained.

Will Climb Steadily

That, by the way, is always a good plan. Choose the biggest and best concern in the line of business that interests you. Get into the organization, even if you have to begin at the very bottom. If you are sincere, and work with a fixed purpose, you'll find yourself climbing up the ladder that leads to the top. Suppose you don't get there! Get as far as you can.

Some men, I know, believe in the little business. They claim that advancement is quicker and the chances greater; but to that I emphatically say no. The bigger the business, the bigger the opportunities. The more competition, the quicker your brain works. The more big men you have the chance to observe and work under, the greater is the experience that you gain. The more branches of the business there are, the more chances of progression and the more opportunities of selecting the branch you like. In a small business you often have to wait for the one or two men higher up to pass out of this life, or for some extraordinary occasion to arise to take them away. In a large concern someone is being moved up almost every month.

Men Who Came Up

Let me give you one or two concrete cases of men who have come up from the bottom in the Marshall Field organization. One man began his career with this concern as bookkeeper in a department office. Later he was transferred to the floor, selling merchandise and taking care of stock in our wholesale store. His next step brought the job of road salesman. Later he became a foreign buyer. That position he held several years, when he was given the management of a large group of departments, with nearly three hundred men working under him. After forty-five years of faithful service to this company he is retiring for a well-earned rest and is well satisfied with his financial achievements.

Was a Salesman

Another man, when he was twenty years old, took a position as salesman in the lining department of the retail store. It was not long before he became a floor manager. I want to add here the explanation that the job of floor manager is not without responsibility. Under his care are a large number of men and women, and, in addition to that, he has to be something of a character expert to know how far to allow credit to customers, and to settle in a tactful way many questions equally important.

Became Manager

Well, an opportunity came to put this man into the housefurnishing department as salesman. This department having a larger scope, there was more chance for him to demonstrate his ability. In a comparatively short time he became buyer and manager of the department. Later he filled the positions of assistant superintendent of the employees, manager of the physical properties, and of assistant merchandise manager; until now, at the end of thirty-five years, he is general manager of the retail store.

Think, ambitious young men, what this means! There are just such chances for you if you only fit yourself for them. Now if I may tell a little about myself, perhaps my experience will be of some definite help.

Looked Ahead

Though I began my career with Marshall Field in a ten-dollar-a-week job as stock boy, I kept my eye steadily looking into the future and aimed to do my work in the best, most thorough way possible, to be progressive and to look for as many improvements as I could find to incorporate in the work itself. By keeping those thoughts ever before me, I soon had a chance for advancement to salesman in one of the departments. From that position I became a buyer, then a merchandise man, and so on up. Never for one moment did I think of any other line of business. My whole attention was given to merchandising in all its different branches as my positions succeeded one another. When I was salesman I tried to be the best in the department, to know the most there was to know about salesmanship and merchandise, and to think about and study the work of a buyer, the next higher job, and which I knew would be mine if I could qualify. I believe the thing that helped me most was steady purpose and courage.

Is Not Considered

The quality of courage is too little taken into consideration in a business career. Many men have good ideas, splendid plans for reorganization or business improvement, but because of lack of courage they fail to carry their plans through to a successful conclusion. There is no stretch along the road to a business success which does not call for courage in a man to back his judgment.

Ability to foresee is another great asset. Not that I mean a man can look ahead twenty years and say, "I will attain certain results by that specified time," or, "This business will be in such and such a position in so many years." In these days, business is changing so rapidly, especially in the large centres of population, that it would be absurd to say a man can look into the future of a business and foretell exactly all its opportunities. But I do say, and most emphatically, that to be abreast of the times you have got to be a little ahead of the times. It is well, therefore, to cultivate the ability to look ahead so that you may be the first in your line to install the newer methods or to launch the most advanced ideas for your work.

Must Show Ideas

In choosing a man for advancement, we always look for the one who has shown the most progressive ideas about his present job, and who has been most thorough in his work. We say to any young man seeking advancement, Never forget the quality of thoroughness. I do not mean that we expect a man to attend to details an office boy could take care of; but I do say, when a job is turned over to you, see that the task is well and completely done. Make it your object to know that any particular piece of work is as thorough and as perfect, even though it may seem of small importance in itself, as you would want an architect to make the plans for a great building.

Aim to be Leader

And aim to be a leader. Assume responsibility. Often it is by the taking over of little jobs that big ones are thrust upon you. When we want to test a young man we may put little jobs up to him. If he is thorough and takes the right responsibility and attitude to those small tasks, he soon finds others entrusted to him. And if he shows that he can do those equally well, he is pretty apt to get the first chance of promotion that comes along.

Makes His Work

In our organization—and I am sure it is the case in other large concerns—a man makes his own work. He may be called an office boy, a clerk, a department manager, for the sake of business organization, but his work may be partly what his title implies and equally that which would come under another title. For, in the work for which he shows the best aptitude, the most chances are given him to use his initiative. Each job you tackle and make a success of is a link in the chain of preparation for something bigger and better.

Spare the man higher up. Be alert to study his wants and needs. Never let him feel he has to prod you to get what he wants. Take over the responsibilities of the smaller things of your chief's job. Look after them so thoroughly and conscientiously that he does not have to give them a moment's thought. He will appreciate it, and your reward will come in due time. In the same way, train those who are working for you to carry on your work. A good business is not carried on by jolts and jars. The smoother it runs, the more successful it is; and the slipping of one man into a higher place and of another into his should be done so easily and smoothly that the business suffers no interruption. I think a man far greater who has the ability to train those working for him than one who never considers that necessary.

Needs Enthusiasm

But to go back to the characteristics of a man that attracts me. Enthusiasm is another. That word enthusiasm is much overrated and misused. The kind of enthusiasm I mean, however, is the product of love for your work. You have got to love your work to succeed. Any young man who is not in complete sympathy with the line of toil he has selected, let him at once change before it is too late and he has made a failure of a business career that would perhaps have been brilliant if it had been founded on love of the work.

With all my fixed purpose, courage, and determination, I never could have realized my desires if the enthusiasm that is built on love of my work had not been their foundation. Work, no matter how absorbing and interesting it may be, is at times taxing, and unless it is a vital part of your existence you can never make a success of it. For me no game of golf, no flight in an aeroplane, could be more interesting than the genuine pleasure and satisfaction I take in planning new business ideas and bringing them to successful fruition.

Seldom Succeeds

I want to go back to that other quality of which I spoke—courtesy. The rude man seldom succeeds. An abrupt, aggressive man makes enemies; and enemies are the undoing of any business, no matter how secure its foundation. The considerate man, who works for the good will of his customer, builds up a business that, because of its success, means his own advancement.

Never wait for your employer to come to you with requests, or suggestions, or orders. Go to him. His time is valuable, and he will appreciate the man who tries to save it.

Won Promotion

I have a very good example of what courtesy did for one man, not so very many years ago. He held a position in my office that required tact, firmness, and sureness of judgment. This young man possessed these qualities in such a degree that he could make an offender see his mistake, and yet feel a friendliness to the young man who had graciously listened to him and finally convinced him of his error. So well did that man complete his job of courtesy that, when a big opening came for a position entailing the care and responsibilty of large numbers of men, it was given to him. I sometimes wonder if he realizes just what it was that brought him his bigger opportunity.

Right here I want to speak of promotion. It is a mistaken idea many young men have, that if they do not gain rapid advancement they are not making a success of their work. The slower methods are often surer. It is true some men progress faster than others, and it is not always due to circumstances, but to the ability of those young men to make good in each step of their progress.

May be Detriment

I have known cases where too rapid promotion was a detriment to the individuals. The increased responsibilities were too much for them, and efficiency was mpaired. It would have been better for those young men if they had had slower promotion. Some men become heady over rapid advancement. It always seems a pity to me. Success is something of which to be proud, but not openly boastful.

The ability to obtain credit is another important feature that enters into the career of any young man, and especially one who is endeavoring to build up a business of his own. I mean credit from banks or from dealers from whom you buy your goods.

I analyze the eligibility for credit under the three C's—Character, Competency and Capital. No matter how clever a manager a man may be, no matter how much he may know about his business, or how much capital he may possess, he cannot gain credit. On the other hand, a man may have believed, to have absolute integrity of character. What he does, what he is, and what he stands for in his community, have everything to do with his ability to gain credt. On the other hand, a man may have an absolutely unquestionable character and good capital, but unless he knows his business thoroughly and has the ability to manage it well, he is not likely to be given credit. Then, again, much as we should like to extend credit to an honest, capable man, it is generally necessary for him to establish the fact that he has some property or negotiable security. "Capital" may not necessarily mean a large sum of money; but it does mean some good assets, good merchandise, the ability to know how to get more and to dispose of it with profit.

Employers Urge Clerks of St. John, N.B., To Form An Association

AN interesting illustration of the modern idea of co-operation between employers and employees was furnished at a meeting held this week in St. John, N.B., for the purpose of considering the formation of an association composed of clerks employed in wholesale and retail places of business. More than one hundred were present and committees were appointed to interview the clerks in the various lines of trade with a view to ascertaining how many would join if an association were formed.

The principal speakers at the meeting were A. H. Wetmore, past president of the Board of Trade, and W. F. Hatheway, both heads of large wholesale establishments. Both of these gentlemen heartily supported the movement and urged the clerks to proceed with their plans.

Mr. Wetmore believed that it would be to the advantage of both clerks and their employers. Mr. Hatheway pointed out that the merchants had associations of their own and could not reasonably object to their clerks following the same line of proceedure. Other employers were reported favorably and the matter now is largely up to the clerks themselves. The association would deal with such matters as wages, hours of work, overtime and others of mutual interest.

GOING AFTER AUTO ACCESSORY BUSINESS

Continued from page 59

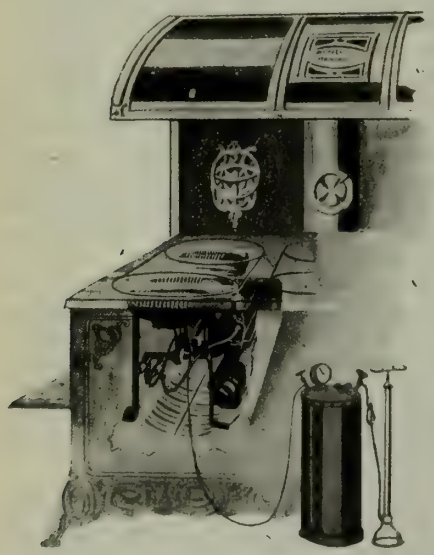
lutely to come up to the requirements of car owners, and in a short time were proven unsaleable. Very, very few hardwaremen were caught with stocks of these novelties because they did not experiment. They were satisfied to deal in the lines that were standard, and for which there was a steady and continuous call and a good profit, rather than risk taking on a lot of lines about which they knew nothing. Events proved that they were wise, and by their farsightedness they not only escaped being caught with stocks of unsaleable goods, but they did not have any of the troubles which come from selling customers goods with which they are dissatisfied in a short time. This always means a loss of confidence in the store where the goods were purchased, and looking elsewhere for a store where goods that can be depended upon are available. This is perhaps one of the big reasons for the hardware dealers' success in handling, not only auto accessories, but other lines. They were very careful in selecting their stock to get good goods, and then they were not afraid to guarantee them to the limit.

STORE CLERKS FORM A UNION IN OTTAWA

President Tom Moore of the Trades and Labor Congress of Canada addressed a large gathering of store clerks in Ottawa recently, at By-Ward Market Hall. The views he expressed seem to meet with general approval and he was listened to with great attention. Mr. Moore gave several reasons for the need of a union, and asserted that clerks were better off in many stores in the States than here.

Organizer Hanley of the Cooks' and Waiters' International Union; Organizer J. T. Walsh, Bakers' Union; Organizer Hoop and President P. Green of the Trades and Labor Council of Ottawa, were the other speakers.

It was decided to form a clerks' union immediately. As soon as the speeches were ended, enrollment cards were distributed, and between two and three hundred of those present signed up. A feature of the meeting was the fact that about half the audience was composed of ladies.



James H. Drewe, of Winnipeg, first manager of the Gurney Northwest Foundry Company's Winnipeg branch, and formerly in the hardware business in Toronto, last week, with Mrs. Drewe, celebrated the 51st anniversary of their marriage. Mr. Drewe retired from active business life in 1907. He had two sons overseas.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

OIL BURNER

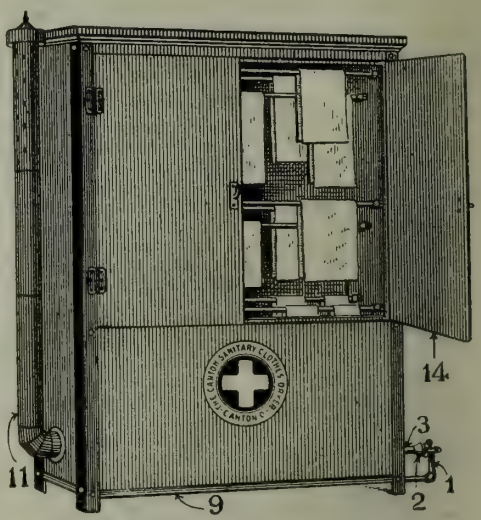
The Canada Oil Burner, manufactured by the Canada Oil Burner Co., 35 Adelaide Street West, Toronto, Ont., produces, it is claimed, a perfectly pure, clean, odorless, smokeless, dry gas which will give a safe and satisfactory heat. The burner, it is stated, uses ten per cent. kerosene mixed with ninety per cent. air. The burner, it is stated, can be installed in any make of furnace, coal stove or range. Each burner, it is claimed, manufactures and consumes it own gas and is equipped with an automatic cleaning device. A big point claimed by the manufacturers in connection with the burner is that there is no smoke, soot or grime and no ashes to sift or carry out daily. Any cook stove, it is stated may, by using the burner, be converted into a gas range in thirty seconds by any housewife. This, it is stated, is of particular value to those residing in the country or in small towns where supplies of artificial gas are not available. One gallon of oil, it is claimed, will generate sufficient gas to burn with the air for from nine to ten hours. The cost, it is stated, figures at from 1½ to 2 2-3 cents per hour of continuous burning and sufficient heat, it is claimed, is generated to heat any range oven up to 450 degrees in half an hour. It will heat the room, it is stated, and will burn under any conditions in an open grate, in a furnace,

Oil Burner

or in the open air. For the furnace the manufacturers claim it is the cheapest proposition on the market, absolutely safe in every way, and it is much cheaper than coal or wood with all the trouble eliminated.

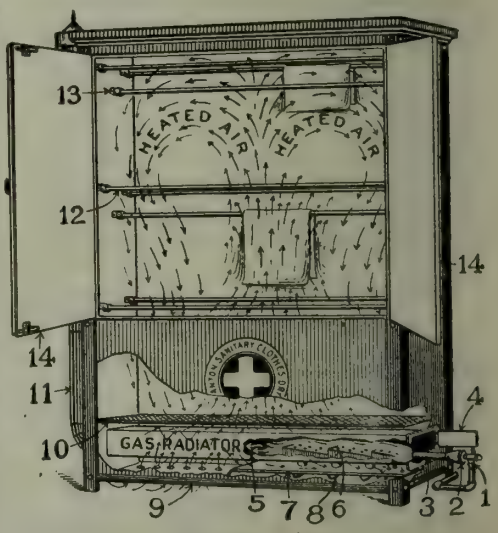
CARBON REMOVER

The Work Rite carbon remover, made by the Workrite Manufacturing Co., 5606 Euclid Avenue, Cleveland, Ohio, will, it is claimed, take the knock out of motors, give a considerable amount of extra power and save from ten to forty per cent. in gasoline consumption. It requires no attention, it is stated, except refilling with water. One quart of water is used, it is stated, in running 100 miles. The carbon remover, it is stated, is easily attached to any engine in a few minutes where the manifold is exposed between the carburetor and the engine. The oxygen in the water, it is stated, burns the carbon in the engine and eliminates further deposit. It gives a perfect mix-



Carbon Remover

ture, it is claimed, even with poor gasoline, causing a powerful explosion. The device consists, it is stated, of a metal frame for holding a quart jar of water. In the jar, it is stated, there is an adjustable inlet valve and an outlet connection with a rubber tube running to the manifold, where it is attached with a ⅛-inch pipe thread connection. The air is drawn through the water, it is stated, by the suction of the engine, and this vapor is mixed with the gasoline. All connections, it is stated, are made of brass and cannot rust.



SANITARY DRYER

The Canton Sanitary Dryer is to be manufactured in Canada by the Hurley Machine Company, 413 Yonge street, Toronto, they having secured the Canadian representation. It is stated the "Canton" is the only ventilated clothes dryer will, it is claimed, modernize the convenient and sanitary. Installing the

Sanitary Dryer

dryer will it is claimed modernize the laundry room and save time, trouble and worry. In the lower part of the drying cabinet and over the gas radiator, it is stated, there is placed a special wire screen to prevent clothes coming in contact with the heated radiator should they at any time fall from the hanging rods. The hanging rods, it is stated, are removable and interchangeable. The dryer, it is claimed, is absolutely noiseless in operation and the cold air, steam and moisture, it is stated, is carried through the gas flame and converted into heated air before coming in contact with radiators or vent pipe. Clothes, it is stated, will not discolor in drying nor will they have a laundry odor.

Interior View

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

FURTHER reductions in some lines of steel and iron goods have been made this week. This is in line with the course Canadian firms are taking to meet the new prices of the American steel firms. Other changes are pending, and all, it is stated, will be downward. No big reductions are being made and none are looked for, the revision process being very gradual.

Among the important changes this week is a new list of discounts for tinware and enamelware, further reductions in iron and steel, new and lower prices for wood screws, and a drop of 35 cents in the price of cut nails.

A reduction of ten per cent. has been made in stove bolts. Chain prices have been revised and are a little higher. A decidedly firmer tone is noticeable in the copper market. Brush manufacturers state that all prices will be very firm until July, when they expect they may advance a little. This will be due, they say, to higher prices for raw materials and high wage schedules. Lower prices are also in effect on carriage and machine bolts, stove and tire bolts, nuts and steel rivets.

Prices of linseed and turpentine are very firm, and according to reports regarding conditions in the producing districts in the South, are likely to remain so. A steadily increasing demand is also reported from overseas.

Many lines of woodenware are showing a tendency to firm prices as a result of inquiries and business that is being received from England.

Business in general is reported to be improving, and it is expected that the general tendency in many lines toward price reduction will have stimulating effects upon the whole situation. In the building trades an even larger volume of construction appears, and prospects are very bright for one of the best seasons in many years.

MONTREAL MARKETS

MONTREAL, April 3.—Reductions of importance have been made this week on a number of leading lines.

Various grades of enamelled ware, tinware, stamped ware, tubs, pails, tinners' trimmings, fry pans, spiders, sheet iron ware, etc., have been reduced by a revision of the discounts. These in many cases are about 10 per cent., and the new schedule is effective as from April 1. Copper tea kettles and boilers are also affected. As yet some lines of japanned ware have remained unchanged and a revision on these may follow.

Cotter pins, stove bolts, sink bolts, etc., have been reduced in price. It will not be surprising if machine and carriage bolts and kindred lines follow. A considerable reduction has been put into effect in the States, it is stated, on wood screws, and these also are inclined to lower levels. Cut nails are down to $4.75. Black sheets are reduced again from 35c to 60c per 100 pounds. Tin is down 2c per pound and ingots are fairly steady and quiet.

On the whole business is not as active as it was a week ago, and this is attributed to a return of decided wintry conditions. Navigation is likely to be retarded somewhat by this unexpected weather, and at this point the beginning of navigation is always looked upon as favorable to better business. Confidence is held regarding the immediate future.

Cotter Pins; Stove Sink Bolts Down

Montreal

BOLTS AND PINS.—Reduced discounts are in effect for cotter pins. The new discounts applying are 85 per cent. and 10 per cent. Sink bolts also are lower, the discount now being 55 and 10 per cent. Stove bolts are lower also, new discounts being 55 and 10 per cent. In view of these changes and following the revision of iron prices downward, it will not be surprising to see lower prices follow for various other bolts, such as carriage and machine.

Wares Are Down; Stoves Steady

Montreal

STOVES AND WARES.—Stove markets are steady, and there is little to indicate changes being made at present. The movement is rather restricted in this market.

Revisions to lower levels have been made on various wares and tinners' trimmings. The changes made are many and are in effect as from April 1. Some lines of japanned ware have not yet been revised, but these will probably follow. The new discounts applying on enamelled ware, tinware, etc., are as follows: Enamelled ware—Colonial, 33 1-3 per cent.; Premier, 10 per cent.; White, 50 per cent.; Imperial, 33 1-3 per cent.; Canada, 10 per cent.; Scotch grey, 50 per cent. Stamped ware—Plain, 50 per cent.; retinned, 45 per cent.; pieced ware, list plus 30 per cent.; copper bottoms, list plus 50 per cent. Sheet iron ware, list plus 10 per cent.; spiders, 10 per cent. Steel sinks, list plus 15 per cent. Galvanized ware, list plus 20 per cent.; galvanized sinks, list plus 15 per cent.; light galvanized pails and tubs, plus 20 per cent.; heavy galvanized pails and tubs, plus 10 per cent.; garbage pails, list plus 10 per cent.; tinners' trimmings, plain, 50 per cent. off list; retinned, 45 per cent.; copper wash boilers, net list; nickel-plated copper tea kettles, net list; copper bottoms and pits, net list; tinned steel hollow ware, 5 per cent. on list.

Cut Nails Reduced; Wire on the Move

Montreal

NAILS AND WIRE.—In one quarter cut nails have been reduced, and the new basis here is $4.75. In all probability this base will be generally adopted, and in any case the output of this line is said to be almost nil with some jobbers. It was stated in HARDWARE AND METAL last week that a reduction would

probably come on these. Wire nails are steady and somewhat more active at the new basis of $4.75. Plain wire is based at $5 per 100 pounds.

Cautious Buying Noted on Rope

Montreal

ROPE, CORDAGE.—Buyers are securing their requirements of rope as wanted, but there is a decided absence of large orders. It would seem that the decidedly uneven price basis that has been manifest in recent weeks has decreed a very careful buying programme on all sides. Prices are unchanged with pure manila rope selling at 34c; British manila at 30c, and sisal at 27½c per pound. The cotton rope market is easy at recent declines already published. Seine twines, too, are on a lower and somewhat uneven basis.

Steady and Firm Oil and Gasoline

Montreal

GASOLINE, COAL OIL.—Steadiness is manifest for all lubricating and illuminating oils, and no changes have been made. Coal oil prices, according to grade, have held at 20c to 23c per gallon. Motor grade gasoline is unchanged at 34c, and with the price war over, which has been raging in the States for some time, the market here will probably be held on a continued steady basis.

THE DRILL SITUATION

Lower prices on drills quoted in HARDWARE AND METAL'S market reports last week represented quotations made to the retail trade by jobbers. They did not represent a further reduction by the manufacturers. The latter reduced their prices about 6 or 8 weeks ago and a number of jobbers did not change their prices until later, as announced in HARDWARE AND METAL'S market reports. Manufacturers claim that unwarranted reductions were made some time ago in order to stimulate business, that the present levels cannot be maintained, and that advances in price will take place rather than further declines.

New Prices Have Helped Bar Sales

Montreal

IRON AND STEEL BARS.—While there is not, as yet, the unusual early movement of iron and steel bars, there is quite a deal of activity all around. This is assigned to the lower basis reached a couple of weeks ago and to the assurances that have been made regarding the continuance of present basis for some months at least. With the opening of river navigation there will be a still better movement, it is expected.

Common bar iron, per 100 lbs.	3 75
Refined iron, per 100 lbs.	4 75
Mild steel	3 75
Iron finish machinery steel	3 80
Norway iron	12 00
Single reeled machinery steel	5 50
Spring steel	5 50
Sleigh shoe steel	3 75
Tire steel	3 95
Toe calk steel, per 100 lbs.	4 65
Band steel	3 75
Harrow tooth steel	3 90
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Black Diamond cast steel, lb.	0 22

Another Reduction On Black Sheets

Montreal

SHEETS AND PLATES. — Black sheets have been revised in price again and the basis is 35c to 60c below the prevailing scale of last week. This makes a fair buying price now for the various gauges and trading will probably be freer in the immediate future. Galvanized sheets are moving out slowly and on an unchanged basis.

BLACK SHEETS—	Per 100 lbs.
10 gauge	$5 40 $6 25
12 gauge	5 45 6 30
14 gauge	5 50 6 35
16 gauge	5 60 6 45
18-20 gauge	6 15 6 75
22-24 gauge	6 20 6 80
26 gauge	6 25 6 85
28 gauge	6 35 7 00
GALVANIZED SHEETS—	
10¾ oz.	$9 25
28 gauge	8 75
26 gauge	8 50
22 and 24 gauge	8 35
20 gauge	8 35
18 gauge	8 35
16 gauge	8 00

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Lead Sheets and Pipe Are Steadied

Montreal

LEAD PRODUCTS.—Makers of lead products feel more confident regarding the future of prices on the line, and do not anticipate changes in the near future. The movement is necessarily restricted, as yet, but with the probability of considerable building being undertaken here in the near future, better business will be available.

Lead pipe, lb.		$0 12
Lead pipe (cut lengths)		0 13
Lead waste pipe, lb.	0 13

45-55		0 39¾
50-50		0 42½
Zinc sheets, casks		0 17
Do., broken lots		0 18

Scrap Metals to Move Better

Montreal

OLD MATERIAL.—While there is no great demand from the Canadian mills for scrap the selling is speeding up in the States, dealers report. It is expected that this influence will reflect itself here in the coming weeks. Prices are unchanged but there is a tendency to greater firmness on various metals. The recent price-fixing on steel in the States seems to have restored confidence in old metals quite a little.

Dealers' Buying Prices—		
Pipe scrap, ton	8 50	9 00
Stove plate, ton		15 00
No. 2 busheling		5 00
Old rubbers, boots and shoes	0 06	0 06½
Overshoes, lumbermen's rubber boots		0 03½
Bicycle tires		0 03

Tin Has Dropped; Copper is Steady

Montreal

INGOT METALS.—Little movement of any one line is reported, and there is but one change, that of a decline of 2c per pound on tin. The London market is lower.

COPPER.—Considerable firmness is manifest in the United States market, and the price basis is upward inclined. Price here holds at 19c.

TIN.—Licenses are now available for import from England, and the easing tendencies there have amounted to about £13 in London. This is followed by a lower quotation here of 58c per pound. One of the assigned reasons for the decline is that of a poor and almost negligible demand from the United States, supplies there having continued large.

LEAD.—Quietness prevails, and while there is no change of price the tendencies at this writing have been slightly firmer. Local basis holds at 7 to 7½c.

ANTIMONY.—A steadier feeling pre-

NEW DISCOUNT ON BOLTS AND NUTS

BOLTS AND NUTS.—New prices on bolts and nuts which become effective immediately were announced on Thursday. The new discounts are carriage bolts ⅜-in. and smaller, 6 in. and shorter, 35 per cent.; ⅜ in. six inch and longer, 20 per cent.; 7-16 in. and larger, 15 per cent.

Machine bolts, ⅜ in. dia., 4 in. and shorter, 40 per cent.; ⅜ in. 4 in. and longer, 25 per cent.; 7-16 in. and larger, 25 per cent.

No change is made in sleigh shoe bolts, all sizes being quoted at net list.

Coach and lag screws, 50 per cent.

Square head blank bolts, 25 per cent.

Bolt ends, 25 per cent.; plow bolts, 30 per cent.; elevator bolts, 25 per cent.; fancy head bolts, 25 per cent.; shaft bolts ($3 list), 25 per cent.; step bolts, large head (3 list), 25 per cent.; whiffletree bolts, 25 per cent.

Nuts, square, blank, add to list 75 cents; nuts square, tapped, add to list $1.

Nuts, hexagon blank, add to list $1; nuts, hexagon, tapped, add to list $$1.25.

F.o.b. Montreal, Toronto, Hamilton, London.

vails and the price basis is maintained without change at 8c per pound.

SPELTER.—Following the trend of lead a slightly firmer feeling is manifest on this item, and the price quoted here is 9c.

ALUMINUM.—Of all the ingots, this is probably the most stable, and the interest is very limited. Price remains at 40c.

PIG IRON.—Lack of interest is as manifest here on this item as elsewhere. Some hesitation exists regarding buying. Price basis, per ton, $45.

TORONTO MARKETS

TORONTO, April 3.—A tendency towards lower prices is noticeable this week in several lines, especially iron and steel, tinware and enamelware, wood screws and cut nails. Changes in some other lines are pending. The reductions which have taken place are all moderate, and in the opinion of manufacturers are likely to hold for some time. Spring business has opened up nicely in many lines, and a very noticeable improvement in orders is noted by a number of firms. This is especially so, it is stated, in the iron and steel trade. Prices of carriage and machine bolts have been revised and all the changes are to slightly lower quotations. The general reduction in the prices of wood screws amounts to two and one-half per cent. Prices for galvanized sheets are a little easier. Black oil is down one cent per gallon. A small reduction has been made in the prices of oiled and annealed wire.

Cut Nails Are Down 60 Cents

Toronto.

NAILS, WIRE.—Cut nails have been reduced sixty cents and the new quotation is at $4.75 per hundred pounds base. Wire nails are steady at $4.70 per hundred pounds base. Steel wire prices are unchanged, the quotation for smooth steel being $5.

Iron and Steel A Little Lower

Toronto.

IRON AND STEEL.—Further reductions in the prices of iron and steel have been made and the new quotations are as follows:

Common bar iron	$4 25	$4 50
Common bar steel	4 25	4 50
Refined iron	4 65	4 90
Angle base	4 50	4 75
Horseshoe iron	4 50	4 75
Tire steel	4 45	4 70
Mild steel	4 25	4 50
Norway iron	11 50	15 00
Toe caulk steel	5 15	5 45
Sleigh shoe steel	4 25	4 50
Band steel, No. 10	4 50	4 75
Do., No. 12	4 75	5 00
Spring steel	9 50	11 50
Mining drill steel	21 00	30 00
Sheet cast steel	0 42	0 45
Tool steel	0 22	0 90

Galvanized Sheets A Little Firmer

Toronto.

SHEETS, PLATES. — While no changes have been made in black sheets the quotations for galvanized sheets are slightly firmer. A good volume of business is being handled and prospects for a steady season's trade are reported good. Quotations are as follows

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$6 80	$7 50
12 gauge	6 50	6 75
14 gauge	6 00	6 25
16 gauge	6 00	6 25
18-20 gauge	....	6 50
22-24 gauge	....	6 55
26 gauge	....	6 60
28 gauge	....	6 70
3-16 inch plate	....	6 25
¼-inch boiler plate	....	5 80

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS—		
10¾ oz.	$8 25	$8 50
U.S. 28	7 95	8 20
U.S. 26	7 65	7 90
22 and 24	7 50	7 75
18 and 20	7 30	7 60
16	7 20	7 45
14	7 10	....

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Higher Prices For Fire Welded Chain

Toronto.

CHAIN.—Higher prices are being asked for both proof coil and B B B fire welded chain. The quotations are: Proof coil, 3/16-in., $21.40; ¼-in., $17.75; 5/16-in., $14.60; ⅜-in., $13.40; 7/16-in., $13.15; ½-in., $12.80; ⅝-in., $12.75; ¾-in., $12.70; ⅞-in., $12.40; 1-in., $12.30.

B B B, 3/16-in., $27.40; ¼-in., $23.60;; 5/16-in., $18.40; ⅜-in., $17.25; 7/16-in., $16.65; ½-in., $16.50; ⅝-in. $16.15; ¾-in., $16.00; ⅞-in., $15.80; 1-in., $15.65.

Stove and Tire Bolts; Steel Rivets Cheaper

STEEL RIVETS, STOVE AND TIRE BOLTS.—New quotations are made on these lines as follows: Steel rivets and burrs, 7-16 in. and smaller, old discounts 35 and 5 per cent.; new discount 40 and 5 per cent.

Stove bolts, old discount 55 and 10 per cent.; new discount $65 per cent.

Tire bolts, old discount 35 per cent.; new discount 50 per cent.

Corrugated Sheets Show No Change

Toronto.

CORRUGATED SHEETS.—A fair volume of business is reported in corrugated sheets. Quotations are unchanged, the figures being as follows:

	Per 100 sq. ft.	
Corrugated Sheets—	Gal'zed	Painted
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Toronto.

Brushes Expected To Hold Very Firm

Toronto.

BRUSHES.—A good volume of business is reported in brushes and it is stated that present prices will hold very firm until July. At that time it is intimated quotations are likely to advance as a result of high prices for labor and steadily advancing prices of bristles.

Export Business May Boost Brooms

Toronto.

CORN BROOMS.—The prices for the best grades of brooms are unchanged notwithstanding the downward revision of the cheaper varieties. A good deal of export business is in prospect it is stated and the tendency will be for prices to remain firm. Prices of whisks show no change. Quotations for washboards and clothes pins remain steady.

Lead and Zinc Remaining Steady

Toronto.

LEAD AND ZINC PRODUCTS. — Quotations on these lines are unchanged with a steadily increasing volume of business offering. The prices are:

Lead pipe, lb.		$0 12
Lead waste pipe, lb.		0 13
Lead traps and bends		Net list
Lead wool, lb.		0 14
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 11	0 12½
Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra.		
Solder, guaranteed, lb.	$0 35	$0 37
Solder, strictly, lb.	0 33	0 37
Solder, commercial, lb.	0 30	0 36
Solder, wiping, lb.	0 29½	0 32½
Solder, wire, lb.	0 40	0 45½
Zinc sheets, per lb.		0 17

Scrap Materials Demand is Quiet

Toronto.

OLD MATERIALS.—While there is little demand for scrap there are indications that the business may improve a little from now on. During the week Toronto firms bought about 40,000 tons of shell steel that was the property of the Imperial Munitions Board. There is more of this material in various parts of the country and it is likely some may

be shipped to England. The quotations are:

Dealers' Buying Prices—		
Tea lead	....	0 03
Heavy lead pipe	....	0 04
Pipe scrap	....	8 00
Stove plate, per ton	....	10 00
No. 2 busheling	....	8 00

Overshoes, lumbermen's rubber boots	....	0 04½
Bicycle tires	....	0 04½
Automobile tires	0 03½	0 04

No Changes Made in Rope Prices

Toronto.

ROPE.—Rope prices are quoted as follows: Pure manila, 34 cents base; British manila, 30 cents; New Zealand hemp, 30 cents; sisal, 27½ cents. Prices it is stated will hold firm. A fair volume of business is being handled. Reports regarding supplies of raw materials indicate that they are plentiful and that no difficulties will be experienced in securing all lines required.

Boiler Tubes May Be Easier Shortly

Toronto.

BOILER TUBES, WROUGHT PIPE.—While revised prices of boiler tubes to slightly lower quotations are expected shortly, they have not yet become effective. Business has been showing some improvement and a number of inquiries are coming in. Prompt delivery is being made from the mills. No changes are reported in the prices of wrought iron pipe.

BOILER TUBES—	Per 100 feet Seamless	Lapweld
1 inch	$28 00	$.....
1¼ inch	32 00	.....
1½ inch	35 00	28 00

2½ inch	45 00	35 00
3 inch	52 00	40 00
3¼ inch	.....	47 00
3½ inch	62 00	48 00
4 inch	70 00	60 00

Firmer Markets For Ingot Metals

Toronto.

INGOT METALS.—Steadily increasing activity in these lines with a firmer tendency in all prices but antimony which is a little lower, are noted this week. Copper prices are showing much stronger tendencies especially since the American Government which has about 100,000,000 pounds on hand, announced that it will only put it on the market in small lots so as not to demoralize the trade.

COPPER.—Prices are distinctly firmer and a steadily increasing volume of business is being handled. Sheet copper is figured on a base price of 25 cents, while other quotations are being made from eighteen to twenty cents a pound.

TIN.—The tin trade is only fair and prices show no change from the sixty cent figure previously quoted.

SPELTER.—Business is more active and will probably continue so as many inquiries now in hand promise business in the near future. Quotations are being made from 8¼ to 8½ cents a pound.

LEAD.—Lead is also more active than for some time. The price is steady at 7½ cents.

ALUMINUM.—The trade in this line is quiet. Quotations range around the fifty-cent mark.

ANTIMONY.—Antimony is a little easier most of the business being done at eight cents. There has been more business offering and more is in prospect.

MAY AFFECT COPPER PRICES

The United States War Department has made the following announcement from the office of the Director of Sales:

An agreement has been reached whereby the United Metal Selling Co., representing the copper producers, will sell for the War Department approximately 100,000,000 pounds of copper and also whatever amount of copper scraps the War Department has to dispose of. Not less than 5,000,000 pounds of copper will be delivered by the United States to the copper producers each month for a period of 10 months, and then 10,000,000 pounds of copper per month will be delivered for a period of five months.

It was further agreed that the amounts delivered to the copper producers would be at least 10 per cent. of their total sales, and in the event of good market conditions the copper producers would take in excess of this amount. The copper will be sold by the copper producers at market prices as determined by the average published quotations. A small consideration will be allowed the copper producers in marketing the copper for the Government to cover expenses of sales.

LONDON MARKETS

LONDON, April 3.—Business during the past week has been good. The few days of warm weather started things going nicely, and it only needs steady warm weather to make good business all the time.

Several lines are quoted at lower prices this week, and other reductions are expected. A revision of the prices of rivets and bolts is likely. Collections in this district are good. From the country round about orders are coming in steadily, and while no one is buying largely there is every prospect for a good season's business.

Lower Prices For Cut and Wire Nails

London, Ont.

NAILS.—Both cut and wire nail prices have been revised downward. Cut nails are down 60c per hundred pounds, the new price being $4.75 base. Wire nails are 25c lower, the latest quotation being $4.70 base, f.o.b. London.

Oiled and Annealed Wire Prices Reduced

London, Ont.

OILED ANNEALED WIRE.—New quotations for oiled and annealed wire show lower figures. With $5 as the base net quotations at present are, No. 10 $5.16 per 100 pounds; No. 11, $5.22, and No. 12, $5.30.

Lower Price Named For Hay Baling Wire

London, Ont.

HAY BALING WIRE.—A revision made in the price of hay baling wire gives quotations on No 14 in coils at $5.40 per hundred pounds.

Ten Per Cent. Cut in Stove Bolts

London, Ont.

STOVE BOLTS.—A drop of 10 per cent. in the quotation on stove bolts has been made. The new discount is 55 and 10 per cent.

Three-Cent Advance Made in Turpentine

London, Ont.

TURPENTINE, LINSEED OIL.—An advance of 3c per gallon has been made in turpentine. Quotations are as follows: 1 bbl. lots, $1.10 per Imperial gallon; in 2 to 4 bbl. lots, $1.09; in 5 gal. lots, $1.20. Linseed oil quotations show no change. The prices are as follows:

	Raw	Boiled
1 to 2 barrels, per gal.	$1 72	$1 75
3 to 5 barrels, per gal.	1 71	1 74
6 to 9 barrels, per gal.	1 69	1 72

Less than barrels, add 10c per gallon.

White Lead in Oil Remains Unchanged

London, Ont.

WHITE LEAD IN OIL.—The quotations for white lead in oil show no changes. The prices are as follows: Pure, in 1 ton lots, $16.30 per hundred pounds; in less than tons, $16.65. Pure Elephant in ton lots, $16.90 per hundred pounds; less than tons, $17.25.

Tinned Tea Spoons Have Been Reduced

London, Ont.

TINNED TEA SPOONS. — Lower prices are now in effect for tinned spoons. The new quotations are: No. 900, tea spoons, $3.75 per gross; No. 900 dessert spoons, $7.25 per gross; No. 900, tablespoons, $7.50 per gross.

Lower Quotations For Asbestos Sad Irons

London, Ont.

ASBESTOS SAD IRONS.—New and lower quotations are made for asbestos sad irons. The new prices are: No. 70, asbestos, $2.50 per set; No. 60 Dover, $1.90 per set.

Price of Solder Slightly Reduced

London, Ont.

SOLDER.—A lower quotations is being made on solder this week. Thirty-one cents per pound is the new price for half and half.

Higher Prices For English Shears

London, Ont.

SHEARS.—The new quotations on English sheep shears are higher. Following are the prices: 5G x 6 in., bent, $10 per dozen; 5G x 6½ in., bent, $10.50; K20 x 6½ in., bent, $13.50; BBA x 7 in., straight, $26. English gardener hedge shears are also higher. The new prices are: No. 100 x 8 in., plain, $1.55 per pair; No. 101 x 8 in., notched, $1.85; No. 100 x 9 in., plain, $1.90; No. 101 x 9 in., notched, $2.25; No. 107, ladies, $1.95; No. 106 x 9 in., long handle, $3; No. 105 x 9 in., long handle, $3; No. 1062 x 9 in., long handle, $3.50.

Fifty-Cent Drop in Carpet Felt

London, Ont.

CARPET FELT.—Carpet felt prices are down 50c per hundred pounds. The new price is $5 per 100 pounds.

Neverslip Calks Are Raised Twenty Cents

London, Ont.

NEVERSLIP CALKS.—An advance of 20c per hundred, list, is announced in "Neverslip" calks. The new prices are: No. 4 x 5-16-in., $2.80 per 100; ⅜-in., $2.80; 7-16-in., $3; ½-in., $3; 9-16-in., $3.20; ⅝-in $3.20. Less 15 per cent.

Electric Grills Are Down Fifty Cents

London, Ont.

ELECTRIC GRILLS.—A drop of 50c in the list price of "Canadian Beauty" electric grills has been made. The quotation is No. 402, $8.25 each list, less 25 per cent.

Coil Door Springs Show an Advance

London, Ont.

COIL DOOR SPRINGS. — Higher prices for "Perfect" coil door springs are announced. The new quotations are: No. 2, 65c per dozen; No. 3, 70c; No. 4, 75c; No. 5, 90c.

Fence Staples Show a Reduction

London, Ont.

FENCE STAPLES.—New and lower prices on fence staples have been named. The new quotations are: Bright, 100 lb. kegs, $5.10 per 100 pounds; 25 and 50 lb. boxes, $5.60; galvanized, 100 lb. kegs, $5.85 per 100 pounds; 25 and 50 lb. boxes, $6.35.

Lower Prices For Cast Enamel Sinks

London, Ont.

CAST ENAMEL SINKS.—Lower quotations are made on cast enamel sinks. The new prices are: 16 x 24, $6 each; 18 x 30, $6.35; 18 x 36, $9.72.

No Changes Made in Prices of Rope

London, Ont.

ROPE.—Booked orders for rope are now being shipped. No change has been made in quotations. The prices are: Pure manila, 34c per pound base; British manila, 30c; New Zealand hemp, 30c; sisal, 27½c.

Poultry Netting Remains the Same

London, Ont.

POULTRY NETTING.—Poultry netting and poultry fence is moving steadily. Prices are unchanged, poultry netting quotations being 15 per cent. off list. The prices for Blue Ribbon poultry fence are: 24 in.., $4.30 per roll of 10 rods; 36 in., $5.50; 48 in., $6.50; 60 in., $7.65; 72 in., $8.75.

Garden Tools Show No Change

London, Ont.

GARDEN TOOLS.—Garden tools are selling well. The quotations show no change from 17½ per cent. off the list price.

Bar Iron Prices Show a Reduction

London, Ont.

BAR IRON.—Lower quotations are being made on bar iron. The new price is $3.75 base f.o.b. London, Ont.

Wrought Washers a Little Easier

London, Ont.

WROUGHT IRON WASHERS.—Lower prices are quoted for wrought iron washers. The new price is 45 per cent. off list.

Horse Clippers Are Selling Well

London, Ont.

HORSE CLIPPERS.—Horse clippers are moving steadily. The quotations are: Stewart (power), No. 1, $9.75 each; Handicap (hand), $1.95; New Market, $2.75.

WINNIPEG MARKETS

WINNIPEG, April 3.—Price changes for the past week are again very limited, practically all lines holding firm with the exception of knife handles and agricultural wrenches, Stillson pipe wrenches and soldering coppers, which show slight reductions, and indications point to fairly steady markets for the next 30 days at least.

Business is reported fairly good in all lines, and is only held up pending warmer weather, as considerable building is expected in the West during the coming season.

General Reduction in Tin and Enamelware

Winnipeg.

New prices are just to hand covering tinware, enamelware, etc., and shows a general reduction of from 10 to 15 per cent. over former quotations. This becomes effective on April 1. New discounts applying are given as follows:

Colonial, Imperial and Pearl Ware, 20-7½%.
Premier, Canada and Diamond Ware, 2½%.
White Ware, 40-10%.
Japanned Ware, regular, list plus 30%.
Japanned Ware, white, list plus 40%.
Stamped Ware, plain, list less 40-10%.
Stamped Ware, retinned, list less 40%.
Pieced Tinware, ordinary, list plus 40%.
Pieced Tinware, copper bottoms, list plus, 60%.
Galvanized Tubs and Pails, light, list plus 27½%.
Galvanized Tubs and Pails, heavy, list plus 17½%.

Wrench Prices Show a Slight Reduction

Winnipeg.

WRENCHES.—Prices on several lines of wrenches have been revised during the past week and show a slight reduction on the local market due to competition; however no change has been recorded by manufacturers and prices quoted may be revised to higher levels in the near future. The lines affected include knife handle, agricultural, hawkeye, and Stillson wrenches, which are selling today at the following figures:

Knife Handle Wrenches, 6 in., $12.00; 8 in., $14.40; 10 in., $16.80; 12 in., $21.60; 15 in., $28.80; 18 in., $38.40; 21 in., $46.80 dozen.
Agricultural—6 in., $7.00; 8 in., $8.40; 10 in., $9.80; 12 in., $12.60.
Hawkeye Wrenches—$6.25 dozen.
Stillson Pipe Wrenches—6 in., $1.00; 8 in., $1.15; 10 in., $1.25; 14 in., $1.75; 18 in., $2.50; 24 in., $3.65; 36 in., $6.75 each.

Soldering Coppers Are Down Two Cents

Winnipeg.

SOLDERING COPPER. — Continued reductions on the price of copper is again reflected in the price of soldering coppers, which show a reduction of 2c per pound during the week and are now selling at 46c base, making the net prices on the different sizes as follows: ¾ lb. per pair, 53c per pound; 1 lb. 52c; 1½ lb., 49c; 2 lb., 48c; 2½ lb. 47c; 3 lbs. and over per pair, 46c per pound.

Oils and Gasoline Slightly Reduced

Winnipeg.

OILS AND GASOLINE.—Prices on oils and gasoline which have been holding firm for the past six months show slight reductions on some lines in price lists just issued by manufacturers. To-day's ruling prices on a few of the more familiar lines are given as follows and are for full barrel lots:

Buffaloite, 25c; Ideal Thresher, 50c; B Castor Machine, 41c; Buffalo Engine Gasoline, 37½c; Buffalo A Gas Engine Oil, 55c; Royal Gasoline, 37c; Family Safety Coal Oil, 25½c; Summer Black Oil, 24½c; Kelso Engine Oil, 60c; Electro Dynamo Oil, 45c; Standard Gas Engine Oil, 45½c; Atlantic Red Engine Oil, 39c; Solar Red Engine Oil, 40c; Renown Engine Oil, 47c; Kearsarge Engine Oil, 43c; Prairie Harvester Oil, heavy, 63c; Prairie Harvester Oil, light, 53c; Granite Harvester Oil, 50½c; Eldorado Caster Machine Oil, 43½c; Winter Black Oil, 25½c; Summer Black Oil, 24½c gallon.

Game Trap Prices Still Holding Firm

Winnipeg.

GAME TRAPS.—Prices on game traps which were reduced on February 1 still hold firm, and no further reductions are to be expected for the coming season. Booking orders are now being solicited by Winnipeg jobbers for fall shipment at to-day's ruling prices, which are confirmed as follows:

Game Traps, Victor—No. 0, $1.95; No. 1, $2.30; No. 1½, $3.45; No. 2, $4.80; No. 3, $6.75; No. 4, $8.10; No. 91, $3.20; No. 91½, $4.55 doz. H. & N.—No. 0, $3.05; No. 1, $3.60; No. 1½, $5.40; No. 2, $7.50; No. 3, $10.00; No. 4, $11.80 doz.
Oneida Jump—No. 1, $3.10; No. 1½, $4.55; No. 2, $6.78; No. 3, $8.90; No. 4, $10.45 doz. Newhouse—No. 1, $5.20; No. 1½, $7.80; No. 2, $11.55; No. 2½, $18.15; No. 3, $15.40; No. 4, $18.15; No. 4½, $45.65; No. 50, $97.95; No. 5, $135.35 doz.

Linseed Oil and Turps Unchanged

Winnipeg.

LINSEED OIL.—Linseed oil prices show no change on the local market during the past week, holding firm at $1.85 per gallon for raw oil and $1.88 for boiled oil, while the demand is reported about normal. Turpentine prices are reported firm at former quotations which have held for the past two months, and no immediate change is anticipated. To-day's ruling prices are confirmed as follows: Barrel lots, $1.25 per gallon; ½ barrels, $1.28; 5 gal. lots, $1.30; 1 gal. lots, $1.30, plus the usual extras for containers.

Wrought Iron Washers May Be Lower Soon

Winnipeg.

WROUGHT IRON. — Prices on wrought iron washers still hold firm at prices established last October. However, recent reports from manufacturers indicate that a slight reduction may be expected. Prices in the meantime are as follows:

Wrought Iron Washers. Size of hole, ¼ in., $19.65; 5-16 in., $17.25; ⅜ in., $15.20; 7-16 in., $15.00; ½ in., $14.05; 9-16 in., $13.55; ⅝ in., $13.40; 11-16 in., $13.25; 13-16 in., $13.15; 15-16 in., $13.00; 1 1-16 in., $13.00; 1¼ in., $13.00; 1⅜ in., $13.25; 1⅝ in., $13.25; 2⅛ in., $13.65 per 100 lbs. For less than cases add 50c per 100 lbs.

Coil and Log Chain May Go Higher Soon

Winnipeg.

COIL AND LOG CHAIN.—Prices on coil and log chain hold very firm on the local market, while the demand is reported to be good. Reports from some quarters seem inclined to look for still higher prices on these lines. Prices to-day on the different sizes are given herewith:

Coil Chain—3-16 in., $19.20; ¼ in., $16.25; 5-16 in., $13.75; ⅜ in., $12.75; 7-16 in., $12.35; ½ in., $12.25; 9-16 in., $12.25; ⅝ in., $12.00; ¾ in., $11.65; ⅞ in., $11.40; 1 in., $11.40 per 100 lbs.
Log Chains—¼ in., $18.05; 5-16 in., $15.55; ⅜ in., $14.55; 7-16 in., $14.15; ½ in., $14.05 per 100 lbs.

BUSINESS CHANGES

Quebec City.—Gosselin and Belanger, hardware, have dissolved partnership.

Frank Criticism of Steel Prices

Not Sufficiently Reduced to Make Investments Safe is One View—Will Fail to Create Big, Broad Market Necessary to Stimulating All Industry is New York Opinion

MANY American trade journals and newspapers are remarkably outspoken and frank in their criticism of the steel magnates in making a reduction in prices which the press regards as insufficient and not in the best interests of business. The following are fair samples of the attitude being taken by the press on the steel situation:

"What has occurred in the matter of iron and steel price fixing is very remarkable in many respects," says the "American Metal Market." It was both surprising and astonishing.

"The producers made much reference to their 'costs' and yet when the prices were announced, tin plates and structural shapes were cut by the same amount, $7 per net ton. Galvanized sheets and merchant bars were cut by the same amount, $7 per net ton. Rods were put at $13.50 above billets, when the War Industries Board had them at $9.50 above and the ten-year pre-war average had them at $6.11 above.

Board's Attitude

"The Industrial Board had made much reference to the re-establishment of open market conditions, and of reinstating the law of supply and demand, but when it announced the reductions it said, 'The public should not expect to buy' below the reduced prices 'during the current year.'

"A great many steel producers had strongly expressed the opinion that at this time there should either be a large reduction in steel prices, one that would command the interest of the long range buyer, or there should be no reductions at all. Yet the reductions, according to our composite finished steel, average $6.70 per net ton or 9.4 per cent. The precise action was taken that had been quite generally condemned, when it was said there should be a large reduction or none.

The Interests

"Hardly less remarkable than what occurred is the attitude of various interests connected with this operation. For instance, there is the attitude of certain of the producers whose representations to Washington were made in the spirit that Washington 'simply must take into consideration' this or that argument. There were certain pig iron producers, for instance, who insisted that Washington must recognize certain basings. These should reflect that the war is over. During the war Washington made the prices and controlled the buying. Now it is the buyer who controls the buying. The receipts of a blast furnace are the tonnage multiplied by the price. The price alone does not fix the receipts. The war is over. These furnacemen need to re-establish contact with their customers.

All Have Duty

"Again, there is the attitude that it is the duty of a great many people, if not everybody, to seek by all means to encourage people to buy. It is quite true that we all have our duties. The trade paper, for example, has a duty, to inform its readers. It is not the duty of a trade paper to misinform or mislead its readers, to color its reports, for instance, so as to convey the impression that prices are not going to decline when the probability is that they will. There may be those who are performing a legitimate public service if they induce a buyer to make a purchase when it would have been to the buyer's advantage not to make the purchase. The responsible trade paper does not stand in that class, however. Its responsibility is to its readers.

Should be Larger

"We will not knowingly devote one agate line of space to any statement that would tend to induce a reader to make a purchase he would afterwards regret having made. We will continue to reflect the best business judgment of our writers. This judgment just now is that steel prices have not been reduced enough to make permanent investments safe, though material needed in the near future should be bought, and bought as quickly as possible. Finished steel prices are now 81 per cent. above the 10-year pre-war average. Twelve days ago copper was 4 per cent. below its pre-war average, and since then it has been advancing."

Says Too High

The "New York Sun" criticizes the new steel prices as being too high, and says that they will fail to create a big, broad, national market which would drive the steel industry at full speed and give momentum to general industry. The "Sun's" article is as follows:

"Steel producers have fixed prices for the rest of this year to the satisfaction of themselves, the Department of Commerce Industrial Board and the Attorney-General of the United States. The Department of Justice will not prosecute the producers for their price fixing agreement. The Industrial Board will recommend the new schedules to consumers as 'fair' prices. The price fixing producers will try to sell their product.

"So far, so good. But unless the producers have fixed the price to the satisfaction of consumers they will not sell their steel.

Normal Business

"The business that is ahead of American industry is normal business. Either it must be done on something like a normal basis or it will not be done at all, price fixing agreements or no agreements, 'fair' prices or not, the Attorney-General concurring with the producers or the Attorney-General trying to send the price fixers to jail.

"And the hard cold fact about the new steel prices is that they still are some 80 per cent. higher than the 10-year average before the war. To argue that a steel condition like this is normal, that is within spyglass distance of normal, anybody would need to be prepared to argue that all war prices and all war conditions are within a shade of being normal as a permanent national institution for the rest of time.

Must Suit Buyers

"When buyers are clamoring for products the producers can make prices to suit themselves. When producers are clamoring for business they must sell to suit the buyers. The successful merchant, when his business or any part of his stock comes to a standstill never hesitates to get it moving again by such deep cutting of his prices that buyers will not only come but come on the run to his market. Then, when his business is in full swing again he works out a readjustment on a new basis—a basis of a living thing, not a dead thing. Manufacturers caught in the same predicament must do the same thing. If they don't they must die of dry rot.

Copper Was Slashed

"The copper producers, with their business stopped dead short, knew they must find a market at any hazard. They did not find it, they did not try to find it, just a shade below the high level of war prices. They slashed and slashed until they were actually two cents below the pre-war average of several years. Consumers needing copper were eager to buy it on that basis because they knew that it could be used profitably at once. They were eager to buy it for future use because they knew that on that basis they could use it profitably at any time—because they knew that the very use of copper in growing volume would send the price sooner or later much higher.

Not Profitable

"In peace times, striving to start up peace business, steel will not be bought that cannot be used at a profit. At only a little lower than war prices the building trades cannot use steel at a profit. The railroads cannot. The manufacturers of farm implements cannot. The makers of machinery for textile mills, for mines, for general productive industry cannot. Nobody but the man in a desperate emergency can use steel now on anything like a war basis. That sort of consumption will not be for the next year, or for the next two years, a drop in the bucket.

"The steel price fixing way up in war cloud heights at such a time as this isn't good enough economics, isn't good enough business to find a market—a big, broad, national market which would drive the particular steel industry at full speed, give momentum to general industry from sea to sea, pack payrolls, swell business and send the country bounding along the old glad road of prosperity."

Bankers Know the Value of Paint

Strong Arguments to Use in Extending Business Among the Farmers—Typical Cases Outlined Showing How Man Who Used Paint Won Out.

"HIGH finance and paint" yelled Jim Cooper at his young partner, "how in blazes do you expect you're going to get those two things to mix and increase your paint sales? Don't you know, sonny, that oil and water never were on good terms with each other?"

"Well, they're going to be, some considerable," replied the junior partner of the Cooper & Coates Hardware Company.

"How do you figure it out?" came back the senior partner.

"When a bank or trust company begin to nose into your business you can reckon on either one of two things—either they're getting a case of nerves over you or they're mighty curious about your surplus cash," observed Coates.

"Well, anything the matter with our bookkeeping? Ain't we sound as a drum?" broke in the old man anxiously and in perplexity.

On Sound Basis

"Sure, we're sound; never better in our lives since we cut out all this credit business," laughed Coates, holding the old man in puzzled suspense, "but that isn't the drift of my argument. The banks and loan companies are headed to get mixed up with the paint business from a different angle. Fact of the matter I never saw it myself till yesterday, when I was cleaning out a lot of those farmers' notes at the bank."

"If you didn't see it coming till yesterday, how can I tell what's in the wind. Are the banks working up some new war scheme finance to clamp on us?" questioned the uneasy and doubtful senior partner impatiently.

"Wrong again, Uncle," laughed Coates. "It's something that can be made to come our way if we go after it right. It's an angle from which the money foundries look at property conditions, and it makes an opening for us to be of real service to the farm community—and you know, if it wasn't for our farm business we could shut up shop here and shift for other browse."

"I don't see it yet," answered the old man with easier mind; "however, shoot away and get it off your system."

Upwards of two-thirds of the Hardware and Paint trade in Canada is either totally dependent or indirectly dependent on and in contact with the farm trade. The viewpoints expressed by this banker represent the viewpoints of all bankers who come in contact with the farming community, and suggest a wide open opportunity for extending the service of your Paint Department. What are you doing in this direction? Are you letting this opportunity go by the board or are you going after it? It's a chance for your Paint Department that's well worth thinking over.

Talking of Paint

"After I had finished up with that paper in the bank I was sitting in the front office with Arthur Saunders, talking over things in general. Somehow or other our conversation veered round to paint. Saunders seemed to take a pretty likely interest in that end of the business.

"I was like you. It took me a little while to find out just which way he was heading. Looking out the window Saunders pointed out Smith, who owns a farm back on the second concession, and Andy Watkins who lives on the cross road two miles east of here.

"'Know those two men out there?' he asked. I told him that they came into the store frequently. 'Ever sell them paint?' he continued. Don't know as I remember ever selling Watkins any, but Smith buys quite often. Why do you ask? It was my turn to get curious.

Interesting Sequel

"'I thought so' he reflected; 'did it ever occur to you the accounts of those two men in our books might disclose an interesting sequel to their accounts with you?'

"I didn't see the connection, and told him so," observed Coates to his curious senior partner; then he gave me the history of the two cases.

"It seems, as you and I both know, that both of these men took up their farms about the same time ten years ago. Both farms are about the same size and about the same distance from town. Both were well drained, have about the same soil, and are well adapted to mixed farming. Both men had their troubles in getting started, and, so far as hard work is concerned neither one has much on the other; both worked hard. Like a lot of others about here, they came to Saunders for money, offering their property as security on their notes. Saunders went out to see both places before he placed his recommendation with the head office.

Different Cases

"'You would have thought,' said Saunders, 'that both men stood an equal chance in obtaining the amount they wanted, which was about the same, but they didn't, nor could I recommend it. Even though he was up against it, more or less, Smith had somehow or other always managed to keep his house, barn, and stock sheds painted and in good repair. The well-kept condition of his buildings and farm impressed me at once. I had no hesitation in making a recommendation for the full amount asked, and our loan inspector backed me up fully.

"'But as I say, it was different with Watkins. The run-down condition of his buildings and the general untidiness of the place forced me to make a cut in my recommendation of his loan. Even at that I had a hard time getting our inspector to pass the amount I had recommended. His report observed that both Watkins' house and barn had been neglected in the matter of paint, and that all were in a poor state of preservation.

A Good Indication

"Naturally their accounts led me into taking an interest in the affairs of each, and I soon came to the conclusion that as a man is so are his buildings, his farm, and the general conduct of his business affairs.

"'It didn't take long for me to observe that the condition of the affairs

Tile-Like Finish

The persistent demand for an ideal Finish is satisfactorily met by *Tile-Like*. For use on hard or soft wood floors, old furniture, wicker furniture, porch chairs, linoleum or oil cloth, etc.

Tile-Like is the greatest renovator of old furniture, you can sell in your store. Makes everything look like new. Spring time is the logical time to sell it.

For beautiful effects and great durable wearing qualities recommend *Tile-Like*. It's sold at a reasonable price and there are splendid profits in it for the dealer.

Write to-day for our agency proposition. It will put you in touch with a line of Paint and Varnish products that are being recognized by the public as the **"best money value"** on the Canadian market to-day.

Benjamin Moore & Co., Ltd.
West Toronto
Ontario

of the two men diverged widely on this very point. Smith, I noticed, maintained the same scrupulous care in the upkeep of his buildings and farm, while Watkins continued on in his slovenly methods. Four years ago Smith paid off the full amount of his last maturing note with interest. If he were to come back to me to-morrow for money I wouldn't hesitate a minute in recommending twice the amount he asked for ten years ago.

"'Now, as you know, Smith has kept up his use of paint, and it would scarcely be necessary to take into account any deterioration that has taken place between that time and now.

Wanted a Renewal

"'With Watkins it was a different story,' continued Saunders. 'Just before you came in here he was asking me to renew his note. I had to be pretty frank and tell him that our risk on his loan was becoming greater, and so it is; his house is a disgrace, and getting worse. I'm afraid that it won't be long before I'll have to tighten the screws on him. I didn't set out to boost your paint department, but I did take the trouble to point out that if he had invested a little of his loan in paint and made some endeavor to keep his property in a neat and tidy condition, he would stand a far better chance for consideration on our part.'"

Coates hesitated in his recital of Saunders' conversation to observe that the significance of his early remarks were being impressed on his senior partner with considerable force.

Often Consulted

"Another thing that Saunders said contained a whole lot more of financial truth than poetry. 'You know,' he said, 'that bankers are very often consulted by selling agents, farmers and others about the purchasing of farms. Now suppose that these two farms had been up for sale, which one do you think I would recommend, and even suppose that there were buyers for both, which one would draw the higher price? Smith's, of course, would get the preference in both instances. Looking at it purely from a banker's standpoint Smith's farm would decidedly be in a better financial condition to sell. I don't say that the mere fact that farm property is well painted will make it a good financial risk, but it is a pretty good gauge by which to judge of the care taken of a farm. A farmer who is farsighted enough to protect his buildings with paint is pretty well sure to protect the fertility of his soil and the welfare of his stock and crops.'

Are Typical Cases

"I asked Saunders if he found that these two cases were typical of general conditions" added Coates.

"'Pretty much so,' he replied. 'You will generally find that the individual who is slovenly about himself and his farm methods takes no interest in the repairs or condition of his buildings, and vice versa. The man who keeps or endeavors to keep his place in good repair, and under a good coat of paint can claim a great deal more consideration than those who permit their property to run down and decay. I believe that the insurance companies take pretty much the same attitude towards all forms of property. A friend of mine told me that during his twenty-five years' of experience as Jury Commissioner he never permitted himself the mistake of not selecting a person who keeps his property well painted and in good repair, for the simple reason that such persons show more character and judgment.

Better Conditions

"'Good roads and good paint' said Saunders 'go a long way towards promoting better farming conditions. Paint suggests cleaning up generally, and when protection is the motive for painting you can rest pretty well assured that such a farmer is taking care of his other assets in equally good manner.'

"Mr. Saunders," I remarked, "you seem pretty confident that the selling of paint to the farmer is of definite economical benefit to him."

"'Most decidedly I am,' retorted Saunders. 'While there is a feeling of community or civic pride that promotes a greater use of paint in towns, the farmer in his isolation is not brought under its influence, and this tends to make him lex in this direction. I have no hesitation in stating that you paint dealers would bestow a decided service to farmers if you would impress upon them more forcibly the necessity of more paint.

A Real Service

"'Indirectly you would confer an immeasurable service upon those entrusted with conducting the farmers' financial affairs. The same thing would apply in connection with town property as well. It may surprise you to know that already the bankers have contributed some interesting statistics on this question. We have found that while approximately 43 per cent. of the buildings in cities are not properly painted with sufficient frequency to keep them in first-class condition, upwards of 63 per cent. of farm buildings of al classes are suffering from the same cause. Take barns alone. I don't suppose over 4 per cent. of our barns and stock sheds in Canada have ever received a coat of paint. While I admit my ignorance on advertising and paint selling as well I have often felt that somehow or other the paint manufacturers and retailers of Canada were overlooking a grand opportunity for the development of their trade in farming communities.'

"Now Uncle," exclaimed Coates to the senior partner, "I don't know that I can argue out a case for mixing paint in with the financiers much better than Saunders has. Of course I didn't know before that these bank fellows were taking any stock in what paint would do. While they're looking at farm development from a cold dollars and cents standpoint it's up to us to confer a benefit on the farming community by promoting more paint sales amongst them. I'm quite well aware that it's a tight squeeze to get between the farmer and his dollar, but it can be done if we can prove that it will jingle a couple more dollars in his pocket afterwards.

"Saunders, in his conversation, provided me with a whole lot of good advertising talk that I never saw put up in paint ads. before. What I like about it is this: that we can give actual service to our farm trade through our paint department. A farmer, or anyone else for that matter, doesn't have to write off a discount on his purchase of paint the minute he puts it in use like a lot of other articles. The minute he puts it in use it takes on a premium and adds a premium to the property on which it is applied."

"Now you're talking, sonny," broke in Cooper. "That's the sort of argument that gets the farmer. You sure can mix paint and finance if you go at it that way. I'm with you! Go as far as you like. We've always stood for rendering a better service in this store wherever we saw we could do so, and it's the same idea that's made our money for us. If our staid old bankers can see direct benefit from the use of more paint on the farm, I don't know as we can follow any more dependable bell-wether than they."

CHANCE IN SOUTH AFRICA FOR SMALL TOOL TRADE

Before the war Germany did an extensive trade with South Africa in small tools of all descriptions, say the "British and South African Export Gazette." This was particularly noticeable in the case of joiners' planes. A careful study had been made of the models chiefly in demand, and these were supplied at prices which made both English and American competition more than a little difficult.

One of the best selling German jack planes was made in red beech without irons, and was stocked in four widths and one length, viz., 14 inches, the pre-war prices for which ranged from $5.10 to $5.60 per dozen. With warranted single irons the advance was 10 per cent. for all widths. White beech planes of the same pattern were supplied with warranted double irons and sold at $9.35 to $10.10 per dozen. There was always a great demand for planes of this type. A standard jack plane, modelled after the English pattern, that was much used throughout South Africa, was 17 inches long, and stocked with or without irons in four widths. The pre-war prices per dozen without irons, were: 2-inch, $9.35; 2⅛-inch, $9.50; 2¼-inch, $9.75, and 2½-inch, $10.25. With the best quality double irons, brass nutted, the prices were $13.65, $13.85, $14.35 and $15.45.

Trying planes were an especially big export line from Germany. One type (the cheaper) was in 22-inch and 24-inch lengths, and in 2⅛-inch, 2¼-inch, and 2½-inch widths, and sold, without irons, at $11.30, $12.15 and $12.40 per dozen; and, with double irons, at $16.18, $16.80, and $17.25. Other planes formerly imported by South African hardware merchants in considerable numbers were smoothing planes, roughing planes (with round nose irons), thumb planes, planes for beads, hollows, rounds, or rabbets, molding planes, and large rabbet and bead planes.

Lowe Brothers Paints

Here is a quartette of business-getters for the live dealer

High Standard

THE brand of paint that has created more genuine good will for the dealer than any other. In the end it pays the merchant to sell the high quality line and a steadily increasing paint trade is his reward.

Mellotone

The finest of all flat wall paints whose beautiful colors are copied from the wildflowers. This is the paint that has proved a revelation to the home decorator and has done more to turn the casual paint buyer into a steady and enthusiastic customer than any other brand of paint on the market.

Vernicol Stains

Rich, lustrous, non-fading varnish stains, unequalled for refinishing chairs, tables, refrigerators and all household furniture; also for floors and woodwork, new or old. Sun-fast and light-fast. A great favorite with women who like to do the work themselves.

Hard Drying Floor Paint

The paint that will bring you the floor paint trade of your neighborhood. Of heavy body and great hiding power. Dries quickly with a fine, hard gloss. Will stand more than ordinary wear and tear.

Will Extend Industrial Training

Vocational Work Of The Invalided Soldiers' Commission To Help In Solving Needs Of Mercantile Establishments Of All Kinds—Groundwork For Comprehensive System Of Employment.

OTTAWA.—The industrial survey, introduced and developed in Canada by the Vocational Branch of the Invalided Soldiers' Commission, has proved of such service that it is being extended to industrial and mercantile establishments of all kinds. The idea has been developed in the following manner:

To discover, classify and systematize the possible openings for discharged disabled soldiers, the Director of the Vocational Branch, Mr. W. E. Segsworth, engaged the services of Mr. Gerald Boate, who has made extended and minute study of the industrial survey. Returned men of suitable experience and character were engaged and rapidly instructed in their duties. The work was begun in the autumn of 1917. The first survey was conducted in the Angus Shops of the Canadian Pacific Railway at Montreal, and what was done there will illustrate the general principle and operation of the survey.

Two Divisions

In October, 1917, permission was obtained from Mr. H. Osborne, Works Manager of the Angus Shops, to investigate that establishment. Between six and seven thousand workmen were employed there, the work falling into two broad divisions—the engine shops, and the car shops. In all, there are about 130 specific kinds of jobs regularly performed. It was the task of Mr. Boate, who was the surveyor, to find out the requirements of each job in respect of physical effort and mental capacity, and to state what kind or degree of physical disability did or did not unfit a worker for each kind of employment.

Four Sub-Classes

The electrical department of the engine shop was first visited. Here Mr. Boate found four sub-classes of work, as follows:

1. Motor and generator armature winding.
2. Inside electrical repairs.
3. Electric crane operators.
4. Outside electrical maintenance men.

A summary of the description of subclass Number One will illustrate the whole method.

Armature Winders

Several women had been employed for about nine months and had become very proficient. One man with a deformed spine was working there. The work is done sitting, and requires little muscular exertion, and is thus suited to many kinds of physical disability. The job consists of stripping motor and generator armatures ranging in size from one-eighth to 450 horsepower. One thousand motors between Halifax and Fort William are kept in repair by this department. Seventy-five per cent. of the following light bench work may be done sitting: coil winding, taping, soldering, connecting coil ends and assembling commutators and coils in the armature.

Should be Trained

There is such a variety of operations that training should be given where the work is done, or at least the final stages of training should be carried on in the shop. Five or six months is sufficient to make a workman efficient. The general work most closely related to this is lathe work and kinds of coil winding on lathes; outside lighting and motor winding in factories, power-houses, and car shops. Necessary experience is gained while working at repairs on various kinds of coils under instruction of the foreman. It is possible for those taking part of their retaining course at this shop to attend the C.P.R. apprentices school. Apprentices are allowed to attend school in the plant two hours a day twice a week during their apprenticeship.

The Conditions

It is necessary that a workman should be able to read, write, keep time cards, and be of average intelligence. In the opinion of the superintendent of the department, the retraining necessary covers arithmetic, science applied to electricity, making time-cards, handling and reading ammeters and voltmeters, familiarity with the sizes and makes of wire, and general shop practice. The surroundings are not favorable for those suffering from lung wounds or diseases. Good eyesight is necessary, but partial deafness will not disqualify. The worker must have good arms and hands with very supple fingers; but loss of or injury to other limbs does not interfere with his usefulness very much.

Given Training

The above is given as a typical analysis of the different jobs in the Angus Shops. The relation of physical disability to each specific job is determined. The physically handicapped discharged soldier is given the training to fit him for a given job and the job is chosen to suit his capacity.

The industrial survey, therefore, furnishes the groundwork for a very comprehensive scheme of employment. Already hundreds of industrial and mercantile concerns have been surveyed, and many hundreds of partially disabled men have been placed at suitable work.

The system of industrial retraining is applicable to more than the returned soldier. It will apply to that great and ever-growing army of industrial cripples from the railways, mines, factories and other industrial lines. The industrial survey, properly applied, will make it possible to lift the disabled from a condition of dependence to that of the self-respecting wage earner; and the Vocational Branch has blazed the path.

Hardware Merchants and the Returned Soldiers

R. H. CURLE, secretary Manitoba branch of the Retail Merchants' Association of Canada, Winnipeg, has been at work on a suggestion which was recently made that the hardware merchants take some stand in regard to policy they will follow to assist the returned soldier who may decide to settle on the land. The suggestion was to the effect that retail hardware merchants undertake to supply soldiers settling on the land with an initial order for tools, house furnishings and kindred lines at probably laid-down cost.

At the time this question came up the Dominion Board of Retail Merchants' Association was about to convene at Ottawa and Mr. Curle, the Winnipeg secretary, put it up to the Dominion Board for action, which would make movement Dominion-wide. His telegram to E. M. Trowern, Dominion, secretary, Ottawa, dated March 17, read as follows: "Have Dominion Board consider advisability of dealers supplying soldiers settling on hand with first order for hardware at a small per cent. added to laid down cost. Suggestions along this line have been made to this office. Executive think this proposal should be referred to Dominion body."

Mr. Curle states that he got in touch with retailers in large and small centres in reference to this proposal, and it was viewed with favor the attitude taken, being that every returned man should be encouraged in his return to civilian life and made to feel that the merchant was willing to help in every way possible.

It was felt that at military dispersal areas, the returned men proposing to go out on the land could be met and handed a letter to the member or members of the association in the town to which he would be going, and a better community spirit immediately be created.

Varnish Quality–plus

Ultimate economy in varnish buying is determined not only by quality, but by adaptability, as an unsuitable varnish may do as much harm as a poor one. Even the smallest consumers have learned that it costs much less to prevent varnish mistakes before applying than to rectify them afterwards.

For every possible use there is a specially adapted Berry Brothers' Finish that can be depended upon to produce the desired results.

Liquid Granite for floors and all interior work exposed to hard wear, Luxeberry White Enamel, Luxeberry Wood Finish, Luxeberry Wall-Finishes and Luxeberry Spar Varnish are a few of the many finishing products for which the demand is large and continuous owing to their long established record for uniform dependability.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, APRIL 3.—While there was a considerable movement of paints and kindred lines last week, the activity has temporarily lessened owing to a return of mid-winter weather, nearly two feet of snow having fallen over the week-end.

Linseed oil has found its level for the time being at least, and while there was a slight reaction for a day or two the market has again steadied and prices hold at the levels of last week. Turpentine is temporarily short in some quarters, but the price has held without change. Much depends upon the export demand of the immediate future. If sales are maintained, supplies here will not accumulate rapidly, and the basis may hold. Putty and white lead are steadily firm and the movement has been very satisfactory. General orders from the travellers on the road continue to be of a satisfactory volume, although spring movement is not yet at its best.

Linseed Oil Held On Last Advances

Montreal

LINSEED OIL.—After a slight reaction during the week linseed oil has again settled down to a more steady basis and quotations in this market are without change from those made in the previous report. There is a considerable demand for supplies, and this was better, while the weather conditions promised an early return of spring. The future is materially dependent upon the Argentine situation, and the state of transportation from there. As it now is, spot supplies are none too ample and seed in sight on the North American continent is said to be short of normal requirements.

	Imp. Gal.	
Raw—		
1 to 4 bbls.	$1 66	$1 67½
5 to 9 bbls.	1 65	1 67½
10 to 25 bbls.	1 64	1 67½
Boiled—	Imp. Gal.	
1 to 4 bbls.	1 68½	1 70
5 to 9 bbls.	1 67½	1 70
10 to 25 bbls.	1 66½	1 70

Turpentine Scarce But No Higher

Montreal

TURPENTINE.—Some of the jobbers have been temporarily short of turpentine, and there is therefore a tendency to hold what stocks there are at full prices. No advances have been registered and with an improved delivery from the producing points of the South prices will tend to be fair and advances looked for recently may not come. Much depends, however, upon the export situation. Demand has improved from overseas and this may prove a larger market even than was anticipated. This being the case, prices would not tend downward, and the shipping situation in the immediate future will prove a determining factor from a price standpoint, it is expected. Sales are moderately active.

		Imp. Gal.
Turpentine—		
1 to 4 barrels	$....	$1 05
Small lots	....	1 16

(Packages extra).

No Weakness in Putty Markets

Montreal

PUTTY. — That putty should be steadily firm is attributable to the cost of both linseed oil and whiting. No advances have been made and it is just as likely that no declines will come while commodities remain high. The movement is very satisfactory and there are evidences of dealers throughout the country getting stocks in shape early this season.

Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Per 100 lbs.

Terms—2%, 15 days, net 60.

Firm and Active is White Lead in Oil

Montreal

WHITE LEAD IN OIL.—With a steadied market for pig lead and with linseed oil on its present basis, the market holds steadily firm. Large tonnage is going forward in the aggregate to dealers throughout the country and the basis is held without change for all grades. Standard grade is priced as follows: Five ton lots, per 100 lbs., $15.50; ton lots, $16, and smaller lots, $16.35.

Mixed Paint Outlook Very Encouraging

Montreal.

MIXED PAINTS.—In a general way the paint manufacturers are very busy and are looking for a record season. Of their own accord, travellers are sending in encouraging reports as to the business which they expect to develop. With orders already in hand, and with the need for paint placed before the general public everywhere in the campaign soon to be started, 1919 should really prove to be a banner one for the paint trade.

TORONTO

TORONTO, APRIL 3.—Turpentine prices show another slight advance this week and there are prospects that it may even go a little higher. Reports from the South indicate that the market will be very firm for some time. This week's quotations are two cents in advance of those of last week.

Linseed oil remains firm, but there are indications that a fluctuating market is likely to prevail. Lower prices are looked for in some quarters, especially as there are rumors that British firms are prepared to quote at from seven to eight cents lower than the present figures on large lots. A fair volume of business is being handled.

Linseed Oil Prices May Fluctuate Soon

Toronto.

LINSEED OIL.—While prices as yet have shown no change, and in many instances a tendency to be firm, a fluctuating market is expected. A fairly good volume of business is being handled. Lower prices are looked for by some firms, but it is not expected there will be any sharp reduction, although there are reports that British firms are prepared to quote at from seven to eight cents below the present figures in large lots. The quotations in effect at present are:

	Raw	Boiled
Linseed Oil—		
1 to 2 barrels, gal.	$1 72	$1 80
3 to 5 barrels, gal.	1 71	1 79
10 bbls. and over	1 69	1 77
	Imp. gal.	
1 to 2 barrels, gal.	$1 69	$1 83
3 to 5 barrels, gal.	1 68	1 82
10 barrels and over	1 66	1 80

Prices shown are those ruling on Thursday of current week and subject to daily fluctuations of the market.

White Lead in Oil Remaining Steady

Toronto.

WHITE LEAD IN OIL.—Business is reported as very fair. No changes are made in the quotations, which are as follows:

GOLD MEDAL VARNISH

A General Purpose Varnish

Your customers have often asked for a varnish that will do for doors, furniture, floors, etc.. The best general purpose varnish is Gold Medal. It possesses all the good qualities of both an inside and outside varnish. It will protect any surface with a most durable coating.

Gold Medal Varnish is a B-H product, with the B-H reputation behind it, and like other B-H products sells readily and profitably.

If there is no B-H Dealer in your town, there's a most attractive agency proposition waiting for you. A post-card will place you under no obligation. Ask us for particulars.

BRANDRAM-HENDERSON LIMITED

MONTREAL HALIFAX ST. JOHN TORONTO WINNIPEG
MEDICINE HAT CALGARY EDMONTON VANCOUVER

Pure lead in oil, $15.80 per hundred pounds in 5-ton lots; $16.30 per hundred pounds in ton lots, and $16.65 per hundred pounds in less than ton lots. The various brands are shown in the current market quotations.

Increasing Activity in Mixed Paint Trade

Toronto.

MIXED PAINTS.—Repeat orders continue to come in steadily and a nice volume of business is being handled. No changes have been made in any of the quotations.

Two-cent Advance in Price of Turpentine

Toronto.

TURPENTINE.—A two cent advance in turpentine quotations has been made with prospects for a very firm market and slight further advances. Dealers are now asking $1.12 per gallon by the barrel. There continues to be difficulty in arranging for through shipments from the South and conditions there are such as to warrant the opinion that a very firm market may be expected for some time. Quotations are as follows:

Turpentine—	Imp. Gal.
1 barrel (barrel included)	$1 10
2 to 4 barrels (barrel included)	1 09
5 gallon lots	1.20

No Changes Made in Glass and Putty

Toronto.

GLASS, PUTTY.—There is little change in the business situation as far as window glass is concerned and only limited orders are coming in. Quotations show no change. The discounts are shown in the current quotations.

Putty prices are unchanged.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices.

ONTARIO HOUSING ACT

Continued from page 54

poration under the provisions of sub-section 3 of section 20 of the Act as collateral security for the payment of the loan shall be serial debentures, that is to say, debentures payable in equal annual instalments of principal and interest, as provided for in sub-section 4 of section 288 of "The Municipal Act." Such debentures shall be deposited with the Treasurer of Ontario before the final payment on the loan is made to the corporation by the province.

LOANS TO FARMERS

Application for Loan

12. Where a farmer, resident in a municipality which has not come under the provisions of the Act, desires to obtain a loan under the provisions of section 13 of the Act, he shall make application in writing therefor to the director.

Parcel of Land to be Set Aside

13. A farmer applying for a loan, either to the director or a Commission, shall designate and set aside a piece or parcel of good agricultural land not less than one acre in extent, immediately adjacent to the proposed dwelling house, for the use of the occupant of such dwelling house.

Plans, Specifications and Estimates

14. Plans, specifications and an estimate of the cost of construction, in triplicate, together with a description of the piece or parcel of land to be so designated and set aside and sufficient to identify same, shall be submitted for approval as provided for in clause 1 of these regulations. Provided, however, that where the application for a loan is made to the director the plans, specifications and estimate of cost will only be required to be in duplicate.

Mortgage to be Given to Secure Loan

15. A farmer obtaining a loan shall give a first mortgage on the whole of his farm to the Commission or the Lieutenant-Governor in Council, as the case may be, as security for the loan; provided, however, that with the approval of the director, such mortgage may be given upon part only of the farm; and provided further that, with the like aproval, a second mortgage may be given upon the whole farm.

Terms of Mortgage

16. The form of such mortgage shall be approved by the director, and shall provide, amongst other things, for—

(a) Payment of an amount in each month estimated by the director as sufficient to pay the purchase money with interest thereon at the rate of 5 per cent. per annum at the end of twenty years from the date of the mortgage.

(b) Payment of interest on arrears at the rate of 5 per cent. per annum.

(c) Payment at the option of the farmer of the whole or any part of the loan at any time during the term of the mortgage.

(d) Right of the farmer before default and with the consent of the Commission or of the director to sell and convey the property covered by the mortgage, subject to the mortgage.

And the mortgage shall contain covenants by the farmer to keep the house in repair and to pay taxes and other rates and insurance.

Forms of Mortgage

17. The Director will cause to be printed and sent to any Commission on request of a sufficient number of blank forms of mortgage for its use.

Remittance of Moneys to Province on Account Loan

18. Repayments on account of a loan made to a farmer by the Lieutenant-Governor in Council must be made monthly by Post Office order, express money order or certified bank cheques payable to the treasurer of Ontario and forwarded to the director.

J. A. ELLIS,
Director of the Bureau of Municipal Affairs.

Trade Inquiries

Continued from page 67

605. **Trunk mounting.**—A Glasgow firm would like to receive offers of the above with a view to business as soon as conditions permit. Specifications may be obtained from the Commercial Intelligence Branch, Department of Trade and Commerce, Ottawa.

Have You Secured Your C·C·M Bicycle Agency?

The Bicycle selling season is already opening up in fine shape. All signs point to a very brisk demand for bicycles during the next few months.

C. C. M. NAMEPLATES

"Gendron" "Massey" "Ivanhoe" "Cleveland"

"Columbia" "Perfect" "Brantford Red Bird"

As usual, C.C.M. dealers will have a distinct advantage. The high quality of these "90% Made-in-Canada" machines and their wide popularity makes them unusually easy to sell. The satisfaction they give helps to build up a permanent, steadily increasing business. The heavy advertising of C.C.M. Bicycles this season in the street cars and newspapers all over Canada will be of great assistance to all C.C.M. Dealers.

Why not secure your share of this business?

For prices and full particulars, write to Head Office or nearest Branch.

CANADA CYCLE & MOTOR CO. LIMITED

The Best Costs No More

Cheap Varnishes are the most expensive.
They are liable to crack and peel and blister.
They are a very poor investment.

Dougall Varnish Lasts Longest

and besides it covers far more per gallon than other varnishes. It is the best proposition from every standpoint. It costs less in the long run to buy Dougall Varnish in the first place.

Liberal discounts to the dealer—write for them.

The Dougall Varnish Co., Ltd., Montreal

A Paint that Satisfies!

Stephens'
REGISTERED TRADE MARK

When you hand a can of paint over your counter, what are you selling your customer?

Is it just paint—a fluid which colors a surface? If that is all you can honestly give him for his money, it's high time you were linking up with a *Stephens' Agency.*

Every *Stephens' Agency* sells with every *Stephens' can of Paint or Varnish* a product that he is proud to recommend to his customer.

He knows — that the Stephens' organization is back of every sale. An organization that has a reputation for good paint.

He knows — that the high standard set for Stephens' Paints and Varnishes is there in every can.

He knows—that his customer will be thoroughly satisfied.

STOP THAT
GUESSWORK

There is only one way whereby you can be sure —take a Stephens' Agency.

Write to-day for our proposition.

TRADE PENBERTHY MARK

TRADE PENBERTHY MARK

AUTOMATIC CELLAR DRAINER

SIMPLE COMPACT ECONOMICAL

Advantages Over Other Makes

1. The float is built around the suction pipe. Prevents trouble common in loose float types.
2. All parts, except strainer, are brass, and except the float, are above water—no slime or corrosion.
3. A foot valve in the strainer seals the suction pipe when the drainer stops working, holding the water in all the pipes, so that it is always primed ready to start instantly. It also prevents flooding of cellar if for any reason the water pressure is insufficient to operate the ejector.
4. It takes up not over half the space, thus effecting a saving both in amount of space used and cost of construction.
5. The operating valves open and close instantly by action of the water pressure.
6. No leather washers used, leather dries and causes leaks.
7. It costs less than many other drainers not as efficient.

Note the compact arrangement of this drainer. It is only necessary to construct a small sump or pit, effecting both a saving of amount of space and extra expense in cost of construction of pit.
It keeps cellars and basements clean and sanitary.

Manufactured by

PENBERTHY INJECTOR COMPANY, LIMITED, WINDSOR, ONTARIO

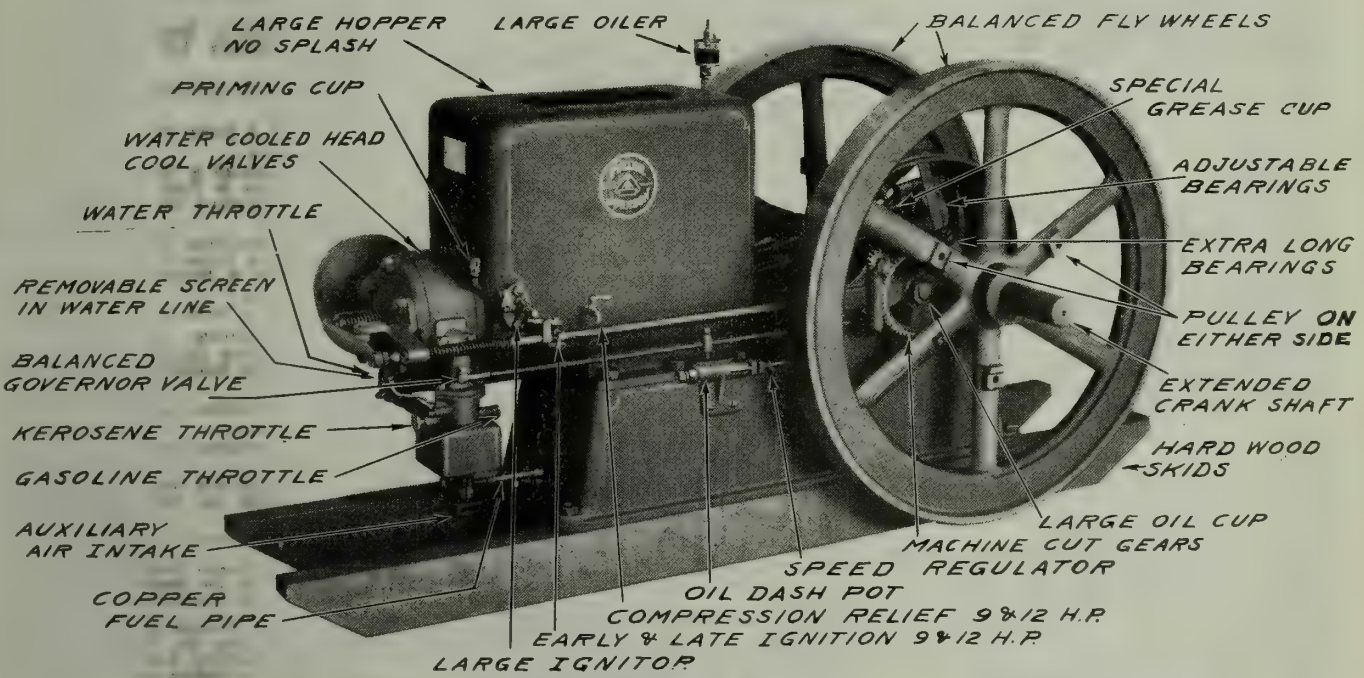
DIAMOND A BRAND — ASHDOWN'S GUARANTEE



The Largest Wholesale Hardware Dealers in Canada

FULLER & JOHNSON

MODEL "K" THROTTLING GOVERNOR

KEROSENE OIL ENGINES

All sizes, 3 to 25 H.P., Stationary and Portable

DEPENDABLE—QUALITY CONSTRUCTION—GUARANTEED

Fuller and Johnson Model "K" Throttling Governor Kerosene Engines embody all the latest improvements and developments in internal combustion engines. They are of the horizontal, hopper cooled, throttling governor type, regularly equipped with low tension, built-in magneto, and operate on the reliable 4-cycle principle.

NEVER MISSES AN EXPLOSION

RUNS SMOOTHLY and EVENLY under light load, full load or varying loads, with the fuel always used in proportion to the load.

MORE POWER, GALLON FOR GALLON, than you get in other engines from high-priced gasoline.

A PLEASURE TO HEAR IT RUN

SIMMS SET IN RUBBER

BRUSHES
GUARANTEED
FOR USE IN ANYTHING

Soaked in paint remover or boiled in water, the setting composition in these brushes remains as solid as concrete.

Try this test on some of the OTHER kinds.

Why sell your customer CEMENT-SET brushes or those set in some imaginary SECRET COMPOSITION that won't stand use in alcohol, spirit varnishes, lacquers, paraffine, crude oil, grease, paint removers and a dozen other things, or

A GLUE-SET brush that cannot be used in water, kalsomine, paste, glue sizing, etc., and dries out if carried on the shelves over the season?
Why not sell him a

SIMMS
SET IN RUBBER

Brush and tell him to use it in any old thing? He can drive nails with it if he wants to; he can't harm the setting.

Samples and Prices through our jobbers on request.

TINKER TOM'S TALKS.

Talk No. One Hundred and Ninty-two

Maple Syrup at one dollar a gallon advance over last year and "PREMIER" GALVANIZED STEEL SHEETS at $50 per ton less—Lo, the poor farmer! He can't even blame it on "RAW MATERIAL."

TINKER TOM.

Look for Talk No. 193 next week.

SELLING SPARK PLUGS INTELLIGENTLY

MEHASCO

ANOTHER MEHASCO MESSAGE 29

With every 100 lot assortment we give a display stand which shows the proper plug for every make of car. Your customer can pick out the plug he wants and order by name, which makes selling easier for you and more satisfactory for him. We handle the celebrated Rex Plug—absolutely guaranteed—as well as all the other ready sellers, including the Mica Tractor Plug in all sizes.

EASYON TIRE CHAINS

The only chains an autoist can slip on the wheels when alone and stuck. Put up eight chains in a set, four, for each rear wheel. Handy little friends to motorists and real, active sellers.

Merchants Hardware Specialties Limited
CALGARY

CARTER'S

The Best Quality of Genuine Dry Red Lead and Genuine Dry Powdered Litharge

Paper manufacturers want a Red Lead to protect their steam and water pipes, and a Litharge to reline their digesters. Rubber and Color Makers need them. Shipbuilding firms must have them. Railways and Ironworks use them. Are you ready to supply the requirements of such firms in your district. Also

YOUR PAINTER

must have Genuine Red Lead and Litharge to meet his requirements. Do not delay in putting in a stock or you will lose good business which is rightly yours.

TRADE MARBLE'S MARK New Trout Knife

This latest addition to the Marble Line is designed expressly for dressing speckled trout and other fish. Forged from finest cutlery steel. Handle is ⅛-in. thick and terminates in a 1-in. ring through which the little finger is inserted about half its length —remaining fingers and thumb are placed just back of the blade against curve of shank. Always open. Easily cleaned. Total length, 5⅝ inches. Weight, including metal bound sheath, 1 oz. List price 55c

Marble's Safety Axe No. 2 (with guard). Sells to every hunter, camper and fisherman. Length, 11 inches. Weight, 20 oz. Steel handle. Lead-lined guard. Solid steel blade, 2⅜ x 4 inches. List price $2.75

Marble's Camp Axe No. 9 is a dandy little axe for camping, fishing and auto trips. Length, 14 inches; weight, 22 ozs.; hickory handle; solid steel blade 2⅞ x 4¾ in. List price, $1.10. With sheath, $1.65.

WRITE FOR CATALOG showing Marble's 60 Specialties for Sportsmen. Liberal discounts to dealers. Any Canadian jobber will fill your orders.

Manufacturers Seeking Locations

The success of your industry depends upon your choice of location

Complete, up-to-date information on shipping facilities, power rates, labor conditions, raw materials, factory sites, municipal inducements, etc., for every commercial centre in Ontario.

Complete details, plans and photographs of over 60 available vacant factories in Ontario, 1,000 to 100,000 square feet floor space.

Our whole organization is free to bona-fide parties seeking industrial locations.

We can save you time, travel and correspondence. Consult us. It will pay you.

More Sales for You

---*If You Display* Flat-Tone

People—realizing more and more the germ-proof advantages of walls painted and tinted—are consigning wallpaper to the dust-heap—and replacing it with *Flat-Tone.*

Flat-Tone is easy to apply, suitable for any surface, lasts long, covers much wall-space, is sanitary and economical. It gives a very beautiful finish—soft and velvety and never cracks or rubs off.

Flat-Tone

will be a money-maker for dealers this Spring. *Stock it*—and *push it.* Its 24 colours give good choice for artistic colour-schemes. Every customer, too, has the free service of our expert decorators, who are always ready to plan the decorating of any room or house in the most perfect way.

Order a good supply at once, so that your customers may get what they want without waiting.

If you are an S-W Dealer, write us for our agency proposition. We offer the most attractive plan in Canada—give our dealers every assistance.

WHERE IS CAPITAL TO COME FROM?

IN reality, it is not more money that is wanted but more of the things which money can buy. The real question, therefore, is: What is necessary to increase the quantity of goods in proportion to the amount demanded by unanimous popular resolution? Incidentally to this is the further question: Where is the capital to come from to provide the factories, machinery, raw materials, etc., and who will furnish the extra labor required for the increased production?

To try and solve this important problem by a general investigation of ideas as they come along involves an attempt to discuss a perfect babel of voices, from that of the Bolshevist who cheerfully distributes blank forms undertaking to deliver the millennium according to details to be filled in by each applicant who will sign up under his leadership to that of the "good old time" pessimist who detects the seeds of ruin in every proposed change.

(That method of solving business problems belongs to minds content to "muddle along" on hearsay and sensational newspaper items.)

The method of an analysis of the essential features of actual economic conditions is likely to be much more effective and more within the bounds of time and space.

(This is the clear-headed business method with business problems of the regular reader of THE FINANCIAL POST.)

The main question affecting Canada and indeed the whole business world to-day and the sentences in plain type above are taken from a leading article by Prof. Adam Shortt in

The Financial Post

dated March 29th, an issue which contains, amongst other important business news, these articles on **"Essential Features of Actual Economic Conditions"** in Canada to-day.

The Menace of Confiscatory Legislation
Shareholders of G.T.R. Entitled to a Better Deal
General State of Business is Favorable
Tariff Amendment a Poor Political Move
Lord Shaughnessy on the Labor Problem
C.P.R. Will Put Confidence in Public Opinion
The Increase in Current Loans Still Continues
West's Problems Considered by Loan Cos.
New Steel Price List Evidently a Compromise
Construction Plans of C.P.R. Announced
General Electric Coming Back to Peace Basis
Suggests That Farmers Deal With Own "Kicks"
Engineer Murphy Attacks Hydro Policy
The Farmer, the Bank, and the Manufacturer (Edit.)
Need for Closer Supervision of Municipal Loans
Apartments Are Only Solution of House Problem
More American Capital for Canada

TO the keen, well-ordered business mind the idea of "muddling along" on haphazard and sensational information which loses the essential business-building points while creating the excitement is totally unsatisfactory. When you "get down to business" you want the plain facts—all of them—without frills—and quickly. You get them like that in THE POST. Send for a sample copy or order subscription on this form:

The MacLean Publishing Co.,
143-153 University Ave., Toronto.
Send me THE FINANCIAL POST every week till further ordered. I will pay subscription price, $3.00 per year, on receipt of bill, or you may draw on me for this.

SALE OF SURPLUS MILITARY AND NAVAL STORES

DRY GOODS, CAMP SUPPLIES, FOOD, HARDWARE, SCRAP METAL, JUNK

Cloth; new and second-hand clothing, equipment, hardware, tents, blankets, camp supplies, etc. :: Flour, jam, canned evaporated milk, tea, coffee, etc. :: Condemned clothing, junk, old brass, metals, leather, rubber, etc.

SALES WILL BE MADE BY SEALED TENDER

Persons desiring to tender are requested to communicate with **THE SECRETARY OF THE WAR PURCHASING COMMISSION, BOOTH BUILDING, OTTAWA,** stating the items in which they are interested, whether new or second-hand or both.

Arrangements will be made to have samples on exhibition at places throughout Canada; specifications, full details, and tender forms will be mailed when ready to those who have registered as suggested above.

IF INTERESTED PLEASE APPLY NOW

Institutions May Make Direct Purchase Without Tender

Dominion, Provincial and Municipal departments, hospitals, charitable, philanthropic, and similar institutions which are conducted for the benefit of the public and not for profit may purchase goods without tender at prices established by the War Purchasing Commission.

All communications should be addressed to the Secretary, War Purchasing Commission, Booth Building, Ottawa, who will be glad to supply lists and further details to those interested.

If you have a business to dispose of, or are in need of efficient help, try a Want Ad. in Hardware and Metal, and let it assist you in filling your needs.

THE ORIGINAL RUBBER PUTTY

Vulcanizes without heat. Repairs tires, tubes, hot water bottles. Put up in three sizes: 25, 50, 150. Dealers wanted.

DU PONT CANADIAN INDUSTRIES

You will sell more Shells and Powder

With young, alert, trained shooters returning to Canada by the tens of thousands — Trap-shooting, Hunting, Target-shooting are going to get a great impetus. These men know how to shoot already. This is an opportunity to make your Sporting Department larger and more profitable.

Is there a Trap-shooting Club in your locality? If not, why not form one? It will be an outlet for the shells and powder you sell.

We will be glad to give you literature fully describing the fascinating sport of Trap-shooting and how to form a Gun Club. Write us to-day.

Polarine

Put Your Oil Business On A Scientific Basis

When motorists come to you for lubricating oils they will accept your recommendations and follow them, **if you are the lubricating authority of your locality,** just as they follow the directions of their doctor when they are sick or of their lawyer when they get into legal difficulties.

Read our book on "Polarine for Automobile Lubrication" and talk to the Imperial Oil Salesman and you will soon become a Lubricating Specialist.

The increased business which such knowledge will bring to you is worth many times the time it takes to become an authority on Polarine and lubrication.

Polarine is the best known, most used lubricant in Canada. Most motorists prefer it to any other make and use it exclusively.

The motorist's business is good business for you. Help them with sound advice and they will reward you by dealing with you regularly. While they are in your store buying oil they will be reminded of their household hardware needs and your business will be increased thereby, too.

Polarine
FRICTION REDUCING MOTOR OIL
MAKES A GOOD CAR BETTER

Polarine sells quickly, gives you a profit of 33 1-3% or more and brings customers back.

Carry the complete Polarine line. Three grades, Polarine, Polarine Heavy and Polarine A, in ½ gallon, gallon and 4 gallon lithographed sealed cans, 12½ gallon steel kegs, ½ barrels and barrels, also Polarine oils and greases for effective transmission and differential lubrication.

Write to 56 Church Street, Toronto, for the Polarine Booklet on Automobile Lubrication, if you have not received your copy.

IMPERIAL OIL LIMITED

Manufacturers & Marketers of POLARINE MOTOR OILS & GREASES

Marketers of *Gargoyle Mobiloils* in Canada

BRANCHES IN ALL CITIES

The Cleanest Store in Town

Your reputation as the cleanest store is worth much to you.

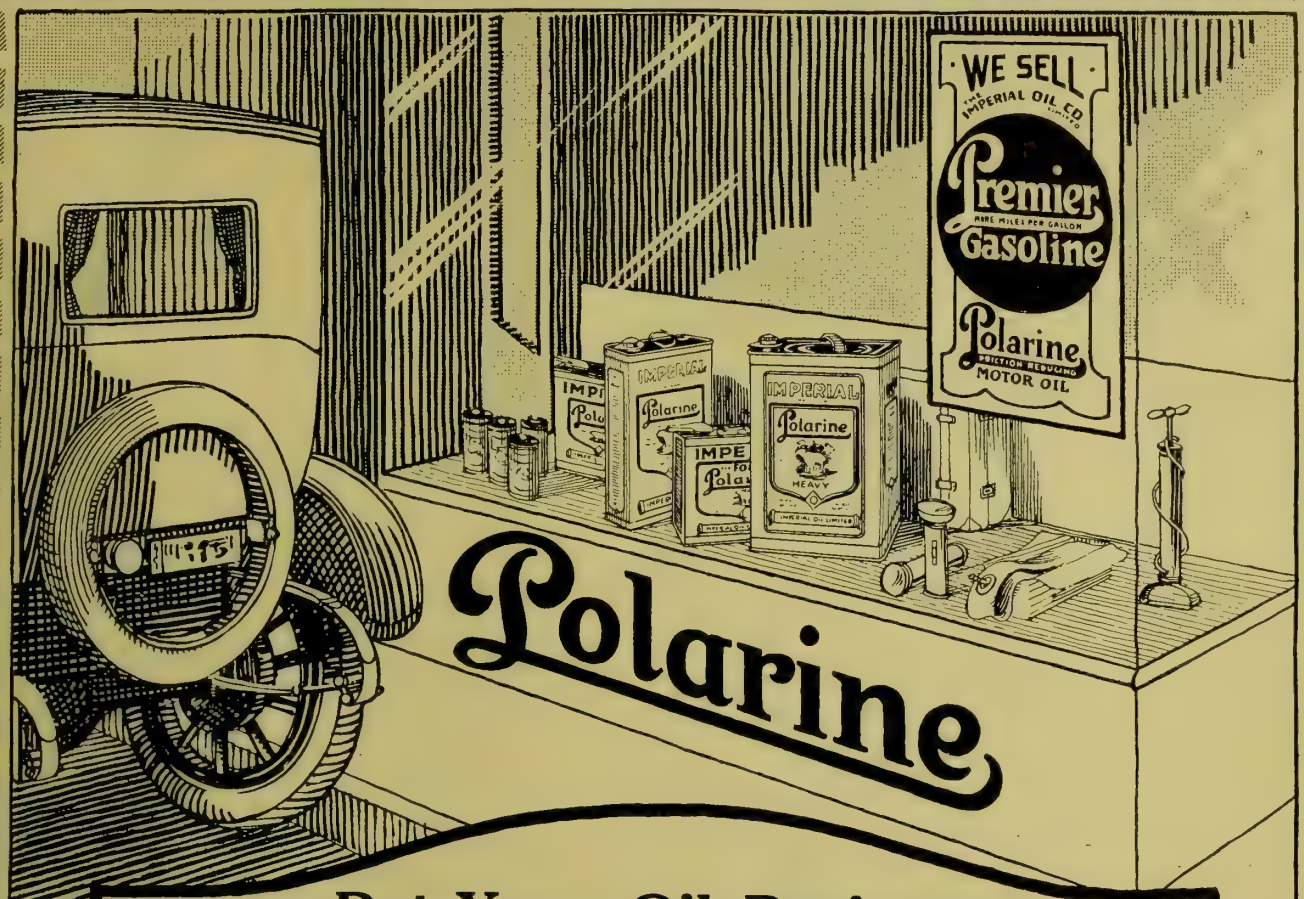
People like to trade in clean stores where merchandise is kept spic-and-span.

Dust repels trade—get rid of dust. Dust *cannot* rise where Imperial Standard Floor Dressing is used.

Imperial Standard Floor Dressing is a wonderful cleaning, wood-preserving preparation which prevents dust from rising.

STANDARD Floor Dressing

Cleans the surface of wood, linoleum and oil cloth thoroughly. One gallon is sufficient for 500-700 square feet of floor space, one application every three or four months will keep floors and shelving clean and prevent dust from rising. Display it on your counter, recommend it to your customers, demonstrate the results by the spotless cleanliness of your own store.



Sold in gallon and four-gallon cans, also half-barrels and barrels.

Polarine

Put Your Oil Business On A Scientific Basis

When motorists come to you for lubricating oils they will accept your recommendations and follow them, **if you are the lubricating authority of your locality,** just as they follow the directions of their doctor when they are sick or of their lawyer when they get into legal difficulties.

Read our book on "Polarine for Automobile Lubrication" and talk to the Imperial Oil Salesman and you will soon become a Lubricating Specialist.

The increased business which such knowledge will bring to you is worth many times the time it takes to become an authority on Polarine and lubrication.

Polarine is the best known, most used lubricant in Canada. Most motorists prefer it to any other make and use it exclusively.

The motorist's business is good business for you. Help them with sound advice and they will reward you by dealing with you regularly. While they are in your store buying oil they will be reminded of their household hardware needs and your business will be increased thereby, too.

Polarine
FRICTION REDUCING MOTOR OIL

MAKES A GOOD CAR BETTER

Polarine sells quickly, gives you a profit of 33 1-3% or more and brings customers back.

Carry the complete Polarine line. Three grades, Polarine, Polarine Heavy and Polarine A, in ½ gallon, gallon and 4 gallon lithographed sealed cans, 12½ gallon steel kegs, ½ barrels and barrels, also Polarine oils and greases for effective transmission and differential lubrication.

Write to 56 Church Street, Toronto, for the Polarine Booklet on Automobile Lubrication, if you have not received your copy.

The Cleanest Store in Town

Your reputation as the cleanest store is worth much to you.

People like to trade in clean stores where merchandise is kept spic-and-span.

Dust repels trade—get rid of dust. Dust *cannot* rise where Imperial Standard Floor Dressing is used.

Imperial Standard Floor Dressing is a wonderful cleaning, wood-preserving preparation which prevents dust from rising.

STANDARD Floor Dressing

Cleans the surface of wood, linoleum and oil cloth thoroughly. One gallon is sufficient for 500-700 square feet of floor space, one application every three or four months will keep floors and shelving clean and prevent dust from rising. Display it on your counter, recommend it to your customers, demonstrate the results by the spotless cleanliness of your own store.

Sold in gallon and four-gallon cans, also half-barrels and barrels.

DUNLOP TIRES —EVERYWHERE

¶ Dunlop Traction Tread can be bought in a greater number of garages than any other tire. Same with all the rest of the "Two Hands" Tire family: Dunlop Cord — "Traction" and "Ribbed"; Dunlop Regular—"Traction," "Special," "Ribbed," "Clipper," "Plain."

¶ Any place that is good enough for you to drop into in search of a casing, tube or some gasoline, oil or free air, is a good enough place for us to sell Dunlop Tires. In these days when tire service is priceless—it is something to know that Dunlop Distribution is of the most far-reaching character—the most successful "Tire-When-It's-Wanted" co-operation ever achieved in Canada.

CANADIAN PLANT OF THE GREENFIELD TAP AND DIE CORPORATION

Two letters that will create business for you

GARAGE men and dealers all over the country report that these two illustrated letters are the most successful method of building brake lining business that they have ever used.

These letters are personal letters ***from you to the motorist in your town*** whom you want as customers. The illustrations shown above appear in colors on the outside. The names are filled in on the inside and each letter is signed with your name.

Educating the motorist to demand efficient brakes

These letters make business good because they convince motorists of the need of good brakes. They show him the danger to which he is exposing himself, his family and his car every time he goes out with doubtful brakes. He is shown the difference between the close, compact texture of Thermoid and the loosely woven texture of ordinary brake lining. The close texture of the Thermoid gives him longer, more certain service.

These productive result-getting letters are part of the co-operation service which we give to Thermoid dealers. Whether or not you are handling Thermoid Brake Lining, write to-day for information about it. Thermoid will bring increased business and increased profits.

Every foot of Thermoid is backed by ***Our Guarantee :- Thermoid will make good—or WE WILL.***

The Canadian Fairbanks-Morse Company, Limited, Montreal. Branches in all principal Canadian Cities

Ordinary Woven Lining

Notice the loosely woven texture.—Wears down quickly and unevenly, losing its gripping power as it wears.

Thermoid Hydraulic Compressed Brake Lining

Notice the compact texture.—Wears down slowly. Gives uniform gripping surface until wafer thin.

Makers of "Thermoid-Hardy Universal Joints" and "Thermoid Crolide Compound Tires"

We know and you know

affords an excellent argument why you should sell these world-renowned plugs.

You should sell them because they are guaranteed (without reservation or time limit) to give the fullest measure of satisfaction, remembering that satisfied customers are an asset.

To refer your customers to the Sphinx guarantee is to clinch the sale every time.

Write me, and I will quote you the trade prices which ensure abundant profit on every deal.

THE SUCCESSFUL ACCESSORY MAN

Success in accessories is simply selling goods which give satisfaction **every time.** You know the motorist is a "high explosive" on anything that causes a stop, a break down or a delay of any kind that mars his joy-ride. He makes the air blue when anything goes wrong and he is going to blame YOU, Mr. Dealer, if he bought any bad stuff at your store. Make friends of every motorist you sell to by selling branded, reputed and advertised lines. You can make them come miles out of their way to buy of you if—you can deliver "the best there is." You are safe in every sale if you are selling—

RADIATOR NEVERLEAK

Stops All Leaks

Radiator Neverleak is a guaranteed preparation for stopping leaks in Auto Radiators. It is a carefully and scientifically compounded liquid that will, positively, in from five to ten minutes, stop any ordinary leak in a radiator or cooling system. And the repair will be permanent.

It Contains No Acid, Meal, Cement or Sediment to Clog or Impair the Cooling System

It will not evaporate, consequently it remains in the radiator indefinitely, automatically sealing any new leaks that may occur. It also tends to prevent the formation of scale or rust in the cooling system.

As your profit on NEVERLEAK is extra good, it will pay you to investigate. You can sell on an absolute money-back guarantee.

Sternwear

Reinforced Pneumatic Tubes

—reduce the cost of motoring.
—solve puncture and blow-out problems.
—double the mileage of casings.
—cannot be pinched by inside cracked casings.
—can be mended the same as any other tubes.

Note the section here illustrated.

The "Sternwear" is not only very thick, but is double reinforced with fabric. No matter how thin a spot is in the casing the pressure is distributed over the whole tire, and there's little or no chance for a blow-out.

Made in all standard sizes.

Write, phone or call on us for Price List and other information.

Why Not Benefit by the Light When It Is Let In?

Our Cash Carriers will enable your selling staff to devote more time to customers, and to serve them more promptly. In other words, the staff can do more business when Gipe-Hazard Carriers are used than it is possible to do without them which, when properly interpreted, means greater profits for the merchant, and better satisfied customers.

Too, there is not to be forgotten the saving of labor, and the avoidance of the disagreeable feature of salesmen having to crowd between persons when going to and from the place of change making.

Write for that circular.

Wanted

A hardware salesman in every town in Canada to sell a patented article, good money-maker. Apply to R. A. Gillies McKay P.O., Vancouver, B.C.

THE "WANT" AD.

The "want ad." has grown from a little used force in business life into one of the great necessities of the present day.

Business men nowadays turn to the "want ad." as a matter of course for a hundred small services.

The "want ad." gets work for workers and workers for work.

It gets clerks for employers and finds employers for clerks. It brings together buyer and seller, and enables them to do business though they may be thousands of miles apart.

The "want ad." is the great force in the small affairs and incidents of daily life.

WHEN WRITING TO ADVERTISERS KINDLY MENTION THIS PAPER

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are arctively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeping, please remit with copy, preferably by money order.

Help Drive the Check Crooks Away From the Hardware Business

Illustration is one-half actual size of machine

Finished in brushed bronze effect with black and nickel trimming

$10.00

Safeguards Your Bank Account!

The Dimunette Check Protector is made by the oldest concern of its kind in the world. It brings for the first time "Standard Protection" within the purse of all. By "Standard Protection" is meant that process which shreds the paper and impregnates the fibre with acid-proof ink. *Standard Protection has never failed.*

SUPPOSE ONE OF YOUR CHECKS WAS RAISED TODAY

If you knew just who was going to cash every check you issued, you wouldn't need to protect any check.

But you *DON'T KNOW* into whose hands your next check will pass before it is cashed.

Suppose, for instance, one of your checks was raised to-day — from eight dollars to eighty; from six dollars to six hundred.

Unless it has "effectual protection" your check will be cashed by the bank. How are *you* going to prove that it was not your fault?

You may never have had one of your checks raised by an unscrupulous check crook. Perhaps you never will.

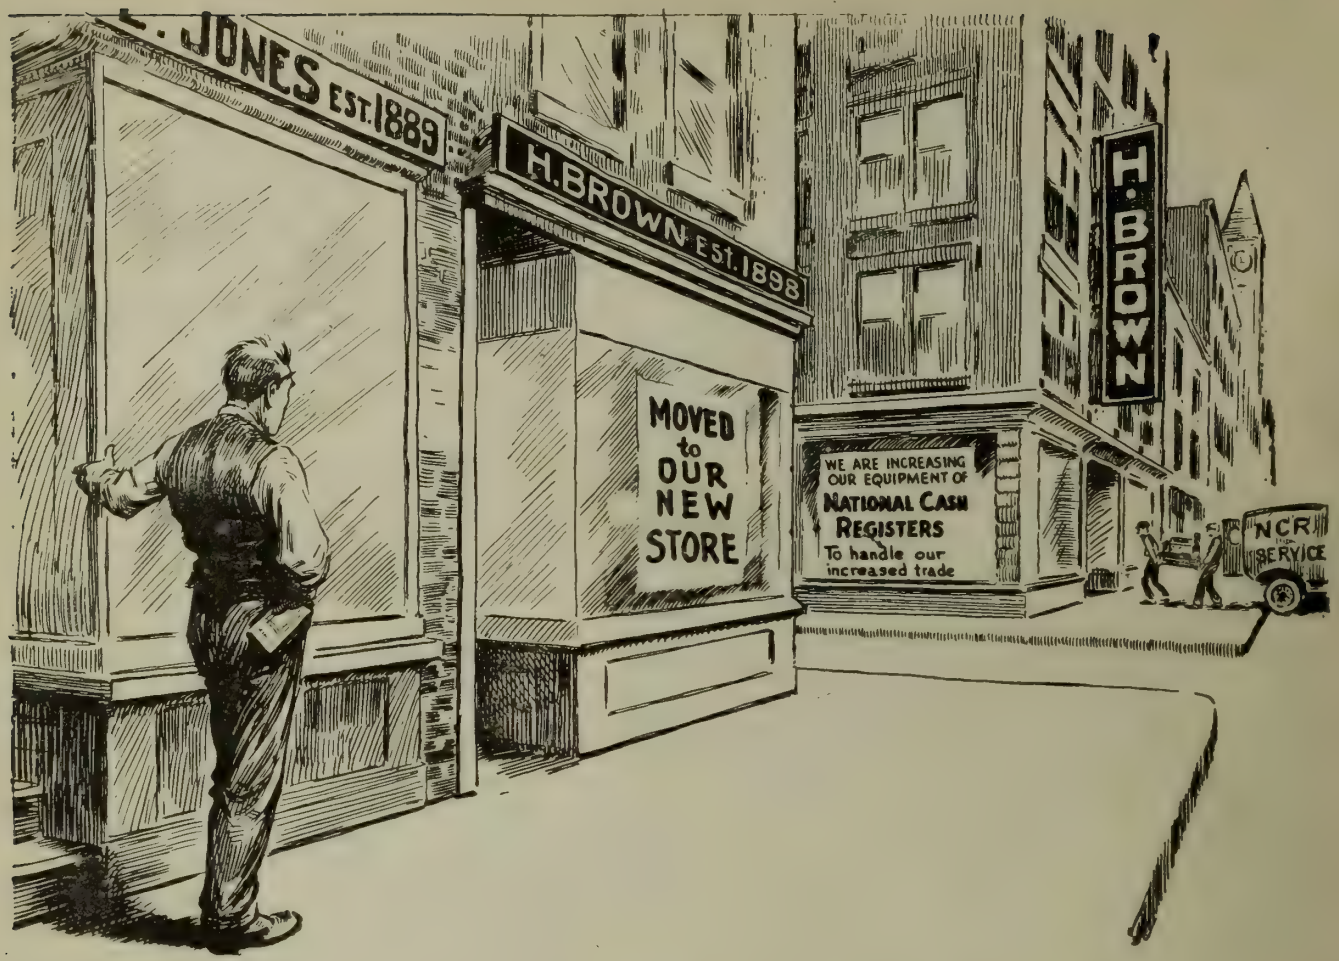
But unless you use standard protection — you can *never be sure.*

Don't imperil your bank account, your good name, your future, by neglecting your duty.

The jobbers in the hardware trade are alive to the situation. They know that on this continent alone last year crooks "got away with" over $20,000,000. They are co-operating to provide every merchant with "standard protection" at the lowest possible cost.

Talk with the first jobber's representative who calls. Let him show you the Diminuette Check Protector. This simple, sturdy approved device costs only $10. Its use defies the wiles and skill of any check crook.

If your bank acount is worth $10.00 you need this *legal* check protector —and you need it right away.



If your jobber can't supply you, write us at once.

MONTREAL TORONTO WINNIPEG

Use an up-to-date N. C. R. System and match your neighbor's success!

The merchant who combines a cash register system with progressive merchandising is bound to grow.

The merchant who handles his money and accounts slowly by hand instead of quickly by machinery, cannot meet competition.

An up-to-date N. C. R. System protects hard-earned profits; increases trade; cuts down expenses; makes clerks more efficient; stops errors, losses, and disputes; speeds up the business.

Every merchant needs the help of an up-to-date N. C. R. System in handling his money and accounts.

An N. C. R. System is within the reach of everybody. The payments are easy and the machine will more than pay for itself out of what it saves.

An N. C. R. System is a modern business necessity

Champion

Dependable Spark Plugs

are more than half sold when the customer reaches your store

A 15 1-2 Inch Champion "X" for Ford Cars Price 90 cents.

The dealer who carries the complete line of Champions does not have to sell spark plugs. He simply supplies the demand that we have created.

For years we have been educating users of the dependability of Champions, and have backed up that education with the guarantee of "absolute satisfaction to the user, or free repair or replacement will be made."

An appreciative public has come to realize that Champions mean spark plug reliability and satisfaction—that is why more Champions are in use than all other plugs combined.

That is the best possible reason why you should stock the full line of Champions—the plugs that are in greatest demand—the plugs that the great majority of motorists have come to depend upon for ***real spark plug service***—the plugs that offer you a living profit—the plugs that are backed by a big, live campaign of promotion that has more than half sold Champions to your customer before they reach your store.

Check up your stock of spark plugs now and order from your jobber a complete line of Champions that you may be in a position to capitalize our promotion to your profit when the driving season begins.

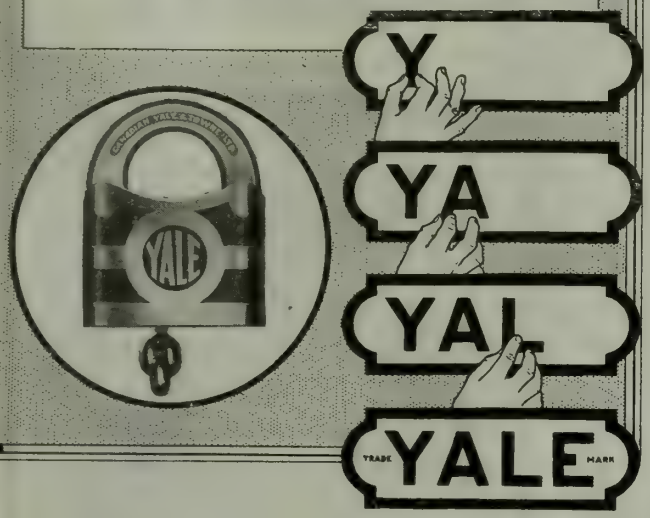
HARDWARE AND METAL, April 12th, 1919. Volume XXXI. Published every Saturday. Yearly subscription price, $3.00. Entered as second-class matter July 1st, 1912, at the Post Office at Buffalo, under the Act of March 3rd, 1879. Entered as second-class matter at the Post Office Department, Ottawa.



BUILT upon the quality of the goods themselves, Yale Padlocks, Night Latches, Door Closers and Builders' Hardware, Yale prestige exerts a powerful consumer demand that is capitalized by the Yale dealer.

It is profitable to stock a line so well known, so extensively advertised throughout the Dominion, and so certain to give satisfaction.

You are invited to inspect our plant at St. Catharines, Ontario.

"The trade-mark 'Yale' helps make the sale."

LAWN MOWER PEP BROUGHT RESULTS

Last week we advised our customers to push Lawn Mower business. That they did so, and with good results, is demonstrated by the flood of orders.

Keep your Mowers moving. A little persuasion sells a new mower to those who pride themselves in their lawns.

Talk "Taylor-Forbes Guarantee."

It's comprehensive and positive.

The Taylor-Forbes Lawn Mowers are guaranteed for one year from date of purchase, against defective material and if for any reason the purchaser is dissatisfied with the machine we will be pleased to replace it free of charge, if delivered at our works accompanied by the tag attached to each Mower.

A Salesman At Nothing Per Week

Ingersoll Display Cases—are real salesmen. You don't have to pay them for the work they do—just give one of them a corner on your show case—and it will make many sales for you—sales that you did not expect to make.

People buy "Ingersolls" where they see them displayed. The whole secret in selling them is in letting your customers know you have them. Our advertising creates prospective buyers and those people only need to be reminded to buy.

Drop us a line and let us tell you about our newest display cases that we supply to our customers.

If you are not handling "Ingersolls" a post card will bring you some interesting information.

Plymouth Rope

Facts as told by prominent retail hardware merchant in Ontario

ONE of the largest, and probably the most prominent retail hardware merchant in Ontario now operating two stores, tells how he came to handle Plymouth Rope exclusively and why he is selling it at a price per foot.

Some few years ago this dealer carried stocks of both Plymouth and second grade Manila rope. It happened that two farmers entered his store together one day, each wanting the same length of 7/8" diameter rope. One insisted on getting second grade Manila, while the other took Plymouth. The merchant was greatly surprised when he came to weigh up the individual purchases to find that the party buying the second grade Manila was paying more for his inferior rope than the farmer who wisely bought Plymouth Rope because of its quality.

Realizing that dissatisfaction over the purchase of the second grade Manila would surely result, if the purchaser had opportunity of learning that the same length of Plymouth Rope actually cost the other farmer less money, the dealer succeeded in steering him out of the back door while the other farmer was leaving by the front.

From that time on this enterprising merchant has safeguarded his customers by refusing to accept anything but Plymouth Rope from his jobbers.

Quality

THE leader in every industry, to maintain his lead, must safeguard the quality of his products.—Rigid inspection and careful supervision are important factors. —To products of iron and steel this principle applies with tremendous force.—It means safety, security and stability.—We safeguard the quality of our products, believing quality will be recognized long after the price is forgotten.

Service

OUR customers must be served. One of the dominating factors in any successful business is Service. —We succeed only through the good will and good wish of the people we serve.—This thought permeates our entire Organization, from the President down. — Our employees feel the sense of responsibility this principle implies; and each one directs his efforts to maintain the high standard of service we aim to render.

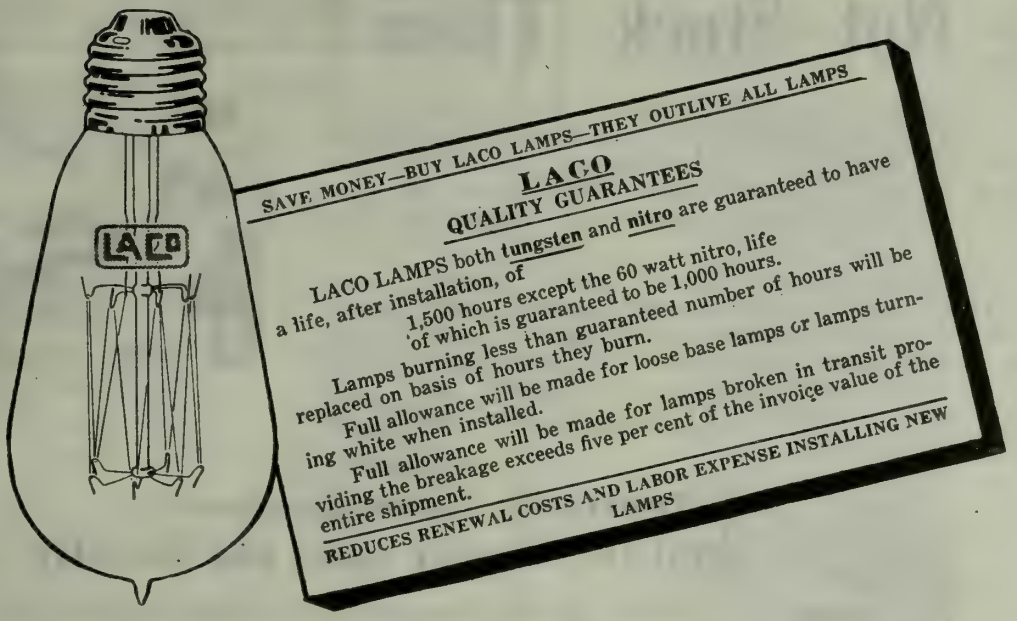
How Much Is It Worth To Have No Complaints?

If the wringer or washer you sell does not give satisfaction, you get the complaints. You are blamed, although it is not your fault. You lose a customer, perhaps more than one, because women compare notes on such things.

Sell **ARROW BRAND** Wringers and our dependable line of Hand and Power **WASHING MACHINES**. You can consistently recommend them, and we will stand back of you to the limit.



DOWSWELL, LEES & CO., LIMITED

HAMILTON, CANADA

Makers of every type of hand or power washing machine of merit. Also ARROW BRAND Clothes Wringers.

Montreal Toronto Winnipeg Vancouver

Why Not Stock Them?

WE are Washing Machine specialists. For twenty years we have been manufacturing home laundry equipment exclusively. Our "1900" Cataract and "1900" Agitator Electric Machines are the best designed Washers on the market. They mechanically perfect and give wonderful satisfacton.

A liberal profit is allowed on all "1900" Washers and Wringers. Our complete line includes washers that operate by Hand, Water Power, Engine Power and Electric Motor. We also have a full assortment of sizes and grades of superior, beautifully finished hand and power wringers. The profit made by carrying the "1900" line is limited only by the "prospects" wthin your reach.

"1900" Agitator Electric

"1900" Cataract Electric.

Extensively Advertised— And the Dealer Gets the Benefit

Every dealer who proves his worth is handed all the inquiries from his territory resulting from our twice-a-year advertising campaigns.
If, at the present time, you do not carry a line of washing machines, or are looking for "something better," you will profit by writing our "Wholesale Department."

Prepare For Spring Trade

Your customers can save time and money by using our Electric Steam Radiators.
Hydro Electric P.C. Approval No. 101.

Spring and its uncertain weather will soon be here. Raining, windy or cold one day, very warm the next, warm in the day and perhaps extremely cool in the evening. It is neither convenient, comfortable nor economical to operate the furnace. One or two of our radiators will furnish all the heat when, where and as required at the minimum of cost and attention.

Clean, economical and guaranteed.

We offer attractive terms to legitimate dealers.

Rapid Radiators Limited,
196 King Street West
TORONTO
THE LOGICAL METHOD OF ELECTRIC HEATING.

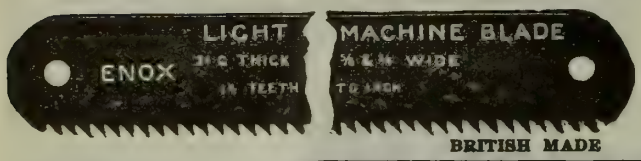
GILSON GARDEN TOOLS

The gardener can do better work by using Gilson Garden Tools and you can increase your sales and profits by selling them. The Gilson Weeder here illustrated does four times the work of an ordinary hoe with half the effort. Made also for attaching to a wheel outfit. A very powerful tool for the destruction of weeds.

Progressive Hardware Dealers are handling Gilson Garden Tools. How about you? It will pay you to investigate. Write us to-day.

Order from any of these jobbers:
F. R. Murray Co., Ltd., Vancouver, B.C.; Brown, Fraser & Co., Ltd., Vancouver, B.C.; The Rogers Hardware Co., Charlottetown, P.E.I.; T. McAvity & Sons, Ltd., St. John, N.B.; J. H. Ashdown Hdwe. Co., Ltd., Winnipeg; Wood, Vallance, Ltd., Winnipeg, Man.

Manufactured by
J. E. GILSON CO.
PORT WASHINGTON
WISCONSIN U.S.A.



Why It Pays!

ADVERTISING in HARDWARE AND METAL is economical because it reaches, and the advertiser only pays for, a circulation of tremendous buying power, which is always on the lookout for new lines and information regarding goods which are already in stock.

Manufacturers and wholesalers cannot afford to side-step the dealers. In nine cases out of ten, the customer accepts the retailer's recommendation.

PEERLESS POULTRY FENCE

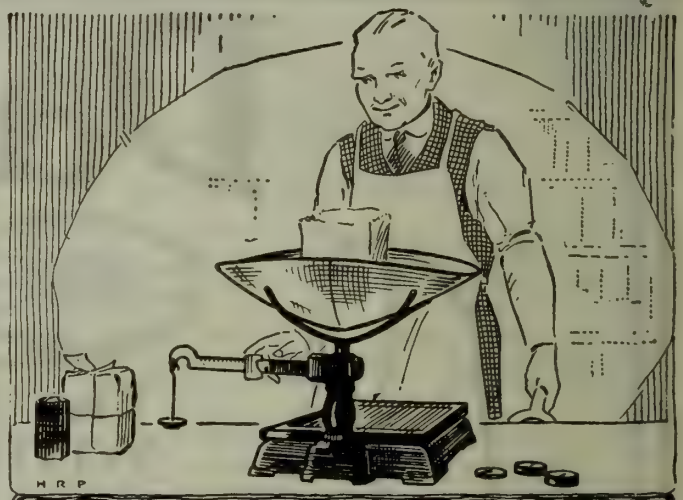
The kind that endures—in place to stay and please — because it lasts. It looks well and is always in place — "it stays put." It's the dealer's friend. You can put up the strongest kind of a guarantee—we back you up.

We build this fence of open hearth steel wire with all the impurities burned out and all its strength and lasting qualities retained. Peerless poultry fencing is extra strong, heavily galvanized, can't sag, won't rust, never gets out of shape, keeps in and keeps out—both great and small.

Poultry Will Pay the War Debt

The Peerless Lock holds the intersecting wires in a firm grip that is non-slippable. Compare it with any other poultry fence. The Peerless fence is built to stand any test. It is durable.

Note the extra close spacing at bottom, no base boards required. Turns the small chicks, keeps small animals in or out.



WRITE FOR DEALER'S PROPOSITION

We show you where the big trade is for parks, lawns, cemeteries, fences plain and ornamental for farms, ranches, all purposes. **Write for Catalog.**

Canada ranks high in the poultry business. A well fenced poultry farm means larger profits when Peerless fencing is used.

Gargoyle Mobiloil "E" - - Business Builder

Every expression on this page is from a Gargoyle Mobiloils **dealer.**

Every one of these dealers has convinced himself that Gargoyle Mobiloil "E" is **the** correct oil for Fords, summer and winter.

Every one of them has seen his own business grow; has seen stimulating confidence bred in his customers.

And every dealer who sells Gargoyle Mobiloil "E" and otherwise follows carefully the Gargoyle Mobiloils Chart of Recommendations is on the high road to a better reputation, better confidence, better prices, better business.

GARGOYLE

Mobiloils

A grade for each type of motor

"Have been getting over 100 miles per quart from Mobiloil 'E' . . and always carry a supply with me. . . as I would not use any other grade of oil."

"We are building a fine business for ourselves with your product and the trade is fully appreciating its worth."

"We, being distributors of Ford cars, tractors and trucks, find Mobiloil 'E' far the best lubricant for Ford engines."

". . our customers . . are more than enthusiastic about Mobiloils and the verdict of them all is that Mobiloil is the best oil they have used."

"We find in the use of Gargoyle Mobiloil 'E' in Ford cars that we get more miles per gallon from both gasoline and oil. . . We recommend Gargoyle Mobiloils to our customers wanting a high grade oil."

". . We have sold some 45 barrels of your oil in the last season and have succeeded in working up a considerable trade which comes to our garage. . . because we handle this kind of oil and recommend it so highly."

". . We always fill up a new car with Gargoyle Mobiloil 'E' and try to get the new owner to take a five-gallon can away with him. We know then that he is started right."

"We have been selling our trade and using Mobiloil 'E' exclusively for the past four years."

". . We are receiving excellent results with your Gargoyle Mobiloil 'E' in Ford cars and frankly say that we have built up a very nice business on your line with very little effort. . ."

"I find your Gargoyle Mobiloil 'E' best suited for Ford cars and have no trouble selling it to a user who has tried it."

IMPERIAL OIL LIMITED

Manufacturers & Marketers of POLARINE MOTOR OILS & GREASES

Marketers of *Gargoyle Mobiloils* in Canada

BRANCHES IN ALL CITIES

GOOD OILS TO SELL

IMPERIAL Farm Lubricants cover every lubricating requirement in the agricultural field — an enormous retail market that is not only constantly growing greater, but represents Canada's most prosperous producing class.

The high quality of Imperial Oils is established with multitudes of users to whom the name "Imperial" is as a guarantee. Our extensive newspaper and farm paper advertising is every day adding to the list.

We are educating the farmer on lubrication—telling him what each of his farm machines need in oil—tractors, stationary engines, threshers and automobiles. We are specifying Imperial Oils for each lubricating need.

Are you prepared to meet an increasing demand for Imperial Lubricants? When your customers ask for a special Imperial Oil, will you be able to supply them or will you be compelled to apologize?

Why not be prepared. Look to your Imperial Farm Lubricant stock to-day, and if it lacks any of the oils here described; why not make it complete. Imperial distribution insures you a ready supply of Imperial Oils at all times. It pays to sell them.

IMPERIAL FARM LUBRICANTS

IMPERIAL POLARINE AND IMPERIAL POLARINE HEAVY

For all gasoline-burning engines — automobiles, tractors and trucks.

IMPERIAL POLARINE A

For all motors requiring an unusually heavy oil.

IMPERIAL ELDORADO CASTOR OIL

A thick oil for worn and loose bearings.

IMPERIAL KEROSENE TRACTOR OIL AND IMPERIAL KEROSENE TRACTOR OIL EXTRA HEAVY

For kerosene-burning stationary engines and tractors.

IMPERIAL PRAIRIE HARVESTER OIL

A heavy-bodied oil for open bearings of threshers, binders and separators.

IMPERIAL CAPITOL CYLINDER OIL

For steam cylinder lubrication — tractors and stationary engines.

IMPERIAL STANDARD GAS ENGINE OIL

For stationary and portable engines using either kerosene or gasoline.

IMPERIAL THRESHER HARD OIL

For grease cup lubrication of bearings. A clean, solidified oil.

Imperial Farm Lubricants are for sale in ½, 1, and 4 gallon sealed cans, half-barrels and barrels.

Of Course You Want *All* the Profits in Your Gasoline Sales

This Gilbert & Barker T-235 Five-Gallon Quick-return pump in front of your store attracts customers day and night.

Painted in a brilliant red, baked on, it acts as an eloquent salesman pointing out your establishment for blocks away.

It is quick, accurate, efficient. Only 20 seconds are required for discharging five gallons under normal operation.

One and three gallons may be measured by means of quantity stops which are securely fastened, and cannot slip and give overmeasure.

Discharge is made from overhead through a ten-foot length of one inch metallic hose. The filter automatically separates all the water or foreign matter from the gasoline.

THE SAVING WITH THIS UP-TO-DATE G. & B. PUMP IS SO POSITIVE THAT IT SOON PAYS FOR ITSELF.

NOW A COMPLETE TRUCK

HEREAFTER Ford One-Ton Trucks may be bought **complete** with bodies and cabs, ready for the road.

The Chassis may still be purchased separately.

But in most cases, the Ford Truck will be sold as a complete Ford job. The body as well as the chassis will be planned to give Ford Service.

This radical step in the production of Trucks is being taken to insure the utmost efficiency from the Ford Truck; to give the purchaser Ford value in every part of his truck; to produce better bodies at lower prices.

TWO STANDARD BODIES

The two types of Truck body most widely used are the Stake and the Express.

These types will be kept in stock by Ford dealers and Ford Branches, set up, painted (or in the lead) and ready for prompt delivery.

They are scientifically designed to distribute weight and strain, and to give the utmost loading capacity.

They have oak floors. The sills are of seasoned hickory, clear five-inch members, clamped to the chassis. There are no bolt holes to weaken this sturdy frame.

Specially designed forgings and castings are used throughout the entire job.

The construction at every point provides for rough usage such as every truck is bound to get. There are no outside stake sockets or braces. The sides of the body are free from trouble-making projections.

The driver can step from the cab into the truck body, saving many a trip to the back of the truck.

THESE COMPLETE FORD TRUCKS ARE ON SALE *NOW*

Call and learn what it will cost to use them in your business. Look them over carefully. See how they outclass other Trucks in every detail.

This new idea in selling Trucks not only gives you unusual value, but enables you to avoid delay in securing the Truck you need.

*STEFANSSON'S

OWN STORY *of his*

FIVE YEARS *in the* ARCTIC

Over five years ago Vilhjalmur Stefansson, the famous Arctic explorer, was commissioned by the Canadian Government to lead a party into the uncharted space that extended from the north-westerly boundaries of Canada on to the North Pole. Shortly after the party got away the news came back to civilization that Stefansson and some of his party had drifted out into the Arctic seas on an island of ice and they were given up as lost. But Stefansson came back, safe and sound, after four years of amazing adventures, during the course of which he made many discoveries of scientific and geographical value. Mr. Stefansson has written his story of this wonderful journey, and exclusive Canadian rights have been purchased by MACLEAN'S MAGAZINE. It starts in the April issue and will continue for six months. It is a thrilling narrative—unquestionably the most important Canadian story of the year.

Mr. Stefansson's story will be published exclusively in Canada in MACLEAN'S. The series of articles by him, now appearing in American and Canadian newspapers, refer entirely to his experiences on previous explorations and do not deal with the journey that he undertook for the Dominion of Canada and completed last year.

Other Outstanding Features of April MacLean's

***"Imperial Relations Must be Worked Out,"** by Viscount Bryce. An important announcement on the future construction of the British Empire.

"Reconstruction in Turkey," by Stephen Leacock. A humorous article on the present condition of things in Turkey as seen by Canada's great humorist, and applied to Canadian conditions.

"Bulldog Carney," by W. A. Fraser. A splendid novelette of the Canadian West, complete in this issue. Illustrated by Charles L. Wrenn.

"Opening the New Book," by J. K. Munro. An article on the situation at Ottawa created by the new Liberal leadership—smashing, impartial, fearless.

"The Sun Gazer," by Charles G. D. Roberts. A remarkable animal story. Illustrated by Arthur Heming.

"Canada's Fishmonger General," by Thomas M. Fraser. An article on a young Canadian who put Canadian fish on the diet of the British armies by a series of Barnum and Bailey advertising stunts.

"Bombing the Boche," by Lieut. J. Vernon Mackenzie. The second of the two articles that Mr. Mackenzie has written on the whirlwind campaign of raid reprisals which so frightened all Germany.

"The Transformation," by Frederic S. Isham. Illustrated by Hanson Booth. The second instalment of this sparkling new serial.

"Man and Wife," by C. W. Stephens. Illustrated by R. M. Brinkerhoff. The first instalment of a three part story of Canadian life by a new Canadian writer—a delightful love story with a background of business intrigue.

The Review of Reviews

The best articles from all publications the world over are selected and condensed for this department. Some of the articles in the April number are:

The Man Behind Bolshevism.
Could German Fleet Have Been Destroyed?
The Secret Plans of the Allied Command.
Too Much Wilson.
Is the ex-Kaiser Haunted?
Next Government Will be Labor.

Many New Bills Affect Retailers

Legislation Now Under Consideration at Ottawa Will Have Important Bearing on Merchandising in All Its Branches—Aim is to Make For Better Conditions in Business Generally

By T. M. FRASER, Ottawa Representative of the MacLean Publications.

EVERY year a large amount of legislation, or proposed legislation, comes before Parliament or its committee, of more or less importance to the retail trade, and this year is no excception to the rule. E. M. Trowern, the Dominion Secretary of the Retail Merchants' Association, always keep a watchful eye upon the bills going through Parliament, and usually has a number to steer through himself; and whether he is promoting legislation or preventing it, it is all with the idea of forwarding the interests of the retailers.

HARDWARE AND METAL, in its issue of March 22, gave an account of the meeting of the Dominion Executive of the retailers, and referred to several matters which is was proposed that the Government should deal with in one way or another. In the issue of March 29, a full account was given of the proposed Bankruptcy Act, now before a committee of the House.

Legislation Needed

The following is the full agenda prepared to lay before the members of the Commons and Senate, as subjects requiring legislation: Bankruptcy Act; Requiring Merchants to Keep Books; Sale of Articles Left for Repair; Amendments to the False Advertising Act; Carrying of Parcels and Catalogs by Mail; Fire Insurance Act; Weights and Measures; Price Maintenance Legislation; Fixing of weight of contents of Cereal Packages; Adulteration Act; Inland Trade Commission; Government Employees to Come under Garnishee Act; War Stamps on Patent Medicines; War Profit Tax on Luxuries; Purchasing of Goods on Sabbath; Daylight Saving; Customs Confiscating Automobiles; Co-operative Societies.

Now Being Considered

A detailed account of the Bankruptcy Act was given in HARDWARE AND METAL in the issue of March 29. A number of other items enumerated hve been dealt with in one form or another. The requiring of merchants to keep books, amendments to the False Advertising Act, and Price Maintenance are now all before the Department of Justice for consideration. The sale of articles left for repairs has been dropped for the present. The carrying of parcels and catalogs by mail is being dealt with by a special committee. The Adulteration Act is before the Cabinet. Nothing will be done on the Inland Trade Commission this year. A bill will be introduced to deal with the matter of the weight on contents of cereal packages; and it may be noted that the weight of contents of salmon and lobsters and other canned goods has been discussed before the House at some length and legislation regarding it will likely be introduced.

Matters of Policy

There are several matters, such as co-operative societies and the confiscation of automobiles carrying liquor, which are a matter of policy and cannot be dealt with by legislation, but strong representation regarding them has been made to the Government and some action will likely be taken.

The Senate has now before it a bill entitled an Act to Amend the Criminal Code, respecting prevention of fire. This provides that everyone is guilty of an indictable offence who negligently causes fire resulting in the loss of life or property, or who refuses to make alterations, remove materials or supply apparatus when ordered to do so by the proper authorities.

A bill now before the House deals with the weight of contents of canned goods, referred to above. It provides that there shall be four sizes of cans for lobsters, containing not less than three, six, nine or twelve ounces avoirdupois respectively of dry lobster meat. No other size of can shall be used for lobsters without permission of the Minister. Such permission shall state the minimum amount of dry lobster meat packed in each size of can so authorized.

The Minister of Trade and Commerce has a resolution before the Committee of the House to amend the Fertilizers Act in several respects. The phosphoric acid contents in the guaranteed analysis of a fertilizer must be plainly stated in connection with each package sold. The vendor must affix stamps to the value of one cent for the value of each one hundred pounds sold, with other provisions regarding analysis.

A very lengthy bill regarding Canadian copyright is also before the Senate, and is being both urged and opposed by rival interests.

Dr. Sheard, M.P., has introduced a bill to incorporate the Wholesale Grocers' Association, which is now before the Committee.

One of the most important matters of legislation to the retailer is that dealing with the war tax stamp duty on patent medicines and articles in bottles and packages, on which an article by Mr. E. M. Trowern will be found on page 46.

Pressing Problems

The Government has got some other problems on its hands that are pressing for settlement, and on which action is being taken. There is the demand of the postal employees for new wages, and various threats as to what is going to happen if this is not attended to immediately. This is a problem that involves the whole commercial world, and those who had a taste of the delays that followed the trouble in Toronto last year when the men went out learned just how much inconvenience and loss it meant. In Montreal 1,200 employees of the Montreal Light, Heat and Power Co., Ltd., are on strike. It is understood that the main points at issue are the refusal of the company to recognize the union and wage differences. The settlement of this trouble is perhaps more important than appears on the surface owing to the number of firms dependent upon the power company for power.

Express Men, Too

In addition to these troubles the Canadian Express Employees have refused the award of the Labor Board and are expected to walk out. Some twelve hundred men are affected, and this may prove a more or less serious handicap at a season when business is increasing and express shipments growing larger from day to day, just before the Easter season. The recommendations of the Labor Board, although granting some concessions and increasing pay schedules, were not acceptable to the men.

Urges Direct Collection of Stamp Tax

Secretary of Dominion Executive Council and Dominion Board of Retail Merchants' Association of Canada Discusses Situation in Regard to War Tax Stamp Duty

By E. M. TROWERN

EVERY loyal citizen in Canada recognizes that the enormous cost of the war must be met, and that everyone should do his share in helping to pay it. The main feature that should be carefully watched is to see that whatever system is adopted it should rest equitably upon all alike, and that the cost of collecting it should be the lowest possible amount. There should also be some uniformity in the plan of collection. Any system that is adopted and that proves to be cumbersome and expensive on one article must also prove to be cumbersome and expensive on all other articles. The important thing, therefore, in all systems of taxation is to be able to collect it in the simplest and least expensive way, and arrange it so that it will rest equitably upon all.

Lose Its Force

The argument that is sometimes used, that it is essential that every purchaser should know the exact amount of tax he is paying to the Government or to the municipality, and that those who sell goods should be able to point out to customer just what that tax is, would soon lose its force if it were deemed necessary to also state to the customer the value of the labor, the value of the material, and the cost of shipping or handling the said article, and if it is necessary to know the amount in one case why not in all cases and on all articles? All these items could be figured out if it was absolutely necessary that they should be done, but why burden any system of taxation with a lot of unnecessary statistical and collection costs?

The chief question that the average intelligent Canadian is concerned about is the following: "What percentage of the tax that is paid by me is going to pay the debt for which the tax was imposed, and what percentage is going to the tax collectors and other Government officials for collecting it?"

Means Big Loss

In the case of the tax on patent medicines and on articles in bottles and packages, where the tax is paid by retail merchants buying war tax stamps and placing them upon the packages, according to the selling price of the article, we are informed on reliable authority that sixty-two and two-thirds per cent. of this tax goes to Government officials for collecting it, and that the Government only receives thirty-seven and one-third as its share. As business men, we consider that this is by no means a satisfactory system of taxation and we are sure that no business house would tolerate any such expensive and extravagant a system as this one.

Cost of Collection

The full cost of collection, however, is not included in the sixty-two and two-thirds per cent. as reported by the Government. There is the further cost to the retail merchant of purchasing the stamps and placing them upon each article, and collecting the same from the customer. This is all additional to the sixty-two and two-thirds per cent., the only difference being that the retail merchant does an enormous amount of work and he receives nothing whatsoever for his services. If by any chance a stamp falls off the package, or the retail merchant or his clerk neglects to attach it, and a Government Inspector happens to enter his store, the retail merchant is summoned to the Police Court, and the usual fine is fifty dollars and costs. This is the reward that the retail merchant receives if he faithfully applies the stamp to one thousand bottles or packages and neglects to put a one-cent stamp on one article. The retail merchant, therefore, does all the work in buying the stamps and collecting the revenue, and receives no reward, only the risk of being fined in the Police Court if he or his clerk makes one miss in a thousand times.

Gets Part of Fine

On the other hand, the Government Inspector, in addition to receiving his salary and expenses for travelling all over the country and spying on the retail merchants, receives a portion of the fine, and a great many complaints have been made to our office stating that the Police Magistrate invariably takes the word of the Inspector against the word of the retail merchant, and they think that where there are no witnesses, and the possibility of the stamp being removed by anyone so inclined, and who was working in league with an Inspector in order to secure a portion of the fine, that in every case the Police Magistrates should demand evidence to show that the stamp was not affixed at the time of the sale.

His Wife Helped

In one case which has recently been before the courts, one of the Government Inspectors engaged his wife to assist him in securing convictions. The plan was to send his wife into the store and ask for some preparation and state that she was in a great hurry so as to throw the retail merchant off his guard, and after purchasing the preparation she would hasten out of the shop and join her husband who was waiting outside to hurriedly drive her away.

Other cases have been before the courts where it was shown that poor widows whose stock in trade did not amount to more than three or four hundred dollars, have been fined as high as fifty dollars and costs, and the fine had to be paid by their friends as they were unable to do so themselves.

These facts are presented to show that the system is absolutely wrong in principle as well as in practice, and it should be changed at once, otherwise the entire commercial community will be aroused from one end of Canada to the other.

Collect Direct

In our opinion, if it is necessary that taxation of this character should be collected to pay war expenditure, it should be collected direct from the manufacturers, and the importers, and passed along to the retailers and to the consumers. This plan would simplify the cost of collection and place more money by far in the hands of the Government than it is now receiving, and it would remove the objectionable feature of summoning respectable, law-abiding citizens before Police Magistrates.

As stated before, the name that is given to any system of taxation is of very little consequence to the average business man. What is chiefly required is the most direct and cheapest way of collecting it, regardless of traditions and political opinions, and it must be evident to the most simple mind that the cheapest and most effective way to collect this tax is to collect it from the fountain head, which is the manufacturer, and the wholesale importer. It is our intention to impress the importance of this matter upon the public mind until we secure a remedy.

ENGLAND WITHDRAWS PIG IRON SUBSIDIES

The British Ministry of Munitions has given notice whereby certain existing subsidies payable on cold-blast pig iron are withdrawn. An advance of 11c per ton in the maximum price is authorized. This advance, added to the increase of 15s., effective January 1st, will raise the maximum price for home sales to £10 8s. 6d. per ton f.o.b. maker's works. The export prices remains unchanged at £11 12s. 6d., but the export drawback will be reduced by amount of increase in home price.

Making Local Paper Help Sell Paint

Hardware Dealers Can Arouse a Lot of Interest and Civic Pride by Enlisting Help of Press—How Fort William Daily Paper is Getting Behind a Clean-Up Campaign

HARDWARE dealers all over Canada can do a lot to increase sales of paint in the next few weeks if they will secure the co-operation not only of the local papers but of the authorities and all citizens who are interested in improving the general surroundings from the standpoint of beauty and cleanliness. The press is one of the most effective means of reaching the people at large and making a strong appeal to them. Already, as pointed out at different times in HARDWARE AND METAL, various editors have been hammering editorially at the need for cleaning up, using more paint, improving the general appearance of the town by brightening up and so on.

Co-operation Counts

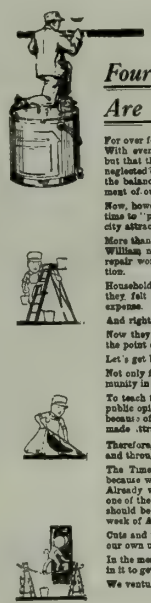
The Daily Times-Journal, of Fort William, Ont., is not only standing behind the Dominion wide "paint up" campaign which is to be launched soon, but is inaugurating a campaign of its own, which is aimed to boost the use and sale of paint. The following letter received by the Times-Journal from Assessment Commissioner R. Dagger, was not only printed in a prominent place in the paper, but copies were mailed to every hardware dealer, painter, plumber and contractor in the town.

The letter reads:

What the City Assessor Says: No Extra Taxes Because You Paint Up

February 28th, 1919.

The Daily Times-Journal,
Fort William, Ont.
Attention of D. Smith, Esq.,
Manager.



Dear Sir:—

I beg to acknowledge you letter of the 27th inst., and in reply would say there is absolutely no truth in the assertion that should owners "paint up" their properties the assessed values are increased with a consequent increase in taxes.

I would go even further and assure you that in compiling our assessments, the basis of valuation is in no way affected by the appearance of the buildings, and should owners beautify the surroundings of their premises it should not be taken as evidence that their taxes will be increased accordingly.

With reference to your campaign advocating the painting and beautifying of the buildings and surroundings of the various preperties throughout the city during the coming spring, I am certainly in sympathy with your object and trust the movement will be widespread and result in making the properties more attractive from a spectacular point of view.

Yours truly,
R. DAGGER,
Assessment Commissioner.

Four Year's Work to be Done—Are You Ready?

For over four years the ordinary trend of affairs has been disturbed. With everyone's attention rivited on the war, who could expect but that the outside appearance of the home and the shop would be neglected? Who had the heart, while the nation's future was in the balance, to devote any attention to the decorating or improvement of our residences and stores?

Now, however, with the war over and our boys coming home, is the time to "put on our glad rags" and with brush and broom make the city attractive and beautiful.

More than half the homes, business houses, outbuildings, etc., in Fort William need a coat of paint, some important and long neglected repair work requiring lumber, shingles, plumbing, interior decoration.

Householders have been delaying this work during the war because they felt it was their duty to avoid every item of unnecessary expense.

And rightly so.

Now they're going to spruce up. All they need is to be stirred to the point of decision and action.

Let's get busy from a community standpoint.

Not only for your own advantage but for the advantage of the community in which you do business.

To teach the eyes of the public to see the need of the work in hand public opinion must be aroused to demand that structures unsightly because of being unpainted, unsanitary, tumbled down, etc., shall be made attractive and fit to live in.

Therefore, a vigorous and persistent campaign through the press and through your advertising is necessary.

The Times-Journal is ready to get behind you in this campaign because we believe it is in the interests of the community to do so. Already we are planning a big Spring Clean-up, Paint-up edition, one of the best of its kind ever published here. We fancy this edition should be issued about three weeks earlier than last year—say the week of April 28 to May 4th.

Cuts and illustrations are now being made for this edition, both for our own use and for the use of our advertisers.

In the meantime we pass the word along to you that there's business in it to get busy now and work up to the final climax.

We venture to predict we'll get your full co-operation.

Yours respectfully,

The Times-Journal

This letter was sent out to arouse interest in the coming "Clean Up, Paint Up" Campaign.

Some sales argument this for painters, hardware men, etc., when talking "Paint-up" to customers—Adv. Manager.

Followed it Up

Naturally this letter got a lot of people talking and created considerable interest in the "paint up" campaign. In order to maintain this and not give anyone a chance to forget, the following circular has been sent out to hardware men and others interested in both Fort William and Port Arthur.

The climax in this campaign will come with the big special edition which is now being prepared, and it is stated that there is every prospect that new sales records will be made in paint sales.

The letter reads:

Four Years Work To Be Done; Are You Ready?

For over four years the ordinary trend of affairs has been disturbed. With everyone's attention riveted on the war who could expect but that the outside appearance of the home and the shop would be neglected? Who had the heart while the nation's future was in the balance, to devote any attention to the decorating or improvement of our residences or stores?

Now, however, with the war over and our boys coming home, is the time to "put on our glad rags" and with brush and broom make the city attractive and beautiful.

More than half the homes, business houses, outbuildings, etc., in Fort William need a coat of paint, some important and long neglected repair work requiring lumber, shingles, plumbing or interior decoration.

Householders have been delaying this work during the war because they felt it was their duty to avoid every unnecessary item of expense.

And rightly so!

Now they're going to spruce up. All they need is to be stirred to the point of decision and action.

Let's get busy from a community standpoint.

Not only for your own advantage but for the advantage of the community in which you do your business.

To teach the eyes of the public to see the need of the work in hand public opinion must be aroused to demand that structures unsightly because of being unpainted, unsanitary, tumbled down, etc., shall be made attractive and fit to live in.

Therefore a vigorous and persistent campaign through the press and through your advertising is necessary.

The Times-Journal.

MAY SPEND $6,000,000

At least $6,000,000 will be expended, it is stated, by the General Motors Corporation in construction work already commenced, on their 38 acre site at Walkerville, purchased some months ago.

This announcement follows that made by W. C. Durant, of Detroit, president of the G. M. C., of an extension program involving a total expenditure approximating $37,398,000.

For several weeks men have been engaged in tearing down the old buildings on the site located on the Walker Road, preparatory to the commencement of building operations on the new factory.

Outlook Good in Bicycle Business

Steady Demand Reported in All Parts of Dominion, With Heavier Sales Than Usual On at Coast Point—How Some Dealers Are Going After the Trade

BICYCLE manufacturers report that business is excellent this spring with prospects for a steady volume of orders. From all parts of the Dominion they say orders have been coming in steadily with larger orders than usual from both the Atlantic and Pacific coast. The larger business on the coast points is directly traceable, it is stated, to the activity in shipbuilding. Thousands of men are employed in the various shipyards and as many of them have fair distances to go, and transportation facilities are not always of the best, they are solving their problem by riding to and from work on bicycles.

Another Factor

"There is another factor in the bicycle situation this season," said sales manager B. B. Halladay, of the Canada Cycle & Motor Co., Ltd., to HARDWARE AND METAL, "that is that there is no English competition. The British manufacturers are having such a hard time in getting raw materials that they are unable to keep up with the demands of their home trade and have nothing to export. As a result of this situation we have had inquiries from both England and Italy, and some business has already been placed. This will, we expect, be followed by further orders shortly. As far as export business is concerned, we are expecting to secure a share of the trade."

Going to Australia

Mr. Halladay leaves about the middle of April for Australia and New Zealand. He will spend the summer getting in touch with the wholesale bicycle dealers there and expects to return to Canada early in September.

"As far as prices are concerned," he stated to HARDWARE AND METAL. "I do not see any likelihood of any reduction being made. Wages are high and there is every indication that they will continue so. That is the big factor in the cost of production. Higher prices have not affected sales either last season or this year so far, and I do not think that they will."

Outlook is Good

"The outlook for business is good. There is a noticeable revival in the demand for bicycles and indications are that it will grow. People are finding that bicycle riding is one of the healthiest out of door forms of exercise they can take. The dealers who are going after the business are getting it, and the orders from all parts of the Dominion indicate that there is a steady demand."

Bicycle week will be observed for the fourth season in Canada this year from May 3 to 10, and already many of the dealers are busy with plans for taking advantage of it.

Let People Know

Selling bicycles is very much like selling any other line of goods. The man who has the stock and who lets the people know that he has it gets the big share of the business. Many hardware dealers in all parts of the Dominion have been winning a big share of the bicycle business in their towns and districts and reports received from various sources indicate that they are right on the job this season, and are going after the trade by their usual aggressive methods. Good window displays, an attractive showing of bicycles in the store and advertising copy that is well arranged and full of bicycle sales "pep" are some of the effective methods that are being used.

Various Plans Used

Various plans figured out according to the needs of their location are used by different dealers to increase their sales. For instance a Western Ontario dealer who goes after the factory trade, makes a point of keeping in the closest possible touch with the workers.

"Every factory," he stated to HARDWARE AND METAL, "contains a lot of good prospects. These are not only among the workers but in the offices and even among the women. Many of the men who have two or three miles or more to come to work cannot walk and they get absolutely tired of waiting for street cars and of riding in them when they are so overcrowded as they always are at certain hours."

Arranges the Terms

"With many of these prospects it is very often a matter of arranging terms. Many of them who would not think of paying $50 or $75 down will gladly pay $25 and then so much per week. We are glad to accommodate these people and have got a lot of good business by doing it. The percentage of losses has been so small as to be almost negligible, and has been more than balanced by the other sales they have brought in. Very often a satisfied customer will do enough talking voluntarily among his friends to bring in half a dozen other sales. Of course these will not come all at once but we get them, and when you get a lot of "boosters" of this kind it costs nothing and means many good sales."

Uses the Windows

This dealer makes the most use of his windows. His store is centrally located but on a side street, about 150 feet from one of the main thoroughfares. His windows not only contain bicycles but also advertising matter sent out by the manufacturers whose lines he handles. He so arranges this among the bicycles that it makes an attractive and striking showing. Prices are marked in large figures and generally large show cards direct attention to some particular features or to some comment on the benefits to be derived by owning or riding a bicycle.

This dealer is a consistent advertiser and his copy is not only well arranged but is freely illustrated.

An Excellent Chance

There are any number of towns in which there is no street car service and in which are located factories. Towns like this offer a splendid opportunity for the aggressive dealer.

One dealer keeps a list of prospects based first among the factory workers, second among business men, boys and girls, clerical workers, teachers, and last but not least among the clergymen. He has sold many bicycles to those who work in the half dozen factories in his town. Many of these are men who have to come anywhere from a mile to a mile and a half, and live on the edge of the town, where they can have good large garden plots. Many of the teachers became buyers when he explained to them the combined advantages of getting to and from their homes quickly and at the same time getting exercise which most of them needed badly.

Helped His Sales

He used these parties especially to encourage a love of bicycle riding among the boys and girls, playing up the exercise and health building side of the matter. In several of the schools bicycle races have become a feature of the annual sports and the dealer keeps in close touch with this event by being always named as a starter or judge and by donating one or two small prizes.

A hardware dealer whose store is located in a city has built up a good business in bicycles by going after the trade of collectors, telegraph and messenger boys, policemen, and a number of men and boys who work at nights. He frequently sells wheels also to inspectors and metermen who have many calls to make constantly and whose work takes them to all parts of the city.

DISCUSS EXPORT TRADE

Ottawa—The hardware dealers and millers are both represented here this week by large delegations coming to discuss the matter of export trade with the Trade Commissioners, preparatory to sending representatives abroad to join the two hundred or more Canadian trade hustlers who are now over there. With the opening of the St. Lawrence shipping conditions will be improved, and the chances of export trade better.

Business Men Direct Housing Plans

Administrative Commission of City Recognize Ability of Practical Men to Direct the $5,000,000 Housing Scheme—Would Probably Serve Without Remuneration —Interested Delegation Waits Upon City Fathers

MONTREAL'S share of the Federal grant to erect homes for the working man is five million dollars. This amount is to be handed over to the civic administration by the Quebec Government, and it is therefore necessary to appoint a special committee that the work may be directed in an efficient and acceptable manner. The need of housing being pressing, and the building season approaching rapidly the thinking men of Montreal are already interesting themselves in the new proposal.

Business Men to Act

Chairman Decary had invited a representative committee to confer with him on this matter. This was done that the ideas of others might be secured and that the plans tentatively held by the Civic Commission might be placed before these citizens from various business interests within the city. Members of the Board of Trade were present, from the Chambre de Commerce, Builders' Association, City Improvement League, Fabian Society, and the Trades and Labor Council. Some fifty or more attended.

Several of the speakers at the preliminary meeting advocated the appointment of business men to direct the work of expending this money in erecting homes for the "low-salaried" men. Among those advocating the selection of such men were U. H. Dandurand and Commissioner Ross. The plan was generally accepted with favor, and when the selection of a proposed committee of five is made from among the nominees sent in by the various organizations, it is expected that the personnel of the committee will have been composed of well-known business men of the city. These men, when appointed, will probably serve without pay, excepting one member, the manager, and who would be under the direction, with his committee, of the Civic Commission.

Plans Far-reaching

With a large and growing industrial population, the suggested scheme in Montreal will be a big thing. With houses scarce and rents high the man with a family who wants a house can, it is expected, secure the necessary funds with which to erect his house at a favorable rate of interest, and under a 20-payment plan that should be agreeable and possible for the worker to carry out.

The details of the scheme will necessarily have to be worked out. The idea brought out at the first meeting was that of minimizing the "red tape" so to speak, and the desire will be that of making the plans so simplified that the owner-to-be will have little technicality to understand. Where he has plans of his own that he wishes carried out, it is suggested that these will be followed as nearly as possible. Where he has none, the committee would have various suggestions that he might adopt. Their supervision would ensure his securing a fair deal, and a suitable house of the maximum value, at the minimum of cost. The large appropriation is expected to go far in providing an army of men with good homes.

R. H. McKay has purchased the interests of Messrs. F. W. Wright and J. W. Sutherland, New Glasgow, N.S., and J. H. Winfield, Halifax, in the Canada Tool and Specialty Co., Limited, and is now the sole owner of this property. The Canada Tool plant and the Gas Engine plant of Messrs. Murray & Frazer, it is stated, may shortly be amalgamated in a new company, with Mr. McKay as manager.

Current Events in Photograph

THE WATCH ON THE RHINE

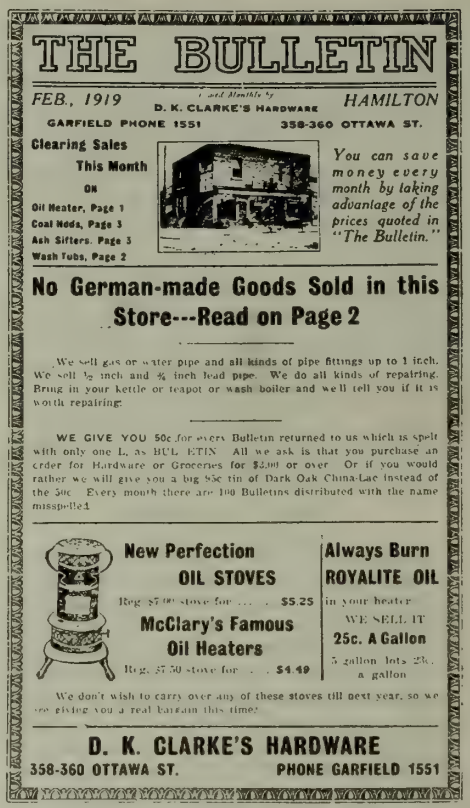
The photo shows the famous Hohenzollern Bridge, over which the Canadians, with other Allied troops, crossed the Rhine and took up positions on German territory. One of the Rhine motor launch patrols is also shown. Both the bridge and the river are closely watched and guarded by the Allies.

Uses Bulletin to Boost Business

D. K. Clarke, of Hamilton, Sends Out Four-Page Monthly Sheet—Guarantee of Quality is Better Sales Point Than Offering Goods at a Low Price

THE hardware store of D. K. Clarke is located in the outskirts of Hamilton. On account of this he found that he did not get the results he desired from newspaper advertising. This does not mean that he does not believe in advertising, as he does thoroughly. In order to gain the results he wanted he instituted a four-page bulletin which he sees are distributed in the districts he desires to reach. The results have been most satisfactory in every ways, he says. Mr. Clarke backs his bulletin advertising by attractive window displays in which he uses lots of price tickets and explanatory cards. He also gains publicity through competitions for the children in his territory. Another plan that has also produced good results is to have large signs placed at prominent corners in his territory directing prospective buyers to Clarke's hardware store.

Eight Years Ago



Mr. Clarke says that customers fully the hardware business for many years as a result of experience he gained while teacher of manual training in Woodstock College. When he left the college in 1911 he came to Hamilton with his son and purchased a grocery and meat business. In the store also was a stock of hardware valued at about $200. Mr. Clarke centred his efforts on building up the hardware, and as a result, a great deal of the grocery and meat stock have been displaced. The business has grown steadily, he says, because he has tried to make the most careful study of the needs of the community and to select a stock of good quality to meet those needs.

Could Help Customers

"The experience I gained as a manual training teacher enabled me to give people a good deal of valuable advice," said Mr. Clarke to HARDWARE AND METAL. "I found that they appreciated it and kept coming to the store for any goods they required, or to ask about work they were planning. By finding out what the people want and stocking accordingly, I have eliminated to a large extent the carrying of dead stock. This means a more rapid turnover and consequently more profits. To be able to back every article that goes out of the store with an absolute guarantee has also been a big help in increasing business. I have found that this frequently means a whole lot more to buyers than being able to offer them something that is cheap."

Service Counts

Mr. Clarke says that customers fully appreciate a dealer who is willing to go to a little trouble once in a while to give them real service. His son, D. A. Clarke, who is with him in the business, took a correspondence school course in plumbing. This has resulted in a good deal of business being secured for the store in connection with this department. A line of pipe fittings which are calculated to meet all the requirements of the average householder for doing gas fitting or heating jobs around the house are carried. The firm does all kinds of repairing and soldering and will cut and thread pipe. A feature of the service Mr. Clarke renders to his customers is prompt delivery by motor. In case a customer asks for an article which is not carried in stock, Mr. Clarke allows him a discount of ten per cent. from the regular retail price if he is willing to wait until the goods can be procured.

THE BULLETIN

FEB., 1919 — D. K. CLARKE'S HARDWARE — HAMILTON

GARFIELD PHONE 1551 — 358-360 OTTAWA ST.

Clearing Sales This Month ON

Oil Heater, Page 1
Coal Hods, Page 3
Ash Sifters, Page 3
Wash Tubs, Page 2

You can save money every month by taking advantage of the prices quoted in "The Bulletin."

No German-made Goods Sold in this Store---Read on Page 2

We sell gas or water pipe and all kinds of pipe fittings up to 1 inch. We sell ½ inch and ¾ inch lead pipe. We do all kinds of repairing. Bring in your kettle or teapot or wash boiler and we'll tell you if it is worth repairing.

WE GIVE YOU 50c for every Bulletin returned to us which is spelt with only one L, as BUL ETIN. All we ask is that you purchase an order for Hardware or Groceries for $2.00 or over. Or if you would rather we will give you a big 85c tin of Dark Oak China-Lac instead of the 50c. Every month there are 100 Bulletins distributed with the name misspelled.

New Perfection OIL STOVES
Reg. $7.00 stove for . . . $5.25
McClary's Famous Oil Heaters
Reg. $7.50 stove for . . . $4.49

Always Burn ROYALITE OIL
in your heater
WE SELL IT
25c. A Gallon
5 gallon lots 23c. a gallon

We don't wish to carry over any of these stoves till next year, so we are giving you a real bargain this time.

NO GERMAN MADE GOODS SOLD IN THIS STORE

We mean it. CLARKE'S HARDWARE will never place German goods for sale in their store.

If every merchant adopted that rule home industry would flourish and German goods would be kept where they belong.

Every loyal Canadian should demand a guarantee that any article he buys is NOT GERMAN MADE, then he would be doing a patriotic duty and at the same time would be benefitting himself.

EVERY LOYAL CANADIAN SHOULD PATRONIZE THE STORES THAT ARE RUN BY CANADIANS THAT WILL NOT SELL GERMAN MADE GOODS.

Would you buy goods at any price, made by Germans on whose hands is the blood of Belgium and of thousands of brave Canadian and British soldiers?

Germany will try by every underhand scheme she can invent to make the world buy her goods.

And you may be sure German goods won't have "Made in Germany" on them.

Germany will sell through neutral countries and the best way to assure yourself that you do not buy German goods is to demand goods "Made in Canada" or in England or in the U. S. A., etc.

Germany will undersell her competitors. She will sell goods at less than cost to get business. GERMAN WORKMEN WILL WORK FOR WAGES THAT NO ENGLISHMAN OR CANADIAN WOULD OR SHOULD WORK FOR.

When a Canadian buys goods that are not made in Canada he lessens his country's prosperity a little. If thousands of Canadians are not particular and buy foreign made goods they impair Canada's prosperity very much.

Two-thirds of the money spent in stores is spent by women. Every loyal woman should give "Made in Canada" goods the preference, and every loyal woman should patronize the stores that try to stock "Made in Canada" merchandise.

Curtain Poles
This is a new line for us. The poles are made of nice pine, 8 feet long, and well finished.
Price 35c each
The poles are not stained, you can stain them any color you like. Stain and brush costs 25c.

Household Scoops
Something every housekeeper needs. They are a very handy size and are just what you need for handling your flour, tea, sugar, etc.
See them in our window.
8c, or 2 for 15c

The illustrations show two of the pages of D. K. Clarkes monthly bulletin. Note the illustrations, general arrangement and statement of prices.

Keeps It Lively

In connection with the bulletins he sends out, Mr. Clarke aims to keep them interesting and lively. To do this he does not devote the entire space to advertising his own goods. Such comment as this is interjected:

"German-made goods put a merchant in a difficult position unless the public back him up. Suppose a Canadian article is made to sell at $1, that $1 represents a fair wage to a Canadian workman and a fair profit to the merchant. A German-made article similar to the Canadian one, only perhaps it is made in Holland or some other neighboring country to Germany, is brought over to Canada and offered for sale to the trade by a pro-German jobber or one who doesn't care. The retail merchant can buy it for perhaps one-third less than the Canadian article. If he is loyal he refuses to handle it. Then some other merchant who isn't so particular buys it and advertises it cheap. In this way the loyal merchant will lose business because he is loyal, unless the public back him up and refuse to buy goods at any price till they know where they are made.

"Let's all pull together. Encourage 'Made in Canada.' Buy the products that come from Canadian factories. Keep our own shop wheels turning. Tell Germany to go to the devil, where she belongs, and take her German-made products with her."

Uses Illustrations

The bulletins are freely illustrated and the cuts that are used are all good, clear electros. The price is given in larger figures than the other matter. Giving the price both in his advertising matter and in his window displays is a feature that Mr. Clarke says pays well. To his window displays he says he can trace many good sales and he arranges new displays regularly.

Different Cards for Each Season

Montreal Firm Aims to Make Changes so Noticeable It Will Be Striking — Directions For Writing Some Attractive Show Cards For Your Own Windows

Written for Hardware and Metal by ROBERT T. D. EDWARDS

MANY firms throughout the Dominion have excellent systems for show-carding their stores. Some of these systems are based on one principle and some on another. Some from an economic point of view, others from a uniformity standpoint. Others use their cards as for the decorative effect to their store. Many have all three principles embodied in their show-carding scheme, but you will find that all systems worked out are subject to local conditions, both from the kind of trade catered to and the various systems necessary to secure business in the various localities.

These various systems are interesting indeed, especially to those who use this form of advertising.

There is a store in the City of Montreal where the system for placing show cards on merchandise is worth while knowing. It has a somewhat different method to that usually used by the departmental store.

The principle of this firm's system is to change its cards often; to give the public a complete set of show cards to look at least every season of the year and to make the change so striking that it will be quite noticeable. For instance, they may use a white card for the winter months and as soon as the spring season comes they in all probability will change to a light green, and then from green to some other noticeable color for the summer. They change their cards for the various seasons and they find it puts a lot of life into their inside advertising.

SUGGESTIONS FOR SHOW CARDS

Give Your Wife A Surprise That She Will Appreciate, One of Our Electric Irons.

Our Washing Machines Are Real Labor Savers.

Keep Your Lawn In Good Shape. See Our Mowers, Garden Hose, Rakes and Sprinklers.

We Have Everything For Your Garden.

See Our Specials In Aluminumware.

Safety Razors That Will Give You Genuine Satisfaction.

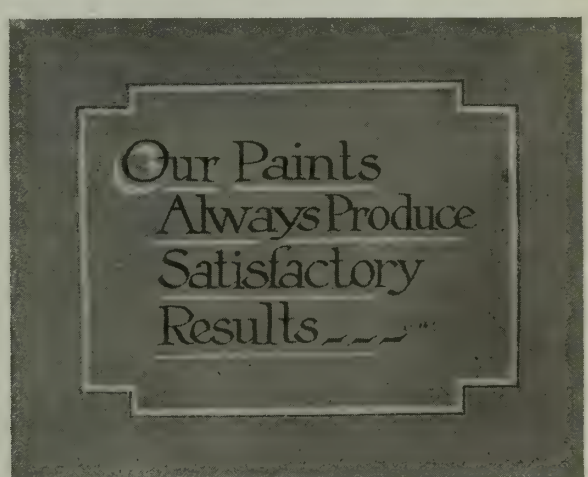
There are a good many firms who do not believe in using highly colored cards for other than sale purposes, but this firm seemingly has had good results from this method and we pass it on for what it is worth to other firms.

Must Watch This

One thing that is most important in show-carding a store after this system is to see that only one color card is up at one time. It has been found that clerks very often follow the line of least resistance, and if yellow cards are in use and they have nothing but a green card in the department to meet the requirement they would use it rather than take the trouble to get a new one. It should be instilled into those in charge of the cards for each department to see that nothing but the one color card be used at one time.

Two Good Cards

Your attention is called to the two card reproductions on this page. The card referring to "good workmanship" will apply in the case of a display of wedding invitation cards, visiting cards, embossed correspondence papers, etc., a branch of trade which is not developed as it should be by some stationers. This half-tone is reproduced from a card done with white lettering on a brown mottled board card.



The other card is done on a medium dark mat board with a broad gold border design. The lettering is a modern Roman in black ink.

From a show card standpoint Montreal is a splendid city. The firms not only use show cards generously, but they use good ones. Many of the firms have excellent show-card writers. Their work is of an entirely different style to that of Toronto cardwriters, but it is clean-cut and many good ideas may be gleaned from the cards.

Their brush stroke work is exceptionally well executed. This is a very important factor in the work of any cardwriter.

A scroll card such as shown in the above illustration can be treated in many different ways and the taste of the writer may produce effects which are not only striking, but very attractive. There is practically no end to the number of combinations that may be obtained.

Here is another style of show card that lends itself very readily to obtaining a distinctive and very satisfactory effect. It is one that is easily made and the lettering with the underlines stands out in a manner that carries its message to hte prospective customer effectively.

EDITORIAL COMMENT

GET THE PRESS TO HELP

ON another page of HARDWARE AND METAL will be found an account of how the daily newspaper in an Ontario city is getting behind the "Paint-Up—Clean-Up Campaign." There is a lesson here for hardware men, not only in the cities, but in the towns as well, to go after and secure the co-operation of the daily press in this work. There is a good deal of common ground in this matter on which the merchants and editors can work, and it is a pretty safe general statement to make in saying that if properly approached the editors will be ready and willing to do their share. Not a few editors have already started in a small way to urge citizens in general to clean up and take some civic pride in keeping their homes looking bright and clean. Others have been basing their appeal on the property-owners' duty to have things looking their best when the boys come back from overseas. Still others have gone after the question from the standpoint of business, pointing out that it was the duty of the house owner to protect his property against the ravages of the elements by the use of paint. The trouble with many of the editors is that they are so busy that they do not always have the time to write as long an editorial or article as they would like to. Others have not the facts at hand that many dealers in paint could give them in a few minutes. The editors are willing enough to co-operate in any way they can as a rule, but a few suggestions from the men handling paint on the best ways to present the case to the public, backed by a few facts that will drive the points home, would help a lot. There is nothing like co-operation in any work of this kind in obtaining results. A combination which includes the dealers, citizens or authorities interested in any movements that make for better towns or cities, and the press is certain to produce results. There must be some driving force behind every accomplishment and as the paint dealers are perhaps more vitally interested in the matter than anybody else, it is up to them to take the initiative and start things moving.

THE HOUSING SCHEME

REQUEST after request for Government funds to help in relieving the shortage of dwellings is being received by J. A. Ellis, who is directing the work in Ontario. Nearly $5,000,000 has already been asked for by twelve of the smaller cities and towns and requests are now being prepared and will be presented within the next thirty days by fifteen others. Mr. Ellis expects that by June there will be at least fifty or sixty municipalities who will have their housing propositions well under way. General reports that come in from all parts of the country indicate that a large amount of construction work is under way and that more is constantly developing in spite of the high prices of materials. In some sections a scarcity of brick and lumber has developed, which is retarding construction that would have gone forward. Hardware dealers report that business has only been fair in comparison with normal conditions, but that it shows as far as the building situation is concerned, a decided increase over similar periods in the past three years.

STEEL AND FOOD PRICES

STEEL men are at a loss to understand why it is that just when they made a reduction in their prices new records were made in many lines of foodstuffs. Discussing the situation with HARDWARE AND METAL, the representative of one steel firm declared that while the steel firms had taken the lead in an effort to stimulate business by making a cut in their prices, no efforts along a similar line are being made by those in other industries. He scored particularly those through whose hands the country's food supplies are handled and emphatically declared, that in his opinion, it was time that the Government took some action to make them bring down prices. Inquiries made by HARDWARE AND METAL indicate that every time the Government has had anything to do with regulating a commodity, the prices went up and went up quickly. The food situation, it seems, revolves entirely about the basis of supply and demand. In England, France and other countries there are millions of people who have been living on short rations for a long time, not because they did not have the money to buy, but because the ships required to take food to them were urgently required for transporting other supplies. Now, they are in the market for all the food supplies Canada can send them, and they are willing to pay practically any price at all to get the goods. Obviously, it will be impossible for wages to decline while living expenses are increasing and on labor costs depend to a very large extent

production costs and prices. The indications are that in many of the trades in the next few weeks workers will demand higher schedules of wages. This has been done in a number of instances already. The general result makes for an uncertainty of conditions that is not in the best interests of business. For instance, in some sections of the West, building trade which until recently showed considerable promise, is now stagnant as a result of the demands of carpenters and others. Just what will happen it is impossible to predict.

KEEP AN EYE ON THE HUN

DESPITE all her internal troubles, governmental and otherwise, Germany already is carefully preparing to seek a large share in the world's markets. That means in Canadian markets as well as the others. The plan may seem audacious, but it is not too bold for the Hun to undertake. Not that he will endeavor to do it openly. No one realizes more fully the storm that would follow or the dire results that would happen. The shrewd business leaders of the Hun appreciate perhaps more than anyone else in the world to-day that when peace is signed it will be the beginning of a new war for trade and commerce—and a war that is going to test Germany's business resources to the limit if she is to stand any chance of success. Reports already received from abroad show that industrial Germany is reaching out in every direction to try and strengthen her commercial organization for the coming struggle. One organization, the Company for Home and Foreign Undertakings of Hamburg, has a capital of $5,950,000, and is planning a series of broad measures for the revival of trade and the placing of German goods. No one has learned better than the German business man the value of accurate information concerning trade conditions in other countries and the opportunities for trade that may open up in foreign markets. Several special commissions have been organized and are studying foreign markets. Still another scheme of the Huns is the establishment in other countries of Boards of Trade, with all signs of the German end of the organization concealed. Data that is invaluable is transmitted quickly and accurately through this medium. The Hun knows that he will be watched as closely as the combined efforts of the Allies can watch him and that every effort will be made to limit his trade. It is up to him to find a way out to save his commercial existence, and one of the simplest ways and a way that naturally appeals to him is by cunning and subterfuge. In this he will find plenty of unscrupulous helpers in various parts, not only of Europe but perhaps right in Canada and the United States.

WHAT OTHER EDITORS SAY

ELEVEN sacks of catalogues from a Toronto mail-order house arrived at the local post office on Wednesday. As this house would not continue this policy unless it paid them, a very great deal of money from this locality must find its way to Toronto. Surely a great many people in this section have either forgotten, or never heard of Abraham Lincoln's famous remark in regard to supporting home industry. He said: "When you buy goods abroad, you get the goods, but the other fellows get the money; but if you buy at home you get both the money and the goods." This is absolutely correct. Your home merchant can give you just as good value for your money as the mail-order firm, if you treat him the same, and in addition to getting the goods, you, as a shareholder in your community, get the benefit of what the home merchant spends, and does, to make that community a better place to live, and consequently makes your property more valuable. How much does the mail-order house do in this way?—Wheatley *Journal.*

"I INTEND to build a home, or a store, or a factory—but I intend to wait till prices go down." Waiting for prices to go down can very easily be overdone. The man who waits too long may find that the parade has gone by leaving him all dressed up and no place to go. Prices in many lines are still too high—profits are still too large. But prices probably never will go back to the old level. They never should. Only a calamity would put them back there. Prices hereafter will have to support a higher wage scale than prevailed in 1914. Virtually everybody is agreed on that; some because they realize that it is fair and just and right; some because they realize that only by good wages can a Canadian worker support a family that will produce the kind of citizens Canada needs; and some because they fear that if the causes of discontent are left untouched, they may breed such dangerous radicalism as Europe is experiencing. Some prices are unduly high. Some wages are still being paid that probably cannot stay up where they are, but those who wait the return of pre-war prices will wait in vain, and if they wait too long it may prove costly to them. Presently there will be the psychological moment for jumping aboard the chariot of industrial activity and those who reap the dividends in years to come will be those who leap in time and not stand back waiting too long.—*The Echo,* Pincher Creek, Alberta.

IT may be said, then, that the daylight saving scheme would be all right and a good thing for the country if all could or would adopt the change of time. But if we are to be governed by the will of the majority, or even the interests of the majority, there will be and should be no change in the time observed in winter and summer.—Lucknow *Sentinel.*

THE loose threads of commercial activity cannot be picked up too quickly. The psychological factor is quite as large in business as it is in other phases of human affairs. The steel industry is learning that the period of readjustment of business to a normal basis cannot be accomplished immediately, but little doubt is entertained that all this will be achieved in good time. The decision to reduce steel prices to a level where commercial buying would be stimulated was not entirely unanimous, but the percentage of the trade that preferred to hold off from making the change was not large. The amount of business that has passed since the new scale came into effect has not been as large as was anticipated by some of the leaders of the steel industry. The readjustment of business must start at the bottom in the opinion of the steel men. The viewpoint of the buyer must be readjusted to the changed conditions, and he must forget pre-war costs when considering present values.—The *Globe,* Toronto.

EVENTS IN THE TRADE

Business Changes

Crysler, Ont.—J. A. Dupuis & Co., hardware, are discontinuing business.

Walkerton, Ont.—John Brown, of Elmwood, Ont., has purchased from J. H. Tolchard the hardware business which Mr. Tolchard recently bought from Paterson Bros.

Fire Losses

A loss of several hundred dollars was caused by a blaze in the store of the Orillia Hardware Co., Ltd., at Orillia, Ont.

Fire, which is supposed to have been started by lightning, started in a tank at the Canadian Oil Company's refinery at Petrolia, Ont., containing 600 barrels of paraffin distillate, and destroyed a great deal of the oil.

Personals

James A. Hossack, sales manager, Lufkin Rule Co., of Canada, Ltd., has left for Western Canada. Mr. Hossack intends to go through to the coast.

Frederick Sara, manufacturer's agent, Calgary, Alta., is spending some time in Ontario, calling on firms whom he represents in Western Canada.

D. J. Lamerieux, general manager of the Pratt & Letchworth Co., Brantford, Ont., manufacturers of malleable iron, has been appointed director of sales for the Canada Car and Foundry Co., Montreal, and vice-president of that and subsidiary companies. He is succeeded as manager of the plant at Brantford by R. J. Hopper.

Trade Notes

The Valleyfield Iron Works, of Montreal, has been dissolved.

The Acme Shear Co., of Bridgeport, Ct., have appointed A. J. McCrae, 23 Scott Street, Toronto, as their Canadian representative.

The Acme Waste Manufacturing Co., of Toronto, which recently built an extension to its plant is now occupying the new premises.

The Seaman-Kent Co., of Meaford, Ont., manufacturers of hardwood flooring, have moved their head office and sales department to Toronto.

The Armoroid Sales Co., 486 Yonge St., Toronto, has secured the distributing rights for Toronto and Manitoba for Armoroid puncture proof products.

The Pacific Roofing Co., Limited, of Vancouver, expect to commence operations within the next week and manufacture prepared roofing.

Arrangements have been completed by F. R. Hall, president of the Northwestern Chemical Company, Marietta, Ohio, by which the firm's products will be made in Montreal shortly.

J. A. Aitcheson, formerly with the Adamson Hardware Company, of Orangeville, Ont., has withdrawn his interest in the firm and has taken over an automobile agency for Elora and vicinity.

Donald F. Johnson, 486 Yonge St., Toronto, has secured the agency for the Dominion for Wedgerite piston rings, and for the Standex automatic lubricating system for Fords.

The Owl Metal Co., Limited, Winnipeg, have started the manufacture of soldering salts, liquid and paste. They are also preparing to put out, when their new plant is completed, copper, red brass, yellow brass and bronzes in ingots.

John Tait, one of the partners of Buchanan & Tait, Galt, Ont., has purchased the store occupied by that firm from Theron Buchanan, his partner. While Mr. Tait is owner of the property there will be no change in the business and Mr. Buchanan will continue as partner.

Frederic Sara, manufacturers' agent, Calgary, Alta., has added to his other lines the agency for Cannon Iron Foundries, Ltd., Deepfields, near Billston, Staffs, England, for their lines of hollowware, castings, enamelled bath supplies, fittings, etc. Mr. Sara has also secured the agency for Christopher Johnson & Co., Sheffield, England, on their lines of cutlery, etc.

Montreal News

Mr. Clark, of the Atlas Metal Co., Montreal, returned last week from a trip to England.

J. E. Beauchamp, manufacturers' representative, has removed to 321 Craig Street West, Montreal.

J. F. Walsh, of Toronto, general manager of the Canadian Manufacturers' Association, was in Montreal on Tuesday.

George C. Davis, general manager of Frothingham and Workman, Ltd., Montreal, returned on Wednesday from New York.

Ernest Bureau, representing Richardson and Bureau, Montreal, is this week calling on the Prince Edward Island trade.

The Montreal staff of the Canada Metal Company are visiting the head office at Toronto this week, Mr. Scott, manager, accompanying them.

Mr. Doolittle, of St. Marys Wood Specialty Co., Ltd., St. Marys, Ontario, was in Eastern territory last week, stopping at Montreal.

J. R. K. Bristol, of Toronto, and connected with the Customs tariff department of the Canadian Manufacturers' Association, visited Montreal during the week.

Quebec City Items

H. Doyle, of Wm. Doyle, Reg'd, is again at his desk after an absence through illness. Mr. Doyle passed through a critical attack of the influenza last fall and was again taken to the hospital a few weeks ago with another complaint, and an operation was necessary.

A window of considerable interest to steamboat men was dressed recently by the Brosseau Ship Hardware Co., St. Joseph Street. This contained ships lanterns, compasses, ships' logs and log lines, and a variety of other kindred goods. Various twines, waste, etc., were used in the base of the window, and the general effect was effectively interesting.

The Chinic Hardware Co. has been displaying various lines of builders' hardware to good advantage lately. This is the time to show the line, and Mr. Lachance, the manager, stated to HARDWARE AND METAL that he anticipated a very good season for these goods.

The Doyle Hardware Co., Reg'd, expects to make improvements in connection with their displays in the centre of the store. Certain fixtures will be removed and silent salesmen arranged to contain various seasonable lines. At present this firm is showing aluminum ware, tools, and builders' hardware in their windows.

Incorporations

Hyatt Steel Products, Limited, capital $300,000, will have its head office in Vancouver.

Electro Tin Products Limited, head office, Brantford, Ont., capital $300,000, plans to operate furnaces for smelting and reducing ores and minerals.

Oliver Lee, Limited, head office, Toronto, capital $50,000, plans to deal in dyes, glue, paints, varnishes, motor vehicles, toys, enamelled and plated ware.

The Stephenson Robillard Company, Limited, head office Montreal, capital, $25,000, plans to manufacture and deal in silverware, glassware, and fancy goods.

International Machinery and Supply Company, Limited, head office, Montreal, capital $100,000, plans to manufacture and deal in iron and steel goods and machinery.

Ayers Richer, Limited, head office Montreal, capital $25,000, pans to manufacture and deal in automobiles, motor trucks, tractors and launches.

Winnipeg Notes

Benjamin Thompson, Ogema, Sask., was in Winnipeg last week.

John Rose, manufacturers' agent, representing the Toledo Metal Wheel Co., St. Louis, as well as various other lines, is in the city during the week calling on the jobbing trade.

John J. Corbett, former credit manager Miller Morse Hardware Co., Winnipeg, but who is now located at St. Paul, was a visitor in Winnipeg last week. Mr. Corbett reports conditions in St. Paul as good with splendid business being done.

I. E. Ermentrout, secretary-treasurer of the Penn Hardware Co., Reading, Pa., one of the large builders' hardware manufacturers of the States, spent a few days in the city, looking over the prospects for the coming season's business, and reports that a banner year is expected in the south this year.

Want Duty Removed On Cement and Oils

Ottawa.—There has been another Government caucus, principally taken part in by the Western members who are still clamoring for tariff reduction, and do not mean to be put off. On Tuesday the Western ministers, Messrs. Calder, Crerar, Burrell and Meighen sat in with the low tariff men and heard what they had to say without saying very much themselves.

Harmony prevailed. It takes two to make dissension, and the ministers listened attentively to the representations made although they said they could not commit the rest of the Cabinet to the sympathy which they themselves entertained towards the sentiments expressed.

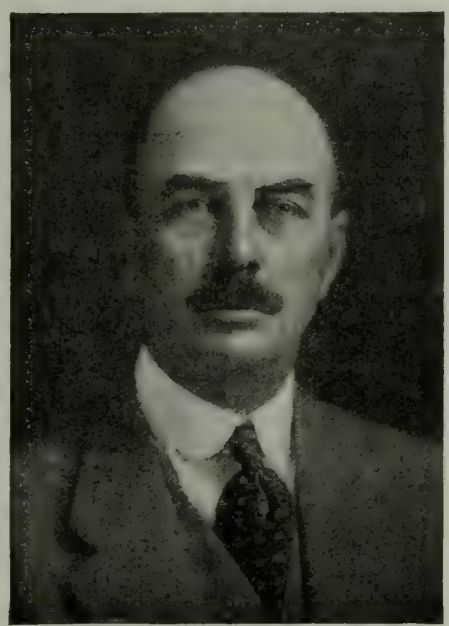
The proposals made regarding the tariff were along the line of those made at previous caucuses. The removal of the duty on cement and oils was asked for. A big cut was proposed in harness and leather goods. Small tractors are now on the free list, and it was asked that tractors of greater horse power up to 15-30 be also made free, and good deal of sentiment being expressed for the removal of duty from all tractors except the very largest ones, of which there are few used.

MAY REVISE DEMURRAGE RATE

The Canadian Manufacturers' Association will take up with the railways very shortly the question of putting demurrage rates back on the schedule that was in effect prior to the war. At the time the rates went into operation it was understood that the plan was to be only adopted temporarily in order to make sure that every possible car was handled as promptly as possible for war work. Now this exigency is past and the manufacturers believe that the old rate should be restored. The pre-war tariff was $1 per day. At the present time $1 is charged for the first day, $2 for the second day, $3 for the third day and $5 for each succeeding day.

TRADE COMMISSION TO GOVERN EXPORT LICENSES

All functions and powers relating to licenses for export of any commodity from Canada formerly vested in the War Trade Board and the Canada Food Board have been transferred by order-in-Council to the Canadian Trade Commission. Proclamations on trading with the enemy are still in force. The inclusion of a commodity in a restricted or prohibited list of imports does not necessarily preclude its export from Canada, but the consignees must obtain an import license from his own Government.



A cablegram received from the Canadian Mission in London states that notwithstanding certain orders of the British Army Council, leather from Canada may be imported under general license.

Charles O. Stillman is New President of Imperial Oil Company

CHARLES O. Stillman, who has been vice-president of the Imperial Oil Company since 1911, has been selected to fill the vacancy created by the death of the president, Hon. W. J. Hanna. A. M. McQueen becomes vice-president.

The new president had been intimately associated with the late Hon. W. J. Hanna for twenty-two years. He had charge of the construction of the Imperial Company's big refinery at Sarnia, Ont.

Mr. Stillman, who is 55 years old, is a native of Cleveland, Ohio. He began his career as an office boy in the offices of the Standard Oil Company, during his summer vacations at Bayonne, N.J. In 1890 he was transferred to Buffalo as superintendent of the plant, and in 1897 went to Sarnia, Ont., as superintendent of the Bushnell Co., Ltd. In Sarnia he had full charge of the planning and construction of the Imperial Company's plant. In 1899 he was appointed a director and superintendent of the Imperial Oil Co., Ltd., of Sarnia. In 1901 he was appointed general superintendent and in 1910 assistant general manager. He became vice-president in 1911.

C. O. STILLMAN

Who succeeds the late Hon. W. J. Hanna as president of the Imperial Oil Company.

A. M. McQUEEN

The new vice-president of the Imperial Oil Company

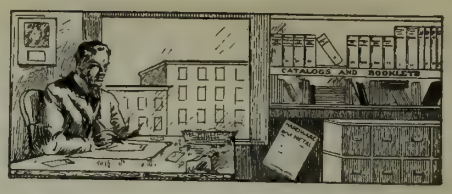
In 1914 he was elected president of the Imperial Pipe Line Co., and president of the Queen City Oil Co. He removed from Sarnia to Toronto three years ago. Mr. Stillman is a member of the Council of the Board of Trade in Toronto.

Mr. McQueen, the new vice-president, is a native of Petrolea, Ont., and has been in charge of extensive drilling and prospecting work carried on by the company in the Northwest since 1916. is also vice-president of the International Petroleum Co.

Bogey of German Competition in Hardware Has Disappeared

DISCUSSING the prospects of German competition in the cutlery trade the Ironmonger, of London, England, says:

"The possibility of German cutlery asserting itself again in the near future is being freely discussed by the trade in Sheffield, and although direct and reliable information on the subject is meagre such as is filtering through points to the conclusion that this once formidable competition is dead, and unlikely to be resurrected for a long period, if ever. It is now obvious that the absurd statements which were made during the war that Germany had accumulated vast stocks of hardware in readiness to be unloaded upon the world's markets at cheap prices immediately upon the restoration of peace were inventions. We have often ridiculed these statements. Sweden, Norway, Holland, and Denmark, which were formerly among Germany's best customers' are seeking to place large orders in this country for cutlery and tools. Sheffield has been visited lately by a number of buyers from these markets, who state that no German cutlery has been offered to them for a long period, and that they have no expectations of obtaining further supplies for the present. So far as they can learn, what little is being made is at prices which exceed those of Sheffield. It is known that the wages of German cutlery workers have gone up by 150 per cent. compared with the days prior to the war. That the countries mentioned offer a fruitful market for British hardware cannot be doubted, as none of them manufacture to any considerable extent, and, having been enriched by the war, they can afford to pay high prices for imported goods. Unfortunately the British cutlery industry is not in a position to accept these orders, owing to its inadequate output.



The progress of demobilization has increased the supply of labor, but there is no corresponding increase in production. As a whole, the men are working much more leisurely than when their remuneration was less than half what it is to-day, and right through the trade there is a marked tendency to go easy. They undoubtedly worked extremely hard during the four years of war, and may be now suffering from the reaction of that time of tension. Some of them, however, admit that they prefer less work to high earnings, and others actually refuse to exert themselves because a portion of the extra remuneration would be taken from them in the shape of income tax. In the aggregate the present output of cutlery is probably double what it was before the war, but the progress is not commensurate with the increase in demand, and moreover the requirements of the army continue on a large scale. Unquestionably a vast amount of trade in cutlery and tools is going a-begging, and people are naturally wondering whether these orders will be snapped up by the United States and Canada. Goods from both countries are being offered in Great Britain, and in markets formerly catered to by Sheffield and Germany.

Will Meet April 17, to Discuss Cash Plan

A meeting between representatives of the Canadian Manufacturers' Association and the members of the Canadian Railway War Board will be held in Toronto on April 17, to try and reach an agreement in connection with the proposal of the railways to put a cash basis plan into effect on June 1. This plan as stated in previous issues of HARDWARE AND METAL, was scheduled to become effective on Mrch 1, but a clause in reference to bonding was so objectionable to the manufacturers and so much trouble was caused all over the country when the provisions of this section became known that the Board decided to lay the matter over until June 1. The manufacturers have not receded in any way from the stand they took formerly, that the clause in reference to bonding was not only unnecessary but was likely to cause so much misunderstanding and confusion as to make the plan unworkable. This clause will feature the meeting on April 17, and an effort will be made to have it removed altogether. In addition the manufacturers want better arrangements made in connection with overcharges and interest on overcharges.

Retailers Appreciate Work of E. M. Trowern

Ottawa—E. M. Trowern, of the Retail Merchants' Association has just received a very fine acknowledgement of his services, from the officers and members of the Canadian National Jewelers' Association in the shape of a solid gold Waltham watch of the highest grade, suitably engraved with his monogram and the reason of the presentation. It was given as a recognition of his services in preparing and securing the passage of the gold and silver marking act, and having it placed on the Dominion statutes. The object of the act is to see that all gold and silver ware made in Canada is marked according to its actual quality. This is a protection to the trade as well as the public. The presentation took place at the annual meeting of the Association in Toronto, and the fact that he was formerly a retail jeweler in Toronto himself makes Mr. Trowern appreciate this all the more.

MILLER MORSE HARDWARE CO. LIMITED

The Miller Morse Hardware Co., Limited, Winnipeg, has issued Catalogue No. A-21, containing 76 large pages in which are listed automobile accessories and sporting goods. Section A, which comprises fifty pages, consists of fifty pages all attractively illustrated. In this section is covered the tires, tools, pumps, chains, spark plugs, lamps and flashlights, batteries and starting systems, bumpers, springs, finishes and varnishes, oils and greases, lifting jacks, wrenches, and general accessories carried. Section B lists not only baseball, tennis and football supplies, croquet and quoit sets, but bicycles and bicycle sundries, hammocks, lawn furniture, fishing tackle, sulkies, go-carts, baby carriages, boys' wagons and velocipedes and similar lines, also small bore rifles. Readers of HARDWARE AND METAL who desire a copy of the catalogue may obtain one upon request.

E. T. WRIGHT CO., LIMITED

"Summer Suggestions for 1919," a forty-eight page catalogue issued by the E. T. Wright Co., Limited, of Hamilton, Ont., lists the oil stoves, vapor stoves, oil and gas ovens, funnels, oil measures, oilers, spray pumps, water coolers, carpet beaters, ice boxes and refrigerators, lunch pails, conductor pipes and elbows, milk cans and pails, bread mixers, cages and lanterns, and other lines manufactured by the firm. It is attractively illustrated throughout. Readers of HARDWARE AND METAL may obtain copies upon request.

THE BROWN BOGGS CO., LIMITED

Catalogue No. 25, issued by the Brown Boggs Co., Limited, Hamilton, Ont., is a most attractively printed volume of 191 pages, in which are listed the lines of machines and tools for sheet metal, tinsmiths' tools and machines, presses, dies, shears, punches, drop hammers, canners' processing machinery, evaporating machinery, and special machinery manufactured by the firm. The catalogue is splendidly illustrated. Copies will be sent upon request to readers of HARDWARE AND METAL who are interested.

STALL & DEAN

The spring and summer catalogue issued by Stall & Dean, Brockton, Mass., and Chicago, lists the many lines of sporting goods manufactured by the company. It contains forty-eight pages and is profusely illustrated, showing baseball goods, bathing suits, sweaters, tennis and golf supplies, etc. Copies of the catalogue will be sent to readers of HARDWARE AND METAL upon request.

Montreal's Motor Show Draws Crowds

WHILE many difficulties presented themselves, the Montreal Motor Show, held this week, was fairly well attended and aroused a good deal of interest.

Secretary T. C. Kirby was unable to secure an indoor heated space, and, accordingly, had to make the best arrangements possible under the circumstances. Under his direction, the Victoria Rink on Stanley street was cleared of ice and many loads of cinders brought in. These made a fairly good floor and the building was made quite comfortable.

Decorations were suitably carried out and festooning of vari-colored bunting, flags, baskets of flowers, etc., made a suitable setting for the display of cars, tractors, trucks, etc., which found ample room on the large floor space.

Some of the Exhibits

Many fine models of cars were displayed, and there was some variety in the way of specialty lines made by Canadian and United States firms.

The Soldiers' Civil Re-Establishment and Re-Educational classes had displays.

It is expected that the net profits of the exhibition will be about $10,000. This will go to the Children's Hospital.

Music was dispersed by Gagnier's orchestra.

The complete list of exhibitors, as published in the program, is as follows:

Art Ross Sales Co., Auto Indicator Sales Co. of Eastern Canada, Ltd.; Automobile Snow Attachment Co., Auto Digest, Bramson Auto Co., Brydges & Leney, Canadian Motor Sales, Chipman, Ltd.; Cleveland Tractor Co., Denby Motor Truck Co., Dixon Vulcanizing Co., Detroit Electric Co., Dominion Supply Co., Dufoe Eustice Co., Four Wheel Drive Auto Co., Foss Machinery Co., Geo. Primm, Ginsberg Motor Co., Grace Motor, Ltd.; Gravelline & Kennedy, Goad & Co., Jennings, Ledoux Co., Ltd.; J. Feeley & Co., Kerosene Equipment Co., Kelly-Springfield Tires Co., Kerosene Equipment Co., Lamontagne, Ltd.; Liquid Air Society, L. Lawrence & Co., Michelin Tire Co., Montreal Automobile Exchange, Montreal Automobile Association, National Steel Car Co., Paige Sales & Service, Ltd.; Partridge Rubber Co., Percy Semelhack, Riley Hern, Schwartz Fuller & Co., The Montreal Motorist, Simplicity Ford Wheel Co., Tuckwell Bros., Welding and Supplies Co.

An extensive display of all kinds of springs was made by Albert Terry and Sons, Ltd., Redditch, England.

Nine Demonstrations At Spring Opening

Nine demonstrations in addition to a tea and food sale were the features which were used on Saturday last by the hardware firm of Ingram & Davey, at St. Thomas, Ont., to keep their store crowded on the occasion of their eleventh annual spring opening. Ingram & Davey are strong believers in the power of advertising and used a four column spread, the full length of the page to tell the people of St. Thomas and vicinity about the demonstrations that were going to be held and also about a lot of "extra specials" they had to offer. The advertisement was most attractively arranged. "Spring Opening" in display type set four columns wide was followed by some general matter about the bargains offered, the spring and summer goods that were to be shown and facts about the demonstrations. This matter was also set four columns wide. The two outer columns of the ad were used to list the bargains and "specials," while in the centre matter set double column and a lot of it in display type told about the nine demonstrations. A special demonstration by a lady demonstrator showing floor and varnish stain was featured. Then came a demonstration of mixed paints by an expert from the factory. To everyone who purchased a half gallon of paint a coupon was offered good for 25 cents in any department. Next was featured a demonstration of a full line of gas ranges, then roofing, shingles, and building papers handled by an expert from the factory. An expert demonstrated the vapor stoves handled by the firm and another expert demonstrated a wall finish. Experts from the factory were in charge also of demonstrations of wire fencing, a patent churn and an electrical display of appliances. Last but not least to hold the crowd through the afternoon was a tea and food sale from 2 to 6, held under the auspices of the Young People Association of a leading church. It is stated that from every standpoint the demonstration was one of the most successful in the history of the firm.

APPOINTED ASSISTANT GENERAL MANAGER

John M. Gunn, foundry manager of the McClary Manufacturing Co., London, Ont., was recently elected a director of the company, and promoted to the position of assistant general manager. H. V. Kenerson, who has been head of the cost accounting department takes the position of foundry manager. Mr. Kenerson was released by the company to join the American army but has received his discharge.

DAYLIGHT SAVING WILL BRING MORE BUSINESS

Galt, Ont.—Hardware men here are pleased with the attitude of the authorities in adopting daylight saving time. The merchants, manufacturers and mechanics were unanimous in wanting summer-time. Daylight saving is a good thing for business hardware men say, as it gives the worker the opportunity of doing a lot of work about their homes in the evenings, gardening, painting, etc., and the merchants are making a strong bid for business in these lines.

TRADE INQUIRIES

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

674. **Agencies.**—The principal of one of the leading South African firms will be in Canada at the end of March or first week in April, for the purpose of making agency arrangements in builders' hardware, bathroom supplies, baths, plumbing material, household utensils, stoves, farmhouse utensils and tools of all kinds, wire, all kinds, and lumber. All firms desiring an interview are requested to address Commercial Intelligence Branch, Department of Trade and Commerce, Ottawa.

747. **Oils and fats.**—A correspondent at Antwerp, Belgium, asks for names of Canadian manufacturers of stearine, oleine, lubricating oils and greases, cylinder oil, engine oils, spindle loom soluble oils, cutting compound, dynamo oils, wool oils, etc.

750. **Automobile accessories, etc.**—A London firm of motor and cycle accessories merchants desires to get into touch with Canadian manufacturers of automobile and motor-cycle lamps and generators; horns (both mechanical and bulb); mirrors, tool kits, sparking plugs; and general items of car equipment.

751. **Picture-frame mouldings.**—A London company desires the addresses of Canadian manufacturers of picture-frame mouldings who can fill export orders.

752. **Upholsterers' leather.**—A firm in Scotland asks to be placed in touch with Canadian manufacturers of upholsterers' leather for use by furniture makers, motor-car body builders, and for ship building. They are prepared to buy either outright or upon a commission basis, and to submit samples of hide patterns as used by their customers.

754. **Rolled gold jewelry, nickel and alarm clocks.**—A London firm wishes to get into correspondence with Canadian manufacturers of rolled gold jewellery who can fill export orders. They also inquire for Canadian manufacturers of nickel and alarm clocks.

758. **Alarm clocks and mantle clocks.**—A firm of London manufacturers' agents and importers desires the addresses of Canadian manufacturers of alarm clocks and mantle clocks.

760. **Tool handles.**—A merchant having an extensive business in South Wales desires to secure supplies of tool handles in hickory, ash and maple from Canada. Handles required for all kinds of colliery, garden, agricultural and domestic tools in large quantities. Would also consider offers of pit-props.

761. **Manufactured goods.**—A firm of British sales agents for American manufacturers having branches in London and Paris wishes to secure supplies of Canadian manufactured goods in the following lines: Household hardware, ironmongery, woodenware, tools, tobacconists' goods, brushware, stationery and school supplies, toys, working gloves, restaurant supplies, shoe sundries, shoe grindery (article for shoe manufacture), lamps.

763. **Raw products and chemicals.** A firm in Stockholm, Sweden, wishes to get into communication with Canadian exporters of all kinds of raw products and chemicals for industrial purposes and especially with firms who have not yet established connections with Scandinavian countries.

765. **Glass tubes.** — A manufacturer of tubes in London who has an immense business, wishes to secure in Canada 60,000 dozen glass tubes. Samples at the Commercial Intelligence Branch, Department of Trade and Commerce, Ottawa.

THE CLERKS DEPARTMENT

John McCormack Tells About the Songs People Like Best

Famous Irishman Was Making Records at $5 Each Not Long Ago—Never Loses Interest in His Audiences, and Studies Their Moods Closely All the Time

"I SUPPOSE there are a round dozen of songs people ask for oftener than they do for others," says John McCormack, the famous singer, discussing his work in the "American Magazine."

These songs come out of the heart of the people. And to do that is to have a talisman which will always give them the entrance to the heart of the people.

The appeal of a heart song is a double one: musical and human; and the way to divide it, I think, is this—five per cent. musical and ninety-five per cent. human. The words are the expression of the human appeal. That is why, to an English-speaking audience, I almost always sing in English, and do it with as perfect enunciation as I am capable of.

Sing Carelessly

It is a curious thing that most singers will study and practise indefatigably to achieve perfect diction in French or Italian, or German, but will sing English with a careless and slipshod enunciation which makes it perfectly unintelligible. I can't understand their point of view. Take an average American audience, for example. Perhaps two per cent. of them will understand French. The other ninety-eight per cent. does not. But it does understand English. Very well, it would seem the courteous as well as the sensible thing to take as much trouble to satisfy the ninety-eight per cent. as the two per cent.

Often Asked For

A song which is asked for perhaps as often as any other is "Ah, Moon of My Delight" from "In a Persian Garden," by our old friend Omar Khayyam. This beautiful lyric was set to music by Liza Lehmann, who died recently.

Take the war songs, too. Some of them have rhythm and melody and a martial swing; but you want something more than that. You want the words—because you want the thought and the feeling behind the words. Those songs are hallowed by associations. And it is chiefly because they have words that those associations have clustered around them.

Little Difference

It makes little difference about the "musical quality" or the "literary value" of a popular patriotic song. You may call it trash from both these points of view. But when it is sung by a nation in war time it is lifted above the plane of what is "musical" and what is "literary." Take "Over There," for example. Who cares about its musical intervals or its technical excellence now? During a great crisis of our national life, two million soldiers, and millions of other Americans, put into it the fire of their fighting spirit. They fairly flung it in the face of the enemy. And now, you cannot strip that song of its associations with marching soldiers and shouting crowds.

Many Associations

I believe that associations cling about many songs and give them a great human appeal, even when we know nothing definite about their history. That is true of folk songs. They may be generations old. But away back there, somewhere, those songs were the outpouring of a people's joys and sorrows, and so those feelings find their echo in our hearts to-day. One reason why certain songs live, as we say, is that they go on gathering associations.

Do you think, for instance, that a song like "Believe Me, if All Those Endearing Young Charms" could possibly mean so much to us if it had been written only a few months, or even a few years ,ago? No! there is some indefinable atmosphere about it, gathered by time and through the myriad human emotions which have clustered around it.

Why They Like Them

Perhaps this partly answers the question about why people like certain songs. Another reason, of course, is that we respond to what touches our deepest feelings. So long as the most beautiful of all relationships, that between a mother and her child, shall remain to bless this dreary old world, we shall go on being stirred by such songs as "Mother Machree." So long as we know love and the pain of separation, we shall listen, with tears, to songs like, "I Hear You Calling Me.' So long as there are men who shall go forth to fight and die for their country, and the ideals she stands for, we shall always be moved to fervor by such songs as "Keep the Home Fires Burning." The great unchanging emotions, if you give them anything like adequate musical expression, are sure of a response.

A Curious Thing

And yet an audience is a curious thing. I never lose interest in it. A concert singer has one advantage over an operatic singer or an actor. In the case of an opera, or a play, the house is dark and all the light is concentrated on the stage. The result is that to the singer, or actor, the audience is a vague blur. He cannot see the individual faces, much less tell from their expressions what kind of response he is getting. He depends chiefly on the applause; although, if the audience is particularly cold, or the reverse, he can more or less "sense" it.

But at a concert the house is lighter and the footlights are lowered, so that the singer can really see the people. I not only see the faces, but I can see the expressions. I can tell if a man's smile is a superior and skeptical one, which means that he saying to himself: "Is that what you do? Well, you'll have to show me something better than that." And I can tell, on the other hand, if his smile is one of genuine enjoyment and satisfaction.

Sings at Him

If it is the first kind, I sing the next verse, or the next number, right at him! And I put my very best into the singing. I don't resent his attitude. He has a right to expect to be "shown." In fact in the first place, the "take it or leave it" air of offering something to an audience will not do much for the singer. People don't like to be treated that way.

A great deal depends on the way you walk out onto the stage. If you do it in a perfunctory and indifferent manner, give a formal bow, and act as if you had a piece of work to go through and the sooner it is over the better, an audience is pretty certain to be just as aloof as you are. But if you come out as if you were glad to be there, if you smile and bow to the people as if you are glad they are there, you are pretty certain to establish a friendly responsiveness.

Have to Work

Occasionally you have to work pretty hard to win a new audience. The fact that you already have a reputation sometimes makes people all the more critical.

I remember the first time I sang in a certain Southern city. It was a fine audience—to look at. But the moment I went onto the platform I felt that it was holding itself aloof for some reason. I went through the program and the applause was all right. But clear through to the end of the concert I could feel something of a reserve in those people. I did not resent it. I like people who think for themselves. Evidently those Southerners were doing their own thinking. And I'm glad to say that the next time I went to their city they accepted me without reserve, and I never had a more friendly and enthusiastic audience.

Likes Independence

I like to sing for people who are independent. That is one of the joys about singing in Boston. It isn't simply that they are musically educated. But they are not afraid to judge for themselves. And when they like a thing, you know it.

I spoke just now of applause. Of course, to a certain extent, applause is the mark of success. But if not a person in an audience moved his hands, I should know absolutely how every song was being received. First, because I can "feel" an audience. There is a current between the singer and the listeners, a mutual rapport, to which the singer is very sensitive.

Not the Only Way

You know, yourself, that applause is not always the way in which you show your response to a song. If you have been moved to tears, for instance, you don't feel like suddenly getting busy with violent physical exercise; and that is what applause is. You feel like sitting still. Under those circumstances silence is the greatest tribute you are able to pay. As I said before, I can see your faces when I sing to you. And when I see you with tears in your eyes, with lines of wistfulness around your mouth, with your hands clasped tight, your whole expression and attitude one of genuine feel-

ing, it is worth more to me than the noisy outburst of sixty persons somewhere in the house who are paid to "start the applause." It may be that there are places where in the opinion of certain people a hired claque is advisable. I don't want one, certainly not in the concert hall. There are songs which naturally get a spontaneous outburst of applause. But there are others to which the true response is the silence of deep feeling. Don't think I will misunderstand that silence. I can see your faces. I know.

Lover of Dogs

McCormack is a man's man. He is a great lover of dogs, his favorite pet being an imported Belgian police dog, which returns his affection in kind. You can tell a good deal about a man by the way his dog treats him.

He adores his family, not only his wife and children, but his mother and father back in Athlone. He is the fourth of eleven children, and his loyalty to his brothers and sisters is deep and sincere. When one of his sisters and her husband lost their lives last summer in a ship torpedoed by the Germans, McCormack cabled that he would take care of the ten children they left. Cyril, his own boy, is a fine lad of twelve; and Gwendolyn, who is nine years old, is her father's greatest pal. When I asked him if they liked to have him sing to them, he laughed boyishly.

Wanted to Know

"Ah, sure, they don't care a darn about it!" he said. "They go to my concerts sometimes, but I suspect 'tis to see the people more than 'tis to hear their father sing. Gwennie came in with me to a concert the other day. But it was because she knew I was going to sing a song which we have in a Caruso record and she wanted to find out whether I sang it the way he did or no."

Worker and Student

He is a worker and a student. When a boy in Athlone he went to the school kept by the Marist Brothers—beginning there before he was four years old and staying with them until he was twelve. At thirteen, in the intermediate school, he won the title of Exhibitioner, which give him a scholarship at college. His people were poor, but they saw to it that the boy had a good education. And he made the most of the opportunities given him.

His love of music came to him straight from his father and mother, both of whom had good voices. It was his mother that taught him, when he was a boy, to sing "Believe me, if all those endearing young charms"; and he says that the way he sings it to-day is the way his mother taught it to him years ago, showing that she had musical taste and perception of a genuinely high order.

The First Time

The first time he ever really sang for anybody was when he was nine years old. The Bishop of Clonmacnoise visited the school, and one of the Brothers lifted the little boy onto a table and told him to sing for the reverend gentleman. McCormack says he can remember now that he "felt queer around the middle," but he sang "Shades of evening, close not o'er us," and when he says he wishes he had a record of that boyish singing, he echoes a wish we all must feel.

His days of study have never come to an end. Long ago he heard from a friend the motto, "Non progredi, est regredi"; "Not to go forward, is to go backward;" and he has taken it for his own. In June, 1917, when the degree of Doctor of Literature was conferred on him at Holy Cross College, at Worcester, Massachusetts, the president of the college said that it was given in appreciation of Mr. McCormack's deep study of Celtic and Romance literature as well as in acknowledgment of his mission as a singer.

A Scrap of Paper

If you have heard him sing you have noticed that he always holds a little piece of paper, which he keeps twisting and rolling with his fingers. Before he goes onto the stage he tears a strip of paper from anything that is handy; for he must have that little scrap in his fingers. After one of his concerts someone saw a woman hunting around on the platform and asked her what she had lost.

"Oh—nothing!" she said. "I was just looking for that piece of paper Mr. McCormack had. I want to keep it as a souvenir."

Inasmuch as so many hundreds of thousands have heard him sing "I hear you calling me," the story of the origin of that song will be interesting. It was a little more than ten years ago, when McCormack was singing at the famous Boosey Ballad Concerts in London. With "Sammy" Liddle, the accompanist, he used to try over countless songs which were sent in, and one day, when the manuscripts were particularly hopeless, McCormack took one out of his pocket and said, "Here, Sammy! here's one we might try." So Sammy played the new song and McCormack sang it.

Didn't Like It

Arthur Boosey, who was present, didn't think much of it, but the other two were willing to try it at one of the concerts, so Boosey accepted it. That song was "I hear you calling me"; and in his book, "John McCormack, His Own Life Story," just published, Mr. McCormack states that it has sold more copies than any other piece of music ever printed, with the exception of "The Holy City."

McCormack first heard Caruso sing at Covent Garden in London, the winter after the Irish Village experience at St. Louis. He says that the event has always been and will always be one of the memorable ones of his life. He himself was in London earning a little money making records for two companies, most of them at $5 apiece! For those which he had to sing until they were accepted as perfect he received $25 each; so that altogether he earned $375 from this work. Back in Ireland he sang in concerts for which he was paid five or six dollars an evening. And this was less than fifteen years ago! In fact, only thirteen years after he was receiving five or six dollars a night he sang at two benefit concerts in New York and the receipts were $34,000 at one of them and $45,000 at the other.

Many Turned Away

At every one of the ninety concerts he has given in New York the house has been sold out and hundreds, even thousands, have been turned away. At one concert in the Hippodrome seven thousand persons were packed into the place. Probably no singer has such a hold on the public. It is a fact that people have actually crowded to the stage after his concerts and kissed the floor where he had stood.

January 11th, 1916, in the very building in Philadelphia where the Declaration of Independence was signed, he made his application for naturalization papers, and he is now a full-fledged citizen of the United States. His birthday is June 14.

When the war came he felt that he wanted to do his share in winning it. He is the kind of man that fights for what he believes. And he believes so fiercely in the justice of America's cause that, as he said, he "would as soon hang by the heels in the cellar" as not take a hand in the business of beating the Huns. That being his state of mind, he began figuring on how he could enlist John McCormack to the best advantage for the Government. He might perhaps have joined as a private; but he believed he could count for more in another way.

Over Half a Million

So he went to President Wilson and put the matter up to him. He volunteered to go anywhere, in any capacity. To this, the President's reply was that John McCormack could do a greater work as a singer for the war than as any other kind of a soldier. That was the capacity in which he "enlisted" for the duration of the war. Every penny that he could earn with his voice, from that time until the armistice was signed, he gave to the Red Cross and other war activities. Even his traveling expenses were not deducted from the sum. In that time he turned over the almost incredible amount—when you consider that it was raised by one man—of over half a million dollars! In eleven concerts alone he earned more than one hundred thousand dollars for the Red Cross.

Still Kicking

Sykes in Philadelphia "Public Ledger"

SPRING HOUSECLEANING

One of the best seasons of the year for increasing sales in many lines of hardware goods is the spring housecleaning season which is now at hand. The dealer who lets the housewives know all about his stock of those particular lines in which they are interested and which they must use when going over the house, will bring in a lot of good business. From now on not only women, but men will be interested in work about the house. Beside the general cleaning there will be a lot of "fixing up" to do. There will be furniture to be brightened up with varnish and paint, upholstered goods to be recovered, verandahs to repaint and porch furniture to be touched up, floors to be oiled and woodwork and walls to be cleaned or painted. While it may be true that if left alone the man or the woman of the house will plan a certain amount of this work it is surprising how much quicker they will get at it if the hardware man lets them know about the goods they need by a few attractive advertisements. It is always well to back these ads by food window displays. Many dealers also arrange for a distribution of the literature supplied by the manufacturers. A well planned campaign of this kind by the hardware man means some quick and steady profits.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

RAZOR PASTE

King Cutter razor paste, manufactured by J. Samuels, Toronto, is, it is claimed, excellent for sharpening all kinds of razors. It is stated that it is good for all varieties of safety blades. "Good for bad razors and not bad for good

Razor Paste

razors," is the claim of the manufacturer. It is stated that by the use of King Cutter paste a keen edge can be quickly obtained. It is claimed that the paste contains no grit and no tallow

TROUT KNIFE

The Marble Arms & Mfg. Co., of Gladstone, Mich., have added a new knife to their line of sportsmen's specialties. This knife was designed by Mr. Marble for the express purpose, it is stated, of dressing speckled trout easily and rapidly. The knife is forged, it is claimed, from finest cutlery steel, and is 5 5-8 in. long and 1-8 in. thick. The handle terminates in a ring 1 inch in diameter. The weight, including a metal bound leather sheath, it is stated, is one ounce, and it may be conveniently carried in the pocket, fish bag or basket.

Trout Knife

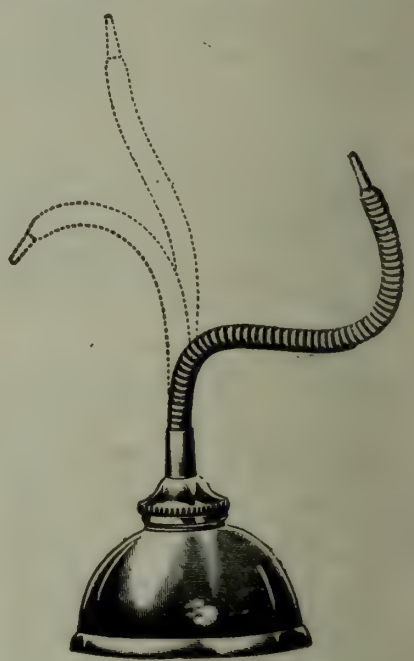
In use, it is stated, the little finger is inserted about half its length in the ring, while the three remaining fingers and thumb are placed just back of the blade and against the curve of the shank. It fits the hand, it is stated, to a nicety.

Although designed expressly for dressing speckled trout, it may be used, it is stated, with equal success on other fish as well as for a considerable variety of purposes for which any small pocket knife could be used. Being made in one piece its sanitary features, it is claimed, will be readily apparent to the fisherman, who knows by experience how difficult it is to thoroughly clean a pocket knife after dressing trout or other fish.

The quality of steel used in the knife is equal, it is stated, to that used in the finest surgical instruments.

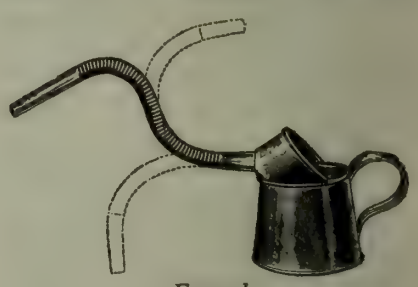
HYDROMETER

The "Workrite" hydrometer outfit, manufactured by the Work Rite Manufacturing Co., 5601 Euclid Avenue, Cleveland, Ohio, will, it is stated, double the efficiency of a battery. The manufacturers claim special features for the "Workrite" which it is stated are found on no other hydrometer on the market, and include rubber collars at each end



Hydrometer

of the hydrometer to protect it from striking and breaking, a float which it is stated is always in plain view, no plug in the bottom to drop out, spilling acid and breaking float. A square collar at the bottom, it is stated, prevents rolling off and breaking in case the device is laid on an uneven surface. All the rubber fittings, it is claimed, are made of unusually high quality stock. The outfit consists of a "Workrite" hydrometer fitted into a glass jar, which is filled with distilled rain water.



ALL WAY OILER

"All Way" oilers, manufactured by the All Way Oiler Manufacturing Co., 77 York Street, Toronto, Ont., are fitted with flexible steel spouts which, it is stated, may be bent in any desired angle or position without breaking or interfering with the flowing of the oil.

Oiler

There is absolutely no waste of oil it is stated, when the "All Way" is used, as the spout may be bent to suit the position where oil is to be applied. The oiler, it is stated, is fitted with a cleaning device, at the end of the spout. This device, it is claimed, also prevents

Funnel

oil from flowing too freely. The manufacturers claim that a saving of fifty per cent. in oil bills may be made by the use of the "All Way." The oilers, it is stated, are strongly made of copper plated steel, in different sizes.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

FURTHER substantial declines have been recorded this week in many lines related to the iron and steel industries. One of the most important of these is that affecting wrought pipe, though the actual decline is only about 3 per cent.

Boiler tubes is a kindred product which has declined a further 10 per cent. The belief is expressed that the bottom has been reached on these and that present basis may be expected to rule for some months. Figures to-day are appreciably below war levels but still substantially above pre-war basis.

Black steel sheets show another decline, jobbers expressing and exercising a desire to bring basis down to rock-bottom, when buyers will come into the market for their requirements. It is felt present figures should create a better feeling among probable purchasers.

Late advices last week provided for further material reductions in all lines of bolts and nuts, discounts named bringing figures well down from war basis. Steel rivets and burrs are lower, with the usual extras applying on coppered and tinned rivets.

Copper rivets and burrs have shown a big decline in new discounts offered to the trade this week. Soldering coppers have dropped a good 10c per pound. These moves bring a reflection of lower figures reached on the metal.

Linseed oil has responded to the strength of the flaxseed market in an advance of 5c per gallon. Whether this position will be held is uncertain just at the moment, but the basis seems quite firm.

The primary markets on turpentine show continued strength, and this has been reflected here in an increase in price of 5c per gallon. That the present basis will be maintained or superseded by an even higher one seems the outlook at the present time.

Galvanized eavetrough, conductor pipe, ridge roll and kindred lines have recorded another decline, the drop this time being a straight reduction of 10 per cent. from former figures.

Razor strops, heavy tin dairy pails, metal polish, and ornamental brass hinges have recorded advances this week. Files have declined.

A distinct improvement in volume of business coming to hand is reported on all sides, and spring trade looks very promising from reports at hand.

MONTREAL MARKETS

MONTREAL, April 10.—There are some important declines this week, a number of them in line with the definite forecast made in HARDWARE AND METAL last week. Carriage and machine, tire and stove and other special bolts are lower. Wood screws also are reduced, and the discounts will be found elsewhere. Washers of the wrought iron sort are reduced, and copper rivets may follow. One line of valves is down and others may follow. Brass butts and a number of the cheaper grades of lock sets are down, the latter 30c per dozen. Lead pipe is lower by half a cent, and lower prices are in effect for steam pipe. Nipples also, and chain, are likely to be on a lower basis, the latter to the extent, probably, of about a cent per pound.

Glaziers' Points Down; Screws Also

Montreal

GLAZIERS' POINTS, SCREWS.—Lower prices are in effect for wood screws. Flat head, bright, are quoted at 75 per cent discount; round head, 70 per cent.; flat head, brass, 40 per cent., and round head, 35 per cent. Zinc coated glaziers' points are selling at 9½c per package.

Bolts Are Down; Washers; Rivets

Montreal

BOLTS, WASHERS.—Prices are out for bolts of various kinds, showing a decrease. The new list of discounts is as follows: Carriage bolts, $1 list, ⅜ in. dia. and smaller, 6 ft. and shorter 35 per cent.; longer lengths, 20 per cent.; 7-16 in. and larger, 15 per cent.; machine bolts, ⅜ in. dia. and smaller, 4 in. and shorter, 40 per cent.; longer lengths, 25 per cent.; 7-16 in. dia. and larger, 25 per cent.; sleigh shoe bolts, all sizes, net list; coach and lag screws, 50 per cent.; square head blank bolts, 25 per cent.; bolt ends, 25 per cent.; plow bolts, 30 per cent.; elevator bolts, large head, 25 per cent.; elevator bolts, corrugated head, 57½ per cent.; fancy head bolts, 25 per cent.; shaft bolts ($3 list), 25 per cent.; step bolts, large head ($3 list), 25 per cent.; whiffletree bolts, 25 per cent.; nuts, square, blank, add to list 75c, tapped, $1; nuts, hexagon, blank, add to list $1, tapped $1.25; tire bolts, 50 per cent.; stove bolts, 65 per cent.

Wrought iron washers are also down, the discount being 45 per cent. from list. Iron rivets are reduced to 40 and 5 per cent., and copper rivets are likely to be lower.

Valves, Butts, Hooks; Locks Less

Montreal

VARIOUS LINES.—Lower prices are in effect on Jenkins' valves. The discount is now 10 per cent. from the list. Brass butts are down to net list; hammock hooks to 85c per dozen for the screw pattern, and to $1.15 for the plate, while cheaper grades of lock sets are

down in price 30c per dozen. Some sash fasts are also down.

Stoves Firm; Wares Active

Montreal

STOVES, WARES.—There is a fair movement of stoves and makers state that prices will hold. Local demand is improving for gas stoves, and with the moving season nearing again it is expected that there will be a heavy demand again ere long. Wares are steadily moving out and there is a bright prospect.

Oils and Gasoline On Steady Basis

Montreal

OILS AND GASOLINE.—A steady basis is holding here for coal oil, prices being unchanged with the range here running from 20 to 23 cents. Gasoline is steady still at 34c. There is a good movement, seasonably speaking, and stocks are in good shape.

Nails Are Going To Many Buyers

Montreal

NAILS AND WIRE.—Prices for nails are holding steady and there is a constant movement to the dealers in country points especially. The base for standard wire holds unchanged at $4.75 per 100 pounds, and cut are quoted at the same figure.

Rope Sales Fair; Basis Held

Montreal

ROPE AND CORDAGE.—A gradual improvement is noted for rope, but there is no disposition to buy beyond present needs. The prices obtaining for pure manila are still held at 34c per pound base; those for British manila at 30c, and for sisal 27½c.

Good Sales of Iron and Steel

Montreal

IRON AND STEEL.—Movement is quite satisfactory of iron and steel bars and the outlook is encouraging for a steady amount of business. This will be helped with the opening of navigation too, for there are many points served by water from this city.

Common bar iron, per 100 lbs.	3 75
Refined iron, per 100 lbs.	4 75
Mild steel	3 75
Iron finish machinery steel	3 80
Norway iron	12 00
Single reeled machinery steel	5 50
Spring steel	5 50
Sleigh shoe steel	3 75
Tire steel	3 95
Toe calk steel, per 100 lbs.	4 65
Band steel	3 75
Harrow tooth steel	3 90
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Black Diamond cast steel, lb.	0 22

Ingots Are Quiet Without Change

Montreal

INGOT METALS.—There is less change this week in ingot metals than usual. As a matter of fact there are no quotable revisions.

COPPER.—Prices are holding on this and there is a fair amount of bidding but sales are usually of small quantities. Price is 19c per pound.

TIN.—No trouble is expressed now in getting supplies, and the movement is limited as usual. Prices hold at 58c per pound.

LEAD.—There is no feature to note and the base quoted here holds at 7 to 7½ cents per pound.

ANTIMONY.—Market holds fairly firm without change, and price basis here is 8c per pound.

SPELTER.—Everywhere it appears the movement is restricted to small lots. The price basis here holds at 9c per pound.

ALUMINUM.—What business there is has been ruling at the unchanged quotation of 40c per pound.

PIG IRON.—This is unchanged at $45 per ton.

Sheets Are Slow At Revisions

Montreal

SHEETS.—There is but little to indicate a swift return to heavy selling on sheets. Those needing them buy as wanted and there is little disposition to load up beyond this. One firm has readjusted prices on black sheets, but beyond this there is nothing new in the way of price changes.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$5 40	$6 25
12 gauge	5 45	6 30
14 gauge	5 50	6 35
16 gauge	5 60	6 50
18-20 gauge	6 15	6 35
22-24 gauge	6 20	6 40
26 gauge	6 25	6 50
28 gauge	6 60	7 00
GALVANIZED SHEETS—		
10¾ oz.		$9 25
28 gauge		8 75
26 gauge		8 50
22 and 24 gauge		8 35
20 gauge		8 35
18 gauge		8 35
16 gauge		8 00

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Lead Pipe Half a Cent Lower

Montreal

LEAD PRODUCTS.—One half a cent per pound has been taken from the prices prevailing for lead pipe. Coil pipe is selling now at 11½c per pound, and waste at 12½c. This is the only change made, and solder, lead wool, sheet lead, and fittings are quite unchanged. There is a quiet condition still.

Lead pipe, lb.		$0 11½
Lead pipe (cut lengths)		0 12½
Lead waste pipe, lb.	0 13	
Lead traps and bends	Net list.	
Lead wool, lb.		0 14
Lead sheets, 3 to 3½ lbs., sq. ft., lb.		0 12
Lead sheets, 4 to 8 lbs., s. ft.		0 11
Cut sheets, ¾c lb. extra, and cut sheets to size. 1c. lb. extra.		
Solder, guaranteed, lb.		0 38
Solder, strictly, lb.		0 35
Solder, commercial, lb.		0 33
Solder, wiping, lb.	0 31	0 35
Solder wire (8 gauge)—		
40-60		0 36¾
45-55		0 39¾
50-50		0 42½
Zinc sheets, casks		0 17
Do., broken lots		0 18

Briefs From the Week's Markets

Copper rivets and burrs took a substantial drop this week in new discounts issued.

* * * * *

Soldering coppers have undergone revision downward, being quoted at 42c per pound base.

* * * * *

Cast enamel sinks reached still lower levels this week.

* * * * *

Carpet sweepers are being quoted with a guarantee against decline to December 31, 1919.

* * * * *

Black steel sheets have undergone a further revision downward.

* * * * *

Lead pipe and lead waste pipe are down ½c per pound. Lead traps and bends are quoted at 10% off list.

* * * * *

Galvanized eavetrough, conductor pipe, ridge roll and kindred lines show a decline of 10%.

Ornamental brass hinges is one line to advance.

* * * * *

Linseed oil moved up 5c per gallon in some quarters.

* * * * *

One line of razor strops has moved to higher levels this week.

* * * * *

Single and double end wrenches are lower. Pipe cutters have also declined.

* * * * *

The strength of the primary market on turpentine is reflected locally in a 5c advance.

* * * * *

Wrought pipe has declined slightly in new list of prices just issued.

* * * * *

Boiler tubes have dropped another 10%. Revised prices are now in effect.

Boat Season May Move Old Metals

Montreal.

OLD MATERIALS.—It is very probable that the opening of navigation which is probable within another week, will make a larger movement of old material possible. Dealers are more hopeful, and it is expected that demand will be better. Prices are inclined to hold at the levels following.

Dealers' Buying Prices—		
Pipe scrap, ton	8 50	9 00
Stove plate, ton	....	15 00
No. 2 busheling	....	5 00
Old rubbers, boots and shoes	0 06	0 06½
Overshoes, lumbermen's rubber boots	....	0 03½
Bicycle tires	....	0 03
Automobile tires	0 04	....
Yellow brass	....	0 08½
Red brass	0 12	0 12½
Light brass	0 06	0 07
Scrap zinc	....	0 04¾
Heavy copper	0 13	0 13½
Wrought iron, No. 1, per gr. ton	....	11 00
No. 1 machinery cast	....	18 00
Heavy melting steel	....	10 00

TORONTO MARKETS

TORONTO, April 10.—Lower prices have again been the predominating feature in the markets this week. Wrought pipe has undergone a further small decline, while boiler tubes are down about 10 per cent. Black sheets are easier, with galvanized remaining unchanged. Eavetrough conductor pipe, ridge roll and kindred lines have dropped about 10 per cent. this week. Copper rivets and burrs have declined substantially, and the same is true of soldering coppers. Lead pipe and waste pipe, along with lead traps and bends, are in the downward move, too. Copper clout nails and tacks are lower, with dry cell quantity prices showing some readjustment. Business shows some improvement during the past few days.

Copper Clout Nails, Tacks Decline

Toronto.

COPPER CLOUT NAILS, TACKS—Lower prices have been named this week on copper clout nails, the list being $2.00 per pound, subject to a discount of 60 and 15 per cent. Copper tacks are also easier, the list on these being $2.25 per pound, subject to a discount of 60 and 15 per cent.

Glaziers' points are easier, the price now quoted to the trade being 10c per paper net.

Battery Prices Under Revision

Toronto.

BATTERIES—Some prices on Columbia dry cells have come in for revision this week. The manufacturers are now packing lots of 50 cells in a barrel or keg at 2c each over the standard barrel contract price and 1c each over open order standard barrel price. Manufacturers are supplying the new package. The quotations now prevailing which take care of this change are as follows:

COLUMBIA AND COLUMBIA IGNITOR DRY CELLS

	Regular 2½x6"	Ignitor 2½x6"
Less than 12, each	$0 45	$0 45
12 or less than 50, each	0 39	0 40
50 or less than 125, each	0 37	0 37½
Bbl. lots of 125 or multiples, each	0 36	0 36½

Copper Rivets, Burrs Go Lower

Toronto.

COPPER RIVETS AND BURRS — A further revision in the price of copper rivets and burrs has been made this week, the present figures representing a substantial decline from former levels. The recent basis of arriving at prices and the new are shown for comparison:

Copper rivets with usual proportion of copper burrs, that is to say, weight of copper burrs not exceeding 1-3 of combined weight of copper rivets and copper burrs. Old basis, list plus 15 per cent.; new basis, discount 15 per cent.

Copper rivets with copper burrs where the burrs are more than 1-3 of the combined weight of the copper rivets and copper burrs: Copper rivets, old basis, list plus 15 per cent.; new basis, discount 15 per cent. Copper burrs up to 1-3 of combined weight of copper rivets and copper burrs, old basis, list plus 15 per cent.; new basis, discount 15 per cent. Copper burrs in excess of 1-3 of combined weight of copper rivets and copper burrs, old basis, list plus 40 per cent.; new basis, list plus 25 per cent.

Copper burrs only, old basis, list plus 40 per cent.; new basis, list plus 25 per cent.

Carpet Sweeper Prices Maintained

Toronto.

CARPET SWEEPERS—The manufacturers of the Bissell carpet sweeper have sent out a notice to the trade in which they state no further change in price is expected in their lines this year. The notice reads as follows:—"After a careful study of market and industrial conditions, we can see no prospect of any further reduction in our prices during the present year. Although there have have been reductions in prices of some raw materials, the price of labor continues very high.

Therefore, to enable our customers to order with a full knowledge of what is ahead, we announce a guarantee of our present prices against our own decline to December 31, 1919."

Cement Price Changed; Roofing

Toronto.

CEMENT, ROOFING—The price on cement has come in for revision this week, the quotation on carload lots, f.o.b. Toronto, now being $3.25. Manufacturers now make an allowance of 80c per bbl. for sacks (20c each) returned in good condition, freight paid. This is just double former allowances, which was 40c.

News is lacking as regards roofing. Prices are unchanged, but business seems just a little slow in starting up and has been consequently disappointing. This is particularly true of material required in large industrial work, sales in the specialty end of the business being well maintained.

Soldering Coppers Register Decline

Toronto.

SOLDERING COPPERS—Prices on soldering coppers have undergone a further revision downward and quotations are being made to-day at 42c per pound in some quarters.

Nails Hold Steady; Wire Revised

Toronto.

NAILS, WIRE — No further change has been made in the situation as related to nails, the lower basis arrived at during the past couple of weeks being maintained. Wire nails are quoted at $4.70 and cut nails at $4.75 per 100 pounds base.

Wire prices are now in line with the reductions made a week or so ago, the base on smooth steel wire being $5.00 per 100 pounds. Other grades with new prices quoted are: cut hay wire No. 9, $5.40 per 100 pounds; No. 10, $5.50; No. 11, $5.55; No. 12, $5.65; No. 13, $5.75; No. 14, $5.95; No. 15, $6.15; No. 16, $6.35. Wire bale ties No. 12, $5.50 per 100 pounds; No. 13, $5.60; No. 13½, $5.70; No. 14, $5.75; No. 15, $5.95; No. 16, $6.20.

Rope Holds at Unchanged Basis

Toronto.

CORDAGE—The primary markets on hemp are somewhat unsettled with little buying interest manifest and the trade apparently just waiting for something to start up. Locally the situation in rope is unchanged, business being fairly good and outlook considered very satisfactory. Quotations still in effect are: pure manila, 34c per pound base; British manila, 30c; New Zealand hemp, 30c; sisal, 27½c; sisal lath yarn, 27½c.

Oils Holding; Gasoline Steady

Toronto.

OILS, GASOLINE—The situation as related to coal oil and lubricating oils shows no startling developments. Business is considered very good and there is no difficulty experienced in getting supplies through. Coal oil ranges in price from 19½c to 22½c per gallon according to grade, unchanged figures. Gasoline is in increasing demand and prices are maintained at the unchanged figure of 33c per gallon.

Wares Hold at New Basis; Stoves

Toronto.

WARES, STOVES—The new prices arrived at on enamel ware, tinware and kindred lines is being maintained at a steady level and the trade has settled into the new schedule of values with little disturbance. Business is fairly good and seems to be showing some improvement the last week or ten days.

The situation in respect to stoves is without material change. Summer lines are going forward in fair quantities and manufacturers are anticipating a very satisfactory sale as the season develops.

Iron and Steel Bars Holding

Toronto.

IRON AND STEEL—Prices show no change during the week, though there seems to be shading of quotations in some quarters. The amount of orders coming to hand is larger and there seems to be a much better feeling over volume of business being handled. Quotations follow:

Common bar iron	$4 25	$4 50
Common bar steel	4 25	4 50
Refined iron	4 65	4 90
Angle base	4 50	4 75
Horseshoe iron	4 50	4 75
Tire steel	4 45	4 70
Mild steel	4 25	4 50
Norway iron	11 50	15 00
Toe caulk steel	5 15	5 45
Sleigh shoe steel	4 25	4 50
Band steel, No. 10	4 50	4 75
Do., No. 12	4 75	5 00
Spring steel	9 50	11 50
Mining drill steel	21 00	30 00
Sheet cast steel	0 42	0 45
Tool steel	0 22	0 30

Black Sheets Down; Galvanized Hold

Toronto.

SHEETS, PLATES—Further revisions downwards have occurred in black steel sheets this week, jobbers expressing a desire to keep basis right down to rock bottom and in this way lend every encouragement to buyers to keep goods moving. Galvanized sheets show no change during the week. Quotations now being made to the trade follows:

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$5 00	$5 50
12 gauge	5 05	5 55
14 gauge	5 10	5 40
16 gauge	5 20	5 45
18-20 gauge	5 80	5 60
22-24 gauge	5 85	5 65
26 gauge	5 90	5 70
28 gauge	6 00	5 80
3-16 inch plate	4 90	6 25
¼-inch boiler plate	4 50	5 80

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS—		
10¾ oz.	$8 25	$8 50
U.S. 28	7 95	8 20
U.S. 26	7 65	7 90
22 and 24	7 50	7 75
18 and 20	7 35	7 60
16	7 20	7 45
12 and 14	7 10	....

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Eavetrough, Conductor Pipe Down 10 Per Cent.

Toronto.

EAVETROUGH, CONDUCTOR PIPE—A decline in the price of eavetrough, conductor pipe, ridge roll, conductor pipe elbows and kindred lines has been made this week. The change in price amounts to 10 per cent., eavetrough and conductor pipe which has been quoted at net list now being subject to a discount of 10 per cent. from list. List prices are unchanged and will be found in current market quotations.

Prices Maintained on Corrugated Sheets

Toronto.

CORRUGATED SHEETS—New developments are lacking in the situation on corrugated sheets. There is some business coming to hand and outlook is considered very fair when building operations become a little more general and further advanced. Range of prices is unchanged at following figures:

	Per 100 sq. ft.	
Corrugated Sheets—	Gal'zed	Painted
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Wrought Pipe Down; Nipples, Couplings Too

Toronto.

WROUGHT PIPE, NIPPLES, COUPLINGS—In line with revisions made on basic materials, lower prices have been named on wrought pipe same effective from April 3. The decline really only amounts to about 3 per cent. on the pipe, whereas, new discounts on wrought nipples and couplings provide for quite substantial reductions. The range of prices and discounts now quoted is:

WROUGHT PIPE

Price List No. 39, April 3, 1919.

Boiler Tubes Register Decline

Toronto.

BOILER TUBES—Further reductions have been made in boiler tubes this week in line with information given out in these columns last week. The decline averages around 10 per cent. Jobbers report business very good and look for present prices to hold for some time to come. There is no difficulty experienced in getting supplies through as needed.

	Per 100 feet	
BOILER TUBES—	Seamless	Lapweld
1 inch	$25 00	$
1¼ inch	29 00	-
1½ inch	32 00	25 00

3 inch	47 00	35 00
3¼ inch	-	42 00
3½ inch	57 00	43 00
4 inch	65 00	56 00

Lead Pipe Down; Traps and Bends Too

Toronto.

LEAD AND ZINC PRODUCTS—Lead pipe at 11½c and lead waste pipe at 12½c per pound both show a decline for the week of ½c per pound. Downward prices on lead traps and bends are also provided for through the change from net list to 10 per cent. discount from list. Solder prices are unchanged. Business is reported to be quiet and active with activity generally expected to be the ruling trend in a very short time. Prices prevailing to-day are;

Lead pipe, lb.	$0 11½
Lead waste pipe, lb.	0 12½

Lead traps and bends	....	10%
Lead wool, lb.	....	0 14
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 11	0 12½

Solder, wire, lb.	0 40	0 45½
Zinc sheets, per lb.	....	0 17

Slightly Better Tone to Old Materials

Toronto.

OLD MATERIALS—Although scrap metal prices have not started to climb yet, it is easy to notice that there is a great deal more strength in the market than for some time past. There is a chance that fourth quarter copper may be hard to get. Just now dealers are not quoting or selling on that delivery, and if this should keep up for any length of time it would be certain to drive up the price in the local scrap markets. As it is those who have red brass now are asking more money for it.

In the other classes of metals much the same feeling is apparent. There have been no price changes and a certain amount of trading is going on at the lists published. But there is a growing and a well defined tendency on the part of the trade to hold material instead of making sales under present circumstances. Although dealers do not care to come out and say so it is one of those situations where it is felt that a great many things may happen on very short notice, and one of the happenings is likely to be a strengthening of prices which dealers will have to pay in order to induce holders to part with their material.

Dealers' Buying Prices—		
Tea lead	....	0 03
Heavy lead pipe	....	0 04

Lead Easier; Other Metals Hold

Toronto.

INGOT METALS—Lead is down ¼c per pound, but other metals show little change during the week. Copper is holding steadily and the tin market has a fairly firm undertone. Antimony is without particular feature.

COPPER—A very fair amount of business is being handled and position of the metal generally is much better. Prices are unchanged, but firmly held at 18c to 20c per pound.

TIN—The market is steady and prices well maintained. Some business is coming to hand and stocks are reported pretty small. Locally the price ranges around 60c per pound.

SPELTER—Buyers are showing more interest with a consequent improvement in standing of spelter. This has not resulted in any price change, but sales are better. Quotations are being made at 8¼c to 8½c per pound.

LEAD—The price has sagged ¼c to 7¼c per pound this week. Business is not very brisk, but there is a reasonable amount of activity noticeable.

ALUMINUM — Interest is lacking, commercial factors still holding out of the market for any large quantities. A nominal figure of 50c per pound prevails, but this would probably be shaded very substantially for any actual business.

ANTIMONY—Dullness marks the attitude of this metal. Price holds without change at around 8c per pound.

LONDON MARKETS

LONDON, April 10.—Declines have been quite numerous again this week, and some advances are also shown. Bolts and nuts are being quoted at new discounts which provide for a substantial drop. Iron rivets and burrs are lower, along with a further reduction in copper rivets and burrs. A new discount on files, a change in soldering coppers, a revision of figures ruling on cast enamel sinks all bespeak declines. Turpentine is higher by 5c per gallon, and linseed oil has gone up a similar amount. Metal polish and heavy tin dairy pails are higher.

A marked improvement in volume of business coming to hand is noted.

Soldering Coppers Record Decline

London, Ont.

SOLDERING COPPERS.—New prices have been established this week on soldering coppers, which show a substantial decline from former figures. The base now named is 42c per pound, which provides for following scale of net figures: 3 lb. to pair and heavier, 42c per pound; 2½ lb. to pair, 43c; 2 lb. to pair, 44c; 1½ lb. to pair, 46c; 1 lb. to pair, 48c.

Enamel Sinks Reach Lower Basis

London, Ont.

ENAMEL SINKS.—A further decline in the price of cast enamel sinks has been recorded this week, the new prices which are now being named to the trade being as follows, prices being each:

16 x 24 in., 1 at time, $4.92; 2 at time, $4.86; 3 at time, $4.80.

18 x 30 in., 1 at time, $5.62; 2 at time, $5.56; 3 at time, $5.50.

18 x 36 in., 1 at time, $9.72, 2 at time, $9.60.

Bolts and Nuts at New Discounts

London, Ont.

BOLTS AND NUTS.—Discounts have been changed on bolts and nuts, the new scale providing for net prices substantially below former figures. The following discounts are those being quoted from standard lists:

Carriage Bolts ($1.00 list), ⅜ in. dia. and smaller, lens. 6 in. and shorter, 35%.
Carriage Bolts ($1.00 list), ⅜ in. dia. and smaller, longer lens, 20%.
Carriage Bolts ($1.00 list), 7-16 in. dia. and larger, 15%.
Machine Bolts, ⅜ in. dia. and smaller, lens. 4 in. and shorter, 40%.
Machine Bolts, ⅜ in. dia. and smaller, longer ens., 25%.
Machine Bolts, 7-16 in. dia. and larger, 25%.
Sleigh Shoe Bolts, ⅜ in. dia. and smaller, net list.
Sleigh Shoe Bolts, 7-16 in. dia. and larger, net list.
Coach and Lag Screws, 50%.
Square Head Blank Bolts, 25%.
Bolt Ends, 25%.
Plow Bolts, 30%.
Elevator Bolts, large head, 25%.
Elevator Bolts, corrugated head, 57½%.
Fancy Head Bolts, 25%.
Step and Shaft Bolts ($3.00 list), 25%.
Whiffletree Bolts, 25%.
Tire Bolts, 50%.
Square Nuts, blank, add to net list 75c per 100 lbs.
Square Nuts, tapped, add to net list $1.00 per 100 lbs.
Hexagon Nuts, blank, add to net list $1.00 per 100 lbs.
Hexagon Nuts, tapped, add to net list $1.25 per 100 lbs.

Tire and Stove Bolts Lower; Wood Screws

London, Ont.

TIRE, STOVE BOLTS, SCREWS.—Tire bolts are being quoted at a discount of 50 per cent. and stove bolts at a discount of 65 per cent. from standard lists, both of which discounts provide for declines.

Wood screws are moving out quite freely at the new discounts named last week, which are as follows: Flat head, bright, 75 per cent.; round head, bright, 70 per cent.; flat head, brass, 40 per cent.; round head, brass, 35 per cent.

Iron Rivets and Burrs Drop; Tubular Up

London, Ont.

IRON RIVETS AND BURRS.—Lower prices have again been named on iron rivets and burrs. The discount which is now being quoted is 40 and 5 per cent. from list, with the usual extras for coppered and tinned. Net prices on coppered iron rivets and burrs figured at the new discount are: 5 lb. cartons, No. 8 x ½ lb. pkgs., assorted, $1.26 per pkg.; 5 lb. cartons, No. 8 x ¼ lb. pkgs., assorted, $1.37; 5 lb. cartons, No. 10 x ½ lb. pkgs., assorted, $1.34.

Japanned tubular rivets have reached higher levels, being quoted to-day at 95c per dozen packages.

Copper Rivets and Burrs Go Still Lower

London, Ont.

COPPER RIVETS AND BURRS.—Still lower prices have been named on copper rivets and burrs this week; the discounts effective to-day being as follows:

Copper rivets with usual proportion of copper burrs, that is to say, weight of copper burrs not exceeding 1-3 of combined weight of copper rivets and copper burrs. List less 15 per cent.

Copper rivets and copper burrs where the burrs are more than 1-3 of the combined weight of the copper rivets and copper burrs: Copper rivets, list less 15 per cent.; copper burrs up to 1-3 of combined weight of copper rivets and copper burrs, list less 15 per cent.; copper burrs in excess of 1-3 of combined weight of copper rivets and copper burrs, list plus 25 per cent; copper burrs only, list plus 25 per cent.

Files Decline; Metal Polish Up

London, Ont.

FILES, METAL POLISH.—A new discount of 35 per cent. from list has been named on Black Diamond files, which means a decline from former figures.

An advance in Brasso metal polish is noted in quotations just issued on this line, the No. 6 size selling to the trade at $2.25 per dozen and the No. 12 size at $4.50 per dozen.

Razor Strops Go Higher; Rope Holds

London, Ont.

RAZOR STROPS, ROPE. — Higher quotations are in effect on Howard square razor strops, according to figures just issued; the No. 88 now selling at $8.50 per dozen and the No. 10 at $9.50 per dozen.

There seems to be little movement of rope just now with prices showing no change from following figures: Pure manila, 34c base per pound; British manila, 30c; New Zealand hemp, 30c; sisal, 27½c.

Nails Unchanged; Spring Lines Moving

London, Ont.

NAILS, SPRING LINES.—A fair sale of nails is being taken care of, prices holding at recent declines, the wire at $4.70 base per 100 pounds, and cut at $4.75 per 100 pounds base.

A better movement of many spring lines is noticeable, Hexagon poultry netting going forward in fair quantities and invoiced at 15 per cent. discount from list. Screen wire cloth in 100 ft. rolls at $3.25 per 100 square feet and in 50 ft. rolls at $3.30, is showing more activity. Garden and harvest tools are selling at 17½ per cent. discount from list, all of these lines holding at former figures.

Dairy Pails Higher Figures

London, Ont.

DAIRY PAILS, ETC.—Heavy tin dairy pails show an advance this week, the figures being quoted on 14 qt. XXXX, being $8.19 per dozen, and 16 qt. XXXX being $10.40 per dozen.

New net prices on galvanized tubs and pails figured at the recent declines are: Galv'd tubs: No. 1, $14.80 per dozen; No. 2, $16.20; No. 3, $18.48. Dufferin galv'd pails, No. 12, $4.80 per dozen; No. 14, $5.40; No. 16, $6.12.

Linseed Oil Up; Turpentine Higher

London, Ont.

LINSEED OIL, TURPENTINE.—The continued strength of the flax seed market has influenced prices of linseed oil to higher levels, an advance of 5c per gallon being recorded this week, as noted in quotations shown below. A better movement of oil to the trade is noted.

Turpentine has also reflected the strength of primary markets in an advance this week of 5c per gallon. The undertone to the market seems very strong at present basis. Quotations follow:

Linseed Oil—	Raw	Boiled
1 to 2 barrels	$1 77	$1 80
3 to 5 barrels	1 76	1 79
6 to 9 barrels	1 74	1 77

Less barrels add 10c gallon.

Turpentine—	Per Gal.
1 barrel lots	$1 15
2 to 4 barrel lots	1 14
5 gallon lots	1 25

WINNIPEG MARKETS

WINNIPEG, April 10.—Price changes during the past week are again very limited and are almost entirely confined to reductions, including such lines as dry batteries, wrenches, pipe cutters and elevator bolts. Ornamental hinges appear as the only advancing commodity.

Business is reported to be much brisker during the past week as weather conditions improve and a continued busy period is looked for.

Single and Double End Wrenches Down

Winnipeg.

SINGLE AND DOUBLE END WRENCHES.—Prices on general service and single and double end wrenches have been revised to slightly lower levels, and new prices now ruling on the various sizes are given below:

General Service Wrenches—No. 660, 12c; No. 661, 15c; No. 662, 20c; No. 563, 25c; No. 564, 31c each.

Single End Wrenches—No. 0, 9c; No. 1, 11c; No. 3, 16c; No. 4, 20c; No. 5, 23c; No. 6, 28c; No. 7, 36c each.

Double End Wrenches—No. 25, 15c; No. 34, 41c; No. 37, 60c; No. 29, 22c; No. 31, 27c each.

Pipe Cutters Register Decline

Winnipeg.

PIPE CUTTERS.—Saunders pipe cutters and wheels show a slight reduction this week over former quotations and are quoted to-day as follows: Saunders pipe cutters, No. 1, $2.40 each; No. 2, $3.60. Saunders pipe cutter wheels, No. 1, 20c each; No. 2, 27c.

Dry Battery Prices Revised

Winnipeg.

DRY BATTERIES.—The manufacturers of Columbia dry batteries have just issued a revised price list, which shows a slight reduction on No. 6 batteries in barrels of 50 only. On the new basis, boxes of 50 will be but 1c each higher than standard barrel lots. Prices now ruling are given as follows:

Columbia Batteries—No. 6 Ignitor—Less than 12, $49.35 per 100; 12 or less than 50, $44.35; 50 or less than 125, $41.85; barrel lots of 125, $40.85

No. 7 Ignitor—Less than 12, $91.40 per 100; 12 or less than 25, $83.40; 25 or less than 50, $81.40; 50 or less than 75, $79.40; Barrel lots of 75, $76.90.

No. 8 Ignitor—Less than 12, $126.40 per 100; 12 or less than 25, $106.90; 25 or less than 50, $103.90; Barrel lots of 50, $100.40.

Ornamental Hinges Slightly Higher

Winnipeg.

ORNAMENTAL HINGES.—Based on new prices received from the manufacturers prices have advanced slightly on No. 1431 ornamental hinges, due, it is said, to heavier manufacturing costs. New prices now in effect are given herewith: No. 1431 A, $2.50; No. 1431 D2, $2.50; No. 1431 F, $2.50; No. 1431 N, $3.00 dozen pair.

Bolts Tending Still Lower

Winnipeg.

BOLTS.—According to current reports new prices will be issued shortly on bolts of all kinds, which will show a decline, although the present prices have only been in force for a short time. To-day's ruling markets on bolts are confirmed as follows:

Carriage Bolts—⅜ and smaller, up to 6 in., 20%; ⅜ and smaller over 6 in., 10%; 7-16 and larger, all lengths, net list.

Machine Bolts—⅜ and smaller, up to 6 in., 25%; ⅜ and smaller, over 6 in., 15%; 7-16 and larger, all lengths, 5%.

Plow Bolts—All sizes and lengths, 10%.
Stove Bolts—All sizes and lengths, 50%.
Shaft Bolts—5% on list.
Sleigh Shoe Bolts, 5% on list.

Elevator Bolts Down 10 Per Cent.

Winnipeg.

ELEVATOR BOLTS.—Following the recent revision in carriage, machine, plow bolts, etc., new prices are now to hand covering corrugated head elevator bolts which show a reduction of approximately 10 per cent. from former prices. These are selling to-day at the following prices: ¼ x ⅝ inch, $1.00; ¼ x 1 inch, $1.05; ¼ x 1¼ inch, $1.10; ¼ x 1½ inch, $1.15 per 100.

Wrought Pipe May Go Lower

Winnipeg.

WROUGHT IRON PIPE.—Wrought iron pipe prices hold firm at former quotations on the local market, but reports indicate that lower prices are to be expected in the near future. Prices in the meantime are holding as follows:

		Black	Galv.
		Per 100 ft.	
Wrought Iron Pipe.	¼	$ 5 40	$ 7 74
	⅜	5 50	7 88
	½	7 38	9 10
	¾	9 32	11 60
	1	13 77	17 20
	1¼	18 63	23 22
	1½	22 28	27 77
	2	30 00	37 40
	2½	48 10	59 80
	3	63.87	78 20
	3½	81 80	.....
	4	96 90	.....
	4½	113 00	.....
	5	131 40	.....
	6	171 00	.....

Linseed Oil Holding Firm

Winnipeg.

LINSEED OIL.—Linseed oil sales are reported to be very good, with prices holding firm. To-day's ruling prices are confirmed as follows: Raw linseed oil, $1.85; boiled linseed oil, $1.88 per gallon in single barrel lots.

Turpentine Holds; Firm Undertone

Winnipeg.

TURPENTINE. — Turpentine prices show no change on the local market, holding firm at former quotations, with a growing demand reported, as the usual spring paint-up campaign is to start soon. Primary markets report a very strong feeling and this may influence prices higher here. To-day's ruling prices are as follows: Barrel lots, $1.25 gal.; ½ barrels, $1.28 gal.; 5 gal. lots, $1.30 gal.; 1 gal. lots, $1.30 gal., plus the usual extras for containers.

PITTSBURGH MARKETS

PITTSBURGH, Pa., Apr. 10. —The whole talk of the trade in the past few days has been on the refusal of the Railroad Administration to proceed to make purchases on the basis of the iron and steel prices announced by the Industrial Board of the Department of Commerce, and made effective by producers March 21. A wide variety of opinions has been expressed on the subject of the refusal. As is frequently the case in human affairs the loudest talk is the most unthinking. Such commentators refer to Mr. Walker D. Hines, Director General of Railroads, as "blocking business," in substance, or as "throwing a monkey wrench into the machinery." Then there are references to the "fine Italian hand of John Skelton Williams," none of whose criticized actions in the past few months appeared to have been based upon anything but a desire to safeguard the public funds, which have to be maintained by taxes paid both by those who criticize and by those who do not. Mr. Hines has been criticized, also, for refusing to accept the steel prices after they were announced, instead of before, when it has not been shown that he had any previous opportunity to pass upon them.

Even though Congress has not acted as to the disposition of the railroads, it is a perfectly safe guess that they are going to be returned to their owners. It is only the additional legal restrictions, and the additional liberties, that are to be arranged that is a matter of doubt. Mr. Hines must return the goods to their owners in as good physical condition as when taken over, and improvements can be charged for, but only at a fair price. If Mr. Hines pays too much for steel the excess price must be paid out of the public funds. Mr. Hines needs only to consult the earnings reports of steel companies for 1918 to see that the profits per ton of steel were extremely large, and that profits would be entirely fair if prices were reduced, from the Government level, much more than they have been thus far. The owners of the railroads, with whom the steel producers have uniformly, up to this date, sympathized with so strongly, would have to be satisfied even with Mr. Hines meeting the extra cost of steel out of the public funds, for this would result in the railroads being saddled with an inflated market when the roads were returned to their owners. The railroad companies would then have to make their purchases on this inflated market, or perform the task of deflating it themselves.

Other Views

There are numerous other views expressed however. One, quite pertinent, is that the Industrial Board departed entirely from its original plan, as officially announced. The Board was to act as intermediary between producers and Government buying departments, to arrive at prices at which business would be done. Instead, what the Board did was to meet with the steel producers, agree upon their terms, and then try to force the Government departments to accept the terms.

Another criticism made of the Board, and made quite emphatically by many buyers of steel, is that the Board executed a complete right about face as to the character of prices to be developed, irrespective of whether they were high or low. It was announced that the law of supply and demand had ceased functioning, and that the object of the whole operation was to restore the operation of the law of supply and demand. This, of course, means an open trading market, but what the Board did by the time it got through was to publish a schedule of prices and then refer to them as being minimum for the remainder of the year. Not only does that not represent an open market, it covers a period three times as long as the periods for which the War Industries Board used to set prices.

The Pig Iron View

The pig iron producers are pleased rather than otherwise at the hitch in the carrying out of the Industrial Board's program. The pig iron people are more or less like the copper people. The copper producers allowed their market to go where it would, the result being that two or three weeks ago it reached a low point, at about 4 per cent. below the ten-year pre-war average price. Since then it has scored an advance of 5 per cent., and is standing on its own feet. The pig iron producers would not mind if pig iron declined below the cost of production. Furnaces would go out, the market would stiffen, and the cost of production woud come down. The pig iron producers, moreover, never did like the Industrial Board's schedule of prices, claiming that steel was reduced too little in proportion to pig iron. If steel had been reduced more, there would be more buying of steel, and then more consumption of pig iron. The pig iron producers recognize that profits depend upon price and production combined. If there is a profitable price, but no iron is made, there is no profit.

"Paint-up—Clean-up" Campaign For London

At a meeting of the London Retail Hardware Association, Thomas Jones, manager of the Cowan Hardware Co., London, Ont., and Thomas Purdom Jr., of the Purdom Hardware Co., were re-elected as president and secretary.

Arrangements were made for a big "Paint-up and Clean-up" week. All the London merchants will take part. This will be worked on a large scale and will possibly be held May 4 to 11.

It was decided by the down-town merchants that they close every night in the week, including Saturday, at 6 p.m., excepting the week preceding Christmas.

The hardware men are in the lead here in this big movement, and it is expected the jewellers will follow at once

Selling Paint as Insurance

Huge Losses Can Be Prevented by Proper Care and Attention to Property — Dealers Have Chance to Impress This Upon Property Owners and Render Real Service to Them and to the Nation

THE paint and varnish trade has always been a strong advocate of using its products as a measure of insurance against decay, yet the volume actually sold from this standpoint is insignificant compared with the amount of fire insurance sold.

Fire insurance is sold against a possible, as well as a more or less preventable loss. Loss and deterioration of property value is continuous and inevitable, but can be deterred and prevented to a large extent by the protective use of paint. Lack of paint hastens this loss. Adequate painting prevents deterioration and depreciation. There is no excuse for property loss through lack of paint.

Trying to Prevent

The serious losses by fire in Canada during the last few years have brought about action by both the Federal and Provincial Governments to seek methods of preventing fires. Fire losses are both individual and national. Inconveniences arising out of them are basically economic to the nation as well as the individual. No individual desires either the loss or inconvenience that comes to him through loss by fire. Our Governments have come to realize that such losses and inconveniences not only affect the individual but they affect economic conditions, draw unnecessarily upon our natural resources and have a retarding influence upon business which have become a national detriment.

Spectacular Appeal

Fire prevention has a more spectacular appeal to both the Government and public for the reason that both have seen the tremendous amount of loss and waste that can take place in the brief period of a conflagration. The truth of the matter is that a greater loss and depreciation is taking place on all property through lack of paint. This loss, while inevitable, covers a period of years; though it is less visible, it is nevertheless as certain, and more destructive in the aggregate.

Losses through lack of paint, like those of fire, are individual and national. The inconveniences that sooner or later arise from loss through lack of paint are just as basically economic to the nation as they are to the individual. They cause us to draw upon our national resources just as unnecessarily as fire. Lack of paint has a retarding influence upon business which is fully as serious a national detriment as fire.

Means Big Saving

We may be pleading a futile cause at the present moment, but from the standpoint of conservation alone, there would appear to be as much justification for the Government encouraging the use of paint, as there is for the positive efforts they are making to prevent fire losses. How far in the distance this may be it is hard to tell. Our Conservation Commission might well direct its attention to the fundamental economic service that paints and varnish can render in protection. If, through their efforts in the direction of preventing fire losses, they are able to effect a saving of 25%, it is quite within the range of possibility to effect a saving of 50% to 75% of the losses through lack of paint. Fires are oftentimes accidental; some of them are incapable of prevention. But lack of paint is inexcusable. The loss is not so rapid, but what man has not plenty of time to get out his ladders, buy a few gallons of paint and apply it every three or four years? A fire brigade is called after the mischief has started, but there are painters who can be called in almost any time of the year to apply paint before the destructive influences that play upon building materials can get a serious hold upon property.

Up to the Dealers

However, it may be a long time before the Government and its commissions wake up to the seriousness of the loss that is occurring from this standpoint, so why wait? The paint retailers can get into action right away by pushing the sales of paints and varnishes this Spring. Every retailer knows the conditions existing in the community. He knows exactly how much there is a need for this sort of insurance. He knows the property owners to whom this form of argument would appeal. Is there any need of waiting for the Government to make a move in this conservation effort when there is bigger business, and a larger profit to be gained from developing paint trade from this standpoint? Governments, like Providence, are pretty much inclined to help those that help themselves. You can take two meanings out of this statement if you will.

Is Much Greater

As we have frequently repeated in this column, it is estimated that the actual loss to property through

(Continued on page 70)

Time to touch up the weather-beaten home

As the sombre hues of winter disappear and give way to Nature's gorgeous tints of spring-time splendour, man's thoughts naturally turn to ways and means of enhancing the appearance of his dwelling place. The greatest factor in the accomplishment of this result is **Paint.**

Moore's Paint, mixed with a small amount of energy, will transform the most unsightly building into a thing of beauty and a pleasure to behold. That's why the **Hardware Dealer** everywhere is making such a success of his **Moore's Paint agency.**

The certainty of pleasing results so surely productive of customer's satisfaction forms such a characteristic of **Moore's Paints** that it has enabled the dealer to build up a profitable prestige for his store.

The same success is waiting you. Write us for our attractive agency plan.

Benjamin Moore & Co., Limited

West Toronto

lack of paint is much greater than loss by fire. A well-known paint authority has also stated that it is probable that the total production of all factors producing paint materials is not more than 1% of the losses that would occur if property were entirely neglected through lack of paint.

These considerations give some seriousness to the contention that paints and varnishes can be made to serve as preventatives and insurance against loss through deterioration. How many property owners realize this seriousness? On the other hand, to what extent have you, as a paint dealer, impressed this phase of painting upon them?

Do Not Realize

You know that many property owners hasten to renew their fire insurance policies, yet never receive any returns by reason of fire. You know also that these same men have neglected or refused to paint their property. Why? Because the actual monetary loss that takes place year in and year out through lack of paint has not been brought home to them. Many a worthy piece of property has gone to rack and ruin through neglect, and which might have been kept in a serviceable, interest-earning condition. This has been proven by the thousands of homes that after a long period of emptiness have been reconstructed, and made not only habitable but comfortable.

Why is it property owners in every community have refused or neglected painting, then go to work and pay out expensive repair bills as though it were a matter of course? It is because they have not been brought face to face with the tremendous loss that must inevitably come about through long periods of paint neglect. If repainting could be made a habit every three or four years, like the renewing of fire insurance, instead of a spasm every eight or ten years, such losses would materially decrease. The retail paint dealer can do a great deal towards developing this habit to the benefit and profit of himself as well as his trade.

Demand Insurance

Here is another thought on the same subject. As is well known, it is the custom of the mortgagee to demand a fire insurance policy against possible loss by fire on any building on which he grants a loan. It would not be unreasonable, therefore, nor impossible, for him to demand as a condition of granting loans on a mortgage that such property should be painted at least every three or four years against inevitable decay and deterioration. Considering that loss through lack of paint is greater than loss by fire, it would form an assurance against loss on realizable value. A leaseholder leasing property over a prolonged period of years would be fully justified in stipulating as a condition of the lease that his property should be painted at frequent intervals in order that it will be returned in serviceable condition, at the expiration of the lease.

Can Render Service

The service that the paint and varnish dealer can render his community by promoting protection, preservation, and conservation through his paint department, is almost inestimable. In very few instances has it been developed to the extent of its possibilities. It is in this phase of paint selling that the greatest opportunity for development and profit rests in the future.

It is not so much a case of how much a man saves by failing to purchase and use paint, as it is the extent of his property loss in neglecting to paint, and how much more is he actually out of pocket in so doing. Failure to paint inevitably brings losses that can never be retrieved; at the same time it brings about his head repair bills that could have been avoided. A repair bill that could have been avoided is as much a loss as deterioration and is only a compounding of the results of neglect.

There has been too great a tendency to look upon paints and varnishes as a luxury, especially when viewed purely from the decorative standpoint. There has been a very great failure to realize that they should be viewed and used from the broad fundamental economic standpoint of preservation and conservation.

Paint dealers who are keeping their ears to the ground will also note the change in attitude of the paint trade in advertising and selling their product. There has come realization that from an economic standpoint paints and varnishes have a larger service to perform than that of a decorative luxury. That service lies in the ability to preserve, protect and conserve and strikes at an underlying economic principle that makes them a necessity, a necessity the use of which brings actual dollars and cents saving to the property owner. The trade is beginning to realize that from this standpoint lies the grandest opportunity for the development of the sales of paints and varnishes.

Paint dealers alive to any change in conditions will get in line with this new tendency and seek to promote a regular painting habit from the economic standpoint. When they do they place their paint departments on a much more solid basis.

When the public buy paint from the standpoint of protection they will naturally demand all the protection they can purchase, which will offer a solution to the mischief created by selling low grade paints when only the best should be used. When service and value are sought, the question of price will sink into the background.

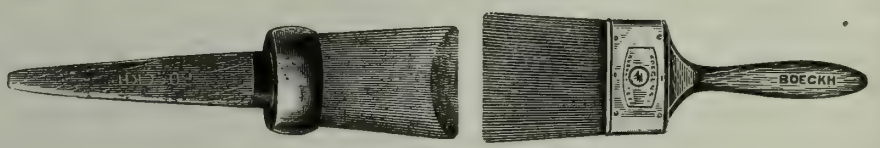
There are a good many dealers who can well afford to take a few minutes off, and think over their paint selling problems in this light.

The Brush Department

Neat Sample Board Will Help You to Sell More Brushes

By Following Out Suggestion Given Below, Time May be Saved For Both Customer and Clerks—Keep Scrubbing and Shoe Brushes Separate From Paint Brushes

DURING the spring season sample boards should be arranged where proper display cases are not used to boost the sales of brushes. A correspondent has sent us in the following idea:



Arrange board, say 18x24 in., cover with turkey red or white cotton. Place brushes on same in rotation of price, viz., 15, 20, 25, and 30c, etc., and upwards with price ticket, and place numbers 1, 2, 3 and 4 and up, in addition to the price ticket. Then take all your stock boxes and mark on reverse end of box the numbers 1, 2, 3, 4 and up, according to the lines carried. When a customer comes in and looks over the board and selects say a 30c brush, you can go to your box labeled No. 4 and get the required brush, thus doing away with the time spent in looking for any particular brand or size, and saving time for both customer and clerk.

Dealers will be surprised at the increased sales of brushes, and they usually carry as good a margin of profit as any article in the store. This idea can be used for paint brushes, kalsomine brushes and dusters, but would suggest that another board, or the reverse side, be used for scrubbing, shoe, sanitary bowl brushes, hair brooms and banister brushes, using the same idea in numbers, only using higher numbers so that they will not conflict with the others.

Brushes should not be kept on high shelves, near the ceiling, during the period when it is necessary to have heat in the store or store room, as all heat ascends and wood handles in brushes are liable to shrink.

A TIMELY SUGGESTION THAT WILL PAY

During the past few years while labor was so scarce many thousands of people acquired the paint-up habit.

The number of persons who now find real enjoyment in handling a brush and retouching their property with a fresh coat of paint is steadily increasing.

Take advantage of this condition—display paint brushes conspicuously at this appropriate time and suggest to the public that they buy now. As you know—you can't sell them the equal of

BOECKH'S RUBBER SET BRUSHES

When Boeckh's are used the "Paint-up" is a real success. The bristles in a Boeckh's Rubber Set Brush cannot work loose and fall out to streak and mar the paint surface —they are rubber set and are there to stay. Look ahead for repeat orders—sell Boeckh's Brushes now. Once used always in demand.

Plate Glass Market is Showing Steadily Increasing Activity

THE following letter in reference to the plate glass situation has been sent out to the trade by the Johnson Brokerage Co., of Pittsburgh.

The plate glass market at present is showing more strength and activity than for many months past. Apparently this change is just beginning and an increasing demand from month to month is likely to continue during 1919.

Much of this improvement is caused by the greatly increased requirements of the automobile industry, while the needs of furniture and mirror manufacturers have been large and are growing.

Another line that has used and is using a large feetage of plate glass, is the modern store front business. Thousands of these store fronts are being installed in all sections of the country.

All old contracts with jobbers have been completed, and present contracts are intended only to cover the legitimate needs of the buyer and for delivery within a reasonable time. Those jobbers who had stocks, and were anxious sellers, have disposed of their holdings and are now actually in the market for glass.

The change came quickly and to many buyers was a surprise. Production has been very light for the past several months at the factories, and stocks in first hands are small.

The export business is taking considerable glass, and will take more when facilities for handling it improve.

You can readily see what the market will be when even an ordinary demand develops for glass for new construction. Don't get caught, but carry at least your normal stock.

SEES PROSPERITY AHEAD

Discussing the outlook for business at the annual meeting of the National Lead Company, President Cornish said:

"There never was a time when there was so much need for our products as at present. Painting was deferred during the war and there was little building except for war purposes. The stocks of merchandise in retailers' hands are the lowest ever known at this period of the year. However, the trade generally seems to be hopeful that a consuming demand will set in in the spring months that will speedily re-establish good business conditions. It is believed that the necessities of war have developed thrift; that the men shifted from peace work to war work have been educated by the diversity of their employment; that the soldier boys returning will be healthier, stronger, broader minded and ennobled by their experiences; and that in consequence will enter into an era of unusual productiveness and prosperity.

A NEW USE FOR PAINT

A dispatch from Omaha says: "Paint men are interested in a statement recently issued by the agricultural department of the University of Nebraska, that a liberal use of paint is the best method of eliminating borers and other injurious parasitic insects that affect fruit orchards.

The statement says: "Probably the best wash for apple tree borers is a thick coat of paint made from raw linseed oil and pure white lead. Remove the earth for a depth of from 3 to 4 inches from the base of the tree, scrape off the dirt and loose bark scales, and after worming, apply to the exposed trunk a thick uniform coating of paint to a distance of about a foot above the ground."

The Campaign Is On

By Wallace H. Blake

Sing a song of Springtime,
Everybody busy,
Four and twenty aldermen
Riding in one Lizzie;
When she stopped a minute
(It was rather quaint!)
Every blessed mother's son
Bought a can of paint.

Sing a song of Hometown
Really on the jump,
Cleaning up and painting up
Every cussed dump;
Everybody happy,
Everybody glad,
Everybody hustling—
Even dear old Dad!

Mother's in the parlor
Brushing varnish on;
Sister's in the kitchen
Helping brother John;
Grandma's mixing mill white
In the old cowshed;
Gosh, a fellow hates to
Lie so late in bed!-

Cleaning up and painting up,
So the days go by,
Preachers, prudes and prima donnas,
Mixing in the pie;
When that pie is opened,
Tell me if it ain't
A jolly day, a dollar day,

FOR THE MAN WHO SELLS THE PAINT

JAPANESE WINDOW GLASS

Japan is producing more window glass of smaller sizes and cheaper grades than is needed for use within the country. The surplus is being exported chiefly to China, India, Java and Australia. Quantities of plate glass, glass with metal inserts, and other better grades, while still imported into Japan, are being reduced each year by the increase in local manufacture.

TURPENTINE MARKET LIKELY TO REMAIN FIRM

Reports from Savannah regarding the turpentine situation are as follows:

Very heavy shipments of turpentine are looked for in the next forty days that will cause a sharp decrease in visible supplies. From Savannah alone it is expected that fully 20,000 barrels will go foreign. This is more than the entire stock at Savannah at this time, and more than the receipts will be for the three main ports for the month of April, probably until the middle of May. The turpentine market continues firm with no sales in excess of current receipts, some minor inroads being made on the tanked stuff. The strength shown by this commodity recently has grown out of two factors, the very small receipts and the opening up of foreign trade. Dealers are not believed to hold much turpentine stocks and the factors and producers and speculators having tanked turpentine are feeling quite different from what they did thirty to sixty days ago about demand and price prospects. They now feel that if production is held down to the level of the season now ending, as seems quite probable, the drop in values that was predicted will be deferred and be of decidedly smaller moment than anticipated.

The whole naval stores aspect seems to be rapidly changing. The period of depression is rapidly passing away and unless there is a recrudescence of trouble in Europe that puts up new barriers to international trade just at the time when the few remaining impediments give promise of being speedily removed, an activity in foreign trade is in sight that will materially alter the entire situation.

Domestic consumers who have been building their plans on tremendous drops in values of naval stores are basing their hopes on a foundation of sand. It is now regarded by experienced men in the trade as very doubtful that rosins will decline much. if any, below the level at which they have been recently offered to consumers. With a small crop in prospect and with a world-wide demand to be met from a production hardly more than half of the old time normal peace crops, there is apt at any time to be seen a pressure of demand on supplies that will put values beyond the quotations. Prices cannot be forced down to peace levels when the production of an article has been cut in half and the world's requirements are on the up grade again, as they unquestionably will be from now on with regard to naval stores. Consumers who defer buying too long are just as apt to find that they have done so to their own financial detriment as otherwise.

Varnish Service

Length of Service is the real measure of varnish value. It is the qualification that makes the most lasting appeal to the consumer. No matter how cheap varnishes are by the gallon, if they lack durability they are dear bargains, since it costs as much to apply a poor varnish as a good one.

Berry Brothers' varnishes, stains and enamels have an established reputation for producing handsome finishing effects that retain their beauty for many years. This long wearing period means economy.

Berry Brothers' label has for 61 years been accepted as the mark of efficient varnish service by discriminating buyers.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, April 10.—Linseed oil is higher again this week, and is a reflection of the high prices for and scarcity of flaxseed. This commodity is now thought to be much shorter in supply than was figured out a few weeks ago, and it does not seem that oil will be low at present. Turpentine is higher in some quarters, and putty, lead in oil and paints are all held steadily. The movement is excellent, according to the manufacturers.

Linseed Oil Up; Seed Scarce

Montreal.

LINSEED OIL.—Another advance of price has been made through the continued scarcity of flaxseed. It is becoming more and more apparent, say the crushers, that seed is not plentiful at all, and that, as a matter of fact, there is less quantity to be had than it was expected awhile ago would be available. There is a decided strengthening of markets and no one will predict the situation for any time ahead.

Raw	Imp. Gal.
1 to 4 bbls.	$1 67½ $1 71
5 to 9 bbls.	1 67½ 1 70

10 to 25 bbls.	1 70 1 71½

Turpentine Firm; Some Ask $1.10

Montreal

TURPENTINE. — Several are not now anxious to offer turpentine, and for the most part, supplies are limited. It has thus developed that some have advanced quotations five cents, and it is probable that another week will see no quotations below the $1.10 level. Some are looking for new supplies and others rather expect shortage to continue.

Turpentine—	Imp. Gal.
1 to 4 barrels	$1 05 $1 10
Small lots	1 16

(Packages extra).

Putty Holds Here With Firm Tone

Montreal

PUTTY.—Due to the high price of oil and of other material, there is a real firmness in the putty market, although no changes have been made. It is considered likely that there will be no recession of values at this time, so long as whiting is scarce and so long as oil holds its present position. There is a good seasonable demand.

Firm White Lead With Trade Good

Montreal

WHITE LEAD IN OIL.—Seasonable business is reported very satisfactory for white lead in oil. The market is steady and rather firm, with prices unchanged. Five ton lots are selling at $15.50 per 100 pounds, ton lots at $16, and smaller quantities at $16.35.

Paints, Specialties Going Well

Montreal.

PAINTS, ETC.—Movement of these lines is better, and there are excellent indications, say the makers, of a good brisk season. This will be borne out, it is expected, when a little better weather comes, and when navigation opens. There are no changes, but prices are well held all around.

TORONTO

TORONTO, April 10.—Higher prices on linseed oil are in effect this week, and is reflection of stronger tone in flax seed markets. Turpentine has gone higher, prices advancing 5c per gallon in some quarters. Shellac has registered a decline of 50c per gallon in the large size packages with a proportionate drop in the small containers. A marked improvement in business being done in all lines of painting materials is reported and the trade feels very optimistic over the outlook.

Linseed Oil Registers Advance

Toronto.

LINSEED OIL.—Higher prices are generally the order of the day as applied to linseed oil, and there is no weak factor in the situation shown at the present time. The situation in respect to Argentine seed reveals no betterment, and with the opening of navigation Canadian seed will be in even bigger demand in the markets of the United States. These conditions would seem to point to an even stronger market on flax seed and that higher figures will be named on linseed oil following changes in seed is a natural condition. The range of quotations made this week are given as follows:

Linseed Oil—	Raw
1 to 2 barrels, gal.	$1.74 -$1.77-$1.83
3 to 5 barrels, gal	1.73 - 1.76- 1.82
10 bbls. and over	1.71 - 1.74- 1.80
	Boiled
1 to 2 barrels, gal.	$1.76½-$1.80-$1.86
3 to 5 barrels, gal.	1.75½- 1.79- 1.85
10 barrels and over	1.73½- 1.77- 1.83

Prices shown are those ruling on Thursday of current week and subject to daily fluctuations of the market.

Five Cent Advance Noted in Turpentine

Toronto.

TURPENTINE.—Locally prices went up 5c per gallon in some quarters with a firm tendency shown. Primary markets are strong and indications are that surplus stocks are being moved out quite rapidly. In addition to this factor the situation in relation to the new crop is not encouraging. Reports state that present season's output will not exceed last year's figures and may be considerably less. With a broader market to supply this crop, which seems quite reasonable to expect, high prices may be maintained and a scarcity develop. However, some interests feel that in another month or six weeks, when new crop turps start rolling in there may be a slight break, temporarily at least. Quotations this week are:

Turpentine—	Imp. Gal.
1 barrel (barrel included)	$1.10-$1.15
2 to 4 barrels (barrel included)	1.09- 1.14
5 gallon lots	1.20- 1.25

Shellac Records Decline 50c Gal.

Toronto.

SHELLAC.—Prices on orange and white shellac have come in for revision downward this week, the large package showing a decline of 50c per gallon with a proportionate drop in the small size containers. New prices in effect are:

White shellac in barrels, $4 per gal.; 5-gal. tins, $4.15 gal.; 1-gal. tins, $4.25 per gal.; in ½-gal. tins, $4.40 gal.; in ¼-gal. tins, $4.55 per gal.; in 1 pint bottles, $7.35 per dozen; ½ pint bottles, $4.05 per dozen; ¼ pint bottles, $2.35; in ⅛ pint bottles, $1.25.

Orange shellac: in barrels, $3.50 per gal.; in 5-gal. tins, $3 65; in 1-gal. tins, $3.75; in ½-gal. tins, $3.90; in ¼-gal. tins, $4.05; in 1 pint bottles, $6.60 per dozen; in ½ pint bottles, $3 79; in ¼

Build your store on this firm foundation. Brandram's Genuine B.B. White Lead is nearly two centuries old—it has a long and honorable history behind it. In the world competition of all these years Brandram's process is the only survivor of all the White Lead processes which were in use at the time it came into being.

This is the white lead which is used in B-H "English" Paint.

Your guarantee and your customer's satisfaction lies in that two centuries of history.

Mixed Paint Business Better

Toronto.

MIXED PAINT.—There is no mistaking the better feeling amongst paint manufacturers over the improvement in orders coming to hand. The volume of business indicates that retailers are getting busy and the outlook is considered promising for substantial repeat business during the next two or three months. Prices hold without change for the week.

More Activity in White Lead in Oil

Toronto.

WHITE LEAD IN OIL.—More activity is being experienced in white lead in oil, the trade showing more of a disposition to buy though orders placed are not for large quantities. Prices have held without change for the week at the following figures: Pure lead in oil, $15.80 per hundred pounds in 5-ton lots; $16.30 per hundred pounds in ton lots, and $16.65 per hundred pounds in less than ton lots. The various brands are shown in the current market quotations.

Glass Quiet; Putty Steady

GLASS, PUTTY.—Business in window glass is small and this has influenced a somewhat weaker tendency though no quotable change is reported. Lower prices are not expected as a reflection of market conditions but may be instituted in some quarters in an effort to stimulate sales. Putty shows no change during the week. There is only a small amount of business being handled and prices remain unchanged at following levels:

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices.

DENATURED ALCOHOL

A dispatch from Ottawa states that it is proposed to enact new provisions governing the manufacture in Canada of alcohol without the admixture of any denaturants, and denatured alcohol, intended for use in the arts and industries or for fuel, light or power purposes, with restrictions as to the place of manufacture, sale, delivery and transport.

NEW PEACE TERMS

Before the war fully 50 per cent. of the output of the five armament firms in Sheffield, England, was of a warlike character, and it follows, therefore, that the trend of negotiations at the Paris Peace Conference causes a certain degree of anxiety. If naval building, and consequently the manufacture of armor plate, guns and shells for the equipment of the vessels are to be seriously curtailed in future, there is going to be a considerable amount of valuable plant lying idle. It is not, of course, suggested that work of the kind indicated should be continued for the sake of an important armament centre, but it will be readily seen that the transition problem is going to be a far more serious one for Sheffield than for many other industrial districts.

Manufacturers, however, are taking as optimistic a view as possible of the situation, and are doing their utmost to perfect arrangements for developing the remaining 50 per cent. of output capacity on the lines of peaceful production, but this will take some time. Meanwhile, many firms are displaying nervousness regarding the manner in which the American steel trade is forging ahead in exports, their misgivings being increased by the handicap of continued labor unrest at home, the prospect of still higher steel prices when the last subsidy on pig iron is removed shortly, and the very apparent disinclination of oversea buyers to translate inquiries into substantial orders.

The ray of hope continues to be supplied by the light steel, cutlery, and silver and electro-plate trades, which are driving busy. File and saw makers cannot produce fast enough.

A REAL "CLEANU-UP, PAINT-UP" CAMPAIGN

The New Orleans Association of Commerce has adopted a unique plan for that city's Clean-Up and Paint-Up campaign this year. Several weeks have been devoted chiefly to cleaning up, this effort culminating in a final week, April 19-26, when reinspections will be made of all the unkempt premises reported in the survey now being made, while property owners also are being notified of these conditions. The Times-Picayune says that "while this work and a thorough educational campaign are in full swing, all organizations and interests will be co-ordinated, the city divided into districts and everything arranged to have the entire city cleaned up, by the end of the third week in April, to a degree never attained before"; and then, "with a clean city as a starting point, the paint-up and other city beautiful features of the campaign will be launched. This work will reach into every section, every home and every school and public and business building and factory."

That will be some campaign, and the broad basis upon which it is planned, and the continuous effort to which the whole city has pledged itself, will result in improved sanitary conditions and lower disease and death rates, and in the conservation and increase of building and ground values to an extent that, if ever fairly estimated, will make all this effort and the incidental expense seem infinitesimal in comparison.

The Canadian Tungsten Lamp Co., of Hamilton, Ont., have installed a well equipped department for the manufacture of "Helios" automobile lamps.

PITTSBURG MARKET LETTER

(Continued from page 67)

The Buyers of Steel

For many years the steel trade philosophy has been that the buyer has little title to say anything about prices or the market. It is for the sellers to do the talking. Fifteen years and more ago the buyer had practically nothing to say about the character of steel he wanted to buy. He was expected to take ordinary soft steel. If it was not strong enough, use more tons for a given purpose. In this matter there has been a radical revolution, nearly all steel producers being anxious to furnish the buyer with any description of steel he desires, and many steel producers even do research work at their own expense, to develop kinds of steel better suited to buyers' requirements. In the matter of price, however, the buyer is supposed to have as little to say as formerly.

The steel buyer has, however, expressed himself, and as a matter of fact he had expressed himself as to the Redfield Board prices, effective March 21, before the Railroad Administration refused to accept the prices. The buyer expressed himself by means of the character of his buying. The record made since March 21 is a very clear one. For a few days there was much heavier booking of orders, the orders showing that they represented business held back in anticipation of price reductions, whether when announced they should prove large or small. It was business that had to be placed in any event. Now, with the longer experience since March 21, all steel producers consulted admit that the bookings are of precisely the same character, and are from the same buyers, as earlier in the year. No new variety business, in other words, has been brought out by the price reductions. There is no steel for construction work or other general investment purposes. The buying is hand to mouth in character and is for common, every-day requirements. Averaging together the decreased rate of buying just before March 21, when business was being held back, and the greater rate of buying that obtained afterwards, the average rate is less than the buying rate in January and February.

Thus the ordinary buyer, the general public, buys no more than before the price reductions, and thus the public really went on record as to its appraisal of the new prices, before the Railroad Administration did.

At this writing the situation is entirely in confusion. Steel prices may be further reduced in the near future, or further time may be consumed in discussion. There is even a possibility that the steel producers will not hold together and that there will be a really open market.

Steel mill operations are at about 75 per cent. of capacity, or a trifle less. Some of the mills have considerable business on books, some have very little and some have none, having already closed.

MARTIN-SENOUR
PAINTS AND VARNISHES

MADE IN CANADA

SOLD ON MERIT

THE GREATEST SATISFACTION A MERCHANT CAN HAVE

is to know positively every time he sells an article that he has provided his customer with absolute satisfaction. The **MARTIN-SENOUR** DEALER AGENT is certain of this every time he sells a can of 100% PURE PAINT or any other **MARTIN-SENOUR** PRODUCT. He knows that he has provided his customer with 100% Efficiency and 100% Satisfaction, because 100% PURE stands for highest quality and lasting service.

It also gives the Dealer-Agent great satisfaction to know that the story of 100% PURE QUALITY and SERVICE is not only widely heralded throughout the country from Coast to Coast, but it is truthfully told in such a way and through such numerous sales helps as to make it the easiest and most profitable to sell.

Pure Paint and Truthful Advertising make for 100% Satisfaction.

Have You Plenty Of C·C·M· Bicycles?

AN EARLY spring this year will probably mean an extra heavy demand for bicycles during this month.

Then along comes Bicycle Week—May 3rd to 10th—and another big rush for bicycles.

Especially for C.C.M. Bicycles—the dependable, widely advertised line.

Ten bicycles in the store when wanted will be worth twenty not yet arrived.

The bicycle dealer who makes the money will be the one with a good stock on hand in plenty of time. We guarantee prompt shipment.

"In A Class By Itself"

Dougall Varnish

It may cost a little more by the gallon, but owing to its great covering power it costs less by the job, and it is "The Varnish That Lasts Longest."

This is the varnish to sell and recommend to your customers in the sure and safe knowledge that it means entire satisfaction to them.

Send a postcard for our dealer proposition.

Jamieson Sales Mean Larger Profits

ASK

the dealer who has been selling our line.

"HE IS A SUCCESS"

The veteran painter, tried and proved, the man who does paint well.

"HE KNOWS"

The chemist, who can analyze—he smiles and says

"ALL RIGHT"

Because

It goes farthest.

Covers more space at less cost.

Encourages the inexperienced to paint and brighten up.

It would be a wise thing to stock them now.

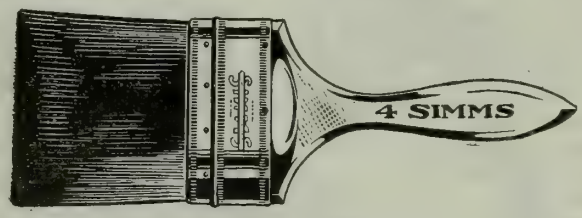
Every Simms' Brush Sold Sells ANOTHER

The selling of Simms' Set-in-Rubber Paint and Varnish Brushes is like an endless chain. Each one used means another sold soon. They advertise themselves by solid merit. And there is a good profit on every brush you sell.

TRADE SIMMS SET IN RUBBER MARK

This Set-in-Rubber is our own patented process. You can find no other Brushes anywhere so good. The bristles are set in forever—they are absolutely guaranteed **never** to come out.

Each Brush is a perfect tool for the painter—doing everything that a good paint brush should do—and then a little more.



Made in every shape and style by skilled workmen for use in skilled work.

Don't let your stock run low. Order a new supply **now.**

Stephens
REGISTERED TRADE MARK

The Essence of Good Salesmanship!

A SUGGESTIVE display of Stephens' paints has always been a powerful factor in veering the minds of the householder around the paint question.

Link up Mr. Householder's paint thoughts with your window and capture his business.

If you are not now a Stephens' Agent, but wish to be, drop us a post card and we will cheerfully send you our proposition.

RADIATOR NEVERLEAK

Stops All Leaks

Radiator Neverleak is a guaranteed preparation for stopping leaks in Auto Radiators. It is a carefully and scientifically compounded liquid that will, positively, in from five to ten minutes, stop any ordinary leak in a radiator or cooling system. And the repair will be permanent.

It Contains No Acid, Meal, Cement or Sediment to Clog or Impair the Cooling System

It will not evaporate, consequently it remains in the radiator indefinitely, automatically sealing any new leaks that may occur. It also tends to prevent the formation of scale or rust in the cooling system.

As your profit on NEVERLEAK is extra good, it will pay you to investigate. You can sell on an absolute money-back guarantee.

GREAT WEST ELECTRIC CO., LIMITED

WINNIPEG

Distributors of Laco Tungsten and Nitro Lamps

When you see the above Trade Mark on anything pertaining to Fishing Tackle you need have no hesitation in recommending it to your customers.

There is no possibility (except in a few articles) of prices for Fishing Tackle being reduced before next season, so that during the period of transition you would be well advised to place orders well ahead of your every-day requirements.

Orders for future delivery are now being booked, but owing to the great pressure we have had with Government work it will be some time yet before we are able to attain our pre-war output.

Our new General Catalogue is now in preparation, and we are placing on a Register the names of Fishing Tackle Dealers who will obtain a copy on publication. Have you sent in your name? If not, do so now.

In the meantime we invite and welcome your enquiries and will be pleased to quote you for anything we can supply. We are Wholesale only, and all enquiries from consumers direct are referred to the nearest retailer. We don't cut into his business.

Morris Carswell & Co., Ltd.

118 Howard Street, Glasgow, Scotland

SELLING SPARK PLUGS INTELLIGENTLY

With every 100 lot assortment we give a display stand which shows the proper plug for every make of car. Your customer can pick out the plug he wants and order by name, which makes selling easier for you and more satisfactory for him. We handle the celebrated Rex Plug—absolutely guaranteed—as well as all the other ready sellers, including the Mica Tractor Plug in all sizes.

MEHASCO

ANOTHER MEHASCO MESSAGE **29**

EASYON TIRE CHAINS

The only chains an autoist can slip on the wheels when alone and stuck. Put up eight chains in a set, four, for each rear wheel. Handy little friends to motorists and real, active sellers.

P&L Dealers Have Steady Call For "61" Floor Varnish

WHY? Because it is advertised in a really *big* way. "61" Floor Varnish is a product which proved its quality *years ago!*

And "61" has gone right on giving just a little longer wear than we ever claimed for it; giving just a little better satisfaction than we ever said it would give.

What is the result?

Today dealers in all parts of the Country are reaping the harvest and profiting because their stores are identified with this steady-selling quality product — "61" Floor Varnish in Colors.

Are you one of these dealers?

If you're not, just jot down your name and address on the margin of this advertisement and mail it to us — we'll send you full particulars of our Introductory Assortment.

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

FROST-PROOF RADIATOR

THE ROLPH-CAMPBELL FROST PROOF RADIATOR.
PAT. No 166589

AN IDEAL "ALL-YEAR" RADIATOR

For Ford Motor Cars, Motor Trucks and Tractors

While the Frost-Proof Radiator is primarily designed to cope with severe winter weather, it has unusual features which give it remarkable cooling efficiency in the warmest of weather.

The water tubes are larger than in ordinary types of radiators and the tanks, both top and bottom, have a greater capacity.

The Cooling Surface is **greater** than in tubular type radiators.

The Water Channels are unusually **large** which is a big feature in Canada, where there is so much alkali water.

The Frost-Proof Radiator will **save its cost** ten times in one winter.

Frost-Proof Radiators will fit 1917-18-19 Fords.

Frost-Proof Cores for 1912-1916 Fords and larger cars can be installed on receipt of outer shell.

EQUALLY EFFICIENT IN ANY WEATHER

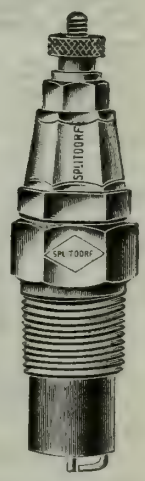
Write for further particulars.

SPLITDORF SPARK PLUGS

The Plug with the Green Jacket

LEAKPROOF NOW AND FOR EVER

Standard S.A.E.



Why do ordinary plugs leak?

Why do SPLITDORF Plugs never leak?

Ordinary plugs have porcelain insulation. It cracks, it chips, it mars, it easily becomes loosened.

SPLITDORF Plugs, on the contrary, are immune from all of these faults because the insulation is made of ruby mica. Thin sheets of this fine mica are wound lengthwise around a cone-shaped electrode. The core thus formed is then forced into the plug casing in such a manner that every explosion tightens it and keeps it forever leakproof.

The conical mica core secures to SPLITDORF Plugs many other advantages over porcelain plugs; it cannot crack, it cannot chip and score cylinders, it can be cleaned and recleaned without injury, and it is almost indestructible.

Heavy Tractor

There is a type of Splitdorf Plug best suited for every engine.

SHARPLES

PIONEER IN 1884
LEADER IN 1919

The above is more than the picture of the oldest and largest separator works in North America. It is convincing evidence, expressed in bricks, machines and men, of the support given Sharples by the dairymen of the world.

Back in 1884, P. M. Sharples, a machinist at West Chester, Pa., began studying the problems of dairymen. Quickly realizing, through actual experience, that foreign separators were inefficient, he invented the first American separator. Not only is Sharples the pioneer North American separator, but every notable improvement in separator construction has been a Sharples achievement. The Sharples Suction-feed Separator is to-day the only separator that skims clean at any speed —and has no discs in the bowl.

Sharples Milker—the only milker with a positive squeeze—is another Sharples pioneer achievement.

Now, Here's What The Above Means To You

Through a Sharples Dealer Contract, you can take advantage of the Sharples 35 years of goodwill; the Sharples pioneering; the Sharples 100% Americanism; the Sharples mechanical supremacy. But the Sharples Contract is not being "hawked" around—we only want dealers who measure up to the Sharples standard. For such dealers there are opportunities now that may not be available in six months—as the Sharples Contract is naturally being eagerly sought after.

Correspondence invited from progressive dealers

RELIABLE
TRADE MARK

Canadian Products

SELL ON SIGHT

Reliable Batteries and Flashlights sell on sight. Customers who see them on display in your store are reminded of their needs.

They sell well because they are good products of best Canadian manufacture thoroughly "Reliable" in every way and because there is a big demand for good flashlights and batteries. Reliable Batteries are fresh and alive with lasting power.

"Reliable" metal Flashlight cases handsomely enamelled in four different colors are without a doubt the finest on the Canadian market. Advertising now appearing regularly in the Canadian magazines, farm papers, newspapers and motor papers, is spreading their name and fame to your customers. The margin of profit is better than on most competing lines. Reliable products will pay you well for your best support.

The following jobbers will supply your requirements—Ask them about our selling helps.

We offer you bars made of High Carbon Steel at the same price as you are buying the Mild Steel Bar elsewhere. Send us a trial order.

B. J. COGHLIN CO., LIMITED, Office and Factory: Ontario Street East, MONTREAL.

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace—made for Machine. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

FLAGS AND TARPAULINS—The demand for Flags is increasing and will continue while our men are coming home. If your stock is low, sort up now. We carry all sizes.
Tarpaulins and Horse Covers find ready sale during Spring months, when horses must be kept dry, as well as goods being moved from place to place. Write for quotations.

Protect Your Reputation

Your reputation as a hardware dealer will depend much upon the quality and make of the hardware specialties you carry in stock. That is why it is essential in selling Garden and Lawn Hose, or Rubber Belting, that you sell dependable qualities or brands that have established a record for service.

In that respect, your reputation will be fully protected, if you buy and sell Dominion Rubber System Hose. These are always safe lines to put into stock. They carry the backing of the largest and oldest rubber manufacturing organization in Canada, and you can be absolutely sure of satisfactory service.

No. 300 Hose is the favorite. The material and workmanship are guaranteed. Its value is without equal.

If your stock of Lawn and Garden Hose is not complete, write to the nearest Dominion Rubber System service branch for prices.

Cutting Soldering Time

at it since '93

Robert W. Hunt & Co., Testing Engineers, Chicago, carried out exhaustive tests with the four Allen Fluxes, and six other leading commercial fluxes. Their report contained the following paragraph:

"In making up the test pieces it was noted that the time required for the soldering operation varied considerably for the different fluxes and that greater speed and cleaner joints were made with the use of Allen's paste and liquid fluxes." For free samples and literature address Bissett & Webb, Ltd., 126 Lombard Street, Winnipeg, Man.

Our catalogue of **Galvanized Iron Building Materials** will enable you to better meet the needs of your customers. Write for it, and further details, to-day.

WHEELER & BAIN
TORONTO

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

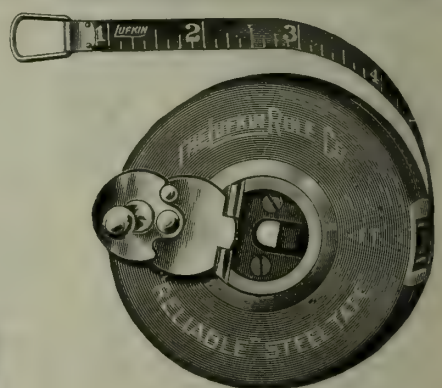
Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are arctively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.



Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeping, please remit with copy, preferably by money order.

INDEX TO ADVERTISERS

Occasionally advertisements are inserted in the paper after the index has been printed. The insertion of the advertiser's name in this index is not part of the advertising order. The index is inserted solely for the convenience of the readers of the paper.

Have You Sold This Man Carborundum Sharpening Stones?

HE is the carpenter—and he is a man who knows and appreciates the value of a good "oil stone." Right soon now he will be getting busy on spring building.

See that he has a Carborundum Sharpening Stone in His Tool Kit

You have dozens of such customers coming into your store every day. Make them Carborundum customers. It will help to hold them.

Just as a suggestion—show them the No. 109 Combination or the No. 107 Round Combination or the No. 174 Slip Stone for gouges and carving tools.

Incidentally we thought you might be interested in this Display Case No. 7. It's a great trade help—so are our window displays, circulars, etc.

Want to know about them?

The Carborundum Company
Niagara Falls, N. Y.

Fine Silverplate Made in Canada

The Lincoln

Its sincerity and unadorned beauty make the name unusually appropriate.

THE name of *Wm. Rogers & Son* stands for *"The Best at the Price."*

Thrifty housewives, who know true values, prefer a product of known reliability, with a wide reputation, because of the name and standing of the company that produces it.

Hardware merchants find a display of the silverplate of *William Rogers and his Son* an especially lucrative sideline. Their women customers are readily attracted by a good display of silverplate. For help with your window or showcase displays write us for information.

Remington UMC

Deliveries Are Now Good On Remington UMC Fire Arms and Metallics

You can go after the shooting business hard this year. We're right behind you with good service and deliveries. You'll find hundreds of men eager to handle a Remington UMC Rifle again—or our famous "Pump" Shot Gun—all they want to know is where to get 'em.

5-Shot Autoloader

6-Shot Repeater

Remington UMC "Metallics" are standard for quality and uniformity. Over 450 kinds —a cartridge for every known make of fire arm.

Make a display of Remington UMC .22 Rifles and Metallics. It's a big Spring business bringer. Advertising material on request.

Remington UMC of Canada, Limited
Windsor, Ontario

REMINGTON UMC

O-CEDAR Polish is a quality product strongly backed by merit, service and satisfaction.

We know we have in O-Cedar Polish Mop and O-Cedar Polish two products the women of Canada want. We do not depend entirely on the merits being advertised by word of mouth or personal recommendation. We bring newspaper, magazine and street car advertising into play as well—strong and persistent advertising that keeps the line continually in the public mind. When you feature this class of product—you will be repaid for the effort you put into it.

EVERY day some of the women in your district are hearing about O-Cedar Products — how they lessen the work of housekeeping. They are reading our advertisements in newspapers circulating all over the Dominion, and they are hearing about O-Cedar from their neighbors.

You should let them know, in the most forceful way possible, that they can buy O-Cedar Products in your store. There may be dozens of people who would buy O-Cedar from you if they were simply reminded of it by an attractive window or store display of O-Cedar Mops and O-Cedar Polish.

O-Cedar Polish

will do wonders for you—if you will give it a fair chance. It is by linking your business to a well-known, well-liked product such as O-Cedar Polish and O-Cedar Polish Mop that you can "register" your store as "a store of satisfaction" and get the confidence and trade of the best class of people.

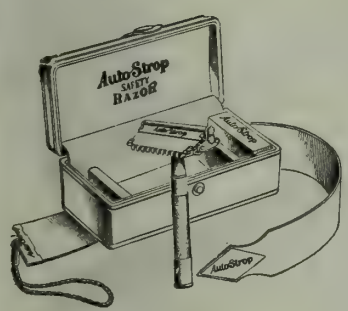
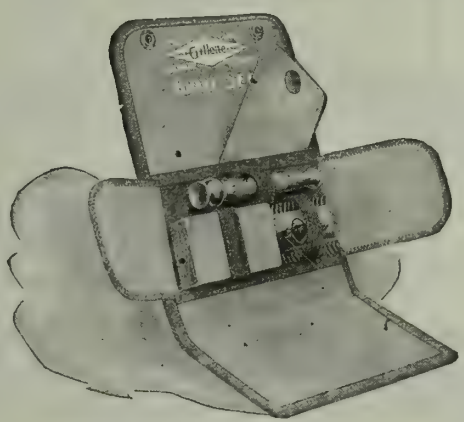
HARDWARE AND METAL, April 19th, 1919. Volume XXXI. Published every Saturday. Yearly subscription price, $3.00. Entered as second-class matter July 1st, 1912, at the Post Office at Buffalo, under the Act of March 3rd, 1879. Entered as second-class matter at the Post Office Department, Ottawa.



RICE LEWIS & SON LIMITED TORONTO HARDWARE Estd 18 47



Razors of all kinds—*safety, regular*

Many a man has developed the "shave-every-day" habit as a result of his military training, and at the same time has been sold on the "safety" idea in razors. With the return of our soldier boys will develop an unprecedented demand for the safety razor. Why not cater to this business?

We carry a good stock of the leading styles in the several makes of safety razors, as well as recognized brands of the regular type of razor, and can make quick delivery. Prepare for the razor trade of your vicinity by arranging a window display and by devoting a show case to the display of your stock.

Order from the "Rice Lewis" representative or direct.

We carry a range of the old style razors at prices to meet all requirements

HAMILTON ▪ ▪ MONTREAL

NUMBER THREE

IN the year 1853, Cyrus W. Field believed that by means of a cable people could talk across an ocean three thousand miles wide. For thirteen years he concentrated on perfecting his means of communication. He made fifty voyages across the Atlantic. Many of his cables broke in mid-ocean. In August, 1866, the first message was successfully transmitted from New York to England. This grand achievement was the result of a man with an idea concentrating on one thing. The story is one of the noblest records of American enterprise.

The secret of Cyrus W. Field's success was

CONCENTRATION

No man ever achieved a worth while victory by accident. Fine achievments are always the result of exhaustive experiments, hard work and concentration. One of the greatest men who ever lived, whose influence has lasted for centuries, took this for his motto: "This one thing I do."

Victor Hack Saws have achieved their position of dominance because we make nothing but hack saws. For many years we have concentrated all our energies and resources on perfecting this one tool. As a result, the Victor Hack Saw Blade is recognized by good mechanics and foremost technicians in all parts of the world as the most efficient hack saw for every metal-cutting purpose.

VICTOR SAW WORKS, Ltd.

This Saw Will Advertise You

Star Hack Saws will help advertise your store if you connect up with our big national advertising campaign. Almost all your customers have seen the page and double-page advertising of Star Saws in the Saturday Evening Post and other publications.

Put Star Saws in your display case and in your window, with a Saturday Evening Post opened to the last Star ad to remind your customers of the national advertising on Star Saws that they have been seeing right along.

Star Hack Saw advertising has shown dealers everywhere that there are far more hack saw users than they ever thought possible. Get after the business that is rightfully yours.

Star Saws, the largest advertised of all tools—will help boost your whole tool department if you will let it work for you.

Our Handbook, "How to Sell Tools," helps you cash in on our national advertising in your tool department. It is full of money-making ideas and selling suggestions that you can use. Write for your copy to-day.

"BARCALO"

"S" Wrench

STRENGTH

A wrench is as strong as its weakest part.

The Barcalo "S" Wrench is a **Unit of strength** made up of few parts. It has a drop-forged, movable jaw — strong enough to stand the hardest strain. The adjustable pin, screw and knurl are made of high-grade materials and properly placed. Every bit of material, every operation necessary to turn out a Barcalo Wrench, passes through the most exacting inspection.

Where other wrenches will not work — in those tricky places so hard to get at—

A Barcalo Does the Trick.

Made in 6, 8, 10, 12 and 14" sizes.

We are so sure of our wrenches measuring up to all we claim for them that we back them to the limit.

Dealers are selling Barcalo Wrenches at a good margin of profit and building up a fine line of business on Barcalo sales.

It's for your advantage to link up with the Barcalo organization. May we tell you why?

Get in touch with us to-day.

Every Wrench is guaranteed.

An unusually early season has speeded up the annual spring demand for these two quick-selling machines.

Stewart No. 9 Ball Bearing Sheep-Shearing Machine

will break all sales records this year, owing to the greatly-increased activity in sheep raising throughout Canada and the United States.

Sheep raisers, everywhere, are pretty well posted on the fact that the use of this machine recovers **15% more wool** at each clip, because it makes such a close, clean job of it. And 15% increase in yield **means something** at the present high prices of wool.

Machine retails at $19.00
and your discount is 25 %

Stewart No. 1 Ball Bearing Horse and Cow Clipping Machine

A million owners of horses and mules are converts to the importance of giving these animals a "Stewart Clip" just before their hard spring work begins.

A man doesn't try to do manual labor on a warm spring day with his winter overcoat on. Why should he expect his horse to feel any different than he would?

This Machine retails for $13.00
and your discount is 25 %

And after the rush spring season is over you will find it easy to sell any machines left in stock, to farmers and dairymen for clipping cows round udders and flanks to keep dust out of the milk pail.

Order a liberal supply of both machines, direct or through your jobber. Better telegraph.

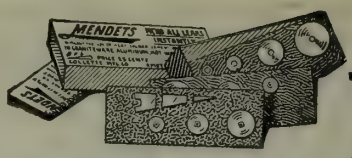
Outselling the old-fashioned hoe

LIBERTY ADJUSTABLE CULTIVATOR WEEDER

(Canada Patent Oct. 15, 1918)

Wherever they have been introduced Liberty Cultivator-Weeders and Gilson Weeders are rapidly ousting the hoe from popular favor. Anyone who has ever used a hoe can see at a glance that these new Gilson tools are more effective and will save time and labor. It won't take Gilson Tools long to "catch on" in your locality. Order from any of these jobbers:



THE GILSON WEEDER

(Canada Patent May 22, 1917)

F. R. Murray Co., Ltd., Vancouver, B.C.; Brown, Fraser & Co., Ltd., Vancouver, B.C.; The Rogers Hdwe. Co., Charlottetown, P.E.I.; T. McAvity & Sons, Ltd., St. John, N.B.; J. H. Ashdown Hdwe. Co., Ltd., Winnipeg; Wood, Vallance, Ltd., Winnipeg.

Manufactured by **J. E. GILSON CO.**

Factory—Hamilton, Ont. **Vancouver Branch—109 Powell St.**

THE ENTERPRISE PERFECT

is a Double High Oven Range

With Two Large Full Size Cooking Ovens, both Equally Good

Not merely one oven and a warming closet but *two ovens for baking and roasting* and a large warming closet as well.

Design registered in Canada, 1916

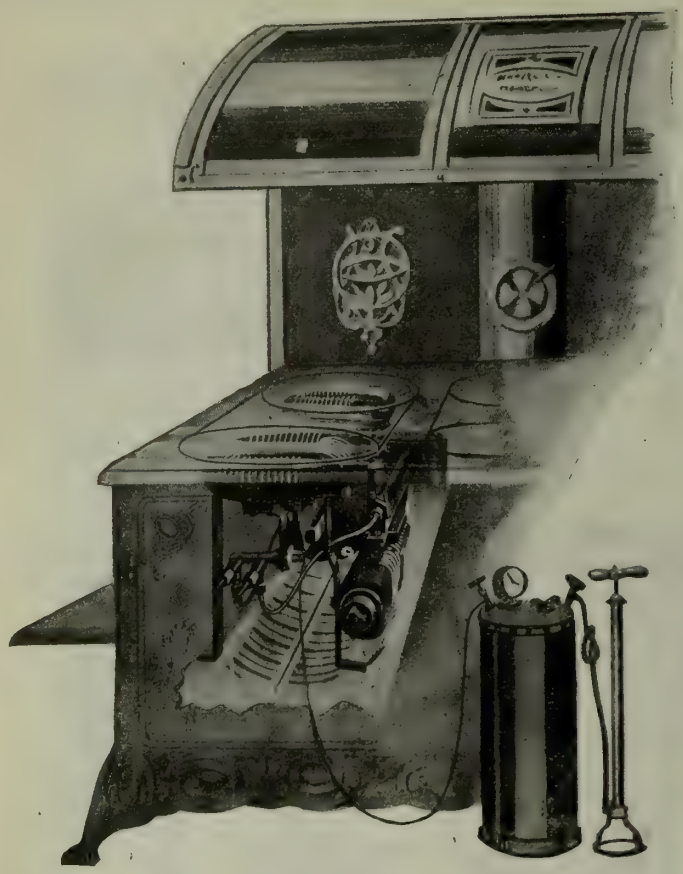
Made in two sizes—8-20 and 9-20

Both ovens can be used at the same time and with the usual amount, or even less fuel than the average single oven range requires. Each oven is fitted with drop door and thermometer.

THE FLUE CONSTRUCTION which makes these two ovens possible, is thoroughly sound, being based on the principle of the old elevated oven stove — the oldest and soundest principle of stove construction.

The HOT CLOSET is roomy and convenient. Has drop door. The BACK is WHITE PORCELAIN ENAMEL — so easy to keep clean.

The RESERVOIR IS DETACHABLE—simply hooks on. Can be put on or taken off in an instant.



THIS RANGE ON YOUR FLOOR INSTANTLY COMMANDS ATTENTION AND CREATES A DESIRE TO BUY—SALES SOON RESULT.

If it is not being sold in your town, write to-day for further information and ask for our agency proposition.

THE ENTERPRISE FOUNDRY CO.

Head Office and Factory: SACKVILLE, N.B.

Enterprise Produets are distributed from the principal points in the east and on the prairies, and in British Columbia by W. T. McArthur & Co., Ltd., Vancouver.

More Heat At Less Cost

Woodstock, - Ontario

Cleaner Oil, Economically Handled
No Waste, More Profits.

This sums up the advantages of the dust and dirt-proof, leak and waste-proof battery of

GILBERT & BARKER
T-230-L Lubricating Oil Outfit

It replaces the fire risk, mess and waste of barrel storage, with safety, convenience and economy. The oil is kept absolutely clean and cannot evaporate. The modern hardware dealer is making additional profits catering to the automobile trade.

This outfit can be put in the rear of the store, quickly available to serve the auto trade with oil. A barrel track and chain hoist enables any man to drain a barrel with ease and despatch. It's such a good investment, making for such positive economy and additional profits from the handling of oils, that it soon pays for itself. At least this has been the experience of thousands of users.

Made in Canada by

Steel Pump Rod Coupling

DEMON GRIP Steel Pump Rod Couplings are harder to break than a bad habit. They are three times as strong as malleable couplings; how much more we do not know.

A **DEMON GRIP** is the only safe coupling to use in joining pump rods whose threads are oversize or of unequal size. These it will take without twisting off the rod or wrecking itself. The crack is what does it. See the cut.

The best coupling should be sold the best way—in boxes for the retailer's shelf. The **DEMON GRIP** Steel Coupling has always been furnished in boxes. These boxes are showy—red and black—and each one carries the packer's record.

To give in a few words the reasons for the success of the **DEMON GRIP—greater strength, adaptability to oversize threads, convenient packing.**

Stanley Tools

STANLEY ADJUSTABLE TRY *and* MITRE SQUARE NO. 21

The Blade is adjustable, and as it can be reversed, provides any size of try or mitre square within the capacity of the tool. In reversing, it is not necessary to remove the blade from the handle, consequently the tool is always assembled and ready for use. The Edges of the Blade are machined, graduated in 8ths, 16ths and 32nds of inches and the tool is square inside and out. Both Handle and Blade are nickel-plated. Made in three sizes—6, 9, 12-inch blades.

4 Good Reasons ---READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 15 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

Those Hard-To-Get-At Nuts

In every garage, machine shop, blacksmith shop and factory in your locality there's a lot of unnecessary cussing that you can turn to profit.

Those nuts that are so hard to get at with an ordinary wrench are easy prey to the Original "Westcott" adjustable "S" Wrench. The "Westcott," besides being the most convenient and useful wrench for ordinary use, can be used in places inaccessible to the Monkey-Wrench. It stops the cussing and adjusts the nut quickly and effectively.

"Westcott" Wrenches are fully guaranteed to do their duty. We empower you to refund the purchase price of any "Westcott" that fails.

The "Westcott" is easily adjusted by the hand that holds it. Its handle is made of first-class refined malleable iron and the jaws of forged steel scientifically heat treated.

If your jobber cannot supply the "Westcott," write us and we will tell you who can.

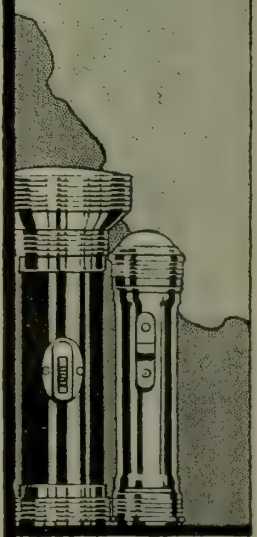
Reliable Flashlight Batteries Now Better Values Than Ever

DEALERS will be glad to know that on March 19th prices of "Reliable" Flashlight Batteries were substantially reduced.

We have been able to reduce manufacturing costs of this line and are very glad to give all who buy "Reliable" Flashlight Batteries the advantage of lessened prices.



"Reliable" Flashlights and "Reliable" Batteries have no superiors. They are made as well as it is possible to make them. Only the best of materials and the best of workmanship go into "Reliable" products.

"Reliable" products are made by Canadian workmen in a Canadian factory, financed by Canadian money. No manufactured parts are imported, and the only duty we pay is on a small portion of our raw materials, on which the duty is very low.

It will pay you to stock the complete line. Many Canadian dealers are building up a big battery business by pushing "Reliable" products.

Dealers who have not received the new price list are invited to communicate with any of the jobbers listed below, or to write direct to us.

Increased Paint and Varnish Sales $10,000 in One Year. Total Sales $25,000 for Year

Based on an interview by Hardware and Metal with Nelson Mills, vice-president Mills Hardware Co., Ltd., Hamilton, Canada.

View of section of the paint and varnish department Mills Hardware Co., King street store, Hamilton, Ontario. Note counters for displaying brushes.

THE Mills Hardware Company, Hamilton, Ont., with stores on King and Barton streets, did a paint business of $25,000 last year, showing an increase of $10,000 over 1917 when paint sales amounted to $15,000. This phenomenal increase in business was not due to accident or luck, but to carefully laid plans, followed out consistently and with enthusiasm on the part of every salesman in the store. Interviewed by HARDWARE AND METAL, Nelson Mills, vice-president and general manager of the company, attributed the success of the paint department largely to confidence in the products carried in stock, enthusiasm over the paint department, knowledge of the goods, neat and practical interior and window displays, advertising, staff conferences, personal talks, and a realization of the great opportunity which exist in every locality for the sale of paint. Every man on the Mills staff agrees with the manufacturer's representative who told them at one of the conferences that *"the possibilities for paint and varnish sales are so great that they can only be realized by trying to take your eyes off paint."* This factory representative stated on one occasion when he made the foregoing remark, he was taken down to the coal bin of a big hotel, and after the electric light was turned on his ques-

tioner said: "Now show us some paint and varnish." Drawing a lead pencil from his pocket, the paint man said: "There is some varnish," and pointing down to the questioner's shoes said, "You will find some more on the eyelets of your shoes." A firm belief in the unlimited field for the sale of paints and varnishes has spurred the Mills staff on to greater efforts, resulting in the splendid showing made last year and with an exceptionally bright outlook for the present year, with good prospects for far exceeding last year's sales totals.

VALUE OF GOOD DISPLAY

Two accompanying displays show views in the paint department of the Mills store on King St. Views of other departments of the Mills store have appeared in previous issues of HARDWARE AND METAL. A glance at the photo is sufficient to indicate to the reader the neat and attractive appearance, and the extent of the paint department. This alone creates a splendid impression upon customers. Stock is carefully kept up and it is the aim of the company to at all times have a full line on hand, and thus be prepared to meet the immediate requirements of all customers.

A neat and extensive department alone will not sell paint. It will influence sales, but behind the product and the display you must have the men, those who come in contact with the public and who in order to be successful retail paint salesmen, must have the necessary knowledge of paints, varnishes and their uses to make practical suggestions, and give intelligent instructions to customers.

STAFF CONFERENCES

This important phase of the business has not been overlooked. For some years past staff conferences have been held regularly with resultant good to the salesmen, the company, and customers of the store. At these conferences which cover a wide range of subjects, the paint department and its possibilities have received a goodly share of time and attention. From time to time manufacturers' representatives take part in the conferences and through actual demonstrations show exactly how the goods should be used, and how various effects are secured. At these conferences the store salesmen have secured a wealth of information, which proves useful every day in answering the questions of, or making suggestions to customers. At times the conferences are attended only by members of the staff, and outside representatives are not present. Tests are made and a general discussion takes place. Salesmen present any problems which confront them, and suggestions are made for improving the department and the efficiency of the company's selling methods.

Through the actual demonstrations in the store in which salesmen have taken part, they have become familiar with the uses of paints, varnishes and fillers. New members added to the staff from time to time are coached, and every effort is made to supply each store salesman with information which will assist him to be a better salesman, make satisfied customers for the Mills paint department, and make customers feel that they can rely on the advice which they receive through the paint department in the Mills store. It will be noted in the accompanying views that brushes are attractively displayed on special counters in the paint department. This method of display has greatly increased brush sales. At the staff conferences when paint and varnish demonstrations are given, the importance of using the proper kind of brushes is always emphasized.

EFFECTIVE USE OF WINDOWS AND NEWSPAPERS

The show windows are used most effectively for paint and varnish displays. Readers of HARDWARE AND METAL will, no doubt, recall some of the splendid paint window displays which have been featured from time to time in this paper.

Paint receives prominence the year round. It is not a one or two-season seller in the Mills business. The paint department in the middle of winter is just as prominent and attractive as in the spring and fall. Sundry lines, such as enamels, stains, etc., receive special prominence, and, in fact, occupy one of the most prominent positions in the department. Sample boards, slats, cards, etc., are always handy for customers. There is no hunting around for color slats, cards, etc. Everything is arranged with a view to giving quick and satisfactory service.

Newspaper advertising has been used regularly to draw trade to the Mills stores. The Mills advertisements are always well illustrated and contain the information that interests the public. The ads. are written from the public's standpoint. "What does the public want to know?" is the attitude of the ad. writer. Mills Hardware Co. ads show the results of careful study and planning. They are not hurriedly thrown together for the purpose of filling space. Each advertisement has a mission to perform, and is prepared with that end in view. And the Mills Company has secured handsome results from local advertising backed up by efficient service in the store.

VALUE OF ENTHUSIASM

Last, but not least, is the enthusiasm of the Mills staff. Every man, from the head of the company down to the delivery men, is a booster for the paint department. Why? Because they all believe in it, talk about it at every opportunity, and realize that it is as profitable a line to push as any other line in the store. The men have all seen actual demonstrations of the goods. They know the results

Another view of a section of store near the paint department, showing how tables extend out to centre of floor. The entire Mills store is departmentized, and wall shelving here shown is a portion of the paint and varnish department only.

which may be secured. They know how to talk intelligently to customers about painting and varnishing. They know of the beautifying, sanitary and preservative qualities of paints and varnishes. They know that the value of paints and varnishes cannot be measured in dollars and cents alone. They know that every time they sell a can of good paint they are assisting in "conservation" (much needed in Canada now), and they know that each satisfied customer is not only a prospect for more paint and varnish, but is also a good advertisement. The foregoing outlines a number of the reasons why the Mills Hardware Company, through their King and Barton street stores, were able last year to increase sales in the paint department alone upwards of $10,000, making a total of sales in the paint department alone upwards of $25,000.

An Explanation

AN article which appeared on Page 61 of the April 5 issue of HARDWARE AND METAL has, owing to an unfortunate typographical error, in which an apostrophe was inserted in the word "firms," been misconstrued in some quarters. The article was intended to help along the "Save the Surface" Campaign which was inaugurated and is being carried on under the auspices of the Canadian Paint, Oil, and Varnish Association. It was intended to outline officially the plans of the Association as far as they had matured up to that time. With this object in view an interview was obtained by a HARDWARE AND METAL representative with Mr. George Henderson, president of the Association and a member of the committee in whose hands was left the matter of making arrangements for the campaign. The heading of the article as it went to the composing room contained no apostrophe in the word "firms." The insertion of the apostrophe has been construed by some persons into meaning that the campaign was being carried on by the firm of which Mr. Henderson is president and general manager. It was not intended in any way to convey this impression. The campaign was inaugurated and is being carried on by the Canadian Paint, Oil and Varnish Association, composed of members located in various parts of Canada. Through an unfortunate co-incidence, the underline accompanying a cut of Mr. Henderson, referred to him only as president and general manager of Brandram-Henderson Ltd., whereas it should have stated, that Mr. Henderson is president of the Canadian Paint, Oil and Varnish Association.

While it was quite obvious to those who read the article that it referred only to the campaign which is being put on by the Association, and not to a campaign of any individual firm, we understand that an erroneous impression has been created in some quarters. We desire to correct any such impression, and to make it clear that the responsibility for the

Continued on page 53

The "Save the Surface" Campaign

To Make Campaign a Success the Co-operation of All Branches of the Trade is Required—Retailer and His Salesmen Can Make or Mar the Success of the Campaign

THE recent decision of the Canadian Paint, Oil and Varnish Association to promote and carry out a co-operative advertising campaign for the encouragement of the greater use of paints and varnishes is, without doubt, a most progressive and important move, and one that should produce good results if all branches of the trade will work in co-operation.

The success or failure of the campaign, however, depends upon the retailer and the retail salesmen—the men who come in direct touch with the buying public. Through his local newspaper advertising, through his show windows, through attractive interior displays, and particularly through personal solicitation in and out of the store, the retailer and his sales staff can do more than any other force in Canada to increase the sale and the use of paints.

Aside from the effort to promote a larger volume of business in paints and varnishes, this campaign has an economic significance that is worthy of the impersonal support of all interested in the conservation of the country's resources. It is not unlikely that it will also receive the support of those who are interested in community welfare, the promotion of better living conditions, and in the present day problem of reconstruction and rehabilitation.

HARDWARE AND METAL has for some time been pointing out the extent to which the use of paints and varnishes has been neglected in Canada, and drawing attention to the subsequent losses through lack of protection and preservation, as well as loss of business.

These losses have been both local and national. Their real significance is most clearly shown by a consideration of effects upon:—

First:—Natural resources, by the deterioration and loss in building material.

Second:—To a certain extent commercial credit, through the run-down condition and appearance of property.

Third:—Industrial progress in the unnecessary replacement of property that might otherwise have been preserved with paint for continued use.

Fourth:—The unnecessary high cost of doing without paint; when it is remembered that our actual losses by fire are less than loss through deterioration by reason of unprotected and unpreserved surfaces.

Materials, labor and time, the basic elements of our real created values, have been absolutely and irrevocably lost in the deterioration of property through lack of paint, improper painting or insufficient painting.

Let us hope that this campaign will in some measure bring home to the public the needlessness of such loss and waste, and that Canada will be able to retrieve some of the values that have been thoughtlessly neglected.

This waste and neglect, which few have realized, have drawn the attention of the paint and varnish trade to the necessity of more aggressive methods, both in selling and advertising paints and varnishes. Like many other industries, they have come to realize that greater co-operation of all interested factors was necessary in order to increase the use of their products. While this movement is primarily prompted by the commercial benefits to be derived by the trade, it is to no small extent permeated with an altruistic desire to help in our conservation efforts by reason of the protective and preservative value of paints and varnishes. There is also a realization that better living and sanitary conditions can be maintained through well-painted and decorated homes, public buildings, and places of work.

There is also another significance that lends further importance to this decision at the present time. Men in every industry have been striving to promote larger business in order to maintain and advance the welfare of the country. This co-operative effort on the part of the paint and varnish trade will, in a very large measure, stimulate the trade as probably nothing else could do. They are formulating and applying their own stimulant, which betokens a healthy sign of aggressiveness in their own interests.

This movement is a positive effort that if properly carried out is bound to assure definite and larger results. It shows a willingness on the part of the trade to do something concrete on their own behalf in place of pleading merely in words for others to help them out. The cry has also been for greater confidences. With such a co-operative campaign in action, it will display in definite form, the confidence that the paint and varnish trade have in Canada for greater opportunities in their line.

Time will probably show that had the property owner not been possessed with an idea of false economy regarding the use of paints and varnishes, some portion of our reconstruction problem would have been lessened, both from the preservative and decorative standpoints.

It is not at all improbable that this campaign will reveal that this has been mistaken economy, and that there will be a revival of painting and the selling of paints and varnishes

Dealers who have been doubtful as to the outcome of coming season and who have been holding back in their preparations for the season's business should see more than a ray of light through this effort and prepare for this revival, not alone in the replenishing of their stocks, but in extending their own advertising and selling efforts, to take advantage to the full of this increased business.

Looking at it from all angles, the launching of this campaign is most opportune just at the present time, and is fraught with many opportunities which have been anticipated by those behind the movement. It is also very likely that many unanticipated opportunities will be revealed as the campaign progresses.

Amongst these is the development of greater all-year-round business. The extension of the fall painting idea, and the encouragement of indoor painting during the late fall and winter months, is quite within the scope of this "Save the Surface" with paint and varnish movement. If these can be brought into greater prominence the all-year-round paint department is in process of realization.

The co-operation of the trade in the United States will also be a big factor in contributing to the success of this effort in Canada. Advertising of a similar character will appear in the larger American periodicals which have circulation in Canada. These efforts on both sides of the line will supplement each other to a marked degree. It is claimed that the arrangement of the campaign will be such that very few people in Canada will not have their attention drawn to it in some way or other. The campaign is replete with comprehensive possibilities, which any paint dealer who reads the writing on the wall, will realize are full of direct and indirect benefits to himself.

In the face of this undertaking on the part of the

larger factors in the trade, and with its possible benefits to all, directly or indirectly interested, it must be remembered that the individual retailer's success primarily depends on his individual co-operation with the larger effort. This campaign of necessity is national in its scope, and as such, will create a marked effect on the trade. But, to a large extent its purely local effects will be dependent on the amount of co-operative effort extended by the local dealer in his own behalf.

Business cannot be handed to each one on a silver salver; nor will it come about through a spirit of "letting George do it." It will be very largely to his own loss and the loss of those behind the campaign if the local dealer does not put forth some effort to supplement this campaign in his own locality. The man who realizes that this is a national, as well as an individaul opportunity, will be getting up on his toes and working in harmony with this campaign.

To the paint dealers of Canada we have this to say very positively—that never before have you had such opportunities for advancing the interests of your own paint department, as lie at your very doors this very moment.

The one arises out of the neglect shown in the use of paints and varnishes during the past four years, and which cries out for their greater use this year. The other is the co-operation being extended to you through this educational co-operative campaign, which seeks to extend the interests of the trade as a whole.

Most of you know whom Providence helps the most, and the man who fails to get his share through lack of co-operation will only have himself to blame.

Which reminds us of a sentence read sometime back and which is quoted here—"The incubator of indifference hatches out nothing. It simply 'lays' things on the desk, and the blame on the Government, or high prices or some other equally irresponsible scapegoat."

AN EXPLANATION

Continued from page 51

appearance of the article rests entirely with HARDWARE AND METAL, and was due to the accidental insertion of an apostrophe, and the omission of a portion of an underline. A brief explanation was to have appeared in last week's issue, but just before going to press we were informed that considerable annoyance and apprehension had been created in paint circles, and we, therefore, decided to hold the matter over and run a more extended explanation in this week's issue. If, as inferred in one quarter, there is an impression that the influence of any one individual was responsible for the appearance of the heading and underline in the form in which they appeared, HARDWARE AND METAL desires to go on record here and now to the effect that the inference is ridiculous and untrue, and not in accordance with the facts.

FORTUNES IN SCRAP

FOUR hundred millionaires have been developed from rag-picking, is the estimate compiled from Government reports on waste reclamation in the United States.

Rag picking and collection of tin cans, scrap iron, old paper, wire, rubber and all discarded metals represent an annual turnover of more than $2,000,000,000, according to incomplete estimates.

The Waste Reclamation Service of the Commerce Department has discovered one Harvard man who gave up a $10,000-a-year "rag-picking" job to enter war work, and now he's going back to his original work again.

Current Events in Photograph

MAIN CAISSON OF HUGE DRY DOCKS

The banks of the St. Lawrence River, near the ancient town of Levis, are once more resounding as in days gone by, to the ring of axe, adze and caulking hammer, also to the more modern clatter made by pneumatic riveters and the snap of plate punches. The reason for all this is the great shipbuilding activity going on at Lauzon, a village just below Levis. One of the new dry docks, of which the main caisson is shown in the photo, is claimed to be the largest in the world.

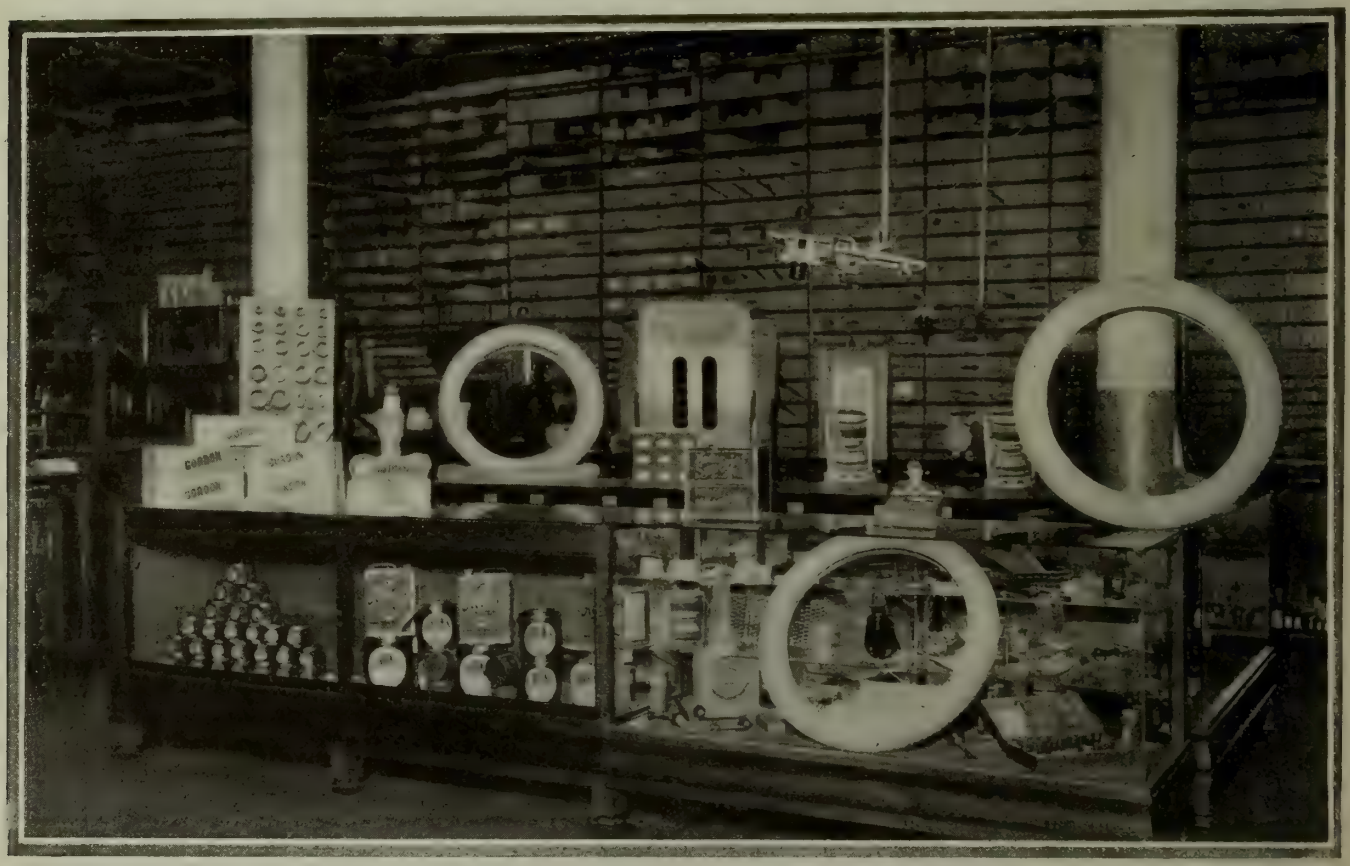
Accessories Field Steadily Growing

Rapidly Increasing Demand For Cars and Trucks Offers a Big Opportunity to the Hardwareman—Chance to Render Real Service to Prosperous Section of the Buying Public is Worth Going After

WITHOUT in any way relaxing their efforts to expand business in the usual channels automobile manufacturers are making very particular efforts this year to break all sales records in the country districts. While few firms are in a position to offer anything in the way of even reasonably early deliveries of cars they are devoting a great deal more than usual attention to rounding up business among the farmers. There are some very good reasons for all this activity in the rural districts and they all centre around the fact that no one class of people in the Dominion to-day have so much ready money or such prospects for continued prosperity as the farmers. The farmers also have realized in the past few years as never before the real value in dollars and cents that an automobile is to them in their everyday life, not only in their work but in their pleasure time as well.

Quick to See It

The automobile manufacturers have been quick to see the unlimited field of opportunity open to them. The money that has been pouring into the farmers' pockets for many months now for everything they can raise has only served to increase a business that from the automobile dealer's standpoint was already one of the most promising and profitable fields. Accordingly the word has been passed to every branch and to every salesman to miss no chances of selling to the farmer.



It is an ill wind that blows nobody any good and in this particular instance the automobile manufacturers are not only benefiting themselves but the dealers in automobile accessories. Every car that has been sold and every car that is sold means just that much more business for the dealer who handles accessories and supplies.

Doing Big Share

The hardware dealers of the Dominion have been cashing in on this business to such an extent that they have aroused the ire of many of the garage men and supply dealers. Some of the latter have not many kind things to say about the hardware dealers, but the hardware dealers are not losing any sleep over the situation. Some of the orders they are placing for accessories and supplies show that they are prepared to handle all business that offers, which is more than can be said very often of the garage man. This readiness to put himself in a position to take care of all the needs of the car owners in his district is one of the reasons why the hardwareman is dominating the situation. There is nothing mysterious about his success. Certain people in the community have automobiles. They need certain supplies and from time to time need accessories and repairs. The hardwareman man and the garage man have exactly equal chances for this trade. It simmers down to the fact that the hardware dealer is prepared to give service while the garage man is not always ready to carry the stock the people need. Result, the business is going to the hardware dealers.

Is Not Lessening

The automobile business and the auto accessory business will steadily increase. There is absolutely no reason to doubt that. A glance at any of the statistics showing how the number of cars in use

A well arranged store or window display of accessories always makes a fine showing and will have the effect of directly increasing sales. Seasonable goods should always be kept to the front.

in Canada is jumping from year to year will satisfy anyone that the auto is here to stay. It is growing more popular every day. The demand for the auto is growing because cars fill a very real place in the everyday life of millions of people. They facilitate business and they save time and money, while at the same time adding materially to the owner's pleasure. Hardware dealers and others who appreciate the possibilities of the growth of the auto and auto accessory business are laying the foundation for one of the most prosperous branches in their whole store by going after it. It is a line that carries a good profit and that lends itself readily to display either in the store or in the show windows.

Brings Good Trade

In addition to all this it brings to the store a class of customer whose trade is decidedly worth cultivating. The very large percentage of car owners are men of substance. They are in a position to not only buy what they need but will not stick at a dollar or two as long as they get what they want. Dealers all over the country have discovered to their profit that sales made to car owners through the accessory department have brought these same people and friends back when they wanted hardware lines. Incidentally much good business has developed and a steadily increasing trade in accessories as well. Business of this kind means an ever widening circle and the hardware dealers have not been slow to see and take advantage of the chances.

Another Big Chance

There is another factor in the business also. Steadily increasing freight rates, express charges and transportation costs generally are resulting in a tremendous demand for auto trucks. Just as in the case of autos so with trucks as far as the accessory dealer is concerned. The truck was never made that will not need painting, or repairing, sooner or later. It will need supplies

The original of the above reproduction was 6¾ inches wide by 6 inches deep. The arrangement and wording is good, but the ad. would have been improved by quoting prices and by the use of one or two more illustrations.

continually and accessories from time to time. Here is another opportunity for the hardware dealer. Someone has got to supply the things required and no one is in a better position to do it than the hardwareman. And to give him his due he is doing it, and every year he is getting a firmer and firmer hold on this business.

Business Methods

He is doing this by the methods that he carries out in his store daily. Service to the public is the secret. This includes selecting a stock of quality goods, goods that he can stand behind to the limit, and letting the people know that he has them. Newspaper advertising and window display are two of the principal methods used in telling the public where they can get goods, although many hardware firms have developed such an extensive business that they now send out their own special lists of auto supplies and accessories. There is a big field here and it is not going to grow any less.

The Importance of Store Arrangement

Display Tables Should Be Changed Often—Keep Seasonable Lines Where Customers Can See Them Quickly—Always Keep Store and Stock Clean and in Order

THE arrangement of the store means more than merchants often realize. Your customer, as soon as he or she enters, gets an impression. Let it be a favorable one. If your store is untidy and the stock dusty or dirty, there is a certain class of people who will never deal with you. Cleanliness is one of the essential things.

Seasonable goods should always be displayed in such a way that your customer can see them at a glance. The use of display tables is one of the best ways of doing this. These should be changed often, and always kept in first-class condition. A table displayed with small articles, such as toasters, mixing spoons, small strainers, egg beaters, can openers, etc., will draw more sales than if these lines are hidden away and shown only when asked for. Other tables should be used for showing goods which are particularly in demand for the time of the year, and let everything have the selling price plainly shown so that there will be no hesitation in quoting prices.

In some cases it would be very unwise to display certain classes of goods on tables, where the dust and dirt can gather on them. In this instance the glass show case is the only thing. These, too, can be arranged very nicely, and have the same advantage as the display tables, keeping the goods in view.

Always keep your store clean and in perfect order. Keep your shelves well stocked so that no one will get the idea that your stock is low. In small stores where the stock carried is not heavy, a good plan is to use the empty cartons to make your stock look complete. And as soon as one season passes and another brings with it the demand for other goods, let the people know you have their requirements and are ready to supply them.

WILL HELP SALES OF SPORTING GOODS

Increased business for hardware dealers of British Columbia in the sale of traps, guns, and ammunition was outlined by Dr. A. R. Baker, chairman of the Game Conservation Board, at a meeting of the Vancouver Angling and Game Association. British Columbia, he said, expects to obtain an annual revenue of approximately $100,000 from the fur trade in the future.

The fur industry is the only natural resource in British Columbia which is not on a revenue-producing basis, declared Dr. Baker. During the season of 1918 the fur trade of British Columbia amounted to $2,000,000, and for next season it is anticipated it will be double this amount.

Dr. Baker had been instructed to seek the control of sporting fish from the Government. He reported that while nothing definite had been done he had been given the assurance that the matter would come before the executive before the close of the present session. He had every expectation, he said, that the request to the Dominion to place the regulation of sporting fish under the Provincial Game Commission would be granted. In his further remarks he said that there were approximately 28,000 hunters in the province, that number of licenses having been issued last season.

It was announced by Dr. Baker that an international crow shoot had been arranged between ten men from Vancouver and ten men from Bellingham. The contestants will shoot twice in the vicinity of Vancouver and Bellingham, the honors going to the team killing the most crows.

IMPORTED SHEETS MAY NOW BE SECURED

In speaking with A. C. Leslie and Co., Ltd., Montreal, HARDWARE AND METAL was informed that the English galvanized sheets sold through the Canadian trade for many years, but which have been temporarily off the market owing to the exigencies of the war, may now be secured. It is expected that there will be a gradual improvement in the quantities that can be delivered, although at this time supplies are not very large. Importation can be made by those desiring supplies.

Three-Cent Postage Likely to Remain

War Tax on Letters Means About Six Million Dollars a Year and Looks Good to the Minister of Finance—Two Cent P stage to Become Effective Again in United States July 1

By T. M. FRASER, Ottawa Representative of the MacLean Publications.

OTTAWA.—In the House the other day a member asked the Government if it was aware that the two cent letter postage rate and the one cent drop letter postage rate are to be restored to the United States on July 1? If so, was it the intention of the Government to adopt similar letter rates for Canada this year? Hon. Mr. Rowell replied that the knowledge had come to the Government's ears; and what they proposed to do would be made known when the budget speech was made. That is about all the satisfaction one ever gets when making inquiries as to what is to be done in the future on any matter of Government policy, particularly if involving revenue; so you have to turn to and dig up reasons which would make it probable that the Government might take a certain course.

Works Out Well

The fact that the United States is about to return to the pre-war rate of postage need not necessarily affect us much, except as an example. They put the low rate in effect on Nov. 2nd, 1917, and it seems to have been a good thing for them; because the U.S. post office had a surplus of nineteen million dollars last year, about double the largest previous surplus on rcord; and surpluses over there are not the rule.

The additional cent postage imposed in Canada was not imposed by the post office department; it was a war tax, for which the Minister of Finance was responsible. It produces an extra revenue of about six million dollars per year; and six million dollars looks good to a Finance Minister who has over one hundred millions of a visible deficit between revenues and proposed expenditure. It seems extremely doubtful if that particular war tax will be dropped this year. No one has made very much complaint about it, and it does not bear very hard on anyone.

Helped Materially

While the Post Office Department showed a surplus of nearly three million ddllars last year, when we recall that about six million dollars of its revenue comes from this war tax, it can be seen that it would have had a deficit of about three millions if the tax had not been on. The conditions during the war were very unfavorable for the department. Not only were there a large number of stamp consumers out of the country, at the war, but the immense business carried on with them through the post office was all done free; and in addition there was the fact that there was a double burden of expenditure on the department from the fact that employees overseas were on full pay, and their places had to be provided for here as well.

Has Been Resumed

Another vital factor in reducing the revenues of the department was the fact that the parcel post revenue was cut off. It was suspended during the war for various reasons; as, for example, the fact that it was found that Russia, Japan and some other countries were using it largely as a cheaper form of freight service than they could get on steamships. It has now been resumed to practically every place except Russia and some unsettled parts of the Balkans.

The expenses of the department have advanced very heavily, in the face of the decrease in revenue. Out of the total increase in expenditure of about a million and three-quarters for the year ending March, 1918, over two thirds was for salary increases.

Great Britain did not put on a postal war tax, as we did; she increased the rate to three cents straight. The rate in France was five cents, and by the rules of the International Postal arrangement could not be increased for foreign postage. Great Britain has shown no indication of returning to the old rate at present.

While nothing definite will be known until the budget appears, it is not considered probable that the war tax will be removed on stamps.

New Controlling Factors in Paint

Influence Has Been Largely That of Oil and Lead—Paint Man Says Labor and Package Costs Bigger Factor Now—Changed Conditions Becoming Realized

THAT labor, package, and other raw material costs will enter more particularly and to a greater extent than ever before into the future cost of paint and kindred products, is the opinion of A. T. Black, general manager of the Martin Senour Co., Ltd., Montreal. "These items will be a greater price influence than ever," said Mr. Black to HARDWARE AND METAL, "and in many ways they will be a greater influence than prices for lead and linseed oil have been in the past."

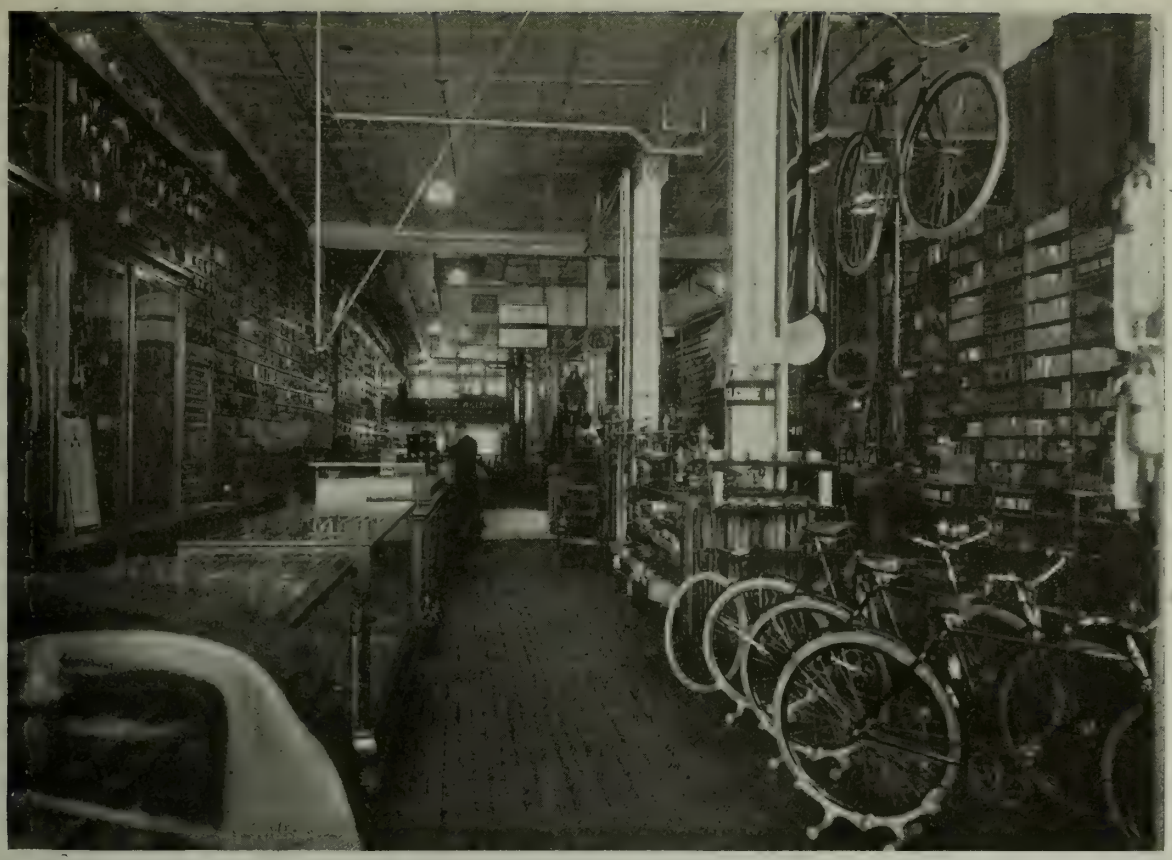
Says Costs Higher

Mr. Black thinks that pre-war levels will never be reached in considering the products turned out by the paint manufacturer. He said: "Even if pre-war prices for white lead and for oil were in effect, pre-war prices for the manufactured article would not prevail. Selling prices will have to continue higher, and the makers' costs to-day are even higher than they have been, even warranting increases at this time."

Mr. Black did not deny that the present basis for linseed oil was one of the big factors in increasing the manufacturers' cost, but the other factors above-mentioned are so great as to be considered among the controlling ones of the future.

Deferred Buying Awkward

In the matter of placing orders, Mr. Black pointed out that merchants had used extreme caution in placing business. In some cases this had been exercised to such a great extent that he believed there would be a great rush of business given the paint maker at the eleventh hour.



"The dealer who lets his stock run down to a low point will very likely be the most inconsiderate when he wants new stock for the coming season," said Mr. Black. "He will, in other words, send in his mail order and expect it to be filled over night. Add this to the regular business placed with the manufacturer, and to the sorting business of a regular nature that comes in, and the paint man will have to maintain a service more extensive than ever. Were orders placed in the regular way, this would not be necessary, and to have an organization to take care of this hurry-up business would be a great tax upon the manufacturer. It would really make a big service burden."

It was thought that, without overstocking, the merchant could still buy his reasonable needs promptly. "For," continued Mr. Black, "even if paint were to decline 50c per gallon now, the average dealer would still have profitable paint stock on his shelves. On the average he would perhaps find that his stock would have increased in value from 50c to 75c per gallon, taking present values into account."

Prices Compared

"The Canadian paint manufacturer has ever been slow to advance prices," said Mr. Black. "He has put this off, very often, until his own costs for raw ma-

The illustration shows how bicycles are kept on display at the front of the store throughout the bicycle season. The James Walker Hardware Co., Ltd., has found this an effective way to increase sales. Window displays are also used frequently.

To Develop Bicycle Sales Display Early

James Walker Hardware Co., Ltd., Montreal, Push Line Forward Before Snow Goes—April to June Best Selling Months—Window Displays Effective—Carry Few Dependable Models Rather Than Many Cheap Ones

"THE latter part of April and the month of May are the best time to sell bicycles, and within this period the largest part of our annual sales are made," said Mr. Rolland, manager of the sporting goods department of the James Walker Hardware Co.. Ltd., St. James St., Montreal, to HARDWARE AND METAL. "The men think about bicycles early," said Mr. Rolland, "and that is the time to press the sale. And when one or two buy new machines it is sure to make others think about them and sales are usually developed from this time on. The man with a new wheel will attract the attention of his friends. They will want to look the machine over, probably will want to have a ride on it, and they will ask where it was bought and if the rider is well satisfied, and if the quality is good. It is a big thing to get these ideas into the probable buyer's mind at the first opportunity."

Advertising is Used

Advertising space in a metropolitan daily is costly. The Walker Hardware Co. use space freely, however, and at this season of the year call particular attention to the special lines they sell. Thus, even before the snow has gone, they advertise bicycles and accessories. In this way the prospective buyer of a bicycle is made to think the matter over. He will want to look at the assortments in any case, before the season opens, and herein is an opportunity to the live dealer to chase this business for all there is in it.

In addition to the use of the newspaper space, small catalogs are used. These are devoted to cuts of the three or four models carried, to descriptive information and to showing other odd accessory lines. The catalogs are either mailed to a selected list of probable buyers, or are given out from behind the counter. In this way, interest is furthered, and Mr. Rolland stated that some had written in, in answer to the firm's advertising. It is a good idea, he thinks, to get people interested in this way.

Display Windows

The modern safety bicycle is a thing of beauty, especially to the man who has any intention of owning one. That is to say he will be attracted by the fine finish of the bicycle in the first place, and for the reason that a bicycle or two graces the floor of any hardware store, the dealer has the advantage of improving the attractiveness of his store.

In the Walker store bicycles are displayed on the main floor. These are carried well along toward the front and this is a good plan, for they are thus sure to catch the eye of any and all who may wish to buy or investigate. It is a big step in the selling process and prominence plays an important part.

Suitable stands are used to hold the bicycles in the correct display position, and sometimes one is suspended from the ceiling.

Used Frequently

The windows are used frequently, especially in the early season. This is part of the selling plan and with suitable bunting, and a free use of lithographs and cards, the display is made attractive. Generally while a bicycle is used towards the back of the window, accessories are neatly shown on the floor of the window and price cards are made use of also.

Within the store, the accessories are well displayed and these are made in closed cases for the most part. The ar-

MERCHANTS never make any profit out of "shelf clingers." It is goods that keep turning over steadily that keep the cash register playing tunes.

* * *

THE only kind of advertising that does not pay is that which is improperly done. Good advertising is an investment that never fails to return a profit. It is never an expense.

* * *

THE "Clean Up—Paint Up" idea is spreading from coast to coast. Are you behind it and cashing in on the opportunities it offers in your district?

GETTING AN EARLY START

NOT in many years have conditions generally been so favorable for the farmers all over the Dominion getting an early start at their work. There is every indication that now that help is more plentiful and with prices soaring for all food commodities production records in Canada will be broken. Prosperity has been coming to the farmers in such large measures that it is making them one of the greatest buying forces in the country. The annual purchases made in the rural districts run into millions and have been increasing at a rate that shows that the farmers are spending at least a large percentage of their greater revenues. Statistics that are available indicate that two of the greatest increases in buying are for automobiles and for labor-saving equipment. Not only the farmer, but his wife, figures in the latter class. There are some splendid possibilities in this situation for the hardware dealers, especially for those who have the ability and the foresight to lead the farmers' taste for better things. The dealer who lays in the stock and suggests to the farmer the things that will make his home better, his everyday life easier and conditions generally better, is going to reap some rich rewards in the shape of profits. There are many ways of doing this. The average farm home presents opportunities for suggestions for improvements of all kinds, both inside and out. Most of them need a lot of painting. Practically without exception there are openings for labor-saving equipment that may be operated either by electricity or gasoline power. Many of them need water systems and various conveniences. In some districts now the farmer who has not an auto is rare. Some of them have two or three. A very large percentage of the farmers who have not autos are prospects of the best kind, especially if they are the younger men. Many hardware men are now not only selling auto accessories but automobiles and are building up a good business. In the building field there are also big openings for business. With more money coming in farmers all over the country are either planning to build new structures or to enlarge and improve their present ones and instal new and improved machinery and implements. The hardware dealer who can anticipate the rural developments in his territory and arouse and cultivate the buying desires of the people will get the business. But he must be prepared to give service. The steadily increasing sales of automobiles to the farmers are making service more imperative all the time. The coming of the auto has meant as far as the farmer is concerned the bringing of the stores within a radius of fifty miles to his door. It is nothing now for a farmer and his family to go on a twenty-five or fifty-mile buying trip in their car. If the home merchant has not got the goods they want or if he tries to sell them lines that are not up to the minute, they simply pass him by and go to the store that will give them service in the way of a complete stock and new suggestions.

USING VACANT LOTS

HARDWARE dealers have a splendid chance to render a real service to their community and round up a lot of good business for themselves at the same time by getting behind all moves to turn unsightly and unproductive vacant lots into gardens. Many thousands of people in the last two years realized as never before the pleasure and profit to be gained from having a garden of their own. The impetus given to gardening, especially by the splendid results that were obtained last year, indicate that during the present season there will be more gardens planted than ever before. Scores of civic gardening and horticultural associations are encouraging this good work and hardware dealers may help the movement along very materially by taking an active interest in it. As a result of what has already been

done, many hundreds of useless lots which were anything but ornamental have been turned into gardens. The products of these gardens not only helped the Empire last year by conserving food supplies in the most critical hour the country has known, but it helped the gardeners to fight the high cost of living most effectively. To many of the factory workers it brought much needed outdoor exercise that they found so pleasant that they will never again be without a garden plot. In many places there are still vacant lots that can be utilized and hardware men can do an excellent work by helping get this land under cultivation. If there are no adults available an effort might be made to get the school children to take up the work.

FUTURE TRADE WARFARE

THE League of Nations may tend to abolish war, but trade warfare, keener than ever on account of the state of national budgets, the opening of new markets, and changes of the world map, will still be waged. What about preferential regulations in trading and preferential tariffs? Secret treaties as between one nation and another may be no longer possible, but the possibility still exists, and opportunity may be abundant, for secret and sinister ways of affecting the trade relations of different countries.

The British Government is alive to the situation, and it is reported proposes to spend £1.000,000 annually for consuls, and £250,000 for commercial attaches. A world-wide system of trade commissioners will co-operate with the reformed British Consular Service, representing trade associations composed of firms whose aggregate capital is said to be £4,000,000.

A NEED FOR CO-OPERATION

THERE are some merchants who work themselves up into a state of resentment because perhaps the local newspaper accepts advertising from the mail-order houses. They feel that the home paper should not accept this business. That is all very well from the standpoint of the merchant, but from the standpoint of the newspaper that lives on its advertising revenue, it is a very different matter. In many instances the local merchant does not think of advertising, and, perforce, the newspaper must find its revenue elsewhere.

Most newspapers would be glad to refuse mail-order advertising if the home advertising justified such a course. There's where the merchant comes in. He should help the local paper, and in so doing help himself. For no advertisement, if properly prepared, can fail to bring business.

WHAT OTHER EDITORS SAY

TO "the man in the street" or the observer not entirely intimate with steel trade conditions and steel trade parlance, it must be very confusing that there should be such divergencies of statement with respect to production costs. The United States Steel Corporation's properties are generally admitted to be worth about $1,600,000,000, which is about the amount of the property account on the balance sheet. Even at 6% this means $96,000.000 a year. On 16,000,000 tons output, approximately the corporation's capacity, that would be $6 per ton, merely for interest on plant investment. At 8,000,000 tons output the charge would be $12, or $6 a ton more. Apart from this item are depreciation, cost of superintendence, general expenses and a long list of expensive items. A cost account can be made up so conservatively that the company will have what are ordinarily considered profits if it sells at the cost shown.—*The American Metal Market.*

FARMERS everywhere are finding out the value of newspaper publicity. A few years ago it was the custom to have sale bills printed only. To-day, conditions have changed. The farmer has rural mail and telephone. He doesn't spend so much time at the hotels and blacksmith shops. The way to reach him now is through the local papers.—*Free Press*, Forest, Ontario.

CUTTING down the hours of labor beyond the point of increased efficiency, as has been proposed by some, will not solve the problem of unemployment. It is the consumer that gives employment, and as labor is itself the chief consumer, it necessarily is the greatest employer. To limit its power of consumption would be to decrease rather than increase employment. But if, instead of decreasing hours beyond the point of greater production, wages were to be raised without raising prices, labor could consume more, and consuming more would give more employment.—*The Public.*

SOCIALISM is a dream. Bolshevism is a nightmare. To have hell on earth put the two together and stir well. —Toledo *Blade.*

THE duty of the Government at this critical period when the whole future of these countries is practically trembling in the balance is so obvious that one wonders why they cannot undertake it without pressure from outside. The manner in which they have dealt with the question of imports and exports which lies at the root of the present problem is not calculated to foster a spirit of confidence in the men who have been placed at the head of the nation's affairs. If the balance of trade against these countries is to be reduced, and our fate depends upon its immediate reduction, the Government must see to it that unnecessary imports are restricted and that the exports should be encouraged to the utmost possible extent.

There is a vast amount of anxiety with regard to this matter in business circles. Those who are engaged in great industrial and commercial enterprises know full well what is at stake, and anyone who has been following the trend of events can understand their anxiety.—*The Irish Ironmonger.*

IT needs only a walk through the city to demonstrate the necessity of more attention to outward appearance. A general campaign with garden rakes and paint brushes, not to say bonfires, is a clamant need of the times, and should be inaugurated at once. Edmonton should now be putting on its better clothes and looking to its laurels as a city of neat if not pretenti ous homes. It is possible that other efforts and expenditures have overshadowed this estimable habit of keeping homes, yards and streets orderly and presentable, but whatever the cause of the recent neglect may be, it is now high time to sound the call to clean up.—*The Journal*, Edmonton, Alta.

EVENTS IN THE TRADE

Business Changes

Leader, Sask.—Bernthal & Love, hardware, have dissolved partnership.

Kintore, Ont.—A. Kinniburgh has purchased the hardware business of William Crellin.

Windsor, Ont.—Gordon Wall, Dresden, Ont., has purchased the Wyandotte St. store of the Ripley Peck Hardware Co.

New Firms

Frank C. Goodwin is commencing business at 2383 Queen Street East, Toronto.

Personal

Richard Lalonge, of the staff of Ryan & Co., hardware, Amherstburg, is ill.

W. W. Scholes, of the firm of Stuart & Wood, paints and oils, Toronto, is taking a week's vacation.

S. W. Smith, manager Toronto branch Brandram-Henderson, Ltd., spent Tuesday of this week in New York.

Ed. Wanless hardware merchant, Chatham, Ont., was elected president of the Retail Merchants' Association of that city.

Wm. Ross, jr., has resumed the position he held before going overseas, as clerk in Lawrie's hardware store, at Forest, Ont.

J. M. Taylor, president and general manager of the Taylor Forbes Co., Ltd., Guelph, Ont., was elected president of the newly formed Chamber of Commerce.

John McCord, who in pre-war days was in charge of Wood-Vallance, Ltd. costing department, has just returned to Winnipeg after four years' service overseas. He went over as a private and secured his commission on the field last year.

H. G. Griffes is taking over the management of the hardware store of Whyte & Orr at Hardisty, Alta., owing to the illness of W. G. Whyte, who has never recovered from the effects of an attack of influenza. Mr. Griffes has been manager of the company's store at Eisler, Alta.

T. B. Williamson, buyer for H. S. Howland, Sons & Co., sailed last Thursday from the Old Country, where he has been for some weeks, and expects to dock at St. John, N.B., on Good Friday. He will probably be at his desk in Toronto Monday or Tuesday of next week.

Trade Notes

Erection of a $75,000 plant on the Windsor municipal industrial site, is contemplated by the Champion Spark Plug Company.

W. T. Woodall, manufacturers of tacks, has been registered at Montreal.

H. Bragg is opening a tinsmithing shop at Dodsland, Sask.

Gosselin & Belanger, hardware, have been registered at Quebec.

H. G. Solomon, tinsmith, Rosemont, Ont., has removed to Grand Valley, Ont.

La Compagnie Maquin, auto accessories, has been registered at Montreal.

The Porteous Hardware Co., Ltd., has been incorporated at Grande Prairie, Alta.

The Barton Electric Company is a new industry which has located at Hamilton, Ontario.

The Acme Waste Manufacturing Co., Limited, of Toronto, is opening a branch warehouse in Montreal.

The Crown Manufacturing Company, of Hamilton, Ont., makers of steel dies, stamps, etc., has moved to Waterdown, Ont.

A meeting of the creditors of the Three Rivers Pail and Box Mfg. Co., Ltd., was held at Three Rivers, Quebec, on Thursday.

A winding-up order has been applied for in connection with the Alloy Steel Works, Limited, Toronto, manufacturers of castings.

The Globe Engineering Company, Limited, 125 Mary Street, Hamilton, Ont., has taken over the manufacturing and selling rights for the lines of builders' hardware made by the Hamilton Stamping, Plating and Manufacturing Co.

The hardware firm of A. Fulton & Co., Enderby, B.C., is making plans to utilize the entire space available in the Fulton block and will add an automobile supplies and accessories department. Arrangements are also being made to handle farm implements, rakes and mowers.

A. B. Dobbyn, of the D. H. Howden Company, London, Ont., who recently purchased the Wyandotte Street store of the Ripley Peck Hardware Company, at Windsor, Ont., has disposed of the business to Gordon Wall, of Dresden. The business will be known as the Wyandotte Hardware Company.

Montreal News

F. O. Barber, representing P. & F. Corbin Lock Co., was in Montreal this week.

O. A. DeGraw of Toronto, representative of the Western Clock Co., La Salle, Ills., visited Montreal.

J. W. Andrews, in the interests of his firm, Remington, U-M-C., Ilion, N. Y., was in Montreal this week.

A. Taylor, of Taylor Bros., Razor Manufacturers, Hamilton, was a Montreal visitor.

Mr. Houghton, with the Peterborough Lock Mfg. Co., Peterborough, was in Montreal this week.

R. F. Daly, general superintendent of the Martin-Senour Co., Ltd., Montreal, was in Toronto this week.

Frank E. Howland, representative of the Brewer-Titchener Corporation, Cortland, New York, visited Montreal recently.

A. T. Black, General Manager of the Martin-Senour Co., Limited, Montreal, returned this week from a trip to Winnipeg.

Mr. Adams, respresenting the LeBarrow Manufacturing Co. of Sherbrooke, Quebec, makers of clothes line pulleys, was in Montreal this week.

Archie Macfarlane of A. Macfarlane and Co., Montreal, who has returned from an extended Western trip, reports the West as being in satisfactory shape from a business standpoint.

Winnipeg News

A. F. Collins, of the International Distributing Co., distributors for Ever-ready safety razors, blades, and brushes, has been in Winnipeg recently, assisting C. C. Craig in a big push on Ever-Ready razors.

C. C. Craig returned last week from a business trip to Brandon, Saskatoon and Edmonton. He will shortly be leaving for a trip to the coast.

Incorporations

Canadian Corkboard Company, Limited, capital $100,000, head office Toronto, plans to manufacture and deal in products of this kind.

H. H. Symes & Company, Limited, capital $25,000, head office, Montreal, plan to carry on a general contracting business and manufacture and deal in roofing.

Scottish Rubber Company, Limited, head office Montreal, capital $100,000; plans to manufacture and deal in rubber products.

Premier Retread Company, Limited, head office Toronto, capital, $25,000, plans to manufacture and deal in autos, bicycles and motorcycles and all kinds of tires.

Industrial Export Company of Canada, Limited, capital $50,000, head office Montreal, plans to deal in hardware, tools, glassware, building material, paints, oils and varnishes.

Montreal Armature Works Limited, capital $50,000, head office Montreal, plans to manufacture and deal in electrical appliances and automobile supplies.

Canadian Durkee Atwood Company, Limited, head office, Toronto, capital $20,000, plans to manufacture and deal in rubber and chemical products.

The Fenwick Battery Company of Canada Limited, capital $18,000, head office St. John, N.B., plans to manufacture and deal in electrical batteries and equipment.

Crowes Iron Works Limited, head office Guelph, Ont., capital $200,000, plans to manufacture and deal in iron and steel products.

Canadian Odorless Disinfectant Company, Limited, plans to increase its capital stock from $50,000 to $250,000.

Canadian Hauck Burner Company Limited, head office Toronto, capital $10,000, plans to manufacture and deal in oil burners.

S. F. Bowser Company Limited, capital $750,000, head office Toronto, plans to manufacture equipment for the storage and sale of liquids.

Asking For Repeal of Early Closing By-law

Thomas Henry, who conducts the "One-Day-Bargain Store" at St. Thomas, Ont., is circulating a petition among local businessmen calling for repeal of the early closing by-law which was passed by the city council in 1917. The by-law at that time was opposed by a number of merchants, but owing to the fact that the majority were in favor of early closing, it was passed by a two-thirds vote of the council. It is illegal under the by-law to keep any store in the city open after 7 o'clock at night. It is said by some of the businessmen of the city, however, that 7 o'clock is too early for the average workingman, and a large number will demand the change.

Mr. Henry was fined $5 and costs the other day for keeping his store open after the hour prescribed, but he claims that he was working on standard time. The Government had, he said, never changed the law governing clocks, and consequently from a legal standpoint he was not violating the law, for while it was 7.30 on the new time, his time was only 6.30. He claims also that the by-law was passed by the city council and not on the voice of the men concerned. The matter promises to prove interesting, owing to the fact that there are a large number of businessmen who are opposed to any change, especially during the summer.

EXPLANATION

In the advertisement of the T. F. Shurly Company, Limited, of St. Catharines, Ont., on page 343 of the March 22 issue (Annual Spring Number) of HARDWARE AND METAL the name was spelled in error with an "e" as follows "Shurley." This of course should have appeared as "Shurly." The name was spelled correctly in the advertiser's index, but through the insertion of an "e" the name appeared incorrectly in the advertisement.

HAD COMMAND OF FIRST PATROL BOAT ON THE RHINE

Lieut. C. C. Carter, R.N., a son of W. J. Carter, Picton, Ont., had the proud distinction of commanding the first vessel to fly the white ensign of the British navy on the Rhine. The vessel which Lieut. Carter commanded was the M. L. 542 of the British motor launch flotilla, a picture of which appeared in last week's issue of HARDWARE AND METAL on page 49 under the heading of Current Events in Photograph—The Watch on the Rhine. Lieut. Carter won the distinction through his ingenuity in equipping his vessel with ice-breaking devices.

LIEUT. C. C. CARTER, R.N.

A son of Mr. W. J. Carter, hardware merchant, of Picton, Ont., who had the proud distinction of commanding the first vessel to fly the white ensign of the British Navy on the Rhine. This vessel is the M.L. 542, of the British motor launch flotilla, a picture of which was shown in HARDWARE AND METAL *on page 49, last week.*

W. J. Carter, Picton, Ont., father of Lieut. Carter, is a well-known figure in the retail hardware trade of Ontario, being a former president of the Ontario Retail Hardware Merchants' Association. Lieut. Carter at the time of his enlistment, some years ago, was associated with his father in the hardware business. Another son, Capt. E. F. Carter, served with the infantry in France, returning to Canada recently and is now convalescing at his father's home in Picton.

MAY LEAVE RUBBER COMPANY

T. H. Rieder, president and general manager of the Canadian Consolidated Rubber Co., Montreal, will, it is understood, join the forces of Ames, Holden, McCready, Ltd., and become vice-president and managing director of the latter company.

This announcement was made a few days ago as being strongly probable, and while HARDWARE AND METAL was unable to confirm this from Mr. Rieder, owing to his absence from the city, it is stated on good authority that the announcement is correct.

Veteran Hardware Man Sees Fine Season Ahead

QUEBEC.—In discussing conditions with Wm. Shaw, president of the Chinic Hardware Co., of Quebec, the Montreal representative of HARDWARE AND METAL was impressed with the Statement made by Mr. Shaw regarding business in the province. "The past three years," said Mr. Shaw, "have been very excellent, and the best yet."

Mr. Shaw made it clear that the increase in business was not wholly due to the increased prices obtaining for goods. Business had really been better and the movement of goods was very large. In addition to this, merchants were very prosperous. The banks are not being called upon for the same accommodations that have been desired in the past. In fact, Mr. Shaw believed that many merchants could use the banks to a greater extent at certain periods of the year. It was wisdom, Mr. Shaw said, to make use of banking facilities at certain seasons of the year when considerable capital was required, for it was not the best policy to be overcapitalized, or to have too much money involved in a business undertaking.

Mr. Shaw looks forward to an encouraging season. He is still an enthusiastic supporter of the retailer and spoke most interestingly of the retail hardware department which they conduct. Although 63 years in the 'game' Mr. Shaw says that he does not know all there is to know concerning hardware. With such a long experience, and with the best of health, Mr. Shaw has real pleasure in attending daily to the duties devolving upon him.

NEW COMPANY SELLS PHILIP CAREY PRODUCTS IN WEST

Building Products & Coal Co., Ltd., of Winnipeg, Man., has been newly formed to succeed the business known as Thompson, McDougall & Co., Ltd., builders' supplies, Winnipeg. The new firm is under the same management as formerly and will handle, in addition to the regular lines of builders' supplies, the Philip Carey products, including building paper, roofing, etc. These will be sold by this firm throughout the Western hardware trade.

BUILDING BOOM AT GALT

GALT.—With prospects for an exceptionally busy building year, Galt hardware merchants are looking for good business this year. The city has entered the Ontario Housing Scheme, with an application for a loan of $250,000, which will mean the erection of a large number of houses and a demand for fixtures and building supplies. Outside of this many houses will be erected by individuals, and permits to date show an increase of over $45,000 for the first three months of the year, compared with the same period of 1918.

Hardware Dealers Lose Out in Efforts to Secure Saturday Half Holiday

A CONTROVERSY in which the issue was whether retail stores of Fort William and Port Arthur, Ont., should close Wednesday or Saturday afternoons during the summer months has just been ended by a victory for those favoring Wednesday afternoon. Not in the history of the cities has there been such keen interest taken in the matter.

The question first came up at the March meeting of the Retail Merchants' Association, at which they went on record as favoring a weekly half holiday, but not setting any day.

Last year there was a small agitation for Saturday afternoon closing by the hardware merchants in preference to Wednesday, which was favored by the dry-goods men, clothiers and grocers. The management of the local paper, the Times-Journal, was aware of this, and as all wholesalers, railways, shops, realty men, lawyers, contractors, etc., close on Saturday afternoon they, no doubt, thought it would be a splendid thing to have everybody take a holiday at the same time. As the merchants, according to their news item given out, had not decided on any day, the local paper, published on their front page an editorial urging Saturday afternoon as a general half holiday.

Started Something

This started the agitation which has been a subject of controversy for three weeks and at times threatened to become serious. Scores of letters, both pro and con, were printed.

Looked Serious

The two largest dry-goods stores(one in each city) endorsed the Saturday afternoon closing, while about eighty per cent. of the butchers, grocers, and all the hardware merchants did likewise. On the other hand the men's stores and the other dry goods stores fought hard against the proposal, as did also the druggists and jewelers.

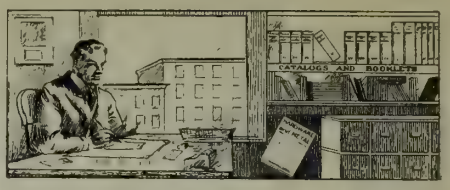
Feeling ran high among the merchants and things looked serious, for the trades unions began to take a hand in the fight. The Brotherhood of Locomotive Firemen and Engineers passed a strong resolution favoring the Saturday half holiday. A committee representing the Scottish Football Club urged strongly that Saturday be chosen, as it would allow all the merchants and clerks to participate in outdoor sports.

Held Big Meeting

The Retail Merchants' Association saw that something had to be done right away and a general meeting was called. There never were so many merchants in one hall in these two cities at one time before, the city auditorium, where the meeting was held, being almost packed to the doors.

"That a mid-week half holiday for Fort William storekeepers and their employers be endorsed for the months of June, July, August and September," was the pith of the resolution which finally carried on a standing vote, after three hours of animated discussion and a half bushel measure of motions, amendments, amendments to the amendments and amendments to the amendments to the amendments had held the floor in turn to the tune of heated debate and barbed repartee and finally gravitated to the limbo of discards.

Every hardware man attending favored Saturday afternoon closing.The reason advanced for this was that on Wednesday all contractors and other works about the city with which they did the bulk of their trade, were running full blast, while on Saturday all these works were closed down.



During the big meeting a trades delegation entered the hall and asked the chairman to let their leader, the president of the Trades and Labor Council, speak. This was granted. He said in part, "You retail men claim that to close on a Saturday afternoon would be impossible, but do you know that the Peace Conference is now discussing the question of an international five day week? What are you going to do in that case? Surely you would not treat as a scrap of paper a treaty of the League of Nations! I say you will not lose a dollar by closing and you will give yourselves and your clerks a chance to mingle with the working people (your customers) and thereby we will all become better acquainted. Close your stores on Saturday afternoon and the labor unions will stand behind you. Close your stores Saturday and set an example to all Canada, the people of which would point to these two great inland ports as the most progressive cities in the whole of the Dominion of Canada."

PUDDLERS' WAGES DECREASE

Wage rates of puddlers of the Bethlehem Steel Co., at its Lebanon plant, have been readjusted on the basis of the new bar iron price of $2.35 per hundred pounds. No change was made in the wage schedule when the bar iron price was cut from $3.40 to $2.90. The last reduction in the price of iron, however, made an aggregate so large that a scaling down of wage rates, based on sale prices, was necessary, says a representative of the company. Several hundred puddlers and helpers are affected.

ANOTHER REDUCTION MADE

Some American manufacturers of steam and hot water boilers and radiators have reduced prices 10 and 15 per cent. respectively, making a total reduction of 40 per cent. on radiators and 35 per cent. on boilers since the first of the year. The action was taken as an effort to stimulate business.

CANADIAN YALE AND TOWNE, LTD.

Catalogue No. 1 of the Canadian Yale & Towne, Limited, St. Catharines, Ont., lists the complete line of Yale products manufactured by the firm. This includes builders' locks and hardware aimed to meet every requirement of ordinary practice. The lines of padlocks, night latches, and door closers made by the firm are also shown. The catalogue contains one hundred and seventy-four pages and is attractively and profusely illustrated. Readers of HARDWARE AND METAL may obtain a copy of the list upon request.

MERRICK ANDERSON CO. LIMITED

Merrick Anderson Co. Limited, Winnipeg, have just issued their first catalogue of auto accessories. In its ninety-five large pages are listed and described a complete list of the latest goods for which there is a steady demand. All novelties and non-essentials have been eliminated. The catalogue is most attractively illustrated, many of the illustrations being in colors. A feature of the arrangements is the classification of the lines into Ford and small car section, large car and general section. The goods listed under the first head are printed on sepia paper so that the whole section can be quickly found, while those listed for the large cars are printed on white. Copies of the catalogue may be obtained upon request by readers of HARDWARE AND METAL.

EXAMPLE TO OTHERS

Under the heading of "The Ashdown Precedent," the Phoenix, Saskatoon, says in part: "J. H. Ashdown has shown his faith in Saskatoon not only by rebuilding the branch destroyed by fire but by making it of more than twice the capacity of the first structure. He is carrying nearly one million dollars' worth of high-grade merchandise here in what is said to be the most modern wholesale hardware warehouse in Canada. And this building was erected while the war was on, when the cost of materials and labor was high. Other wholesalers who have withheld from building during the war will be impressed by the facts of the Ashdown case. They will know that his course has been controlled by one of the keenest business minds in the Dominion."

The Republic Motor Truck Co. of Cleveland, Ohio, will locate its Canadian branch plant to cost $500,000 at London, Ont.

SECONDS MUST BE SOLD

A bulletin from the National Vigilance Committee of the Associated Advertising Clubs of the World describes a forward step which has been taken by the city council of Los Angeles for the protection of the public against the sale of "seconds" in various lines of merchandise, unless the dealer describes the goods for what they are. The ordinance also covers the advertising of second-hand articles.

The measure was passed as the result of the efforts of the vigilance committee of the Los Angeles Advertising Club, which had found that inferior goods were often advertised without mention of their inferiority.

The ordinance follows:

Section 1. It shall be unlawful for any person, firm or corporation, in any newspaper, magazine, circular, form letter or any open publication, published, distributed or circulated in the City of Los Angeles, or on any billboard, card, label or other advertising medium, or by means of any other advertising device, to advertise, call attention to, or give publicity to the sale of any merchandise, or which merchandise is secondhand or used merchandise, or which merchandise is defective in any manner, or which merchandise consists of articles or units or parts known as "seconds," or blemished merchandise, or which merchandise has been rejected by the manufacturer thereof as not first-class, unless there be conspicuously displayed directly in connection with the name and description of such merchandise and each specified article, unit, or part thereof, a direct and unequivocal statement, phrase, or word which will clearly indicate that such merchandise or each article, unit or part thereof so advertised is secondhand, used, defective, or consists of "seconds" or is blemished merchandise, or has been rejected by manufacturer thereof, as the fact shall be.

Section 2. That any person, firm or corporation violating any of the provisions of this ordinance shall be deemed guilty of a misdemeanor and upon conviction thereof shall be punishable by a fine of not more than $500.00 or by imprisonment in the City Jail for a period of not more than six (6) months, or both such fine and imprisonment.

MONTREAL TO HAVE BICYCLE WEEK

Montreal.—Bicycle Week as recognized by the bicycle trade of Canada and the United States' will take place during the week of May 3 to 10. Various events are planned throughout both countries, Montreal in particular intends to be well in the lead.

Several parades are scheduled to take place, the largest of which will be the Second Annual Carnival Parade to be held on Saturday afternoon, May 10.

Last year the results were far in advance of all expectation and it is confidentally expected that 1919 will far surpass all previous records.

Letters to the Editor

HARDWARE AND METAL,
Toronto, Ont.

Dear Editor:—

Would like to draw your attention to the inconvenience and annoyance of having certain lines of American made merchandise with the American selling price marked on the article.

This is very misleading to Canadian purchasers, and a great deal of unnecessary explaining has to be indulged in, by the retailer, and often customers will not see the point and hold the trade up as exorbitant in price. This is very unfair to the trade.

The amount of duty, and special war tax and long freight haul, particularly to the West, added to the American price, looks very unreasonable to the majority of consumers.

This can be remedied if importers of American goods will insist on a marked Canadian selling price or no marked price at all, the latter perferable as it is only reasonable that the cost is more the further West the goods are shipped, consequently the selling price is in proportion.

Western Dealer,
A. G. Box.

MADE AT FERGUS

Editor—HARDWARE AND METAL,
Toronto.

Dear Sir:—

In your issue of the 5th inst., you ask for name of manufacturer of the "Valmar, Volmar or Vulmar" washing machine.

Beatty Bros., of Fergus, manufacture a machine called the "Vollmar" and I think this is possibly the machine your correspondent is looking for.

Trusting this information may be of service to our Western brother, and with the writer's kind personal regards to the Editor, I remain,

Yours very truly,
W. J. Bell

CLOSE AT NOON HOUR

In connection with the recent agitation for, and the securing of Daylight Saving in Quebec City, the Mechanics' Supply Company, Ltd., made a unique announcement. Heading their usual advertising space with the words "Daylight Saving," they continued: "Commencing with the first of the month—April—our establishment will open and close with daylight saving time, and do so until further notice."

One of the real innovations that this firm has hit upon is that of closing up tight during the noon hour. This is done, they state, to give their employees ample time for lunch. "During the noon hour," they continue, "our stores are closed from 11.45 a.m. to 1.15 p.m. Also on Saturday afternoon from 1 o'clock, p.m.

TRADE INQUIRIES

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

769. An important British house that has been importing large quantities of goods from the United States wishes to transfer its business to Canada if similar goods can be obtained in the Dominion. The following is a list of the articles required:—

Aluminum cooking utensils; builders' shelf hardware, including locks, clockwork, door bells, door springs, etc.; blue flame pattern oil cooking stoves; carpet sweepers, other than "Bissell"; clothes wringers (rubber roller); food choppers; ice cream freezers; lawn mowers; Perfection pattern oil heaters; refrigerators; steel butt hinges; tee hinges; toilet fixtures; auger bits; bench and man drills; drills; engineers' and pipe thread; expansive and auger bits; fly balloons; garden tools, rakes, hoes, etc.; glass cutters; sand and breast drills, braces; hand and cross-cut saws; hay forks, hay rakes; iron planes; nail hammers; pipe stocks and dies and vices; rakes; screw drivers; spanners and pliers; Stillson wrenches; stocks and dies and taps; trimo tools; twist drills and reamers; vulcan wrenches, vices, cramps and spinners; wire cutters and pliers; wood bench screws; ash and hickory tool handles (axe, broom, fork, hammer, hay, pick, sledge); ash fork handles; blind rollers; clothes pegs; coat hangers; gum broom handles and mop handles; hammer handles; hickory pick shafts; pastry boards; rolling pins; spring clothes pegs; washboards; wood chair seats; wood wheelbarrows; oil stones; wallpapers; dover egg whisks; fly bats; mouse traps.

Further particulars regarding these articles can be obtained by application to the Commercial Intelligence Branch, Department of Trade and Commerce, Ottawa.

774. **Clinical thermometers.** — A London firm would like to get into touch with Canadian firms able to manufacture clinical thermometers or parts thereof.

775. **Ready-made doors.**—A Sheffield firm asks for names of Canadian exporters of ready-made wooden doors.

776. **Manufactured goods.**—A London correspondent is open to take up agencies for the sale of Canadian manufactured goods, particularly paper hardware, metals, wire and other nails, or specialties.

778. **Dowels.**—A London firm desires to be placed in communication with reliable manufacturers of dowels in Canada.

782. **Glassware.**—A London firm desires the addresses of Canadian manufacturers of table and lamp glassware, in all of which they are interested.

783. **Bent wooden trunk hoops.**—A London company is open to purchase supplies of bent wooden trunk hoops, according to specification and other details on file in the Commercial Intelligence Branch, Department of Trade and Commerce, Ottawa.

788. **Sulphite board.** — A London firm would be glad to hear from Canadian manufacturers who can supply sulphite board for containers and boxes, in large quantities.

789. **Automobile accessories.** — A London company is open to purchase automobile accessories of every description, including lamps, horns, tires, and fittings, and invites offers from Canadian manufacturers of same.

791. **Grain, oilseed cake and oilseeds.**—A firm in Denmark wishes to negotiate direct with Canadian exporters of grain, oilseed cake and oilseeds. Bank references given in the United Kingdom, United States, and Denmark.

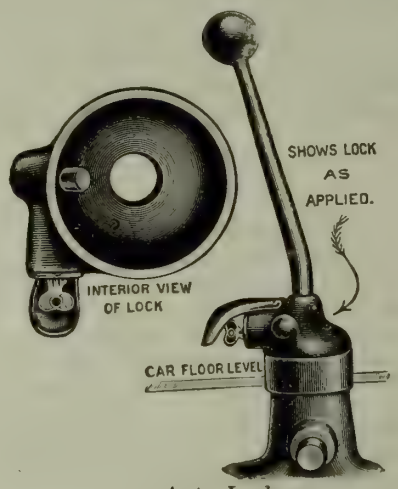
NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

SHOCK ABSORBER

The Burgess Rebound Check and Shock Absorber, manufactured by the Zinke Company, 1323 Michigan avenue, Chi-

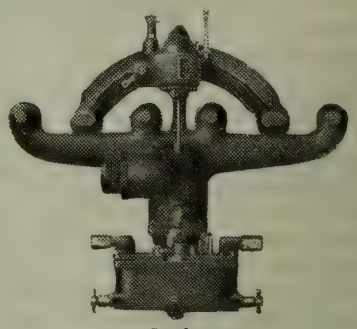


Shock Absorber

cago, will, it is claimed, absorb thirty periodic vibrations per second. It is stated that the arms on which these springs are mounted are arranged to control the recoil of the leaf spring, by shifting the load at the moment of recoil from the tip of the spring to the centre. This, it is claimed, positively eliminates all rebound. This device is made for Ford cars and the manner of attaching the arms does not, it is stated, bind the leaves of the springs or interfere with the working of any part of the car. These shock absorbers, it is claimed, are adjustable to any load. The spring tension, it is stated, can be easily increased to make cars with heavy bodies easy riding. In addition to making cars easy running, it is claimed for the device that it will lengthen the life of any car to which it is attached by safeguarding it from preventable vibration. The springs, it is stated, will smother all jolts before they can reach the vital parts of the motor and body.

AUTO LOCK

The McCoy Auto Lock, manufactured by Canadian Toys Limited, 36 John St. North, Hamilton, Ont., is made, it is stated, to fit only cars with centre ball control. It is claimed the lock is one of the most practical, efficient and reliable locking devices yet made for cars having this style of control. It is securely fastened, it is stated, to the shift gear lever by means of a screw or tapered pin at the top of the transmission case cover, and it is said that it also acts as a case cover in addition to lock. It prevents the operation of the shift gear lever, it is stated, by locking in neutral. It is stated that the lock is made of solid brass and hardened steel and finished in black rubber which requires no attention or polishing. The car owner, it is stated, may start the engine, but until the key is replaced in the lock and the gears released it is impossible to operate the gear shift lever. The key, it is claimed, annot be removed from the lock without automatically locking the car. The key remains in the lock all the time the car is in operation, but does not, it is stated, in any way interfere

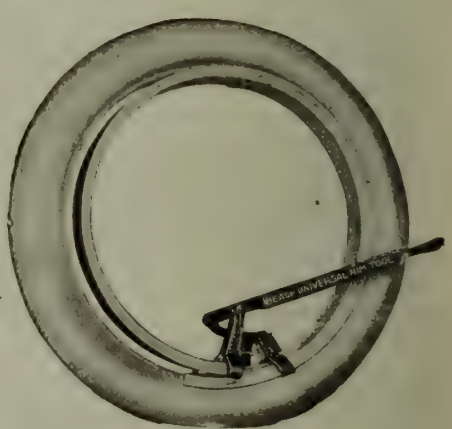


Auto Lock

with its proper working or cause undue wear on the transmission, and it cannot fall out.

CARBURETOR

The Holley all fuel carburetor manufactured by the Holley Carburetor Company, 145 Willis Avenue, East, Detroit, consists, it is stated, of special exhaust and inlet manifolds, replacing the standard Ford manifolds, a mixing chamber, a double float chamber, a small gasoline tank in which to carry fuel for starting purposes and all necessary connections ready for complete installation. The fuel, it is stated, is drawn by the suction of the motor from the float chamber, into the heater tube where it is vaporized. The vapor passes out of the tube into the mixing chamber, where inrushing air, it is stated, forms it into a perfect mixture. The heater tube is coiled in the heater chamber. To facilitate starting the equipment, it is stated, includes a choker as well as primer for flooding float chamber. To further facilitate start-



Carburetor

ing in extremely cold weather a priming cup is furnished, being attached to the top of the intake manifold. It is rarely necessary, it is stated, to use the priming cup. The makers claim that the saving made by using the Holley carburetor will pay for the outfit in a very short time besides giving a smoother running motor and doing away with annoying delays in starting. The Holley, it is stated, will handle gasoline, kerosene, benzol, alcohol or California distillate.

RIM TOOL

The Beach rim tool, manufactured by the Greb Company, 223 State St., Boston, Mass., will, it is claimed, fit all type and sizes of cross split rims. It is stated that with this tool a car owner can quickly expand or contract any make of cross split demountable rim, doing away with all the trouble that follows hammering a rim to force it in or out of place.

Rim Tool

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

JOBBERS have put into effect new prices in line with increased costs on one line of English cutlery. The advance, which affects pocket cutlery, table cutlery, butcher knives, skinning knives and kindred lines, amounts to between 10 and 12½ per cent.

Following on the heels of the reduction in wrought pipe, couplings and nipples, a general revision downward has been made in malleable and cast iron pipe fittings, including plugs, bushings and unions, as well as pound goods.

Boiler tubes have come in for further revision, the new scale of quotations being worked out in direct relation to cost, and providing in some instances for slight advances, and in others for slight declines. The present basis will, it is believed, hold for some time to come—at least, any further changes will be worked out from present schedule.

Another move upward in the price of linseed oil is recorded in some quarters this week. The advance amounts to 3c per gallon and is a direct reflection of the strong tendencies which have consistently been shown in the flax seed markets. Reports from the United States indicate that the early arrivals of a considerable amount of Argentine seed is probable, but owing to the increasing demand it is not thought this will have much of a bearish influence on the present situation. Crushers both in Canada and the United States report that they are actually very busy, increased business coming to hand the last week or ten days.

Turpentine is tending still higher and some factors show a slight advance this week. This has resulted in a narrowing of the range of quotations to the trade. Reports from the South all reveal bullish sentiments, stocks being reduced under the influence of an active demand and arrivals from the new crop still being practically nil.

Steam boilers and radiation have been revised downward again this week, the present scale of discounts being a reflection of the competitive figures established in United States markets and is, it is indicated, not attributable to market conditions. Round hot water boilers have not undergone any change from recent decline.

Brass escutcheon pins, brass steam goods, horse rasps, files, sash weights and cotton wrapping twine are all lines that have registered declines this week. Ingot metals, including copper, tin, lead, and spelter, are slightly easier, while antimony has advanced ½c per pound.

A distinct improvement in business is reported from virtually all sides and the feeling exists that in another two or three weeks things should be humming quite briskly.

MONTREAL MARKETS

MONTREAL, April 17.—Changes are of material importance this week, there being a number of staple articles affected. Reductions have been made on pipe and fittings, copper rivets, nails and tacks. Escutcheon pins, in brass, are lower, but the steel kind are not affected. Fry pans are reduced in price, this applying to the steel grades. Files and rasps have come in for lower prices, and oilcloth binding, cotter pins and babbitt metal are all revised downward. It is possible that solder may be reduced, following an easier trend on lead and a lower price for tin. Copper, in the ingot, is reduced in price, and lower prices also prevail for pig tin and spelter. Antimony, on the other hand, has advanced half a cent per pound.

Business is better, and will improve much with navigation opened. Boats are expected to be leaving this port by the week-end. The outlook is excellent, and with a splendid run of sap in some parts of the province worth millions of ready cash, prosperity should be evident in this section of the country for the farmers.

Copper Rivets Less; Escutcheon Pins; Tacks

Montreal

RIVETS, PINS, NAILS. — Declines have been registered in the price of copper rivets and burrs. These, for mixed rivets and burrs are on a 15 per cent. discount basis, this being a material change. Burrs only are plus 20 per cent. on list.

Copper nails are down to $2 per pound, list, and copper tacks to $2.25 per pound list. Brass escutcheon pins are now quoted at 5 per cent. from list, while there is no change in the steel pins, these holding at 50 per cent. from list.

Glaziers' points are reduced from 25c to 20c per pound, this being for the galvanized grade.

Pipe and Fittings Marked Down

Montreal.

PIPE AND FITTINGS.—As pointed out last week, new reduced prices would be forthcoming on wrought pipe. These are now out and the same are as follows:

¼ and ⅜	$ 4 32-$ 4 53	$ 6 45-$ 6 66
½	5 70- 5 99	7 27- 7 57
¾	7 13- 7 53	9 26- 9 66
1	10 54- 11 14	13 68- 14 28
1¼	14 26- 15 07	18 51- 19 32
1½	17 05- 18 01	22 13- 24 10
2	22 94- 24 24	29 78- 31 08
2½	- 38 90	- 49 73
3	- 50 87	- 65 03
3½	- 64 86	- 81 88
4	- 76 85	- 97 01

These prices apply to the Standard Steel Buttweld grade. Prices on fittings are: Cast and mall. bushings, 30 to 32½ per cent.; flanges, 32½ per cent.; plugs, 25 to 27½ per cent.; flange unions, 15 per cent.; mall. unions, 45 per

cent.; malleable fittings, Class A, black, per pound, 55c; galvanized, 65c; Class B, per pound, black, 22c, and galvanized, 30½c; Class C, black, 14¾c, and galvanized, 22c.

On pipe, where 5,000 feet or over is taken by one customer in one lot and to one delivery point, 5 per cent. discount from quoted prices is allowed.

Fry Pans Lower; Files; Chain, Too

Montreal

PANS, FILES, CHAINS. — Lower prices are in effect for fry pans. No. 2-0 are quoted at $1.35 per dozen; No. 1-0 at $1.65; No. 1, $2; No. 2, $2.30; No. 3, $2.55; No. 4, $2.85; No. 5, $3.25; No. 6, $3.80, and No. 7, $6.

Heller's horse rasps are now on a 62½ per cent. basis, and this line of horse tooth rasps and floats at 55 per cent. discount. Black Diamond files are quoted at 35 per cent. off, while one jobber is quoting all kinds rasps at 62½ per cent. off.

Canadian coil chain is down, the discount being 37½ per cent. from the list, a reduction of about 20 per cent. Reductions are probable in other grades of chain also.

Binding, Cotter Pins; Babbitt Metal Down

Montreal

VARIOUS LINES.—Oilcloth binding has been reduced on the zinc grade. This is selling now as follows: 4 x 4, per dozen, $2.25; 4 x 6, $3.60, and 4 x 8, $4.75.

Babbitt metal is reduced, too. No. 1 is quoted at 15c per pound; No. 2 at 14c, and No. 3 at 13c.

Cotter pins are now quoted on a discount basis of 85 and 10 per cent.

Some Stove Sales; Wares Going

Montreal

STOVES AND WARES.—There is some movement in stoves, but the selling is still light on ranges and cook stoves, activity being more general in gas and electric ranges. It seems possible that some change may be made in stoves, following the lower prices effected in the United States on steel and other products. Wares are in good demand and there is little likelihood but what an active season will ensue.

Coal Oil Prices; Gasoline Unchanged

Montreal

COAL OIL, GASOLINE.—A steady and fairly large business is being done in gasoline, and this will increase with better roads. Price basis is unchanged at 34c per gallon for motor grade. Coal oil is fairly active, and the quoted basis here runs from 20c to 23c per gallon.

Some Good Orders For Nails; Wire

Montreal.

NAILS AND WIRE.—Some fairly good orders for nails have been received from outlying towns, and the future is expected to show an even better condition locally. The price basis holds unchanged with standard wire nails selling at $4.75 per keg, and cut nails the same.

Smooth steel wire is still selling at $5 per 100 pounds base.

Steady Selling and Prices on Rope

Montreal

ROPE AND CORDAGE.—There is a steadiness to the rope market and no changes have been made. Orders from the country are sifting in every day, but there is a chance for improvement, nevertheless. Dealers prefer, apparently, to buy as they require stock. Boat business will be looked for in the weeks immediately ahead.

Pure manila basis is held at 34c; British manila at 30c, and sisal at 27½c per pound.

Steady Sales of Iron and Steel

Montreal

IRON AND STEEL.—The movement is steady and constant of both steel and iron. But, as with so many other lines, the orders are small, buyers not stocking up beyond requirements to any extent. It is expected that there will be a better movement to points served by water routes in the immediate future.

Common bar iron, per 100 lbs.	3 75
Refined iron, per 100 lbs.	4 75
Mild steel	3 75
Iron finish machinery steel	3 80
Norway iron	12 00

Black Diamond tool steel, per lb.	0 18 -0 19
Black Diamond cast steel, lb.	0 22

Sheets Are Held; Movement Fair

Montreal

SHEETS AND PLATES.—At the prevailing prices sheets are selling fairly well, and there is an unchanged price basis. What business offers is sought by many sellers, and there is a probability of lower levels still being reached, or the present range of prices narrowed.

BLACK SHEETS—	Per 100 lbs.

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Lower Solder May Be Had Soon

Montreal

LEAD PRODUCTS.—In view of the fact that lead has been somewhat reduced the past few days, it is possible that solder will lower in price. The freer delivery of tin and the reduction of price also will tend to make prices less. There is little movement as yet for pipe and sheets, though contracts are seemingly looming up, and if these materialize there will be some impetus to business.

Lead pipe, lb.	....	$0 11½
Lead pipe (cut lengths)	....	0 12½

BRIEFS FROM THE WEEK'S MARKETS

Solid sash weights dropped $1.00 per 100 pounds this week and sectional 75c.

Pocket and table cutlery, butcher knives and kindred lines manufactured by Joseph Rodgers & Sons are up from 10 to 12½ per cent.

Heller horse rasps have declined. The new discount to the trade is 62½ per cent.

Malleable and cast iron pipe fittings have come in for a further revision downward.

Brass escutcheon pins are quoted at 5 per cent. from list. This represents a decline. Steel escutcheon pins are unchanged at 50 per cent.

Winchester shot guns and rifles are higher and American ammunition is also advanced, although some interests have not changed prices pending possible tariff changes.

Cotton wrapping twine is slightly easier in some quarters this week.

Turpentine prices have narrowed, an advance of 2c per gallon being recorded by some interests, this cutting down the range between quotations to that extent. Primary markets are firm and may go even higher.

Linseed oil is higher, some factors advancing prices 3c per gallon. The market is considered very strong.

Steam boilers show a decline along with standard wall radiation. Competition is main contributing factor, it being stated the change is not due to market conditions.

Boiler tubes have been revised again, the change this week being a readjustment in line with to-day's cost. Some sizes are higher, some lower. It is thought present scale of quotations will hold for some little time.

No Changes Made In Old Material

Montreal

OLD MATERIAL.—Since last report there has not been much change in the situation. As far as iron and steel scrap go, there has been a natural waiting attitude, in view of the controversial nature of price fixing in the States on steel. There have been no changes of any account and prices are held as below.

Dealers' Buying Prices—		
Pipe scrap, ton	8 50	9 00

Copper is Down; Lead; Tin; Spelter

Montreal.

INGOT METALS.—Reductions have been made this week on copper, tin, lead, and spelter. This is prompted, in part, by the very quiet state of trade. Antimony is firmer.

COPPER.—Price basis on this has been reduced to 18c per pound. This has not prompted much actual business yet, and the demand is light.

TIN.—Prices have been reduced in this market and the basis is now 56c per pound. Supplies are fully equal to all demand, and demand is not considered active.

LEAD.—Large smelters in the States have lowered prices again to a limited extent and the early lead was soon followed by others. Prices here have weakened somewhat, the quotation being 6¾c to 7c per pound.

ANTIMONY.—Some strength developed in antimony during the week and sales are made here on the basis of 8½c per pound, which is half a cent up.

SPELTER.—A lower price is being quoted this week, 8½c per pound being the basis. This is a reduction of half a cent.

ALUMINUM.—Trading is confined to small proportions and there is little new feature. Prices remain unchanged at 40c per pound.

PIG IRON.—All interested await developments on the U. S. side. In the meantime, prices here hold at $45.00 per ton.

TORONTO MARKETS

TORONTO, April 17.—Changes are again quite numerous this week and important. Sash weights have undergone revision downward, along with horse rasps. One line of English cutlery has been received and prices just issued to the trade show quite a substantial advance; the lines affected include pocket and table cutlery; butcher knives, etc. Pipe fittings have declined and the same is true of many lines of brass goods. Boilers and radiators are lower and closet seats and tanks have declined $1.50 each.

Jobbers report business better and in some lines trade is showing up very well. Report from retail centres indicate that quite a nice turnover is being handled in the majority of instances.

English Cutlery Registers Advance

Toronto.

CUTLERY—Jobbers' prices on Joseph Rodgers & Sons' cutlery have been revised this week in accordance with manufacturers' latest invoices, and the present scale provides for a substantial advance all along the line. The lines affected include pocket cutlery, table cutlery, butcher knives, skinning knives, and kindred goods. The new quotations range from 10 to 12½ per cent. above former levels.

Decline Named On Horse Rasps

Toronto.

HORSE RASPS.—Revision of the discount applying on Heller's horse rasps has been made and on the new basis a decline has been provided for. The present discount to the trade is 6½ per cent. from standard lists.

Sash Weights Record Decline

Toronto.

SASH WEIGHTS.—A substantial decline has been recorded this week in sash weights, prices on the solid dropping $1.00 per 100 pounds to $3.25 and the sectional being reduced from $5.50 to $4.75 per 100 pounds.

Wash Boards Revised Downward

Toronto.

WASH BOARDS—A new list on wash boards adopted last fall by the jobbers has been replaced by list in effect immediately preceding that date and this has resulted in a revision of prices downward. The present scale of quotations is as follows: Pony, $2.35 per dozen; Improved Globe, $5.15; Neptune, $5.15; Standard Globe, $5.15; Original Globe, $5.65; Jubilee, $5 80; Newmarket King, $5.80; Western King (enamel), $8.00; Beaver (brass), $7.35; Diamond King (glass), $6.30.

Lower Prices on Pipe Fittings

Toronto.

PIPE FITTINGS.—Pipe fittings are again under revision downward, the new discounts named this week providing for a substantial decline. The discounts which are now in effect are given as follows: Cast iron fittings, 20 per cent.; plugs, 35 per cent.; bushings, 35 per cent.; standard unions, 50 per cent.; malleable fittings, Class A, black, 50c per pound; galvanized, 60c; Class B, black, 21c per pound; galvanized, 30c; Class C, black, 14c per pound; galvanized, 21c.

Dart unions are also lower, ¼ to 2 inch being quoted at a discount of 25 per cent., and 2½ inch and larger, 15 per cent.

Brass Goods Record Decline

Toronto.

BRASS GOODS.—A general revision downward in brass goods amounting to about 5 per cent. has been recorded this week. Practically the entire list is affected, the new discounts now ruling being given as follows: Compression work, standard, discount off list, 50 per cent.; high grade, 49 per cent.; fuller work, standard, 45 per cent.; high grade, 38 per cent.; basin cocks, No. 0 standard, 40 per cent.; Nos. 1 and 2, 40 per cent.; bath cocks, compression, 50 per cent.; bath cocks, fuller, 45 per cent.; flatway stop and waste cock, standard, 50 per cent.; high grade, 47 per cent.; Roundmay stop and waste cocks, standard, 50 per cent.; high grade, 47 per cent.; basin cocks, No. 0 and 1, fuller pattern, 45 per cent.

Change Discount of Escutcheon Pins

Toronto.

ESCUTCHEON PINS.—A decline is provided for in the new discount named on brass escutcheon pins this week of 5 per cent. from standard lists. There is no change made in the steel escutcheon pins, which remain at the discount of 50 per cent.

Closet Tanks and Seats Down $1.50

Toronto.

CLOSET SEATS, TANKS. — Lower prices have been named on closet seats and tanks; the decline amounting to $1.50 each. Those with oak tank and seat are now being quoted at $25.50, and enamel

iron or white vitro tank are being quoted at $27.50.

Boilers, Radiators Go Still Lower

Toronto.

BOILERS, RADIATORS.—Still lower levels have been reached in the prices applying on boilers and radiators. This follows on the heels of quite a substantial decline a few weeks ago. Manufacturers here indicate that this change is not representative of a market condition, but is the result of competition originating in the United States. It is indicated that some interests, evidently in an effort to stimulate business, began cutting prices, and this resulted in big factors reducing their quotations materially. Prices here have been revised to offset outside competition, steam boilers going down 3 points, standard radiation 6 points, and wall radiation 8 points. No change has been made in the round hot water boilers.

Nails Unchanged; Wire Prices Hold

Toronto.

NAILS, WIRE.—There has been no change in the situation on nails shown this week. There is a fair amount of business being done, but no desire to buy beyond immediate requirements is noticeable. Wire nails are being quoted at $4.70 per 100 pounds base, and cut nails at $4.75 per 100 pounds base.

Prices recently named on wire are holding without change, the smooth steel wire base of $5.00 per 100 pounds prevailing. There is comparatively little business passing.

Rope Prices Holding Steadily

Toronto.

CORDAGE.—Locally there have been no new developments in the situation on rope. Prices are held without change and business is waiting for consuming demand to absorb supplies taken into stock around April 1. From primary points the news is that little buying interest is showing itself. Buyers are hoping that the market will be easier and consequently restricting purchasers to absolute needs. Quotations in effect here are: Pure manila, 34c per pound, base; British manila, 30c; New Zealand hemp, 30c; sisal, 27½c; sisal lath yarn, 27½c.

Activity in Coal Oil; Gasoline, Too

Toronto.

OILS, GASOLINE.—Activity marks the sales of coal oil and gasoline with the approach of warmer weather. Dealers report the volume of business good and movement to consuming channels increasing. Prices are unchanged for the week, coal oil ranging from 19½c to 22½c per gallon, according to grade and gasoline being quoted at 33c per gallon.

Stoves Still Hold; Wares Moving

Toronto.

STOVES, WARES.—There has been no revision made as yet in the price of stoves, and opinions seem divided as to just what may develop in this regard. Some announcement seems likely in the next few days. Outside of the summer lines there is little doing, but gas, electric, coal oil and gasoline stoves are selling fairly well.

There is a very good volume of business being handled in all lines of wares at the new scale of quotations recently adopted.

STOVE PRICES MAY ADVANCE

The various interests connected with the stove manufacturing industry met on Wednesday of this week to discuss conditions relating to their lines. There was a strong feeling among the foundrymen that in view of the labor advances which have had to be met, that prices on stoves and ranges might be forced upward before fall.

It is true there have been some reductions in steel and iron, but labor plays such a large factor in the cost of stoves that to-day it must be considered the determining element in final price worked out. There is no certainty that present schedule of labor will be maintained, and it is quite safe to say there will be no cheaper men available—the tendency rather is the other way and a further advance in wages would surely work out in an advanced price on the finished stove. Steel and iron would have to decline enormously to offset this, and it is not thought prices on the raw material will recede sufficiently to overcome advancing labor costs.

United States manufacturers are, it is indicated, faced with the same problem of increased labor costs and may be compelled to adopt a higher schedule of prices on the manufactured lines before very long.

Better Trade in Iron and Steel

Toronto.

IRON AND STEEL.—Jobbers report business better. It is not large, but the orders are coming in a little oftener and the trade feel much more cheerful over volume of sales than they have for some time past. Prices show no change, the following being prevailing figures:

Common bar steel	4 25	4 50
Common bar iron	$4 25	$4 50
Refined iron	4 65	4 90
Angle base	4 50	4 75
Horseshoe iron	4 50	4 75
Tire steel	4 45	4 70
Mild steel	4 25	4 50
Norway iron	11 50	15 00
Toe caulk steel	5 15	5 45
Sleigh shoe steel	4 25	4 50
Band steel, No. 10	4 50	4 75
Do., No. 12	4 75	5 00
Spring steel	9 50	11 50
Mining drill steel	21 00	30 00
Sheet cast steel	0 42	0 45
Tool steel	0 22	0 80

Slight Readjustment Made in Black Sheets

Toronto.

SHEETS, PLATES.—A slight readjustment has been made in some quarters on black sheets and basis now prevailing seems fairly well established. Whether price fixing will govern or open market rule is still the question with the trade, and some feel that the open market will win out. If it does, the opinion is held that quite a further substantial drop may be made to get down to absolutely rock-bottom figures, and get business moving along in large volume again.

The trade which is coming to hand now is considered splendid, however. It isn't coming in big chunks, but it is coming often, and this indicates a good healthy condition in the trade. Jobbers are well satisfied with volume of sales. Galvanized sheets hold without change.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$5 00	$5 45
12 gauge	5 05	5 50
14 gauge	5 10	5 15
16 gauge	5 20	5 25
18-20 gauge	5 80	....
22-24 gauge	5 85	....
26 gauge	5 90	....
28 gauge	6 00	....
3-16 inch plate	4 90	6 25
¼-inch boiler plate	4 50	5 80

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS—		
10¾ oz.	$8 25	$8 50
U.S. 28	7 95	8 20
U.S. 26	7 65	7 90
22 and 24	7 50	7 75
18 and 20	7 35	7 60
16	7 20	7 45
12 and 14	7 10	....

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Eavetrough Holds; Corrugated Sheets, Too

Toronto.

CORRUGATED SHEETS, EAVETROUGH.—The decline recorded last week of 10 per cent. in eavetrough, conductor pipe and kindred lines is now generally in effect. This brings prices in the East in line with Western figures, which were recently altered. Manufacturers report quite an active demand for these lines and sales increasing.

Corrugated sheets are moving out in fair quantities to the trade, but no change in price is reported, the quotations shown herewith still standing.

Corrugated Sheets—	Per 100 sq. ft Gal'zed	Painted
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Wrought Pipe Steady at New Figures

Toronto.

WROUGHT PIPE.—The situation as it affects wrought pipe is unchanged this week, the revisions named and re-

ported in last week's issue being steadily maintained. Manufacturers report some business offering and are in good shape to handle same. Prices appear in current market quotations.

Further Readjustments Made in Boiler Tubes

Toronto.

BOILER TUBES.—Prices issued last week on boiler tubes have been readjusted again, some sizes showing a slight downward move and others a slight upward move. Jobbers have worked out the present schedule carefully and anticipate present basis will now stand until the next general revision, which they indicate may be some months away. Prices to-day follow:

BOILER TUBES—	Per 100 feet Seamless	Lapweld
1¼ inch	27 00	.....
1½ inch	28 00	.....
1¾ inch	30 00	26 00
2 inch	30 00	26 00
2¼ inch	33 00	28 00
2½ inch	40 00	32 00
3 inch	46 00	38 00
3¼ inch	.....	45 00
3½ inch	56 00	42 00

Traps and Bends Active; Prices Hold

Toronto.

LEAD AND ZINC PRODUCTS. — Manufacturers report a distinct improvement in the sale of lead traps and bends in the last week or two, better than for some months in fact. The reduction in price has perhaps influenced the placing of some orders, but manufacturers see in the movement an increased need for the material which all hope will continue. Other lines are without special feature and are a little quiet the past couple of weeks. Prices seem fairly steady and no great variety from present levels is looked for in the immediate future at least.

Market Still Rather Dull

Toronto.

OLD MATERIALS.—Little interest is yet markedly apparent in the situation on old materials. Dealers are not buying and there is no demand, the situation apparently hingeing on the outcome of the Peace Conference and the terms which may be made there. The steel situation in the United States is still in an unsettled state too and this is not tending to improve the general situation any.

Ingot Metals Seem Steadier

Toronto.

INGOT METALS.—A steadier basis of quotations seems to have been arrived at in ingot metals and little variation from present figures is looked for in the immediate future. There is a fair amount of trading being done but this is not overly large.

COPPER.—Primary markets show some interests shading prices slightly in an effort to stimulate business, but this has not been reflected locally where quotations range from 18c to 20c per pound. There is a fair amount of the red metal moving.

TIN.—New developments are not shown in operations affecting tin. Stocks are small, some orders being handled and the price maintained at around 60c per pound.

SPELTER.—The actual volume of business is not large but there is more interest in this metal. The price holds at 8¼c to 8½c per pound. Ample supplies are reported.

LEAD.—The market seems to have reached the bottom for the present at least. A better feeling prevails as sales are somewhat improved and stocks being reduced to a very good margin. Prices range about 7¼c per lb.

ALUMINUM.—This metal is without change and quotations nominally held at about 50c per pound. Buyers could probably shade the price 10c if they wanted supplies.

ANTIMONY.—No interest is being taken in antimony from all accounts. The price is still 8c per pound.

LONDON MARKETS

LONDON, Ont., April 17.—An important change is that noted this week in pocket and table cutlery, which along with butcher knives and kindred lines, shows an advance of from 10 to 12½%. A change has been recorded also in some American guns, rifles, and ammunition, the latest prices issued providing for an advance. Declines have occurred here in wrought pipe, nipples and couplings. Cotton twine, horse rasps and shellac have followed the downward trend, whereas at least one pattern of lawn rakes has gone higher.

Business here continues good as applied to both the city and country trade. Spring lines are moving forward in very good quantities, and the trade as a whole is well satisfied with business being handled.

Pipe, Couplings, Nipples Are Lower

London, Ont.

PIPE FITTINGS.—The new price list just recently established on wrought pipe is in effect here. The figures shown in the current market quotations are the ones prevailing on this market. Wrought nipples have declined, 4 inch and smaller now being quoted at 60 per cent. discount from list; 4½ inch and larger, 50 per cent.; 4 inch and under, running thread, 30 per cent. Wrought couplings are also changed, 4 inch and under now being quoted at 40 per cent. discount and 4½ inch and larger 20 per cent.

Decline Named on Clout Nails, Tacks

London, Ont.

CLOUT NAILS.—Copper clout nails have come in for revision downwards this week, now being listed at $2.00 per pound and subject to a discount of 60 and 15 per cent. Copper tacks are also lower and are now being quoted at $2.25 per pound with a discount of 60 and 15 per cent.

There is a fair sale of wire nails at an unchanged base of $4.70 per 100 pounds; cut nails are also unchanged at $4.75 per 100 pounds

Pocket, Table Cutlery Higher

London, Ont.

POCKET, TABLE CUTLERY.—New prices have just come to hand on Joseph Rodgers, pocket and table cutlery, which show a substantial advance over figures formerly in effect. The new scale of quotations are about 10 to 12½ per cent. higher than those formerly in effect. Pocket knives are being quoted as follows: No. 32,341, 1 blade, 3 inch, $8.25 per dozen; 3¼ inch, $8.75; 3½ inch, $9.70; No. 32,345, 2 blade, 2¾ inch, $10.65 per dozen; 3 inch, $11.65; 3¼ inch, $13.10; 3½ inch, $14.55; 3¾ inch, $16.00; No. 32,352, boy's, one blade, $6.55 per dozen; pen knife, No. 17,749, two blade, ivory or buff, $14.05 per dozen.

Table knives, No. 3,744, are quoted at $14.80 per dozen.; No. 3,749, $13.90; Dessert knives, No. 3,744, $11.60 per dozen and No. 3,749, $10.75.

Butcher, Skinning Knives Also Up

London, Ont.

BUTCHER KNIVES.—The change on Rodgers' cutlery extends also to butcher knives and skinning knives. The advance

on these lines amounts to from 10 to 12½ per cent. The Rodgers butcher knife, No. 1,707 by 6 inch is now being quoted at $7.40 per dozen; 6½ inch, $8.00; 7 inch, $9.25; 8 inch, $11.10; 10 inch, $18.85; 12 inch $25.25; and 14 inch, $38.50; Skinning knife No. 1,707 by 5½ inch is now quoted at $7.40 per dozen and 6 inch, $7.70.

Wrapping Twine Revised Downward

London, Ont.

TWINE.—Prices locally have been revised on cotton wrapping twine, the 3-ply now being quoted at 66c per pound, and the 4-ply at 70c per pound, these figures representing a decline from former levels.

Horse Rasps Down; Rope Unchanged

London, Ont.

HORSE RASPS, ROPE.—There has been a decline this week in the price of the Heller horse rasps. The decline amounts to about 12½, the new discount to the trade being 62½ per cent. off list.

There has been no change made in the basis on rope. There is a fair sale in progress, but this is not heavy by any means. Quotations which are being named are for the pure manila, 34c per pound, base; British manila, 30c; New Zealand hemp, 30c; sisal, 27½c.

Lawn Rakes Up; Garden Tools Move

London, Ont.

LAWN RAKES, HARVEST TOOLS. —There has been an advance this week in the price of Dunn's pattern lawn rake. This new price which is now being quoted to the trade is $6.50 per dozen.

Jobbers report that there is a very good demand for garden and harvest tools, the price remaining at the unchanged discount of 17½ per cent. from list.

Guns, Rifles, Ammunition Higher

London, Ont.

GUNS, RIFLES, AMMUNITION.— A change has been made in the price of the Winchester shot guns and rifles. On the new basis quotations will show an advance over former figures. The new price is determined by adding 10 per cent. to standard list.

A change has also become effective on American ammunition which advances about 9 per cent. New prices are determined by adding 22½ per cent. to list.

Winchester shell primers have also recorded an advance and are now being quoted at 22½ per cent. advance on list.

Sporting Goods Enjoy Activity

London, Ont.

SPORTING GOODS.—Practically all lines of sporting goods are now starting to move and a good season is looked for on these lines. Prices generally on baseball goods are higher for the present season, a 15c baseball being about the lowest retail price available; the price on this line is $1.20 to the trade. The American League Ball, which used to retail at $1.50 each, will now have to sell for $2.00; the price to the trade being $16.80 per dozen. Indications are that gloves and mitts and kindred lines are higher in proportion.

Activity in Oil Stoves and Ovens

London, Ont.

OIL STOVES, OVENS.—More activity is noted in regard to the sales of oil stoves and ovens. Sales at the present time are considered quite satisfactory and prices remain at unchanged figures. Perfection oil stoves, 2 burner, are now quoted at $14.06 each; the 3 burner, $18.19; and the 4 burner at $23.06. Perfection oil stove ovens, No. 21 G, are quoted $4.31 each; No. 22 G at $5.44; No. 41 G, $4.31; No. 42 G, $5.44. McClary's glass front oven No. 70 is quoted at $4.25 each.

Shellac Lower; Down 50c Gallon

London, Ont.

Shellac. — The larger packages of shellac have declined this week 50c per gallon, with the small sizes being reduced proportionately. The new scale of prices which is provided by this decline is for the white, 1 gallon, $4.25 per gallon; ½ gallons, $4.40; ¼ gallons, $4.55; pints, $7.35 per dozen; ½ pints, $4.05; ¼ pints, $2.35; and ⅛ pints, $1.25. The orange shellac is quoted in 1 gallons at $3.75 per gallon; ½ gallons, $3.90; ¼ gallons, $4.05; pints, $6.60 per dozen; ½ pints, $3.70; ¼ pints, $2.15; and ⅛ pints $1.20.

Putty, Glass, White Lead in Oil Steady

London, Ont.

PUTTY, GLASS, WHITE LEAD.— The situation in respect to putty is without change. There is a very small demand and prices are well maintained, the standard in 100 pound drums being quoted at $6.75 per 100 pounds; and in 25 pound drums at $7.00. Pure putty is quoted at an advance of $2.00 per 100 pounds over these figures.

The situation in regard to window glass is without change. There is very little moving to the trade, and discounts are maintained at unchanged figures. Single and double diamond glass is quoted at 25 per cent. discount from list, with cut lights quoted at 10 per cent.

A somewhat better sale is noticeable for white lead in oil. This has not yet assumed very large proportion, but gives an indication of how trade is improving. The pure white lead in oil in ton lots is quoted at $16.30 per 100 pounds, and in less than tons $16.65.

Linseed Oil Firm; Turpentine Strong

London, Ont.

LINSEED OIL, TURPENTINE.—The market on linseed oil remains very strong and there is no indication of any break in present prices on seed. A much better movement of oil to the trade is reported and outlook is considered encouraging. Prices to-day are shown below.

Reports from primary points reveal a strong situation there. Receipts from the new crop are practically nil yet and sales represent a pretty heavy total. The outlook seems to be for high prices for some time to come. Quotations follow:

Linseed Oil	Raw	Boiled
1 to 2 berrels, gal.	$1 72	$1 75
3 to 5 barrels, gal.	1 71	1 74
6 to 9 barrels, gal.	1 69	1 72
Less barrels, add 10 cents gallon.		
Turpentine—		
1 barrel lots, gal.		$1 10
2 to 4 barrel lots, gal.		1 09
5 gal. lots, gal.		1 20

WINNIPEG MARKETS

WINNIPEG, April 17—Price changes during the week show many changes of importance to the hardware trade and affect quite a number of the staple lines. Those undergoing revision are wrought iron pipe, cap screws, set screws, wrought iron washers, stove bolts, copper and iron rivets and soldering coppers, all of which lines register declines from former quotations.

Business in general is reported better and in many instances, wholesalers are reported to be very busy rushing out spring goods.

Cap and Set Screws Decline

Winnipeg.

CAP AND SET SCREWS.—Cap and set screws show a reduction in price during this week of 10%, the former now being quoted at 15 and 10%, while the discount on the latter is 20 and 10%.

Wrought Washers Decline About $2.00

Winnipeg.

WROUGHT WASHERS. — Wrought washer prices, which have remained unchanged for the past eight months, have undergone a revision and new prices show a reduction of approximately $2 per 100 lbs. To-day's selling prices are as follows:

WROUGHT IRON WASHERS

Size of Bolt	Per 100 lbs. Full Cases	Less
3-16 inch	$16.40	$16 90
¼ inch	14 40	14 90
5-16 inch	13 55	14 05
⅜ inch	12 55	13 05
7-16 inch	11 80	12 30
½ inch	11 35	11 85
9-16 inch	11 25	11 75
⅝ inch	11 10	11 60
¾ inch	11 00	11 50

⅞ inch	10 90	11 40
1 inch	10 90	11 40
1⅛ inch	10 90	11 40
1¼ inch	11 10	11 60
1½ inch	11 10	11 60
2 inch	11 45	11 95

Twenty Per Cent. Drop in Stove Bolts

Winnipeg.

STOVE BOLTS. — New prices just to hand on stove bolts show a reduction of 20% below former quotations, the new discount to-day being 60% off the list.

Copper Rivets and Burrs Down 10 to 15%

Winnipeg.

COPPER RIVETS AND BURRS.—Due to the heavy drop in the copper market new prices have been announced by manufacturers of copper rivets and burrs, showing reductions of from 10 to 15% below former quotations. To-day's net prices are as follows:

Copper rivets and burrs, assorted, No. 8, 52c; No. 10, 55c per lb.

Copper rivets only, No. 8, 46c; No. 10, 50c; No. 12, 54c per lb.

Copper burrs only, No. 8, 46c; No. 10, 50c; No. 12, 54c.

Ten Per Cent. Drop in Iron Rivets and Burrs

Winnipeg.

IRON RIVETS AND BURRS.—Prices on all lines of iron rivets have also been reduced approximately 10%, based on new steel prices, and are effective immediately. To-day's selling discount is 30 and 10% off the standard list. Net prices are now as follows:

Coppered Iron Rivets and Burrs—No. 8, 28c; No. 10, 30c per lb.

Coppered Iron Rivets only—No. 8, 17c; No. 10, 18c per lb.

Coppered Iron Burrs only—No. 8, 30c; No. 10, 32c per lb.

Tinned Rivets only—No. 8, 22½c; No. 10, 23½c per lb.

Tinned Burrs only—No. 8, 36c; No. 10, 38c per lb.

Carriage Rivets—No. 6, ⅜ inch, 16c; ½ to ⅝ inch, 14c; ¾ to ⅞ inch, 13½c; 1 inch and longer, 13c per pound.

Carriage Rivets—No. 0, ½ to ⅝ inch, 13c; ¾ to ⅞ inch, 13c; 1 inch and longer, 12½c per pound. No. 1, ½ to ⅝ inch, 13c; ¾ to ⅞ inch, 13c; 1 inch and longer, 12½c per pound. No. 3, ½ to ⅝ inch, 13c; ¾ to ⅞ inch, 13c; 1 inch and longer, 12½c per pound.

Hame Rivets, No. 7—¾ inch, 14½c; ⅞ inch, 14c; 1 inch, 13½c lb.

Section Rivets, No. 6—⅜ and 7-16 inch, 16½c; ½ and ⅝ inch, 14½c; ¾ and ⅞ inch, 14c; 1 inch and longer, 13½c per pound.

Tinners' Rivets, Black—8 oz., 14c; 10 oz., 15c; 12 oz., 16½c; 14 oz., 17½c; 1 lb., 18c; 1¼ lb., 20c; 1½ lb., 23½c; 1¾ lb., 26c; 2 lb., 28c; 2½ lb., 36c; 3 lb., 39c; 3½ lb., 45c; 4 lb., 50c; 5 lb., 63c; 6 lb., 70c; 7 lb., 83c; 8 lb., 95c per M. Tinned, 8 oz., 20c; 10 oz., 23c; 12 oz., 24c; 14 oz., 27c; 1 lb., 30c; 1¼ lb., 34c; 1½ lb., 40c; 1¾ lb., 45c; 2 lb., 50c; 2½ lb., 63c; 3 lb., 72c; 3½ lb., 85c; 4 lb., 95c; 5 lb., $1.18; 6 lb., $1.35; 7 lb., $1.62; 8 lb., $1.83 per M.

Soldering Coppers Down 4c Pound

Winnipeg.

SOLDERING COPPERS.—Following the drop in other articles of copper manufacture, new prices have been announced on soldering coppers, showing a further reduction of 4c lb., base, making to-day's selling prices as follows:

3-4 lb., per pair, 49c; 1 lb. per pair, 48c; 1-2 lb. per pair, 45c; 2 lb. per pair, 44c; 2 1-2 lb. per pair, 43c; 3 lb. per pair and over, 42c per lb.

Wrought Pipe Somewhat Easier

Winnipeg.

WROUGHT PIPE. — Prices on wrought iron pipe show a slight reduction during the week, based on new prices just to hand from the manufacturers, and new net prices now effective are quoted herewith:

WROUGHT IRON PIPE

Inch	Per 100 feet. Black	Galvd.
⅛	$5 40	$7 65
¼	4 91	7 20
⅜	5 00	7 34

10L	301 50	.....

Linseed Oil Holding Firm

Winnipeg.

LINSEED OIL.—Linseed oil prices show no change during the week, holding firm at former quotations, with stocks adequate for the demand, which is reported normal. Prices are confirmed as follows: Raw linseed oil, $1.80 per gallon; boiled linseed oil, $1.83 per gallon; in single barrel lots.

Turpentine Steady at Firm Levels

Winnipeg.

TURPENTINE. — Turpentine prices still hold firm on the local market, and no immediate change is anticipated. Stocks are reported in good shape to take care of the spring trade, which is expected to be fairly good. To-day's prices are as follows: Barrel lots, $1.25 gallon; half barrel, $1.28 gallon; 5 gallon lots, $1.30 gallon; 1 gallon lots, $1.30 gallon, plus the usual extras for containers.

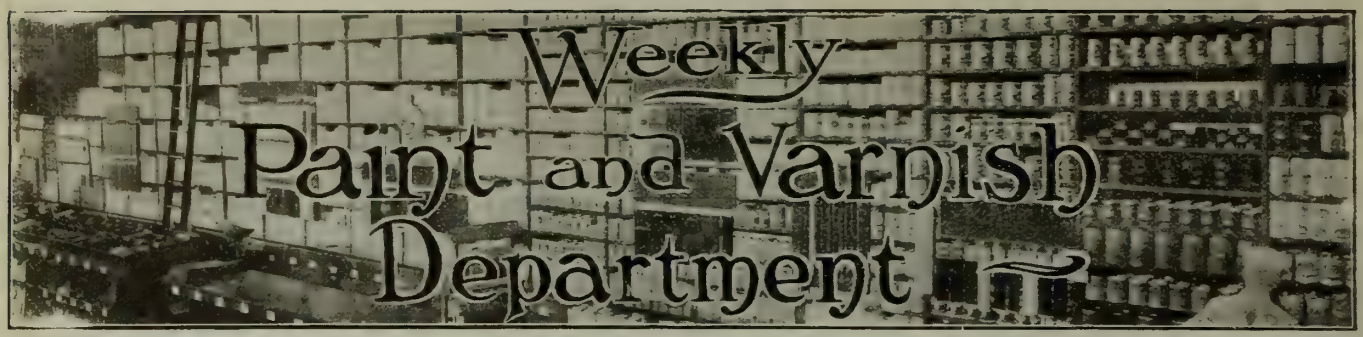
PITTSBURGH MARKETS

PITTSBURGH, Pa., April 17.—The finished steel market is absolutely stagnant. The flow of orders after the price reductions that became effective March 21, soon subsided, showing that not a great deal of business had previously been held back in anticipation of the price reductions. The average of buying since March 1 to date has been much less than the average during January and February. Why the market should not become more active instead of less active is very difficulty to understand. Of course the matter of price enters, but still there is always a considerable volume of business that is placed, irrespective of price. Equally difficult to understand is the high rate of operation that the mills maintain. In point of percentage of capacity the production may not seem heavy, but the case is different when one reflects that present capacity is 40 per cent. greater than capacity in 1914, being now fully 49,000,000 tons of steel ingots a year, against 35,000,000 tons in 1914. Actual production in the two best years before the war, 1912 and 1913, was only between 30,000,000 and 31,000,000 tons. Yet below are given annual rates of production in the past three months, computed from the monthly reports of the Institute, covering the output of 30 companies reporting monthly, which made 84.03 per cent. of the total steel in 1918 together with the percentage of production to capacity, taking the latter at 49,000,000 tons:

	Tonnage rate	Percentage
January	42,000,000	86 9
February	41,700,000	85 1
March	37,900,000	77.3

The present rate is about 70 per cent., or 34,000,000 tons, but that is a rate 10 per cent. greater than the best output in a year before the war. Practically complete statistics of steel ingot production in 1918 are now available, making the following comparison:

1905	19,463,180
1910	25,154,087
1915	31,284,212
1916	41,401,917
1917	43,619,200
1918	43,027,000



Price Uncertainties

Steel producers naturally take the position that the present abstention of the public from buying is due to the controversy in Washington over prices, between the Industrial Board and the Railroad Administration, but the public had an opportunity to buy at the price reductions of March 21, before it became known that the director-general would not pay them, and the public did not do so to any great extent.

There is no possibility of the director-general "accepting" the new steel prices. He has made it clear that he regards them as altogether too high, and he has also expressed disapproval of the idea that it is in the best interest of country for the public to be encouraged, by announcement that prices will not be reduced for the remainder of the year, to buy at these prices if they are too high.

That the prices are very high is obvious. The Government prices were not especially high, in the circumstances of the war, but now conditions are different. There were heavy taxes, and when the war ended large sums had to be written off for various adjustments. By the time the Steel Corporation was through with its adjustments it had only $199,000,000 to report as regular earnings for 1918, this being about one-

Impress Value and Service of Paint

How Dealer is Selling Greater Gallonage Under High-Price Conditions Than He Did in Normal Times—Builds Up Trade By Convincing Customers of Value They Are Receiving

HOW in the name of Sam Hill can a fellow conduct his paint department on a service basis, when he's got to be everlastingly bucking against paint prices?" asked a retail paint and varnish dealer after reading our little lay sermon on service extension recently.

Did you ever watch a good game of rugby football, Mr. Painter?

Did you notice that the big fellow, head down, bucking the centre line, time after time, seldom got very far?

And did you notice that the lightweight, fleet-footed flying wing with his head up usually gets farther down the field with the ball?

Rugby fans call that an end run.

There's a young hardware clerk up country that's got the end run on the high price situation down pat.

He and his boss don't think of his methods in football terms—but just the same they have given up useless bucking the line on the price situation, and they're making end runs with their paint sales.

Here's the Idea

Here is how this young chap got the idea—just as he told it to the boss:—

"Do you remember that old Martin house up on the hill, before Dad sold it to Bill Watson?"

The boss remembered.

"And you remember that he had a 'For Sale' sign on it for two years, without anyone showing any worry about buying it?

The boss's memory was still good.

"You also recollect selling Dad $20.00 worth of paint for that house and not long after Billy Watson took it off his hands?"

The boss's recollection was perfect.

"Alright then," said the clerk, "let me give you a little inside history on that deal."

"I'm listening," said the boss.

Decides to Paint Up

"Dad needed the money for that house, and needed it quick. Heaven knows he tried hard enough to sell it, too."

"One day he said to me, 'Son, I'm going to get a grey hair or two if that house don't sell pretty soon."

"'Want to sell it that bad?' I asked."

"'I sure do,' he replied."

"'Well, why not buy a little paint and I'll paint it up for you,' I offered."

"'You're on' came back at me quick and so I went to work."

"The upshot was that within two weeks Billy Watson came along and offered him $200 more than he had formerly asked for it."

"Well," remarked the boss with an air of 'What's the big idea?'"

"Afterwards you took me on in the store here, my first real interest was in watching you sell paint, dickering over prices, and fussing yourself up generally over your customer's protests."

"Thinking back over that paint deal on the Martin house I asked myself if Dad ever kicked about the high price of paint—not when he thought of the $180 extra clear profit that he made on it."

Show the Customer

"Then it occurred to me that there ought to be some other way of selling paint besides yours—it came in a flash;—if I can make the customer see what he is getting out of his purchase and keep him from thinking what we are getting out of it, paint sales will be both easier and bigger."

And that young man to-day is selling a greater gallonage of paint under high price conditions than his boss ever did in normal times.

He is making highly profitable end runs around and past high price difficulties by impressing his customers with the service and value they can obtain from paints and varnishes.

Avoid Comparison

By purposely steering clear of any comparison of present prices with former prices he saves himself and his customer a lot of useless worry. He does, however, contrast the comparatively low price of paint with the high cost of doing without it.

Price never scares this chap. He is unlike a good many dealers who scare themselves stiff over high prices, then proceed to scare their trade by eternally drawing their attention to what is and what used to be.

When necessary he lets a property owner know about his father's $200 return on a $20 paint investment.

Knowing the price of lumber for replacement on property that is deteriorating, it don't take him long to convince his customer that the price of paint is a compara-

In City or Country
Moore's Paints

There is little in common between the huge skyscraper of the crowded city and the small pioneer's cottage of the open prairies. In one essential only have they a common interest, and that is **Paint.** It spreads its colour and adds a touch of beauty to both of them.

Moore's Paints have proven their worth and staying qualities against the dust, smoke and grime of city conditions, as well as standing the test of raging elements in unprotected places. You take no risks by lining up with a **Moore Agency.** Moore's Paint is so 100% efficient under all conditions that it sells on its merits.

Write us to-day for our interesting agency proposition.

Benjamin Moore & Co., Limited

West Toronto
Ontario

tively small item with the service it renders in protection.

With women customers, he compares the service, and if necessary the price, of a quart of floor paint with the cost of a new carpet or a new rug.

Compares Service

He compares the service of a half-pint of household enamel or varnish stain on an old piece of serviceable furniture against the cost of a new piece.

Now mark you, his comparisons boost his paint department—they don't knock it—likewise they can be measured in terms of service rendered to his customers.

This young man carries on sales in his paint department on the basis of service—and in spite of high prices.

And his efforts don't rest behind the counter.

What advertising he is able to do talks service in the same manner as he conducts his sales. He even went to the extent of getting the advertising department of his supply house to write a letter to his trade along this line.

The moral is:—Don't try to buck something you can't help—make an end run around your difficulties. In this instance trade was kept and build up on the policy of convincing the customer that he was getting value and service out of all proportion to the price asked.

Conservation Boosts Sales—Possibilities For Wood Preservatives

Have Been Little Understood By Average Buyer Until Recently, Because Materials Were Cheap and Plentiful — Value Recognized Now By Farmers, Contractors, Architects and Others

PRESERVATIVES for wood have been scarcely understood by the average man because there has been little demand for such material; but to-day, when the conservation of timber is absolutely essential, it is an important consideration with engineers, architects, contractors and farmers.

The recognized specifications of all preservative oils as used by foremost engineers call for "An oil obtained by the restrictive distillation of bituminous coal." The reason for this lies in the fact that by distillation, one reaches the valuable anthracene oil which is only obtained from coal tar. This particular product is further qualified by specific gravity, of from 1.09 to 1.13, a high flash and burning point; also by allowing no distillation under 235° C. (or 450° F.) as well as limiting the tar acids to 1% or 2%. By this means the following advantages are secured:—

Penetration of the wood, resistance to heat from the sun, no evaporation unless heated to approximately 500° Fahrenheit. This oil has high permanent antiseptic properties which insure any wood against decay, for in a non-evaporatable oil form it is permanently in the wood.

Coal tar distillation has reached the highest efficiency in England and it is from this source that most of the oil used by the large railroad and other corporations draw their supplies. In the States as well as in England these high grade oils should not be confused with creosote, under which heading one buys to-day a production from wood tar and light oils taken from coal tar pit. These have little preservative value, for one loses up to 50% by evaporation in a short time, besides which the tar acids are injurious to spikes, nails, etc., which they assist to destroy.

The following is a rough and interesting idea of that which is obtained from coal tar:

At a heat from	On First Distillation.	On the Redistillation
100° to 190° F.	Ammoniacal Liquor	Water, Ammonia, Sulphides, etc.
190° to 320° F.	Light Oil	Naphtha, Benzole, Phenol, Dyes, etc.
320° to 500° F.	Carbolic Oils	Cresols, Carbolic Acid, Picric Acid, Pyridine, etc.
500° to 750° F.	Anthracene Oil	"Letteney" and other high grade wood preserving oils.
750° and over	Hard Pitch	

Says Varnish Prices Likely to Stay Firm

That there is likely to be a steady and maintained basis for varnishes is the opinion of W. W. Ingersoll, vice-president and secretary of the Dougall Varnish Company, Montreal. Mr. Ingersoll, to HARDWARE AND METAL, stated that there was unlikely to be any lower price on varnish under existing conditions.

"One of the big factors at present in maintaining the market is the high price of linseed oil. Many raw materials are still costing as much as ever, and altogether prices are likely to hold," said Mr. Ingersoll.

As to the container situation, there has been little relief from a price standpoint. Manufacturers contracted for supplies months ago and are operating with the stocks they contracted for. There has been less difficulty in securing these, of course, and this is a source of satisfaction in that it makes for a less interrupted delivery. Manufacturers will, it is expected, be in a position to take care of orders promptly.

In speaking of general conditions, Mr. Ingersoll said: "Present business is in a satisfactory condition, and there is a very good movement. As to the future, I would not venture to say what it will be, but we hope the season will be a good one."

The future situation will depend, materially, upon the trend of the linseed oil market. If the supply is short, prices will rule high. Much depends upon the Argentine situation. There is seed there, but with a big demand for shipping, with strikes the order of the day in many places, and with the season approaching rapidly when these supplies are needed, there is no indication of immediate readjustment on raw material, or on finished product.

NEW CONTROLLING FACTORS IN PAINT

Continued from page 56

terial have advanced and been in effect for some time. Even then, when he has made new prices, these have sometimes not gone into effect until after announcement had been made that prices would advance. Take the United States paint maker, on the other hand. His prices advanced more frequently, and he was always quick to do this when his cost for raw material increased. He then raised his prices at once. Here in Canada, changes have frequently been held off for a considerable time."

In the opinion of Mr. Black there will be no lower-priced paint for many months, probably not this year at all, and if so, late in the fall. Wage sheets have not been lower, containers have cost as much as before, and all ingredients entering into paint manufacture have ruled on a high basis, with a few exceptions. Some commodities have even gone higher.

Views of the West

Speaking of Western Canada, from which he has just returned, Mr. Black expressed encouragement regarding conditions there. "There seems to have been a general deferring of buying there on the part of the retailer, but orders are now coming in. Some of the jobbers were expecting orders to come in earlier in the year. Weather conditions have really been less favorable than they have in the East, but a better spirit in manifest there now, and the feeling expressed by jobbers and manufacturers regarding the future is a good one. Conditions seem to promise well."

TO CONFER AT CLEVELAND

A special meeting of the paint manufacturers of the United States will be held at Cleveland, on Tuesday, April 22, to consider matters if importance connected with the general readjustment situation. The varnish manufacturers have been invited to join in the discussion.

The annual meeting of the National Association of Window Glass Manufacturers will be held at Atlantic City the last week in June or the first week in July. The committee of arrangements consists of W. S. Phillips, chairman; L. S. Cunningham and W. L. Graham.

YOUR SALES AND PROFITS

To the greater extent depend on the quality of the goods with which you supply your customers. When you give them first quality goods backed up by good live advertising, you are laying the foundation for future business and increased sales and profits.

TRADE ELASTICA MARK.

PAINTS AND VARNISHES

are built on reputation for always being of first quality, and the wise dealers, the ones who are looking for future sales and profits, are the ones who are now selling the complete ELASTICA line. This line is complete with a Paint and Varnish product for every purpose and all bearing the Trade Mark that has been recognized for years as the standard of perfection in Varnishes.

This is your opportunity to increase your sales and profits. A letter from you will bring particulars of our attractive proposition. Why not write now?

TD DEVELOP BICYCLE SALES DISPLAY EARLY

Continued from page 57

ticles being so small, it is unwise, Mr. Rolland believes, to leave them out where pilfering would be invited. Then a permanent placing of various accessories can be maintained within the cases, which would otherwise be impossible.

Sell For Cash

In a general way sales are made for cash. This is not a difficult thing to accomplish, Mr. Rolland pointed out. For instance when a man wants a bicycle he has planned his ideas ahead of time. He, expects, in nine cases out of ten, to pay spot cash. He cannot send away and get it under any other terms. Besides, at a cash price he knows that he is likely to get a close quotation, closer than would be likely were he to seek time in which to pay. And it has therefore been usual here to make sales for spot cash.

The seasons vary and weather conditions naturally have something to do with the turnover. Mr. Rolland expects the coming season to be a good one and in the average season the number of wheels sold will run from 35 to 40. There is prospect of a larger number selling each season. There also is an increasing desire to have a good, dependable wheel that will 'stand the racket' and deliver efficiency all around. Men, especially, want a good wheel, while the boys will do with a less costly mount.

Profit on Accessories

In view of the fact that bicycle prices ars usually more or less established for a given grade of wheel, the experience of Mr. Rolland has been that of developing as extensively as possible a greater movement of accessories. It is true, he pointed out, that a man will pay $10 more for a wheel than he formerly did, but of course this does not mean that the dealer can get a larger profit than before. And so accessories are looked to for the real profits in a large number of cases.

Need Accessories

It was pointed out, that with the sale of a bicycle, the clerks were expected to sell accessories of such a nature as the customer would probably have to buy. He should have, perhaps, an extra inner tube, a special wrench, and odd tools that were not included in the tool bag equipment. Here was an opportunity to suggest these things and many others. The plan of suggesting has worked out well here and good sales have been made those buying bicycles.

It is worthy of note that the boy will, when wanting an alarm for his bicycle, very often buy a Klaxon or the like,while the man will buy a bell. In like manner, the boy will purchase the cheaper tire cover or inner tube, and the man the better grade, paying a little more for it.

In the average season about 100 tire covers will be disposed of here, and of inner tubes many more. Stock is turned several times per year, and of the smaller accessories, such as patching and repair outfits, wrenches, spokes, cements, grips, etc., the turnover is much greater. Pumps are especially active sellers.

Sell Many Flashlights

"We sell a great many flashlights," said Mr. Rolland. "In the summer season the sale is larger than in the winter, and we will turn our stock many times. We would sell,perhaps, $600 to $700 worth per month. In the winter months the figures would be about one-half this.'

Asked as to how the sales of this line were developed, Mr. Rolland stated that they always kept these lines well displayed. They are shown in a case, and the display is made neatly and the samples are attractive and kept free from dust and finger marks.

Need Good Battery

But one of the most important things is that of giving every customer a good battery with the lamp he has selected. These batteries are tested right before the customer so that he may see what he is getting in the way of a strong, live battery. And with the stock turning many times—probably once a month —the stock is kept fresh. Thus, when the customer has taken away his lamp and with the battery giving weeks of service, he is almost sure to return for refills. He is particular about this, Mr. Rolland said, and believed that he would secure real value by coming back here for supplies required subsequently.

Retail Associations May Be Amalgamated

WINDSOR.—Amalgamation of local Retail Merchants' Associations into one organization embracing the counties of Essex and Kent, is again a live issue. The proposal was brought forward last fall, but during the winter no active effort was made to ascertain the attitude of the retailers affected.

Now, however, the Border Cities R. M. A., from which branch the suggestion originally emanated, have received the assurance of representative merchants and officers of organizations in Chatham, Blenheim, Leamington, Kingsville and Amherstburg, that these towns and cities are ready for the move to cooperate with Ford, Walkerville, Windsor, Sandwich and Ojibway, with the ultimate object in view of forming one large association, to embrace all Western Ontario, and to be constituted along lines similar to the Western Ontario Associated Boards of Trade.

A somewhat similar movement is circulating among the Chambers of Commerce and Boards of Trade, the tendency being towards centralization. Recently a deputation representing the larger towns of Essex and Kent Counties attended a meeting of the Border Chamber of Commerce and offered suggestions along these lines. Consideration of the proposal has been promised by the local executive.

Trade Inquiries

792. **Agricultural implements.**—A London company, whose operations cover the United Kingdom, Scandinavia, Poland, Siberia, Caucasus, and South, Central and North Russia, is desirous of getting into touch with Canadian manufacturers of agricultural implements. They are establishing a factory for reassembling and other purposes and also a demonstration field. Canadian manufacturers interested should forward complete catalogues with present prices.

793. **Wire nails.**—A London firm wishes to purchase supplies of wire nails, and invites offers from actual Canadian manufacturers.

794. **Woodenware and hardware.**—An important London company, who are large buyers of broom handles, implement handles, washboards, dowels, clothes pegs, and all kinds of small turnery, are prepared to place orders for large and regular quantities with Canadian manufacturers, and in this connection to send out a representative to Canada if prospects of securing supplies are favorable. In the meantime they would like to hear from actual Canadian manufacturers possessing the necessary output capacity for handling export trade.

795. **Fancy goods.**—A London firm wishes to secure sole agency for the United Kingdom of Canadian manufacturers of vulcanite combs, manicure requisites, hot-water bottles, and toilet specialties.

797. **Enamelware.**—A Liverpool firm wishes to communicate with exporters of the above.

798. **Corn brooms and whisks, brushes.**—A Liverpool firm wishes to hear from exporters of the above.

799. **Household woodenware.**—A Liverpool firm wishes to hear from exporters of the above.

800. **Office furniture and equipment.**—A Liverpool firm wishes to get into touch with manufacturers of the above.

806. **Asbestos plaited packing,**—A Liverpool firm asks to be placed in touch with exporters of the above.

807. **Rubber surgical tubing.**—A Liverpool firm is in a position to place orders for all sizes of the above.

811. **Barbed wire.**—A Liverpool firm asks for quotations on 25-ton lots of the above.

812. **Net fencing wire, galvanized fencing wire, No. 8.**—A Liverpool firm asks for quotations on carload lots of the above.

813. **Bolts and nuts.**—A Liverpool firm asks for quotations on carload lots of cup square, square and hexagon round hexagon nuts and bolts.

815. **Iron shoe rivets and tacks.**—A Liverpool firm is in the market for the above.

828. **Corn brooms, woodenware, etc.**—A Glasgow importer wishes to hear from exporters of the above with a view to purchase or agency.

829. **Boxboard.** — An Edinburgh firm wishes to get into touch with manufacturers of boards suitable for making folding boxes and cartons.

834. **Iron bars.**—A Glasgow firm asks for offers of 16 tons of the above, in accordance with specifications which may be obtained from the Department of Trade and Commerce, Commercial Intelligence Branch, Ottawa.

768. **Lighting glassware.** A firm of Australian importers desires to receive catalogues and wholesale quotations, on the basis of f.o.b steamer of the following lines of Canadian glassware: Upright gas chimneys, straight and normal, with side holes—clear and opal glass and also fancy colored glass blobes. Clear inner cylinders and bulbs, 3-lug fitting in 48, 54, 63 and 70 mm. diameter for inverted burners. Clear, half-frosted, half-opal, and fancy colored globes for inverted burners in 70, 80, 85, 100 and 120 mm. diameter, flange fittings. The quality required to be similar to "Jena" or "Thermo."

Varnish Quality–plus

Ultimate economy in varnish buying is determined not only by quality, but by adaptability, as an unsuitable varnish may do as much harm as a poor one. Even the smallest consumers have learned that it costs much less to prevent varnish mistakes before applying than to rectify them afterwards.

For every possible use there is a specially adapted Berry Brothers' Finish that can be depended upon to produce the desired results.

Liquid Granite for floors and all interior work exposed to hard wear, Luxeberry White Enamel, Luxeberry Wood Finish, Luxeberry Wall-Finishes and Luxeberry Spar Varnish are a few of the many finishing products for which the demand is large and continuous owing to their long established record for uniform dependability.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, April 17—No actual changes of price have been made this week on linseed oil. The difficulties of the crushers have not been reduced to any extent, however, and the Argentine seed situation is still a dominating factor, Canadian seed being in short supply. Whether improvement will come soon enough to ease the price basis is not now clear. A great deal hinges on transport accommodation. If this is available from time to time, and the export to other countries does not take all the supply that can be carried, Canadian mills should get their requirements.

Oil Market Strong; Argentine Factor

Montreal.

LINSEED OIL—"There is seed in the Argentine but we cannot be sure that we will get adequate supplies from there." This is the manner of sizing up the flaxseed situation by a Montreal crusher. There seems to have been no difficulty of filling orders from the trade up to this time. But there is a real likelihood of shipping playing an important part still in delivery of seed to the mills. Canadian stocks are limited and with the busy season about to open there will be every need for increased supplies of oil. Prices are holding this week, with a strong undertone prevailing.

Raw—	Imp. Gal.	
1 to 4 bbls.	$1 65	$1 71
5 to 9 bbls.	1 65	1 70
10 to 25 bbls.	1 65	1 69
Boiled—	**Imp. Gal.**	
1 to 4 bbls.	$1 67½	$1 73½
5 to 9 bbls.	1 67½	1 72½
10 to 25 bbls.	1 67½	1 71½

Still Shortage of Turpentine

Montreal

TURPENTINE—While some of the jobbers who handle turpentine in a small way have been advancing their prices, the paint trade has not made any advance this week. Some are not offering stock at present, but are still booking at $1.10, subject to the receipt of supplies, which are eagerly awaited. There is no promise of improvement from a price standpoint.

Turpentine—	Imp. Gal.	
1 to 4 barrels		$1 10
Small lots	$1 17	1 22
Small lots		1 16

(Packages extra).

Putty Has Held; Good Sales Made

Montreal.

PUTTY—Prices have held with a decided firmness of undertone. Oil prices are responsible for this in large measure, and there seems likely to be no reduction now. Higher prices are, it is considered, more likely, though there is no suggestion of this at this time. A seasonably good movement is reported.

Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs advance on above prices

Terms—2%, 15 days, net 60.

Oil Firming Factor For White Lead in Oil

Montreal.

WHITE LEAD IN OIL—Trade is developing very satisfactorily on white lead in oil, and in accordance with oil prices, the undertone is steadily firm. Supplies are adequate to meet trade demands and orders will naturally be looked for as the season progresses and painting becomes general. Five ton lots are held at $15.50 per 100 lbs.; ton lots at $16 and smaller quantities at $16.35.

Paints and Varnish Have Strong Tone

Montreal

PAINTS, VARNISHES—"Not only are paints firm, but the present conditions rather justify an advance," said a large paint manufacturer to HARDWARE AND METAL this week. An increase was not anticipated by this informant, but with continued high prices for labor and material it is expected that markets will hold with much strength of undertone. The same conditions holds with respect to the varnish market. A large varnish maker stated that there was nothing to indicate lower prices for some time. The condition of business is satisfactorily reported on both lines.

TORONTO

TORONTO, April 17.—Linseed oil prices are very firmly held and there is no indication of any easing away at the present time. Turpentine has advanced in some quarters, resulting in a narrowing of the range of prices. Reports from primary points indicate a very strong market there. Much more activity is noticed all the way through on lines associated with the paint trade. Mixed paints, varnishes, white lead in oil, are all enjoying a great volume of business, and outlook is considered very bright.

Strong Feeling in Linseed Oil Markets

Toronto.

LINSEED OIL.—There is no sign at present of any break in linseed oil prices. The market on seed is holding quite steadily and this condition seems general. Reports from the United States indicate that they expect a considerable allotment of Argentine seed, but with the big demand now manifesting itself for oil, this expected arrival has not exercised any bearish effect on the market. Crushers in the United States and Canada now state that they are really busy. The volume of orders coming to hand in the last week or ten days from both jobbers and manufacturers is heavy and a splendid season is confidently looked for. The tone of the trade is decidedly optimistic. Range of prices this week is as follows:

Linseed Oil—	Raw	
1 to 2 barrels, gal.	$1.74	1$1.80
3 to 5 barrels, gal.	1.73	- 1.79
10 bbls. and over	1.71	- 1.77
	Boiled	
1 to 2 barrels, gal.	$1.76½	-$1.83
3 to 5 barrels, gal.	1.75½	- 1.82
10 barrels and over	1.73½	- 1.80

Prices shown are those ruling on Thursday of current week and subject to daily fluctuations of the market.

Range Quotations on Turpentine Narrows

Toronto.

TURPENTINE.—The range of prices on turpentine has narrowed this week through an advance in some quarters of 2c per gallon. Every indication of a strong market is evident. Sales from primary points are heavy, receipts of new crop turps small, with a consequent reduction in stocks on hand. Reports from the South all carry bullish sentiments, and that prices may go slightly higher seems the present outlook. Locally the quotations are as follows:

Turpentine—	Imp. Gal.
1 barrel (barrel included)	$1.12-$1.15
2 to 4 barrels (barrel included)	1.11- 1.14
5 gallon lots	1.22- 1.25

Orders For Mixed Paints Improving

Toronto.

MIXED PAINTS.—Although spring

Nearly Two Centuries Old

Brandram's Genuine B-B White Lead

Do they not mean something to you,—these pictures? Look at them. A long and honorable history is behind them.

Canada was largely a wilderness when Brandram's Genuine B-B White Lead was first made. Napoleon has come and gone. The United States has come into being—and now Germany has fallen. Steam power, electricity, telephone, telegraph, wireless, submarines, airplanes—these have all come into being since the Brandram process was discovered.

1919 is using out of the same pail as 1745? Exactly the same process was used in making the white lead (Brandram's Genuine B-B) of 1745, as is used in making that of 1919. In the world competition which has been waged all these years, the Brandram process is the only survivor of all the white lead processes which were in use at the time it came into being.

This is the white lead which is used in B-H "English" Paint, and in all other Brandram-Henderson paint products employing a white base.

Your guarantee lies in that two centuries of history. No one else can give a guarantee of the same character

MEDICINE HAT CALGARY EDMONTON VANCOUVER

orders are supposed to have been shipped out, manufacturers report a very good volume of business coming to hand, with some repeat orders lined up with the others. Retailers are evidently campaigning hard and the reports gathered from retail centres are generally pretty optimistic over amount of business they expect to do. Prices are steady and well maintained.

Steady Movement White Lead in Oil

Toronto.

WHITE LEAD IN OIL.—There is what might be termed a steady movement of white lead in oil to the trade. This is slightly improved in the last couple of weeks and is expected to increase as the season advances. Prices have held without change for the week at the following figures: Pure lead in oil, $15.80 per hundred pounds in 5-ton lots; $16.30 per hundred pounds in ton lots, and $16.65 per hundred pounds in less than ton lots. The various brands are shown in the current market quotations.

Plate Glass Hard to Get; Putty Steady

Toronto.

GLASS, PUTTY.—Reports from the manufacturers state that real good plate glass is hard to get and prices are very firmly maintained. Window glass is without any feature of interest. Stocks are ample and market conditions tend to firmness. Whether efforts to stimulate business may result in some price-cutting, is hard to say. Discounts shown in current quotations are unchanged.

Putty is quiet and prices hold at following figures:

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices.

PITTSBURGH MARKET REPORT

Continued from page 71

fourth more than the best showing before the war. The corporation's total profits, however, from which various deductions had to be made by reason of the war, amounted to some $550,000,000, and it may readily be computed that if in 1919 its total profits were one-half as much, or $275,000,000, its taxes would be about $57,000,000, leaving, after paying subsidiary bond interest, about $10 000,000 more than the earnings shown for 1918. As the 1918 profits were made at Government prices, with shipments at 88 per cent. of the present capacity, it can readily be seen that large price reductions can be made and leave very substantial earnings, provided there is anything like full operation. The difficulty in this whole price controversy is simply this, that relatively light production is expected and large profits per ton are desired in order to pay the overhead. Thus the statement has been made that it cost $46 a ton to make Bessemer rails in January, and no doubt it did, but a very considerable part of the $46 was overhead, for the Bessemer rail production was very light.

The steel producers are now very much divided in attitude as to prices. Some, of course, hold that the director-general is wrong in his contention, and that he has done much harm in refusing to endorse the proposed prices. Others, however, and a rapidly increasing number, rather take sides with the director-general, and as price stability seems now out of the question, favor an open market as the quickest and best way to get business started. Those who want an open market are the optimists, in that they believe it is possible to get business going again. Those who want to maintain prices, however optimistically they may talk, are pessimists, believing that conditions are such that business cannot be stimulated and that it is better to get as large profits per ton out of the business that must be placed from day to day, no matter what the price.

Pig Iron

The blast furnace interests were not satisfied with the Industrial Board adjustment of prices, feeling that steel products were not reduced nearly enough in proportion to the pig iron reduction of $4.25, which they computed was 14 per cent. Since then the dissatisfaction of the merchant furnaces with attempts to regulate the market artificially have greatly increased. The merchant furnaces want an open market, as they had practically all the time before war time Government price regulation came. They had their good years and their poor years and they are willing to average up now as they did in the past. Their costs are high and they feel the way to get costs down is to blow out, which the furnaces are doing now in increasing numbers.

It may be asked why there is not an open market in pig iron if the furnaces want one. Possibly there is already. One can only ascertain by inquiring for a reasonable tonnage, and of such inquiry there is none.

The Lake Superior iron ore interests are reported to be dissatisfied with price regulation. Their trouble is that the fancy freight rates on ore from mine to lake dock have not been reduced. They are blamed with asking high prices for ore, at Lake Erie dock, when a large part of the cost is freight, and the ore roads stand to make very large earnings, which will go into the Railroad Administration's revolving fund and help to make good the lighter earnings of other roads, under the Government guarantee as to earnings.

Simon Peters, hardware dealer, of Waldheim, Sask., accompanied by his wife and daughter, has just returned from California, where they spent the last two months on a vacation.

WORK COMMENCED

Actual construction work was commenced this week on the $6,000,000 Canadian subsidiary plant of the General Motors Corporation at Walkerville, Ont. Ground was broken for the first time Monday morning, although gangs have been employed for some time removing old buildings on the 38-acre site purchased last fall.

Erection of the Walkerville plant, as a Canadian branch, is part of a large extension scheme embracing an expenditure of $37,398.000. as announced by President Durant, of the G.M.C., recently.

Following closely upon the heels of the announcement of a policy of wide extension, comes the statement from the president of a profit-sharing system which will be inaugurated provided the stockholders vote favorably upon the proposal at their next meeting, slated for April 30, at Wilmington, Delaware, whereby employees of the corporation will benefit from the establishment of an employees' savings and investment plan, under which employees will share in the profits and be encouraged in thrift. The scheme is this: for every dollar invested annually in the fund by the workmen, the corporation will place another dollar to his credit, the limit being paced at $300 yearly. It will bear interest at six per cent. In any case the employee will not be allowed to deposit more than ten per cent. of his earnings.

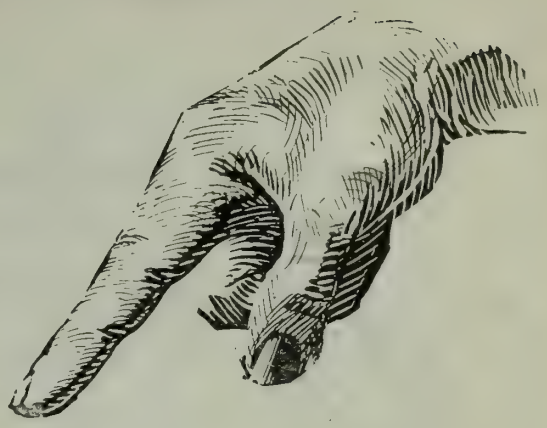
NEW BRANCHES OF R. M. A. FORMED

J. C. Campbell, District Secretary of the R. M. A., recently organized branches at Sterling, Tweed, Marmora, Madoc, and Belleville, Ont. The officers of the new branches, so far as received, are as follows:

Belleville: Pres. D. V. Sinclair; 1st Vice, Arthur Wallbridge; 2nd Vice, E. R. McBride; Treas., Wm. Doyle; Sec., W. D. Hanley.

Marmora and District: Pres., F. N. Marett; 1st Vice, D. Shannon; 2nd. Vice, D. Narrie; Treas., Mr. Connor; Sec. F. M. Gladney. Madoc: Pres., Benson O'Hara; Sec., E. C. Tufts. Sterling: Pres., Geo. H. Leury; 1st Vice., R. A. Eliot; 2nd Vice, L. Meiklejohn Treas., M. G. Cooke; Sec., Fred T. Ward. Tweed: Pres., J. D. Taylor; 1st Vice, Chas. Kerr; 2nd Vice, Felix Rashotte; Treas., Chas. Clarke; Sec., J. J. Quinn.

Sterling meets the second Monday each month; and Tweed the third Friday.



Brockville Branch of the R. M. A. are expecting to hold a banquet on the 23rd inst., and have invited Messrs. E. M. Trowern, Henry Watters, and J. C. Campbell to be present.

It is proposed to hold convention of the different branches of the R.M.A. in the county of Hastings in Belleville, some time in June.

Mr. Smith of Smith & Hargraves spent a few days in the city calling on the jobbing trade.

Let this *Worthy* Brand dominate Your Paint Department and Hold Your Trade

Only the skilled and expert chemist can determine Jamieson quality by *examination*. To the workman, however, Jamieson quality is determined only by *service*.

Many years' experience and continual improvement have given the Jamieson line to-day a prestige that makes it a best seller wherever paints and varnishes are sold.

We want *you* to be the Jamieson agent in your town. Drop us a postcard and we will show you how it will *pay* you to sell Jamieson Paints and Varnishes exclusively to your customers.

TRADE SIMMS MARK
SET IN RUBBER

Clinches the Painter's Trade

You can get—and keep—the custom of every painter within miles of your store, when you let them know that you stock Simms' Better Brushes—set-in-rubber by our own exclusive patented process.

Simms' Set-in-Rubber Paint and Varnish Brushes are guaranteed to hold their bristles firmly in the setting, no matter what usage they are subjected to. The harshest paint-remover, boiling water, crude oil—everything that usually destroys the ordinary brush—have no effect whatever on Simms' Paint and Varnish Brushes. Their setting is perfection. The bristles **never** come out.

Get a good supply in now. There is a good profit on every brush you sell. We will send price-list by return of mail.

Floglaze M L QUALITY

Save the Surface and You Save All--Paint and Varnish

Floglaze M L QUALITY

Every structure of every description provides prospective use for Paint and Varnish.

Everyone in Canada, connected with the Paint and Varnish trade, has realized for years past that more paints and varnishes could be used.

If all property owners knew as well as painters, paint manufacturers and others, what losses they have suffered through the lack of paint, more painting would have been done.

The decision of the Canadian paint and varnish trade to promote and carry out a great co-operative educational campaign for the extension of the greater use of paints and varnishes is, without doubt, the most progressive and important move ever made by the industry.

As a result, more painting and varnishing will be done.

More paint and varnish business will be done, benefiting retail dealers, jobbers, painters and manufacturers alike.

This campaign will have peculiar significance and importance at this time. It denotes the confidence of the trade in Canada's prosperity and possibilities. It is a concrete evidence of their desire to do a "bit" in boosting Canada's business.

The movement will be of material assistance in Canada's readjustment problems. It will assist in Canada's rehabilitation problem by promoting greater opportunities for labour.

The campaign is to be co-operative and impersonal; the benefit to be shared alike by retailers, painters, jobbers, manufacturers, and all those directly or indirectly connected with the trade.

But co-operation means operation by every interested factor. It is not one-man effort; it implies concerted effort by all. While the larger factors are preparing to spread this campaign broadcast in Canada's largest farm and daily papers, it is up to every paint dealer to do his bit locally. By doing your part locally, you can make your trade feel that you are part of the big game which they are bound to see working out through this "Save the Surface" campaign.

Speaking personally, we are heart and soul with this movement. For years we have advocated the necessity of greater education in the use of paints and varnishes. We are convinced that it will bring a vastly greater volume of business to the retail trade of the country.

But this business will not be all handed to the retailer on a silver spoon. He must do his part by extra effort in taking advantage of this opportunity, such as has never been placed before the Canadian paint and varnish trade.

Apart from our own active interest in assisting by all within our power to promote the success of this campaign, we shall continue to make **Maple Leaf Paints and Varnishes,** so that they will give the maximum service to our customers. We believe this is also highly important in promoting greater confidence in prepared paints and varnishes, and will materially benefit the worthiness of the objects which have prompted this movement.

If You Knew—

THE economic reasons, alone, as a motive for housewives in selecting "Silkstone" as a wall covering, is a big factor in promoting sales.

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Silkstone is cheaper than wall-paper (and decidedly more sanitary), lasts longer than other wall finishes, can be washed often, and won't rub off. It gives a beautiful soft, silky finish that will outwear any other wall covering. The economy of a finish that costs little to apply and lasts so long will forcibly appeal to all.

Set "Economy" to make sales of Silkstone for you. If there is no Stephens' Agent near you, write for our good proposition.

Stands on S-W Quality

When the painter finds that he requires White Lead he comes to his dealer and asks for Green Seal Pure White Lead—for he knows this pure product stands on S-W Quality.

In the corroding of the lead, in the washing, drying, and pulverizing—

Green Seal

Guaranteed Strictly Pure

White Lead

has all the advantages of being made in the plant of the largest Paint and Varnish Makers in the British Empire. It is not stringy, will not separate in the package—is absolutely white—breaks up easier than other leads and spreads better. Takes a greater reduction with pure linseed oil—does not pull or show laps—the finest ground white lead on the market to-day.

That's why painters won't be satisfied with any other White Lead.

We keep in personal touch with a great many painters—and it will pay you to be ready at all times to give them Green Seal Pure White Lead.

25,000 dealers sell S-W products. If you are not one of them, write and let us tell you about our proposition to agents. It will put money in your pocket.

Dougall
DA-Cote
Motor Car Enamels

"Good enough for the professional painter—Easy enough for the amateur."

Here is a line that will meet with a ready response by your trade. A Dougall quality product, prepared for the car owner. It is easy to use, gives a beautiful finish, and it dries overnight.

You can do a brisk business in this line if you will get your stock in hand now. Many car owners are *thinking* of painting. The suggestion from you will make the sale.

It does not require an expert to be successful with DOUGALL'S DA-COTE—full directions are printed on every can which, if followed, will produce satisfactory results.

Dougall Da-Cote, though primarily for motor cars, is good for many other uses—sleighs, buggies, wagons, baby carriages, etc.—in fact, anywhere where a glossy, weather-resisting surface is required.

Dougall Da-Cote Is Made In Black, White and 8 Colors

Lowe Brothers

PAINTS VARNISHES

How Many Houses in Your Neighborhood Need Repainting?

HAVE YOU MADE A LIST OF THEM?

THESE are excellent prospects—do you follow them up?

Many Lowe Brothers dealers who have made a special success in selling paints have proven that the methodical following up of a good paint prospect usually lands the business.

This is how they go about it.

A careful list is made of all good paint prospects—owners of unpainted houses, of buildings in the course of erection or which need repainting. A copy of this list is given to each clerk to commit to memory and whenever any of these prospects come into the store they are given a quiet little selling talk on paints with special reference to their individual needs.

To back this up their names are sent in to Lowe Brothers and are put on their follow-up list. This means a number of personal letters and a continual stream of high class advertising matter. This follow-up of Lowe Brothers, supplemented by the efforts of the local dealer and his clerks usually secures the order for paint.

Are you taking advantage of the strong selling helps which Lowe Brothers offer you? Are you getting all the paint business to which you are entitled?

Remember every house painted with Lowe Brothers Paints is a constant and compelling advertisement for the paints and the dealer who sells them.

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — A — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

THREE LEADING RANGES

THE DIAMOND "A" MALLEABLE, SUPERB AND THE HOME PRIDE

Diamond "A" Malleable

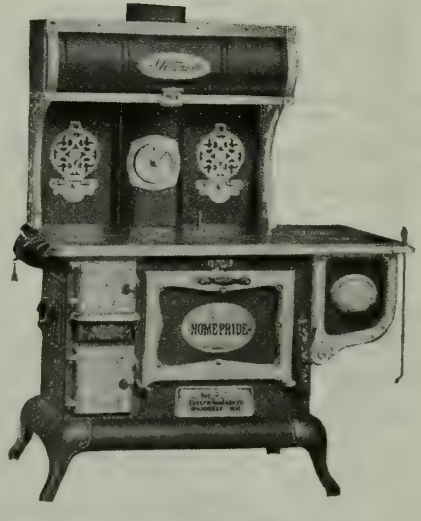
Diamond "A" Malleable

The Diamond "A" Malleable Range has a Steel Body, the Oven has Malleable Angle Iron Frame Front and Back. Braced Full Length. Nickel Parts Double Plated on Copper Base.

Coal and Wood Grate

Malleable Three-Panel Top, Highly Polished. Front Panel Hinged. Firebox Linings Extra Heavy. Reservoir—Cold Rolled Copper, Tinned Inside. Thermometer in oven door.

We know the Range is Right.



Superb

Superb

The Superb Range is a new, attractive model which is a valuable addition to the Stewart Line. With its wide range of sizes, square ovens, full nickel trimmings and up-to-date plain design, it fills the demand for an attractive well-built range.

We Fully Guarantee The Diamond "A" Malleable Steel Range

The Home Pride

The Home Pride

The Home Pride Range possesses many good features which will appeal to the housewife. They are quick and perfect bakers and use a surprisingly small amount of fuel. All materials are the best, and they offer the greatest value for a modern-priced range.

Write for Special Catalog and Prices.

The Potato Growers' "Old Standby"

The "Potato Bug Season" is a short one, why not make it a merry one.

Farmers and gardeners have no time to waste on experiments with "bug powders" that may, or may not, prove effective. Neither can you afford to waste time trying to sell them.

The jingle of your cash register is the music you want to hear, and you will hear it regularly as you ring up sales of the "Old Standby"

Munro's Pure Paris Green

Munro's certainly plays havoc with potato bugs, and all potato growers are well aware of this fact. That makes for quick sales and many of them.

Stock up on the "Old Standby" and get the most of the sales and the most of the profits.

Order from your nearest distributor or direct from the manufacturers.

BT Extension Ladders are made of Douglas Fir

THE Douglas Fir used in BT Extension and Single Ladders is the best wood in the world for Extension Ladders yet discovered. This wood is obtained from the giant trees of British Columbia. It comes to us in long, straight-grained timbers with scarcely a single knot or flaw, and is seasoned for 2 years before a stick of it is used.

Douglas Fir is stronger than Pine, which is generally used for Extension Ladders. Place a small stick of Douglas Fir across two boxes and suspend weights from it. Try the same experiment with a stick of Pine. You will find that when it takes a weight of 100 lbs. to break the Fir Stick, only 88.5 lbs. are needed to break the pine stick.

Fir is Lighter.

A cubic foot of oven-dried Douglas Fir weighs 27.8 lbs. A cubic foot of oven-dried Long Leaf Pine weighs 38 lbs.

WE GUARANTEE PRICE

Order Extension Ladders now for delivery when required. We guarantee price up to day of shipment, if shipment is taken in 8 months.

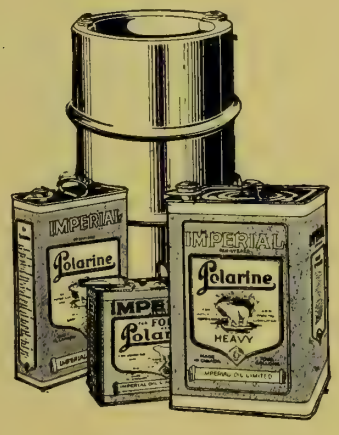
How Valuable is the Motor Car Owner's Business To You?

The average householder comes to you for many things — paints, varnish, nails, window glass, screening, etc. If the article purchased is awkward to carry or heavy in weight, you must make delivery for the customer.

When the motorist drives up to your door he needs and buys all the products purchased by the ordinary householder. **And in addition,** he is a prospect for you and must buy from you or some one else, tires, spark-plugs, parts and tools, gasoline, lubricating oils and greases, polish, etc.

He carries his own purchases and does not ask you to make delivery. His car is his hobby, and if you can help him with your knowledge of his requirements, he will deal with you regularly.



Every motorist uses considerable lubricating oils and greases. Most motorists prefer Imperial Polarine to other brands. When you recommend Imperial Polarine it is already more than half sold, for we have advertised Polarine consistently for years. When he comes back for more Imperial Polarine, you have first chance to supply his other hardware requirements.

Polarine
FRICTION REDUCING MOTOR OIL

"Makes a Good Car Better"

There's good business in stocking a full supply of the complete Imperial Polarine line and thoroughly posting yourself on the right grade for every lubricating need. Have the size package your customer wants in the right grade suited to his needs.

Imperial Polarine comes in three grades: Imperial Polarine, Imperial Polarine Heavy and Imperial Polarine A for cylinder lubrication. There are also Imperial Polarine Oils and Greases for effective transmission and differential lubrication. Put up in attractive, lithographed, sealed cans — half-gallon, gallon and four-gallon. Larger quantities in 12½-gallon steel kegs, half-barrels and barrels.

Write for Polarine Booklet on Automobile Lubrication. Address us at 56 Church Street, Toronto, and get our dealer proposition.

The Biggest Thing in the Store

IMPERIAL Parowax, Imperial Ioco Liquid Gloss, and Imperial Household Lubricant are big sellers because they are necessities in every household.

There is use for one of these three products in the home every day. Each housewife should have a stock on her pantry shelf.

The need is there, you only have to display them on your counter to receive many calls a day for one or all of these products.

Imperial Parowax, Imperial Ioco Liquid Gloss and Imperial Household Lubricant are put up in convenient household packages. Each sale offers a splendid margin of profit — much more than that offered by most competing lines.

You can satisfy your customer with these high quality lines for they are better values than any other.

Put them on the counter and in the window—they are the biggest thing in the store.

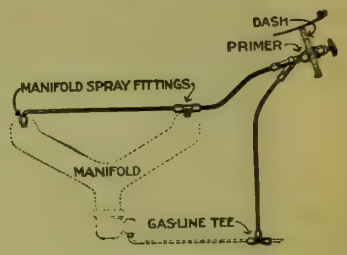
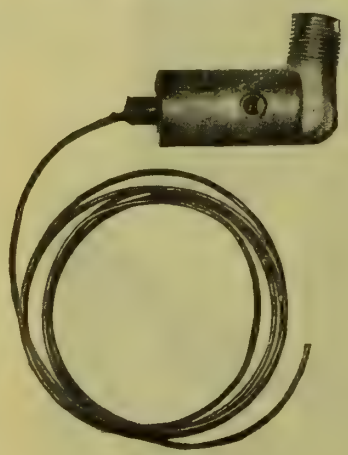
Automobile Accessories That Increase Your Profits



No. 53-D Primer Outfit with Auxiliary Tank



IMPERIAL PRIMER

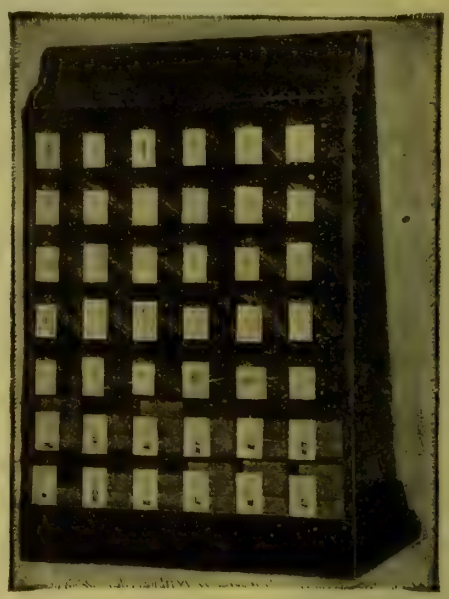
For all makes of Cars, Tractors and Trucks

A simple, easily installed device, that starts the motor instantly in cold weather. The Imperial Primer is a remarkable stimulant toward making cold weather motoring a common practice. Cars equipped with this Primer are in constant use, bringing more business for the garage, and accessory dealer.

No. 53-D Primer Outfit with Gas Line Tee

THOMAS OIL TEST COCKS

For Ford Cars



Replaces the old style test pet cock. The Thomas Test Cock is screwed in the place of either upper or lower pet cocks of the Ford crank case. When screwed in place, a wire is run from the end of the plunger over and through a small hole in the flange of the fender. The oil may be tested by simply pulling on the wire.

IGNITION PARTS

Are you getting your share of electrical repair work? A good way to increase this business is to carry a complete stock of Ignition Contact points. The many different items in the ignition line have made it imperative that a "simplified system of selling" be worked out. The self-selling system cabinet illustrated here solves the problem. This cabinet on your counter reminds a customer of his needs and makes sales for you. The glass front and labels always show the actual condition of your stock. You know when to order and overcome the "out-of-stock" evil.

We will be pleased to send you one of these cabinets free of charge. Make up an order totalling $100.00 net. Send it to our nearest house and you will receive the cabinet with your order.

Write to-day for literature and prices on these and other quick-selling automobile accessory lines. Our nearest house will be glad to assist you.

1,000,000 Motorists Use It 4,000,000 More Need It

The limited supply and high cost of inner tubes makes it necessary for motorists to repair punctures, cuts, tears and cracks—to keep their tubes in good repair.

The present conditions make it imperative for motorists to stop the easy-going, wasteful habit of carrying $5 to $15 worth of spare tubes—that deteriorate quickly—and scrapping perfectly good inner tubes that merely have a puncture, cut or tear—which can be repaired *permanently* with a Shaler 5-Minute Vulcanizer, quicker than a new tube can be inserted.

Saves Tubes—Saves Repair Bills

Easy to Use

Repairs tubes—as good as new. It's easy and inexpensive. *The Shaler works automatically*—and without fail. Just touch a match to the non-flaming chemical fuel. In five minutes you have a firm, flat, "feather-edge," permanent repair—stronger than any "stuck on patch"—stronger than the tube itself. No gasoline, cement or flame, and no danger of injuring the tube. Carry it in your tool box for emergency use. It works in the wind, in any weather, anywhere. The heat is applied directly to the pure gum patch and does not extend to the tube itself.

Easy to Sell

A five-minute demonstration sells the Shaler Vulcanizer easily. Every sale gives you a good profit. The large resale of Patch and Heat Units is profitable and brings new customers into your store, who will also buy other accessories.

Over 1,000,000 Motorists now use the Shaler 5-Minute Vulcanizer for repairing tube punctures, cuts, etc.; 4,000,000 more need it. Every motorist is a prospect for this handy tube vulcanizer—it should be in every car owner's tool box, for emergency use on the road or repairing tubes at home.

Complete Outfit Only $2.00

The outfit includes the Vulcanizer—12 Patch and Heat Units (6 round for punctures, and 6 oblong for cuts)—complete $2.00. Extra Patch and Heat Units, $1.00 per dozen.

Sold By All Accessory Dealers and Jobbers

TO DEALERS—To insure shipments—it is advisable to order from your jobber now. The great demand has exceeded our factory capacity, and shipments will be made according to priority in receipt of orders.

Catalog of the Complete Shaler Line of Vulcanizers for Motorists, Repair Shops and Garages mailed on request.

C. A. Shaler Company

Oldest and Largest Manufacturers of Vulcanizers

Mends Tubes in 5 Minutes

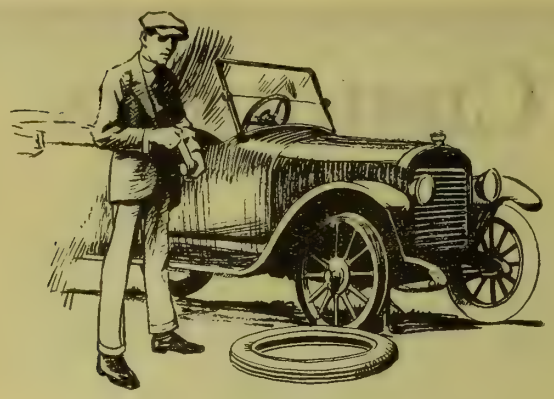
When Your Customers Ask You—

"What's the Best Tire?"

Don't hesitate. You can be as sure you're right when you recommend Maltese Cross Tires as you are sure it is right to give a square deal.

MALTESE CROSS TIRES

are too well constructed by experts in the factory, and too well tested out by laboratory experiments and by years of use by motorists, for you to have the slightest doubts as to where they stand. They are FIRST and FOREMOST for quality and satisfaction. You will have a satisfied customer in every motorist you sell Maltese Cross Tires to.



RUBBER ACCESSORIES OF ALL KINDS

Keep Your Auto Supply Lines Complete with a full range of Maltese Cross Goods

Every Car Owner Needs the Locktite Tire Patcher

The Packard owner, the Ford owner—every motorist is a prospective purchaser of the Locktite Auto-New-Matic Patcher.

The market is practically unlimited—because the Locktite offers millions of car owners a complete repair Patcher for emergencies on the road—as well as for all their spare tire patching.

What It Contains

The Locktite container serves as base around which the tube is placed and repaired.
A clamp holds the tube tightly in position.
The emery top of the container—strong, canvas-back patching sheet—gasoline swab-tube buffer and cement make up the complete outfit.

How It Works

First place the tube around the container—as shown in the picture. Clean and roughen the surface around the hole with emery; apply cement. Then press on the patch firmly—and the tube is ready to go into casing.
No waiting for the patch to set.

A Quick Selling Proposition

The Locktite Patcher sells itself. The motorist quickly realizes what the Patcher will do for him in an emergency. It also offers him an opportunity to save time and money by repairing his spare tubes at home.

Because it requires little shelf room—

Because it sells over the counter like lamps or spark plugs—

Because a demand has been created for the Patcher through advertising, dealers find the Locktite a quick-selling, money-making proposition.

There is a special larger size for use in garages and repair shops.

Write for our dealer proposition to-day.

LOCKTITE PATCH CO.

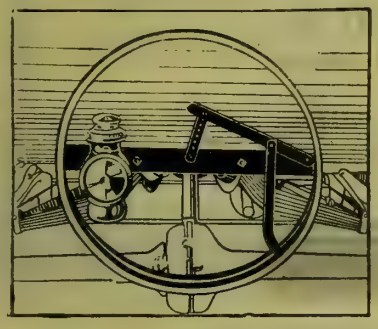
Twin Arm Style, Set of Four,
$12.00 List

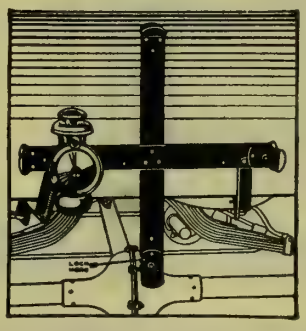


State whether for Roadster, Touring Car or Taxi.

250,000 Satisfied Users Agree that H & D's Save Tires, Engine and Springs, Stop Jars, Jolts and Sidesway and make the car ride like a limousine.

Also made for Ford One-Ton Truck.
List, set of four
$23.50

TIRE CARRIERS

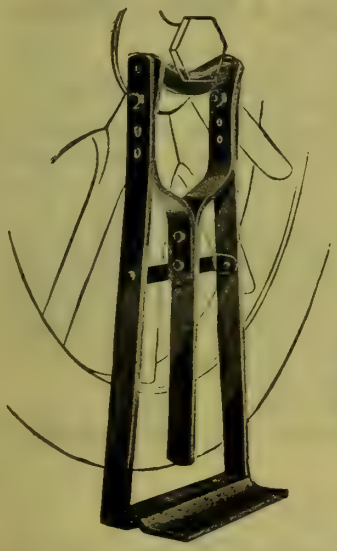


The King Carrier is the only carrier that PROTECTS the tire. It keeps water and dirt out of the casing and off the fabric. The damage that occurs to the inner fabric of a tire through accumulation of rain water and dirt is a source of annoyance and expense which cannot be avoided with the old style carrier.

King-Tire Carrier

The rim is contracted and expanded by a lever, which is very easily operated. The tire can be put on or removed instantly. The lever expands the circular rim tightly against the tire and holds it firmly in its natural position, preserving its proper shape.

List, each $5.50



Queen Tire-Carrier

Is for Fords with demountable rims, and is the only carrier that holds the tire without touching the rubber. It avoids the damage from chafing common to other kinds of carriers. Place for lamp and license tag.

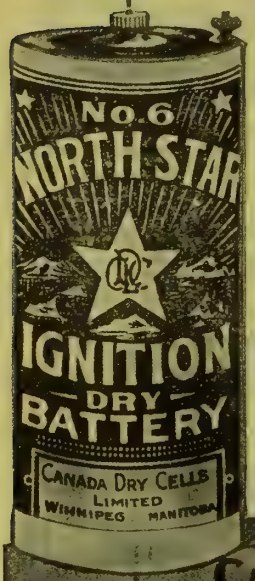
List, each $5.50

R-W No. 501 TIRE SAVER and STORAGE JACKS

increase tire mileage 30% by taking pressure off the rubber. Save blocking up cars for storage. Thousands in use. List $6.00 set.

R-W No. 100 CRACKERJACK

For anything up to a 5,000-lb. car. Made small and compact to take up minimum space in tool box, but a wonder for power. Long steel handle. List, $2.40.



LIBERAL DEALER DISCOUNTS.

Everything required for motor car equipment and supplies will be found in our new 208-page catalogue. Send for free copy.
Every enterprising dealer featuring the Hyslop line is assured substantial profit and quick turnover.

"Hy-Pol" Body Polish

HY-POL Automobile Body Polish brings a quick polish to automobile and carriage bodies, fenders, tops, leather cushions and all painted, varnished or enamelled surfaces.

HY-POL acts as a water-proofer and produces a beautiful lustre with very little labour. Preserves leather, dries quickly, sheds water and eliminates the dust collecting feature.

Mud spots, finger marks, water spots, also grease and road oil, may be easily and entirely removed with HY-POL. It acts as a food, too, protecting and preserving the varnish.

No. 3620

No. 3620—**Price**, 12-oz. tin $0.90
No. 3621—**Price**, 5/6 qt. tin 1.50
No. 3622—**Price**, 5/6 gal. tin 4.50

Ad-el-ite Auto Cleaner and Reviver

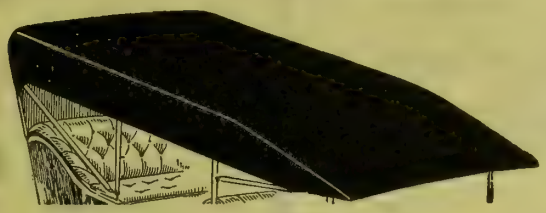
Quickly and easily removes stains, road oil, tarvia, water spots, mud splashes, surface scratches, dirt, and all blemishes, quickly reviving original, brilliant "factory newness."

No. 3623—**Price**, 10-oz. ton, each $0.85

Ad-el-ite Wax Polish

AD-EL-ITE Auto Wax Polish produces a hard, dry, clean, lustrous water and dust-proof finish. Equal to a high grade varnish in durability.

No. 3624—**Price**, 7-oz. tin, each $0.85



"Shinite" Metal Polish

A quick polish for all bright parts, brass, nickel, etc., on an automobile. Requires but little labor to produce a brilliant lustre.

No. 3625—**Price**, 12-oz. tin $0.75

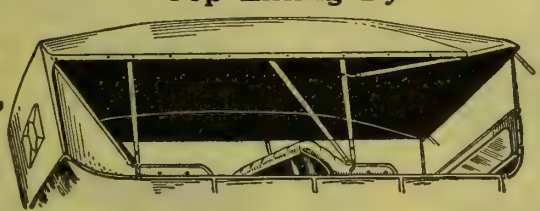
Rub-R-Tite Dressing for Rubber and Imitation Leather Tops

No. 3632

The best preparation on the market for re-rubberizing and dressing imitation leather and rubber tops, which produces a factory newness and wearing quality.

No. 3632—**Price**, 12-oz. tin for Run-about...$0.75
No. 3633—**Price**, 25-oz. tin for large top.... 1.35

Rub-R-Tite Patches



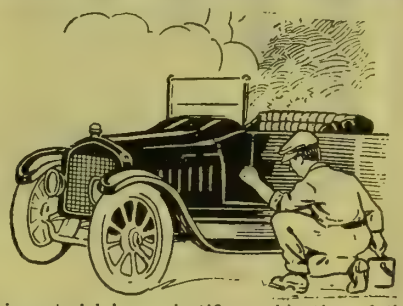
No. 3638

Holes or tears, any size or shape, easily, quickly and permanently repaired.

Rub-R-Tite Patches come in sheets 4-in. x 12-in. and are made in mohair for mohair tops, and special rubber for Rubber and Pantasote Tops.

No. 3638—**Price**, for Mohair, per sheet.....$0.50
No. 3639—**Price**, for Rubber, Pantasote or Leather, per sheet 0.50

Rub-R-Tite Black Inside Top Lining Dye

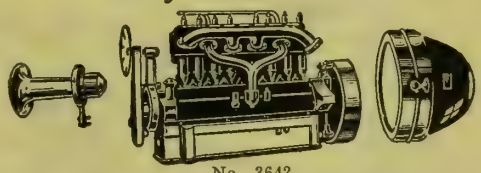


Applied with sponge, easily, quickly and at slight expense. It eliminates all stains and spots and the color will endure as long as the color in a new top.

No. 3631—**Price**, 12-oz. tin $1.50

One 12-oz. tin is sufficient for either runabout or large top.

Ad-el-ite Automobile Colored Varnishes



This material is a scientific combination of the best varnishes and colors, and makes old cars look like new, changing the old, worn finish to a brilliant, new one at small cost. Does not streak or lap, and dries dust-free in twenty-four hours.

Stay-on-Enamel

No. 3642

An oil enamel that is air drying, easily applied at little cost and gives the desired finish as well as protecting all metal parts. For use on lamps, horns, hoods and fenders, engines and pipes, and in fact all metal parts.

It gives an elastic gloss black finish.

No. 3642—**Price**, 12-oz. tin $0.75
No. 3643—**Price**, 25-oz. tin 1.35
No. 3644—**Price**, 100-oz. tin 4.60

Aluminum Enamel

Heat Resisting

Especially compounded for the motors of automobiles and motor boats; also the gear cases and radiator. Rie Nie Aluminum Enamel is also used on plumbing, sinks, furnace fronts, railings, gas stoves, scales, etc., and gives a protective coat of fine aluminum lustre that is heat-proof and prevents rust.

No. 3645—**Price**, 16-oz. can $1.25

LANE'S HANDY AUTO RATCHET TOOLS

FORD SET

Contains—1 Handle, 7 inches in length; 2 Screw Driver Bits; 1 Extension Bar, 6 inches in length; 6 Sockets to fit all nuts and bolt heads on Ford cars, including the cylinder head. Put up in strong leatherette case. Weight, 22 ounces.

STANDARD SET

Contains—1 Handle, 7 inches in length; 2 Screw Driver Bits; 7 Sockets to fit all size nuts in U.S. Standard from ¼ inch bolt to ½ inch bolt; S.A.E. Standard from 5-16 inch bolt to 11-16 inch bolt. Cap screws from 5-16 inch bolt to ⅞ inch bolt. Put up in strong leatherette case. Weight, 18 ounces.

The **"Standard"** and **"Ford"** Sets of the Lane **"Unique"** Ratchet Wrench and the Lane **"Super-Unique" Ratchet** Wrench Set, together with the Lane **"Unique"** Off-Set Ratchet Screw Driver, present unusual selling opportunities for the dealer.

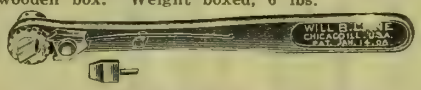
All Lane's Ratchet Tools are durable products. Machine-made, sockets turned from Grade "A" cold rolled steel, case hardened, Pawl and Ratchet Wheels milled, handles drop-forged and case hardened.

Their ability to perform tasks, where other wrenches fail, make them easy to sell.

Your jobber has them.

Manufactured by

WILL B. LANE



180 N. Dearborn St.

CHICAGO, ILL.

SUPER-UNIQUE SET

Contains—1 Drop Forged Handle, 9 inches in length; 1 Extension Bar, 8 inches in length with thimble attached; 15 Hexagon Sockets to fit all size nuts within 7-16 to 1¼ inches **broached opening.** The sockets fit all S.A.E. standards from ¼ to ⅞ inches. U.S. standards from 3-16 to ¾ inches (bolt). Cap screw sizes from ¼ to 1 inch. Put up in strong wooden box. Weight boxed, 6 lbs.

OFF-SET RATCHET SCREW DRIVER

Consists of 1 Six-inch Drop Forged Handle, polished and case-hardened; 2 Size accurately milled Screw Driver Bits made from the highest grade screw driver steel and oil tempered. Bits are interchangeable and can be removed and replaced in one second. This article is fully warranted. Weight, in paper box, five ounces.

STOVE MICA

All sizes of Clear Mica in stock for immediate shipment.

Price List on Application

Mica Company of Canada, Limited

P.O. Box 156, Hull, Que.

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are arctively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeping, please remit with copy, preferably by money order.

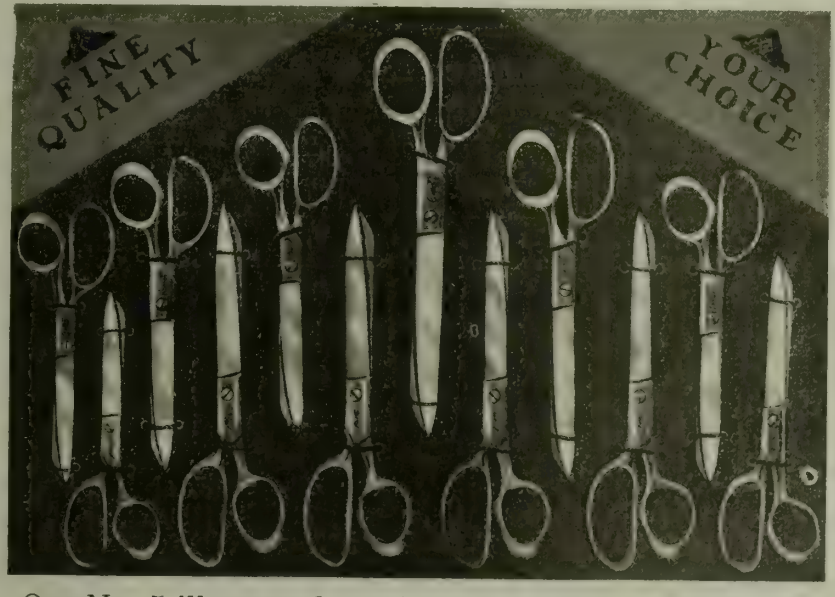
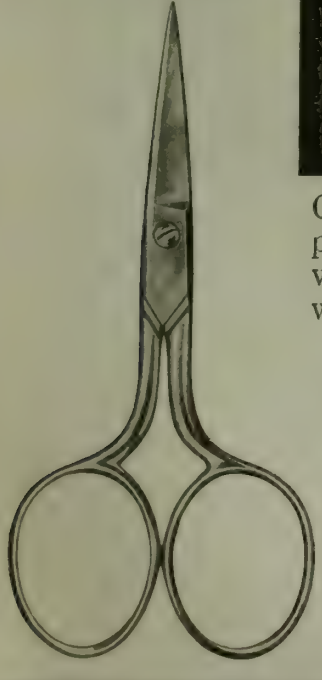
"ACME" SHEARS AND SCISSORS

HAVE BEEN ON THE MARKETS OF THE WORLD OVER 40 YEARS

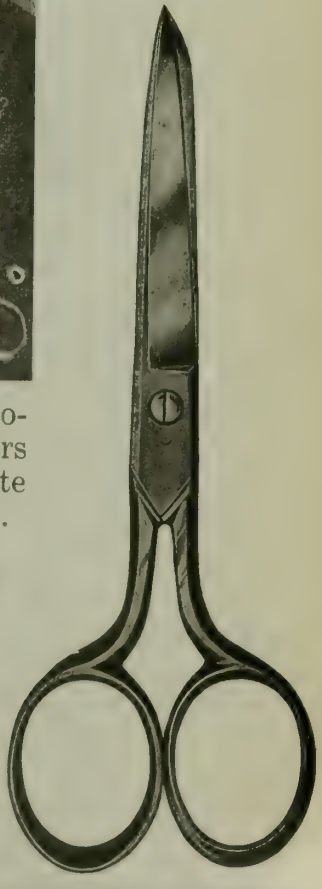
MADE BY THE LARGEST MAKERS IN THE WORLD OF LOW-PRICED CUTLERY

(OVER 35,000 PAIRS PRODUCED DAILY)





Our line of High-grade Cast Shears, Scissors and Tinners' Snips are Standard throughout the World, and their quality is constantly maintained.



Exceptional manufacturing facilities enable us to fill orders promptly and to quote interesting prices. "Acme" Shears and Scissors are a profitable line to import. They meet the most exacting requirements everywhere. Discriminating importers do not hesitate to carry an adequate stock.

It is our desire to demonstrate to Canadian Wholesale Dealers the popularity of our cutlery as an addition to their higher-priced lines.

Each pair of "Acme" Scissors and Shears is made from specially selected Cutlery material, with hard, sharp and durable cutting edges, and satisfaction is given to all users.

Our No. 5 illustrated catalogue is a "Scissors Encyclopedia." A copy will be sent upon request. Buyers visiting New York or Toronto should communicate with us so that our representative may call on them.

Genco RAZORS

Trade Mark, Reg. U.S. Pat. Off.

RAZORS are sold mostly through display, but now and then a manufacturer starts an advertising campaign at a new angle, greatly increasing sales.

We are conducting such a campaign in the magazines of largest circulation, calling attention to the following points:

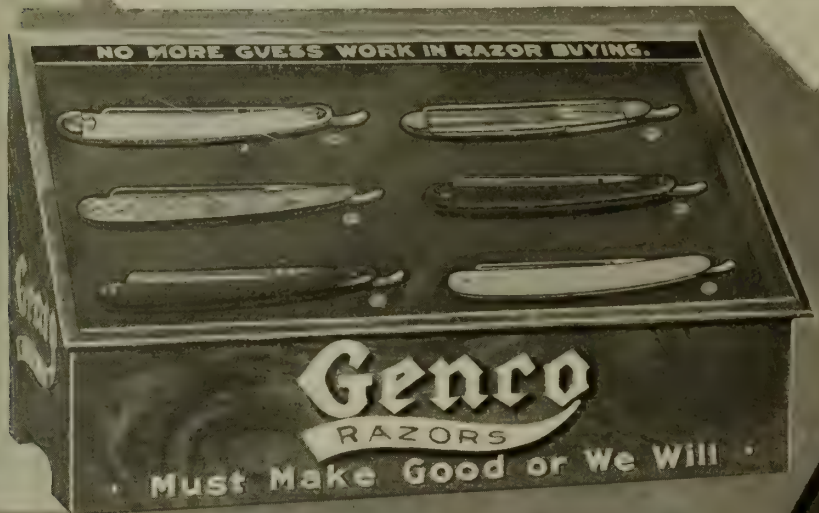
(1) One type of razor has been used to shave men with from time beyond record, for forty centuries at least. It is the Genco type.

(2) That type of razor is still used by all barbers without exception.

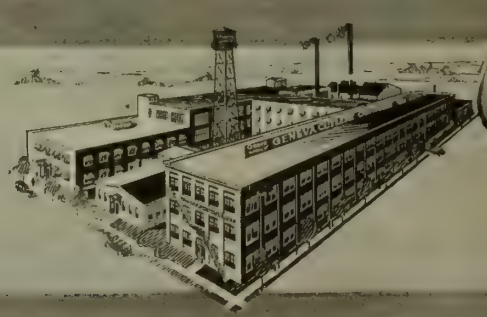
(3) A razor-blade made with a broad back and a slight supporting bevel behind the edge lies against the strop at just the correct angle to bring back quickly its ideal shaving edge.

(4) All GENCO Razors are of that type. They have professional blades—economical and efficient—good for a lifetime, scientifically built to strop. (The Safege is a professional razor with a guard, made for men a little timid or nervous about shaving with unguarded blades. Its guard merely has to be flipped back to clean it and strop it.)

(5) All GENCO Razors are guaranteed.—"GENCO Razors must make good or we will."



Send for a handsome GENCO Display Case FREE



with your first order—you'll sell more razors, at a good, substantial profit. Put it up on your cutlery counter, where it will interest customers while you are busy elsewhere. Use the above points to sell GENCO Razors to people our advertising sends to you.

This is Going to Be a Big Week

1919		MAY				1919
Sun.	Mon.	Tues.	Wed.	Thur.	Fri.	Sat.
6	14	22	29	1	2	3
4	5	6	7	8	9	10
11	12	13	14	15	16	17
18	19	20	21	22	23	24
25	26	27	28	29	30	31

May 26 to 31 will be "Ingersoll Week"

We've planned a real advertising drive for that week. Special window displays will direct people to your store—and special displays that "hitch up" to these advertisements have been planned. It is going to be a big week for every dealer who has an Ingersoll display in his window.

If you are not selling "Ingersolls," it will be a splendid time for you to start.

We have an interesting booklet which explains "Ingersoll Week," and it tells you how you can "cash in" on our advertising.

It is free for the asking. Write for it to-day.

The Moment of Opportunity *for* Retail Merchants

THE next few years will mark a tremendous change in the business of retailing.

Here and there out of the mass of small businesses, big retail establishments will spring up.

Every community will see some few stores rise rapidly above Ordinary Success to Big Success.

Opportunity is knocking now at every merchant's door.

For, to-day, the handicap that once set a limit to a store's expansion no longer exists. The trading area, which is the area to which goods may be delivered profitably, has been greatly extended.

The store in the centre of the town can serve customers on the outskirts. The east-end store can deliver goods in the west end.

The whole community is laid open to competition. And in this fair field the live merchant must win.

Railway Transportation revolutionized trade. It made Big Business possible. By opening up distant markets, by moving goods rapidly at comparatively low cost, Railway Transportation built up big central successes.

Motor Transportation, now reduced to a low-cost basis, will produce, in local trading, results similar to those effected in national markets by Railroad Transportation.

As men everywhere grasp this idea, as they seize the opportunity for business growth that now presents itself, the retail business will be operated on a higher, more efficient plane. The public will be better served. Larger and more varied stocks will be offered for sale. Better and bigger stores will appear.

The Ford One-Ton Truck makes available this opportunity. It is motor transportation at low cost—low first cost, low maintenance cost, low operating cost.

A large investment in equipment is not needed. Every business that is paying cartage bills or maintaining a delivery system can employ Ford Trucks economically.

A small outlay will motorize your deliveries and open to you the opportunity for business expansion.

Complete Ford Trucks in Two Standard Body Types Now Ready for Immediate Delivery

The Ford Truck Chassis is being used with hundreds of special body types in every line of business. But, ordinary hauling and delivery work can be best adapted to two standard types—the Stake Body and the Express Body.

These two body types are kept in stock by Ford Dealers and Ford Branches, ready for immediate delivery. They insure the maximum efficiency from the Ford Truck. They give the buyer of a Ford Truck the recognized benefits of Ford production.

Both types have the Enclosed Cab with the two-way windshield which gives the driver proper protection from the weather. This Cab—a Ford feature—is warm in winter and cool in summer. It may be ordered with or without doors as desired.

See These Complete Trucks

No question affecting the future of your business is quite as important as this question of motor deliveries. Can you afford to evade it? Will you wait until your competitors force it on you as a defensive measure?

Seize the opportunity to enlarge your field of business. Consult the Ford Dealer. Let him solve your delivery problem. Act. To-day.

Ford One-Ton Truck (Chassis Only) $750.00 f. o. b. Ford, Ont

Sherardizing *and* Packing

The two fundamental reasons for the great popularity of **"National Builders' Hardware"** are—our methods of finishing and packing. We have adopted Sherardizing—known as the most satisfactory method of rust-proofing steel or iron. Prevents peeling and cracking and will last for years.

Note our method of **individual packing** with screws, Strap and "T" Hinges and Hinge Hasps. It's the "Unusual National Way," for all our lines.

The service—assistance we render you in selling National Products is worth your careful consideration.

National Manufacturing Company Sterling Ill.

Our big catalogue of Builders' Supplies will acquaint you with our profitable lines. Write for it to-day.

ALL GARAGE DOORS SHOULD BE HUNG ON ROLLERS

No equipment ever produced offers the many attractive features or gives such universal satisfaction to the user as does the

HATCH GARAGE DOOR OUTFIT

Outfit includes:

- **3 Special Swivel Door Rollers**
- **22 Feet of Track**
- **3 Pairs Special Garage Door Hinges**
- **3 Stay Rollers**
- **2 Extra Heavy Door Handles**
- **1 Safety Hasp**
- **1 Hook and Eye**

Makes doors weather-tight, sag-proof; prevents slamming, and does not get out of order.

The hinged door allows entrance without opening the other two.

Complete directions packed with every set.

The roller bearing swivel hangers hold the doors in place, take the bind off the hinges and roll the doors around the corner, on the inside of building to the side wall.

Plymouth Rope

Facts as told by prominent retail hardware merchant in Ontario

ONE of the largest, and probably the most prominent retail hardware merchant in Ontario, now operating two stores, tells how he came to handle Plymouth Rope exclusively and why he is selling it at a price per foot.

Some few years ago this dealer carried stocks of both Plymouth and second grade Manila rope. It happened that two farmers entered his store together one day, each wanting the same length of 7/8" diameter rope. One insisted on getting second grade Manila, while the other took Plymouth. The merchant was greatly surprised when he came to weigh up the individual purchases to find that the party buying the second grade Manila was paying more for his inferior rope than the farmer who wisely bought Plymouth Rope because of its quality.

Realizing that dissatisfaction over the purchase of the second grade Manila would surely result, if the purchaser had opportunity of learning that the same length of Plymouth Rope actually cost the other farmer less money, the dealer succeeded in steering him out of the back door while the other farmer was leaving by the front.

From that time on this enterprising merchant has safeguarded his customers by refusing to accept anything but Plymouth Rope from his jobbers.
